2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

RATIFICATION OF THE CONSTITUTION

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787, unanimously.
 Pennsylvania, December 12, 1787, vote 46 to 23.
 New Jersey, December 18, 1787, unanimously.
 Georgia, January 2, 1788, unanimously.
 Connecticut, January 9, 1788, vote 128 to 40.
 Massachusetts, February 6, 1788, vote 187 to 168.
 Maryland, April 28, 1788, vote 63 to 12.
 South Carolina, May 23, 1788, vote 149 to 73.
 New Hampshire, June 21, 1788, vote 57 to 46.
 Virginia, June 25, 1788, vote 89 to 79.
 New York, July 26, 1788, vote 30 to 28.
 North Carolina, November 21, 1789, vote 193 to 75.
 Rhode Island, May 29, 1790, vote 34 to 32.

RATIFICATION OF THE AMENDMENTS

I to X, inclusive, were declared in force December 15, 1791.

XI was declared in force January 8, 1798.

XII, regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 28, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky; not acted on by Texas; conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee; rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

Corea or Korea. A country embracing the peninsula lying between the Yellow Sea and the Sea of Japan. Yi Heui, who succeeded to the throne in 1864, and assumed the title of emperor in 1897, abdicated and was succeeded by his son in 1907. Until 1894, China was the suzerain of Corea, but on the conclusion of the war in 1895, China relinquished her suzerainty, and the independence of Corea was acknowledged. Then a struggle began with Russia, which culminated in the Russo-Japanese War, and by the Peace Treaty between Russia and Japan, 1905, the paramount interest of the latter country in Corea was acknowledged. A treaty between Corea and Japan, signed at Seoul, November 17, 1905, provided that Japan, through the department of foreign affairs in Tokio, should control and direct the external relations and affairs of Corea; that Japan should be represented at the court of the Emperor of Corea by a resident-general residing at Seoul, and have the right to station residents at the several open ports and such other places in Corea as it might deem necessary. The attitude of the emperor, culminating in his action in sending a delegation to The Hague Conference, led to his abdication in favor of the crown prince, July 19, 1907, on the unanimous advice of the ministry, who were nearly murdered for their pains. The Japanese troops had to put down some serious rioting in Seoul, and the attitude of the ex-emperor, who at once began to conspire against the Japanese, led to a new convention being promulgated (July 25th), the terms of which were as follows: (1) The administration of Corea was placed under the Japanese resident-general. (2) The enactment of all laws and ordinances and the transaction of important state affairs must receive the approval of the resident-general. (3) The appointment of all high responsible officials must receive the approval of the resident-general. (4) A distinct line of demarcation was drawn between administrative and judicial affairs. (5) Japanese subjects recommended by the resident-general are eligible to office under the Corean Government. (6) Foreigners may be employed only with the consent of the resident-general. (7) The first clause of the convention of August 22, 1904, providing for the employment of a financial adviser, was annulled. The Corean native army was disbanded on August 1st, not without some trouble and loss of life.

Cuba, after having been continuously in the possession of Spain from its discovery, was, by the peace preliminaries and by the definitive treaty signed by the Peace Commissioners at Paris, December 10, 1898, relinquished by Spain, and thus has the position of an independent state. The direct armed interposition of the United States in the struggle against Spanish domination has, however, brought the island into close association with the United States Government. On November 5, 1900, a convention met to decide on a Constitution, and on

February 21, 1901, a Constitution was adopted, under which the island has a republican form of government, with a President, a Vice-President, a Senate, and a House of Representatives. The United States Legislature passed a law authorizing the President of the United States to make over the government of the island to the Cuban people as soon as Cuba should undertake to make no treaty with any foreign power endangering its independence, to contract no debt for which the current revenue would not suffice, to concede to the United States Government a right of intervention, and also to grant to it the use of naval stations. On June 12, 1901, these conditions were accepted by Cuba, on February 24, 1902, the President and Vice-President of the Republic were elected, and on May 20th, the control of the island was formally transferred to the new Cuban Government. Under treaties signed July 2, 1903, and ratified within seven months of that date, the United States has had coaling stations in the Bay of Guantánamo and Bahia Honda, for which they pay \$2,000 annually. The connection between Cuba and the United States was rendered still closer by the reciprocal commercial convention which came into operation on December 27, 1903. In August, 1906, an insurrection broke out and, after futile attempts at the restoration of order, and serious warning from the United States Peace Commission, which had arrived, President Palma, on September 28th, resigned office. No successor was elected and, as Cuba was without a government, Mr. Taft, the United States Secretary for War, and Peace Commissioner to Cuba, undertook the provisional government. He was succeeded on October 13th by Mr. C. E. Magoon. In 1908, Cuba again resumed the reins of government under President Gomez and a native Cabinet. The Cabinet consists of the Secretary of State and of Justice, and the Secretaries of the Interior, of Finance, of Agriculture, of Public Instruction, and of Public Works.

Declaration of Independence

THE UNANIMOUS DECLARATION OF THE THIRTEEN UNITED STATES OF AMERICA, IN CONGRESS, JULY 4, 1776.

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Gov-

ernment, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harrass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offenses:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation, and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow-Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us,

and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, in GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, We mutually pledge to each other our Lives, our Fortunes and our sacred Honor.

(The foregoing declaration was, by order of Congress, engrossed, and signed by the following members:)

JOHN HANCOCK.

BUTTON GWINNETT, GEO. WALTON.
LYMAN HALL,

Delaware. The first Constitution, adopted in 1776, was followed by those of 1792, 1831, and 1897, the last named being still in force. Constitutional amendments, proposed in either House of the Legislature, agreed to by a two-thirds vote of both Houses, and by a similar vote of the next Legislature, become law. The Legislature consists of a Senate of seventeen members, elected for four years and a House of Representatives of thirty-five members, elected for two years, the two Houses being known as the General Assembly. Senators must be 27 years of age, and Representatives 24; both must be citizens who have resided three years in the State, and one year in the electoral district immediately preceding the election. Money bills must originate in the House of Representatives. The Senate tries cases of impeachment brought by the House of Representatives. The principal executive officer of the State is the governor, who is elected for four years and is not eligible for a third term. He is commander-in-chief of the military and naval forces of the State, and, with the consent of the Senate, appoints to various offices of State. He may call special sessions of the legislature, and has power to pardon, limited by the authority of the board of pardons, of which he is a member. He has a veto on legislation, which may be overridden by a three-fifths vote of each house. The secretary of state is appointed by the governor with the consent of the Senate. Other State officials are the lieutenant-governor, the treasurer, and the auditor.

Denmark. Under the Constitution of 1849 (modified in 1855, 1863, 1865, and 1866), the executive power is vested in king and ministers, the legislative in the Rigsdag or Diet acting jointly with the sovereign. The Rigsdag is composed of the Landsting (or upper house of sixty-six members—twelve Crown nominees appointed for life, and fifty-four indirectly elected by electoral bodies, in which large taxpayers are well represented, for eight years), and the Folkething (or house of commons of 114 members directly elected by universal suffrage for three years). Members of both houses are paid about three dollars a day while the Rigsdag is sitting and their traveling expenses. The Rigsdag must meet every October, and all money bills be submitted first to the Folkething. For local government the country is divided into eighteen counties, each under a governor, and these are subdivided into hundreds and parishes. The towns are administered by mayors.

District of Columbia. The municipal government of the District of Columbia is vested by act of Congress approved June 11, 1878, in three commissioners, two of whom are appointed by the president from citizens of the District having had three years' residence therein immediately preceding that appointment, and confirmed by the Senate. The other commissioner is detailed by the President of the United States from the Corps of Engineers of the United States Army, and must have lineal rank senior to captain, or be a captain who has served at least fifteen years in the Corps of Engineers of the Army. The commissioners appoint the subordinate official service of said government,

except the board of education which is appointed by the Supreme Court of the District of Columbia. Congress makes all laws for the District, but has intrusted to the commissioners authority to make police, building, and plumbing regulations, and others of a municipal nature.

Dominican Republic, or San Domingo, is the Republic which occupies the eastern end of the island of Hayti, and was founded in 1844, after a revolution which overthrew the Spanish rule. It is divided into six states or provinces, and six maritime districts, and is governed by a President, chosen by an electoral college for a term of four years, and a National Congress of twenty-four members elected for four years. A convention was drawn up on February 8, 1907, and approved February 25th, by the American Senate, and by the San Domingo Congress on May 3d. The chief creditors of the Republic had agreed to accept 50 to 55% for cash payment of their claims. It was estimated that \$17,000,000 were required for the purpose, and a New York bank agreed to find the sum of \$20,000,000 (the balance being for the extinction of certain concessions and harbor monopolies, and for the construction of railways and other public improvements) on the basis of an issue of 5% bonds payable in fifty years, and redeemable after seventy years at 102½. The bank thus became the sole creditor of the government. The receiver-general of customs was appointed by the United States Government under the new convention, and the customs duties are applied in the first instance to the payment of the annual sums for amortization of the bonds, the balance going to the Dominican Government. The Dominican Republic further pledged itself not to increase its public debt till the whole of the bonds had been paid off, nor to modify its import duties without the consent of the United States.

Ecuador is a Republic of equatorial South America, constituted in 1830, by separation from the original Republic of Colombia. Under the Constitution of 1884, modified in 1887, and 1897, it is governed by a President elected for four years, with the assistance of a Congress composed of a Senate of thirty-two members, elected for two years, representing the sixteen provinces, and a Chamber of forty-two Deputies, representing the people, which is elected every two years. The electors to both chambers must be adults able to read and write.

Florida. The original Constitution, framed in 1838, was succeeded by others in 1865, 1868, and 1885. That of 1885, amended in 1894, 1896, and 1904, is now in force. Amendments may be proposed in either House of the Legislature; if approved by a three-fifths vote of all the members of each House, they are submitted to the people and, if accepted by a majority of those voting on them, they become part of the Constitution. The State Legislature consists of a Senate of thirty-two members, and House of Representatives with sixty-eight members. Senators are elected for four years, Representatives for two, the Senate being renewed by one-half every two years. Any bill may originate in either House. The House of Representatives has the sole power of impeachment, but a two-

thirds vote of all members present is necessary to impeach. Impeachment cases are tried by the Senate. Legislators must be qualified electors in the counties they represent. The chief executive officer of the State is the governor, who is elected for four years, and is not eligible for the next term of office. He has the usual powers of State governors, including a veto on legislation which may be overridden by a two-thirds vote of the members present in each House. Other State officers elected for four years are the attorney-general, the comptroller, the treasurer, the superintendent of public instruction, and the commissioner of agriculture.

France is a Republic, governed by the Constitution of 1875, modified in 1879, 1884, 1885, and 1899. The Legislature consists of the Assembly, sitting in two Houses, viz: the Senate of 300 members, indirectly elected for nine years (one-third retiring every three years) by delegates chosen by the municipal councils and the senators, deputies, councilors-general, and district councilor of the departments (there are a number of Senators originally elected for life by the two chambers, but as these die the vacancies are filled by the election of Senators for a period of nine years only); and the Chamber of Deputies of 594 members, elected for four years by universal suffrage. Voters are required to be over 21 and to have a six months' residential qualification. Both Houses can initiate and frame laws, except in the case of financial laws, which must first be presented to and voted by the Chamber of Deputies. Deputies and Senators are both paid at the rate of 15,000 francs a year. The presidents of the two chambers each receive in addition 72,000 francs a year for the expense of entertainment. Members of both chambers travel free on all railways on making a small annual payment. The executive power is confided to the President, who is elected for seven years by the two Houses united in National Assembly, and receives 600,000 francs a year, and a further allowance of 600,000 francs for expenses. He appoints the ministers and makes all civil and military appointments. War can be declared by the President only with consent of the two Houses, and his every act must be countersigned by a minister. The colonies are looked upon as being politically part of France, and are represented in the Senate by four Senators and in the Chamber by ten Deputies.

Georgia. Georgia entered the Union as one of the original States and its first Constitution, adopted in 1777, was succeeded by those of 1789, 1798, 1865, and 1877. The last has been amended seven times, most recently in 1904. Amendments proposed in either House and approved by a two-thirds vote of the members of each House, must be submitted to the people; if ratified by a majority of those who vote, they become part of the Constitution. The Legislature consists of a Senate of forty-four members and a House of Representatives of 175 members, known collectively as the General Assembly. Both Senators and Representatives are elected for two years. Senators must be citizens of the United States, 25 years old, resident in the State four years preceding election and one year in the district for

which elected. Representatives must be citizens of the United States, 21 years old, resident in the State two years and in the county one year next preceding election. The seat of a member of either House is vacated on his removal from the district or county from which he was elected. The House of Representatives has sole power of impeachment, and the Senate tries impeachment cases. All bills to raise money must originate in the House of Representatives. The chief executive officer of the State is the governor, who is elected for two years. He has the usual limited powers of pardon and veto. He has power to fill vacancies not otherwise provided for by law, and is required to see that the laws of the State are faithfully executed. He is commander-in-chief of the State militia. Other elective officials are the secretary of state, the comptroller, the treasurer, the attorney-general, and the superintendent of education. Georgia is divided into 137 counties.

German Empire. The Constitution of the German Empire is based upon the decree of the 16th of April, 1871, which took effect on the 4th of May following. The presidency of the empire belongs to the Crown of Prussia, to which is attached the hereditary title of Emperor of Germany. The prerogatives of the emperor are to represent the empire in its relation to other states, to declare war if defensive, and conclude peace in name of the empire, to contract alliances, etc. The emperor has also the supreme command of the army and the navy, appoints and dismisses officials of the empire, appoints consuls, and superintends the entire consulate of the empire. The legislative authority is vested in the Bundesrath (Federal Council) and the Reichstag (Imperial Diet), the former consisting of fifty-eight representatives of the different states of the empire, seventeen from Prussia, six from Bavaria, four each from Saxony and Württemberg, three each from Baden and Hesse, one from Saxe-Weimar, etc. The Reichstag consists of 397 deputies elected by secret voting in all the states of the empire. As a rule, one member is returned to the Reichstag for every 131,604 of the inhabitants of each state. The election of Wilhelm I., King of Prussia, as German Emperor in 1871, was by the vote of the Reichstag of the North German Confederacy, and upon his acceptance of the dignity the imperial office became hereditary in the House of Hohenzollern. Wilhelm, "Der Grosse," reigned until 1888, when he was succeeded by his son, Frederick, who lived but a few weeks. Frederick's eldest son, the present emperor, Wilhelm II., was born January 27, 1859. On February 27, 1881, he married Princess Victoria of Schleswig-Holstein-Sonderburg-Augustenburg (born October 22, 1858), daughter of the late Duke Frederick.

The Heir Apparent.—The heir apparent to the German throne is Prince Frederick William, born May 6, 1882, the eldest son of the present Emperor-King.

The Ministry.—The Imperial Secretaries of State of Germany do not form a ministry or cabinet, but act independently of each other under the general direction of the Chancellor of the Empire. They are as follows:

1. *Chancellor of the Empire.*
2. *Ministry for Foreign Affairs.*
3. *Imperial Home Office and "Representative of the Chancellor."*
4. *Imperial Admiralty.*
5. *Imperial Ministry of Justice.*
6. *Imperial Treasury.*
7. *Imperial Post-office.*
8. *Secretary for the Colonies.*

And, in addition, the following presidents of imperial bureaus:

9. *Railways.*
10. *Imperial Exchequer.*
11. *Imperial Invalid Fund.*
12. *Imperial Bank.*
13. *Imperial Debt Commission.*
14. *Administration of Imperial Railways.*
15. *Imperial Court Martial.*

Greece. The Kingdom of Hellas, as it is correctly styled, includes the three provinces of Northern Greece, the five of Peloponnesus, the three of Thessaly, and five islands. According to the present Constitution the throne is hereditary in the family of King George (second son of the King of Denmark). The legislative authority is vested in a single Chamber, called the *Boule*, the members of which (proportioned in number to the amount of the population) are elected for four years by ballot by manhood suffrage. The executive power rests with the king and ministry. The Greek Church alone is established, but all forms of religion enjoy toleration. Justice is administered, on the basis of the French civil code, by a supreme court (*Areios Pagos*), at Athens; four royal courts (*Ephiteia*), at Athens, Nauplia, Patras, and Corfu; sixteen courts of primary resort (*Protodokeia*), one in each principal town.

The regulations provide for an army of from 120,000 to 130,000 men on a war footing, but there are officers only for about 75,000. The armament is to be changed, the guns being replaced by quick-firers, and the present Gras rifle by a magazine rifle. A contract for the supply of 60,000 Mannlicher-Schönauer rifles by 1908, and 40,000 subsequently, was signed in November 1905. The navy consists of three small battleships, of about 4,800 tons displacement, and a few gunboats and torpedo craft of no large fighting value.

The Ministry.—The Ministry is constituted as follows: President of the Council and Minister of Finance; Minister of Interior; Minister of Worship and Public Instruction; Minister of Marine; Minister of War; Minister of Foreign Affairs, and Minister of Justice. The present ruler, George I., is the second son of the present King of Denmark. He was born December 24, 1845. After the expulsion of the late ruler, the Greeks, meeting in National Assembly, elected him King of the Hellenes, on March 18, 1863, and on June 4th of the same year he accepted the crown, his father acting as his guardian, as he was not then of age. On October 27, 1867, he was married to Grand Duchess Olga, the eldest daughter of Grand Duke Constantine of Russia, brother of the late emperor. She was born August 22, 1851.

The Heir Apparent.—Prince Constantine, Duke of Sparta, is heir apparent to the throne. He was born August 2, 1868, and was married to Princess Sophie of Prussia, the sister of Emperor William II., on October 27, 1889. They have had four children.

Hayti. The Republic of Hayti was originally a French colony, but was proclaimed independent in 1804, and is governed under a Constitution drawn up in 1889. The executive power is in the hands of a President, elected for seven years by the Senate and Chamber of Representatives, who receives a salary of \$24,000. The Chamber of ninety-five members is elected directly for three years by all male citizens, and the Senate of thirty-nine members indirectly for six years. The religion is Roman Catholic, and elementary education is free. There is an army of 18,916 men, and a navy of six small vessels.

Idaho. The original Constitution, adopted in 1889, is still in force. Amendments may be proposed in either House of the Legislature, and, if approved by a two-thirds vote of all the members of each House, are submitted to the popular vote for ratification. The Legislature consists of a Senate of twenty-one members, and a House of Representatives of fifty-one members, all the Legislators being elected for two years. The chief executive officer is the governor, who is elected for two years, and has the powers usually vested in State governors, including a limited veto. The board of pardons, of which he is a member, may pardon or grant reprieves. Other State officials elected for two years are the lieutenant-governor, auditor, treasurer, attorney-general, and superintendent of public instruction.

Illinois. The Constitution adopted in 1818 was superseded by that of 1848, which gave place to the Constitution adopted in 1870. This, with several amendments, is now in force. Amendments proposed in either House of the Legislature, approved by a two-thirds majority of all the members of each House, and ratified by a majority of the electors voting at the next general election, become part of the Constitution. Provision is also made for Constitutional amendments by means of a convention called for the purpose. The Legislature consists of a Senate of fifty-one members elected for four years (about half of whom retire every two years), and a House of Representatives of 153 members elected for two years. The two Houses have equal rights in introducing and passing bills. Senators and Representatives must be citizens, not holding any State or Federal office to which payment is attached. Senators must be 25 and Representatives 21 years of age; both must have resided in the State five, and in the district two, years next before election. The chief executive officer is the governor, elected for four years. He must be 30 years of age, and must have been a citizen for five years. He appoints many State officials and has the powers and duties which usually belong to State governors, including limited pardoning power and a limited veto. Other members of the executive, elected for four years, are the lieutenant-governor, the auditor, the superintendent of public instruction, and the attorney-general. The treasurer is elected for two years.

India. The present form of government of the Indian Empire is established by the Government of India, act of 1858. By this act, all the territories, theretofore, under the government of the East India Company are vested in the King of Great Britain; and all its powers are exercised in his name; all territorial and other revenues, and all tributes and other payments, are likewise received in his name, and disposed of for the purposes of the government of India alone. The secretary of state for India is invested with all the powers formerly exercised by the company or by the board of control. The administration of the Indian Empire in England is entrusted to a secretary of state for India, assisted by a council of not less than ten members, vacancies in which are filled by the secretary of state for India. The duties of the council, which has no initiative authority, are, under the direction of the secretary of state for India, to conduct the business transacted in the United Kingdom in relation to the Government of India. The supreme executive authority in India is vested in the governor-general in Council, often styled the Government of India. The governor-general, who since 1858 has also been viceroy, is appointed by the Crown, and usually holds office for five years. The salary of the governor-general is \$83,250 a year.

Indiana. The Constitution of 1816 was superseded by that of 1851 which, as amended in 1873 and 1881, is still in force. Amendments proposed in and approved by the Legislature require the approval of the succeeding General Assembly; if then passed by a majority vote, they become part of the Constitution. The State Legislature consists of a Senate of fifty members elected for four years, and a House of Representatives of 100 members elected for two years, the two Houses together being called the General Assembly. Special sessions, called by the governor, are limited to forty days. Bill for raising revenue may originate only in the House of Representatives. Eligible to sit in either House are all citizens of the United States who have resided in the State two years, and in their county or district one year next preceding the election; but Senators must be 25, and Representatives 21 years of age. The chief executive officer of the State is the governor, who is elected for four years. He may call special sessions of the Legislature, and he has a veto which may be overridden by a majority vote of the two Houses. He appoints to offices not otherwise provided for by law, is commander-in-chief of the militia, and may pardon or reprieve in all cases of crime except treason or where the accused has been impeached. Other elective officials are the auditor, the treasurer, and the attorney-general.

Iowa. The original Constitution of 1846 was, in 1857, superseded by a new Constitution, which, amended five times since 1868, is still in force. The Legislature, known as the General Assembly, consists of a Senate of fifty, and a House of Representatives of 100 members, meeting every two years or an unlimited session. Senators are elected for four years, half of them retiring every second year; Representatives for two years. Any bill may originate in either House. The House of Representatives alone

can impeach; the Senate tries impeachments. Amendments to the Constitution may be proposed in either House, but to become law they must be sanctioned by a majority vote of both Houses of the then sitting and next succeeding Assembly, followed by a majority vote of the people. The executive power is vested in a governor, elected for two years. He has the powers usually entrusted to State governors, including limited pardoning power and a veto which may be overridden by a two-thirds majority of all the members of each House. Other State officials are a lieutenant-governor, an auditor, a treasurer, an attorney-general, and a superintendent of public instruction, all elected for two years.

Ireland. The head of the executive in Ireland is the viceroy or lord-lieutenant, who is assisted by a chief secretary, the lord chancellor of Ireland, the attorney-general for Ireland, the permanent officials, and a privy council (which is a separate and distinct body from the privy council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the ministry of the day in London. The lord-lieutenant is charged with the maintenance of law and order; the Irish constabulary are under his control, and he may, if he think it to be necessary, direct the commander of the forces to send troops to their aid. He has power to commute sentences and pardon criminals. There are, however, more agreeable and less anxious functions attaching to the office; for as representing his majesty, the viceroy, assisted by his wife, holds courts, drawing-rooms, levées, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honor of civil knighthood with the approval of his majesty. During his absence the duties of chief governorship are performed by one or more lord justice or lord justices, those who act in this capacity being usually the lord chancellor of Ireland, the commander of the forces, and some of the judges. The lord chancellor of Ireland is head of the Irish judicial establishment, principal legal adviser of the lord-lieutenant, and exercises in Ireland many of the powers which in England are vested in the lord high-chancellor. The office may be held by a Roman Catholic. The chief secretary to the lord-lieutenant, or chief secretary for Ireland as he is usually called, has been described as prime minister to the viceroy. His office is at Dublin Castle; but he has also an office in London, which remains open during the sitting of parliament. He is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a permanent under-secretary, and other officials. There is a separate local government board; a board of public works, which is the great financial agent of the Government in Ireland; a board of national education, by which the grant made by parliament for public education is administered, and a department of agriculture and other industries and technical instruction which was created in 1899. There are also many other government departments in Ireland directly responsible to the Irish Government.

Italy is a constitutional monarchy. Under the constitution of 1848, as subsequently modified and expanded, the executive is vested in the king, and exercised through his ministers. The legislative authority is exercised by the king in conjunction with a senate of about 363 members in 1906 (composed of the princes of the royal house who are of age, and of an unlimited number of members selected by the ministry and nominated by the king for life, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of \$600); and a chamber of 508 deputies, elected by conditional universal suffrage for a period of five years, though the king can dissolve the chamber at any time. All money bills must be initiated in the chamber. Senators and deputies are unpaid, but travel free.

Japan. The Empire of Japan consists of the Archipelago of Nippon, which includes the four large islands of Honshiu, Kiushiu, Shikoku, and Hokkaido, together with Formosa and the Pescadores, ceded by China in 1895, and nearly 4,000 smaller islands. Although Japan is regarded as one of the absolute monarchies of the world, it possesses a Constitution which was adopted in 1889. It provides that the Emperor shall be the head of the empire, with all the rights of the sovereign and exercising full executive power, with the advice and assistance of the Cabinet Ministers who are appointed by himself. There is also a Privy Council and a House of Diet, consisting of two branches, a House of Peers, and a House of Representatives. The House of Peers is composed of members of the imperial family, counts, viscounts, and barons, and an indefinite number of persons appointed by the Emperor for meritorious service to the state or for erudition, and persons elected by each Fu and Ken. The total membership of the House of Peers is 364. According to the Constitution the membership of the House of Representatives shall be 369, a fixed number being returned from each electoral district. Voting is by secret ballot and the proportion of members to the population is one to each 126,000. Under the Constitution absolute freedom of religious belief and practice is assured so long as it does not interfere with general peace and order. There is no state religion, but the mass of the people follow one of the eleven sects of Shintoism, or one of the sixteen sects and twenty-five creeds of Buddhism. The present Mikado is Mutsuhito, who was born at Kyoto on November 3, 1852. He succeeded his father, Komei Tenno, February 13, 1867, and was married to Princess Haruko, the daughter of Prince Ichijo, on February 9, 1869. She was born May 28, 1850, and their issue has been: Prince Yoshihito, Prince Hirohito, Prince Yasuhito, Princess Masako, Princess Fusako, Princess Nobuko, Princess Toshiko.

The Heir Apparent.—The Imperial House law, which was passed February 11, 1889, definitely fixes the succession to the throne upon the next male descendant of the sovereign. As the result, Prince Yoshihito, the oldest son of the Mikado, is the heir apparent. He was born

August 31, 1879, and was proclaimed Kotoishi, or Crown Prince, November 3, 1889. On May 10, 1900, he was married to Princess Sadako, the daughter of Prince Kujo. They have had two children.

The Ministry.—The Ministry, or Cabinet, comprises the following departments: President or Premier; Minister of Foreign Affairs, Minister of Finance, Minister of the Interior, Minister of Justice, Minister of War, Minister of the Navy, Minister of Public Instruction, Minister of Agriculture and Commerce, Minister of Communications.

Kansas. Successive Constitutions were framed in 1857, 1858, 1859, and 1861, the last of which, amended nine times up to 1897, is still in force. Amendments, proposed in either House of the Legislature, and agreed to by a two-thirds majority of each House, are submitted to the people, and, if approved by a majority of those who vote, become part of the Constitution. The Legislature consists of a Senate of forty members, elected for four years, half their number retiring every two years, and a House of Representatives of 125 members, elected for two years. Any bill may originate in either House. The Senate tries cases of impeachment brought by the House of Representatives. Legislators must be voters, resident in the county for which they are elected. The chief executive officer of the State is the governor, elected for two years. He has the power usually invested in State governors, including authority to call special sessions of the Legislature, a limited pardoning power and a veto which may be overridden by a two-thirds majority of each House. Other officials elected for two years are the lieutenant-governor, auditor, treasurer, attorney-general, and superintendent of public instruction.

Kentucky. The Constitution adopted in the year 1799 was succeeded by other Constitutions in 1850 and 1891, that of 1891 being still in force. Amendments of the Constitution, proposed in either House of the Legislature and agreed to by a three-fifths vote of all the members of each House, are submitted to the popular vote and, if then approved, become part of the Constitution. The Legislature, known as the General Assembly, consists of a Senate of thirty-eight members elected for four years, one-half retiring every two years, and a House of Representatives of 100 members elected for two years. Bills for raising money must originate in the House of Representatives. In order to become law any bill at its final passage must have a majority voting for it not less than two-fifths of the members elected to each House. The House of Representatives can impeach; the Senate tries impeachments. Eligible to the Senate are all citizens 30 years of age who have resided in the State six years and in the district one year next before the election. Representatives must be 24 years of age and must have resided in the State two years, and in the county or district one year next before election. The chief executive authority resides in the governor, elected for four years. He has the powers usually vested in State governors, including a veto which may be overridden by a majority of all the members elected to each House. Other

officials elected for four years are the lieutenant-governor, treasurer, auditor, attorney-general, and superintendent of public instruction.

Liberia is a negro Republic on the coast of West Africa. Founded in 1822, by American philanthropists for the settlement of freed slaves. It was declared independent in 1847, was recognized as a sovereign state by Great Britain in 1848, and by the United States in 1862. The Constitution is on the model of that of the United States. The President is elected for four years, the House of Representatives (fourteen members) for two years, and the Senate (nine members) for six. The Liberian Development Chartered Company (British) in 1906, advanced £100,000 to the government, with which a government bank was founded, roads were built, other public works were commenced, and a military constabulary force was established. In addition two British officials were appointed to reorganize the customs service and the country's finance.

Louisiana. The Constitution of 1812 was succeeded by those of 1845, 1852, 1864, 1868, 1879, and 1898; the last-named was amended in 1900, in 1902, and in 1904, and is still in force. Amendments proposed in the General Assembly and approved by a two-thirds vote of each House are submitted to the popular vote for ratification. The Legislature consists of a Senate of forty-one members and a House of Representatives of 115 members, Senators and Representatives being chosen for four years. The powers of the two Houses are similar, but bills for raising money must originate in the House of Representatives, and the Senate tries cases of impeachment brought by the other House. Senators must be at least 25 and Representatives 21 years of age; both must have been citizens of the State for five years and residents in the State for two years next before their election. The chief executive officer is the governor, who is elected for four years, and has the powers usually entrusted to State governors, including the limited veto. Other officials elected for four years are the lieutenant-governor, the treasurer, the secretary of state, the auditor, the attorney-general, and the superintendent of education.

Maine. The first Constitution of Maine, adopted in 1819, was frequently altered by amendments, which, to the number of twenty-one, were in 1876 incorporated in the document. Between 1876 and 1898 nine amendments were adopted. Proposed amendments, passed by a two-thirds vote of both Houses of the Legislature, are submitted to the voters at the next election, and, if then passed by a majority of those voting, they become part of the Constitution. For extensive revision a constitutional convention may be, but never has been, called by a two-thirds vote of both Houses of the Legislature. The Constitution provides for a Legislature of two Houses, the Senate, consisting of thirty-one members, and the House of Representatives with 151 members, both Houses being elected at the same time for two years. Senators are elected in districts formed of groups of towns, and Representatives are chosen by cities, towns, and plantations according to population. Senators must be 25 and Representatives

21 years of age; members of both Houses must be citizens of the United States, resident in Maine for one year, and in the district or town for three months before the election. But no member of Congress, no office holder of the Federal Government, except a postmaster, no paid officer of the State, except justices of the peace, notaries public, coroners, and militia officers, may sit in either House. The powers of the two Houses are similar, but money bills must originate in the House of Representatives. The chief executive authority resides in the governor, who is elected for two years by popular vote. He must be 30 years of age, born in the United States, resident in the State for five years next before election, and he may not hold any other office, either under the United States or under the State of Maine. He recommends legislative measures, and has a veto which lapses if unused for five days, and which may be overridden by a two-thirds vote of each House. He is commander-in-chief of the military forces and he along with the council, appoints many State officers. He may grant pardons, etc., but has to report to the Legislature on each case of his exercise of this power. The governor has an advisory council consisting of seven members chosen every two years by joint ballot of Senators and Representatives. The council's advice and consent are required for appointments, and its warrant for payment of money from the treasury. The secretary of state, treasurer, and attorney-general are appointed by joint ballot of the Legislature. Other officers are the superintendent of schools, various commissioners (for labor statistics, insurance, land, etc.), and also boards and commissions for State institutions, railways, assessment, health, fisheries, etc. For local government the State is divided into sixteen counties, subdivided into towns, cities, plantations, and various unincorporated places. Counties are administered by boards of commissioners elected for six years, one commissioner retiring every year. These boards have elective officers and supervise county finance, property, jails, roads, etc.

Maryland. The first Constitution of Maryland was succeeded by others in 1857, 1864, and 1867, that of 1867, amended ten times (last in 1901), being still in force. Amendments proposed in the General Assembly must obtain a three-fifths vote of all the members elected to each House; they must then be submitted to the people, and, if approved by a majority of those voting, they become part of the Constitution. The Legislature consists of a Senate and a House of Delegates, the two bodies together being known as the General Assembly. There are twenty-seven Senators and 101 Delegates. The Senators serve for four years, and the Senate is renewed to the extent of half every two years. The Delegates are elected for two years. Senators must be 25 years of age, and Delegates 21. Clergy, members of Congress, and federal officials are ineligible for either Senate or House of Delegates. No person is eligible who has not lived in the State three years next preceding election. Any bill may originate in either House and be altered, amended, or rejected by the other. The House of Delegates

has sole power of impeachment, and impeachment cases are tried by Senate. The highest officer of the State is the governor, elected for four years. He is commander-in-chief of the State militia, and, with consent of Senate, appoints all civil and military officers of State whose appointment or election is not otherwise provided for by law. He may remove for incompetency or misconduct civil officers who received appointment from the executive for a term of years. He may convene the Legislature or Senate alone for special sessions. He has a veto which may be overcome by a three-fifths vote of the members elected to both Houses. He may grant pardons and reprieves except in cases of impeachment, but must report his action to the Legislature whenever required. Other officers are the secretary of state, treasurer, the comptroller, the adjutant-general, the attorney-general, and the superintendent of education. The State is divided into twenty-four counties.

Massachusetts. The first Constitution of the State, after having been submitted to and accepted by the people, was formally adopted at a Convention held at Boston on June 15, 1780. It has been amended from time to time, the earliest amendments having been made in 1821 and the most recent in 1894. The Constitution provides for a legislative body consisting of a Senate and a House of Representatives, styled collectively the General Court of Massachusetts. The Senate consists of forty members elected annually by popular vote, the State being divided into forty senatorial districts, each of which returns one Senator. The House of Representatives consists of 240 members, elected in 164 districts, each of which returns one, two, or three representatives, according to population. There is an annual session of the Legislature and special sessions may be called by the governor in case of exigency. Money bills must originate in the House of Representatives, but may be amended in the Senate. If the subjects under consideration are of public interest, hearings are advertised and the people have a right to appear and speak in support of or against the passing of certain laws. Amendments of the Constitution must be proposed in the General Court, and agreed to by a majority of the Senate and two-thirds of the House of Representatives present and voting thereon; they must be referred to the General Court next elected, and if then agreed to by similar majorities, they are submitted to the people, and, if approved and ratified by a majority of the qualified voters voting thereon at meetings legally held for the purpose, they become part of the Constitution. The executive power of the State resides in the governor, assisted by a council. He is chosen by popular vote and holds office for one year, but no one is eligible who has not resided within the State for the seven years last past. He has power to adjourn or prorogue (for not more than ninety days), or to summon the General Court. He is commander-in-chief of the State's army and navy. He may, with the advice of his council, pardon convicted offenders, but not those convicted before the Senate on

impeachment by the House. He appoints (with the consent of his council) the judges, the solicitor-general, and many other officials, and he has general supervision of the administration of affairs in the State. The council with which he acts consists of eight councillors elected by popular vote in the eight districts into which the State is, for this purpose, divided. The lieutenant-governor, who becomes acting governor in case of the death of the governor, or of his absence from the State, is similarly elected by the people, and holds office for one year. The secretary of the commonwealth is also elected by the people for one year. Other officials elected by the people for a year are the treasurer and receiver-general, who is ineligible for more than five successive years of office; the State auditor, and the attorney-general. There are fourteen counties in the State, thirty-three cities and 321 towns. The cities are granted charters by the State Legislature. The mayor is the executive officer in each city, and the legislative bodies are usually a board of aldermen and a common council. The counties are administered by officers styled the county commissioners.

Mexico. Under the present Constitution, which bears date of February 5, 1857, Mexico is a federative Republic. It was originally divided into nineteen States, but at this time there are twenty-seven, with two Territories, and the Federal District, and, while each manages its own local affairs, they are bound together as an inseparable body by the constitutional laws. The form of government in Mexico is broadly similar to that of the United States, the executive vesting in a President, who is elected for a term of six years, and who is assisted by a Cabinet, while the legislative power is conferred upon a Congress, which is composed of two Houses — a Senate and a House of Representatives. The President may serve any number of terms, and the present Executive, General G. Porfirio Diaz, is now in his seventh term, as he had already served six four-year terms when he was inaugurated December 11, 1904. Under the direction of the President and a Council, the administration is carried on by the Secretaries of State in charge of the following portfolios: Foreign Affairs, Interior, Justice and Public Instruction, Agriculture and Colonization, Finance, Communications and Public Works, War and Navy. The Senate consists of fifty-six members, two from each State, who must be at least 30 years of age. They are elected by the ballots of all respectable males and serve for a term of two years. Representatives must be 25 years of age. They are elected for an equal term with the Senators and in a similar manner. The President is elected by electors popularly chosen at a general election. There is no state religion in Mexico, and all religious sects are equal before the law. The prevailing religion, of course, is Roman Catholic, but no ecclesiastical body can own realty, and since 1863, when all the churches were closed and the lands confiscated, many of the buildings have been assigned to serve as hospitals, schools, etc. The judicial power in Mexico is entirely distinct from that of the executive. It includes a Supreme Court,

consisting of fifteen judges, who are chosen for a term of six years; Circuit Courts, with three judges, and District Courts, with thirty-two judges. The chief sources of Mexican revenue are the internal taxation and the customs, less than fifteen per cent. being obtained from other sources.

Michigan. Its first Constitution was framed and adopted in 1835, and Congress passed the Act admitting it into the Union as a State on January 26, 1837. In 1850 a new Constitution was adopted which with little alteration is still in force. The legislative authority is vested in a Senate of thirty-two members elected by the counties or groups of counties for two years, and a House of Representatives of from sixty-four to 100 members, the electoral districts being rearranged according to population every five years. Senators and Representatives must be citizens of the United States and qualified electors of the districts for which they are chosen. Any bill may originate in either House. The Constitution was amended in 1870, 1875, 1887, and 1904. Amendments may be proposed in either House; if approved by a two-thirds vote of each House they are submitted for the approval of the people in manner prescribed, and, if this approval be given, the amendments become part of the Constitution. For a complete or extensive revision a Convention is required and the question is submitted to the electors. If the majority of those who vote are on the affirmative side, the Legislature makes provision for a Convention. The executive power is vested in the governor, elected for two years. He has the powers usually entrusted to State governors, including a limited veto, and he makes administrative appointments, many of which require the approval of the Senate. The secretary of state, State treasurer, auditor-general, and attorney-general are elected by popular vote. The lieutenant-governor, elected for two years, presides over the Senate, and in case of the death, absence, or default of the governor, succeeds to the governor's authority. For local government the State is organized in counties, cities, towns, and villages. There are eighty-five counties, each of which is a corporate body with a board of supervisors as its administrative authority. Cities must have each a population of not less than 3,000, but a few which have been long incorporated have a smaller population. Cities are classified into four groups, according to population, and are divided into three or more wards.

Minnesota. The State Legislature consists of a Senate of sixty-three members, one being elected in each of the legislative districts, and a House of Representatives of 119 members elected in the same districts in numbers proportioned to population. Eligible for either House are all male citizens of the United States, 21 years of age, who have resided one year in the State and six months in the district just before election; but no office-holder under the Federal or State government, except a postmaster, may belong to either House. The two Houses have similar powers, but money bills must originate in the House of Representatives. No special laws relating to personal or local

affairs or corporations can be enacted. The House of Representatives can impeach State officers before the Senate, which by a two-thirds majority of members present may convict and deprive of office. Some changes have been made in the Constitution, chiefly, as in 1896 and 1898, affecting the regulations for local organization. Amendments proposed in either House and supported by a two-thirds vote of each and subsequently approved by the people in manner prescribed, become part of the Constitution. For an extensive revision, the proposal, after being approved by a two-thirds vote of each House, must be submitted to the electors; if approved, the Legislature provides for the holding of a convention; delegates are elected, meet together, and make the revision which is then referred to the people and, if approved, becomes law. The chief executive officer of the State is the governor, who is elected by the people for two years. He must be a citizen of the United States, 25 years of age, and resident in the State for one year before election. In legislation he has a limited veto and other powers usually entrusted to State governors. The lieutenant-governor presides over the Senate and, on the death or absence of the governor, he acts as governor. The secretary of state is elected for two years; the auditor (elected for four years) audits State accounts and superintends State lands; the treasurer and attorney are elected for two years. Several important officials, boards, and commissioners, with duties relating to health, equalization, charities, insurance, railways, etc., are appointed by the governor. The State is organized in counties (usually under special acts), and in townships, villages, and cities (usually under general acts). There are eighty-two counties.

Mississippi. The Constitution of 1817 was followed by others in 1832, 1868, and 1890. Proposed amendments of the Constitution approved by two-thirds of the members of each House voting on them on three separate days, and ratified by a majority of the qualified electors voting on them, become part of the Constitution. The Legislature consists of a Senate and a House of Representatives, both elected for four years. Ordinary sessions, unrestricted in length, are held once in four years. Special sessions, limited to thirty days, unless extended by proclamation by the governor, are held alternately with regular sessions, so that the Legislature in fact meets biennially. Bills for raising revenue and bills providing for assessment of property must be approved by three-fifths of the members of each House present and voting. The chief executive officer of the State is the governor, who is elected for four years, and is not eligible for the succeeding term. He has a limited veto, and the other powers usually vested in State governors. Other officials elected for four years are the secretary of state, the lieutenant-governor, the treasurer, and the auditor. Neither treasurer nor auditor is eligible for the succeeding term, nor can the one succeed the other. Mississippi is divided into seventy-six counties.

Missouri. The original Constitution, adopted in 1820, was followed by those of 1865

and 1875, the latter of which, as amended in 1884, 1890, 1900, and 1902, is still in force. Amendments proposed in either House of the Legislature, and supported by a majority of the members of each, are submitted to the popular vote and, if approved, become part of the Constitution. The Legislature, called the General Assembly, consists of a Senate of thirty-four members elected for four years (half their number retiring every two years), and House of Representatives of 142 members elected for two years. Any bill may originate in either House. The Senate tries cases of impeachment brought by the House of Representatives. Senators must be at least 30 years of age, electors in the State three years and resident in the district one year next before election. Representatives must be 24 years of age, citizens, electors in the State two years, and resident in the county or district one year next before election. The chief executive official is the governor, who is elected for four years, and possesses the powers usually entrusted to State governors, including a limited pardoning power and a veto which may be overridden by a two-thirds majority of all the members of each House. Other State officials are the secretary of state, lieutenant-governor, auditor, treasurer, attorney-general, and superintendent of public instruction, all elected for four years. The retiring governor and treasurer are not eligible for the succeeding term. The State is divided into 115 counties.

Monaco. Monaco is a small Principality in the Mediterranean, surrounded by the French Department of Alpes Maritimes, excepting on the side towards the sea. From 968 it belonged to the House of Grimaldi. In 1715, it passed into the female line, Louise Hippolyte, daughter of Antony I., heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I. died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I. as Duc di Valentinois, who was in his turn succeeded by his son Honorius III. This prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814, the Principality was reestablished, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815). In 1848, Mentone and Roquebrune revolted, and declared themselves free towns; in 1861, Charles III. ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the protectorate came to an end. The Prince is an absolute ruler, there being no elective representation within the Principality. The administration is entrusted to a Governor-General with a Secretary-General and a Secretary of State. There is a consultative State Council of five members appointed by the Prince. Municipal administration is in the hands of a *maire* and two assistants with a Commission of five members, all appointed by the Prince. In 1819, the Government adopted the French Codes and a Court of First Instance, as well as

a Judge de Paix's Court. A Court of Appeals is constituted by the Prince's appointment of two Paris judges who act as such when necessary. The Principality has its own coinage, which is current since 1876 in all the States of the Latin Union; it also issues its own separate postage-stamps.

Montana adopted its first and present Constitution in 1889. The legislative power is vested in a Senate and a House of Representatives, which meet in regular session on the first Monday of January in each odd-numbered year. There are twenty-six Senators, elected for four years in such a manner that the Senate is renewed to the extent of one-half at each biennial election. The members of the House of Representatives, seventy-two in number, are elected for two years. Elective State officials are the governor, lieutenant-governor, secretary of state, State treasurer, attorney-general, State auditor, and superintendent of public instruction. The governor has the right of appointment to various offices, including those of State land agent, commissioner of the bureau of agriculture, labor and industry, and inspector of mines. For local administrative purposes the State is divided into twenty-six counties, and into twelve judicial districts.

Montenegro. Under the Constitution granted by the Prince of Montenegro on December 19, 1905, the form of government has been changed. It is now an hereditary Constitutional monarchy with popular representation. A National Assembly or Skupshtina was convoked for a short term in 1905 to receive communication of the Constitution. An electoral law has been framed under which elections took place in September, 1906, for the present Skupshtina. That assembly is in future to be convoked yearly, on October 31st, by the Prince. Its members are elected by universal suffrage for a period of four years. Each of the fifty-six districts or capitanats of Montenegro, and each of the six provincial towns, Cetinje, Podgoritz, Niksic, Kolashin, Antivari, and Dulcigno, elect one representative. There are also twelve *ex-officio* members, including the Montenegrin Orthodox Metropolitan, the Roman Catholic Archbishop of Antivari, the Montenegrin Mussulman Mufti, six high officials of the state, and three generals, nominated by the Prince. There are thus seventy-four members in all. Besides the Prime Minister, there are Ministries of the Interior, Justice, Agriculture, War, Foreign Affairs, Finance and Public Works, Worship and Public Instruction.

Morocco. The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan is chief of the state, as well as head of the religion. As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mohammed, by the expounders of the Koran, the class of "Ulema," under the "Sheik-ul-Islam." The Sultan has six ministers, whom he consults if he deems it prudent to do so; otherwise they are merely the executive of his unrestricted will. They are the Grand Vizier, the Ministers for

Foreign Affairs, Home Affairs, and War, Chief Chamberlain, Chief Treasurer, and Chief Administrator of Customs. The unsettled condition of affairs in Morocco rendered it necessary that other countries interested should come to an understanding regarding their respective rights. By the Anglo-French Convention of April, 1904, Great Britain recognizes that it appertains to France to assist in the administrative, economic, financial, and military forms in Morocco, but reserves the rights which by treaties or usage she now enjoys. Both governments agree not to allow fortifications on the Moorish coast between Melilla and the heights dominating the right bank of the Sebu, but this arrangement does not apply to points held by Spain on that coast. Neither government will lend itself to any inequality in taxation or railway rates, and reciprocal engagements with respect to trade are to last for thirty years with prolongation for periods of five years, failing denunciation a year in advance. Roads, railways, harbor works, etc., are to remain under State control. These arrangements were accepted also by Spain in a Franco-Spanish convention. Germany, however, expressed dissatisfaction with this arrangement, and a conference of thirteen delegates, representing Morocco, the European Powers interested, and the United States of America, was held at Algeciras for the settlement of disputed matters, from January 16th to April 7, 1906, when an agreement, embodied in a General Act, was signed by all the delegates. The Sultan signed the agreement on June 18th, and ratifications of the agreement were deposited at Madrid by the other powers, December 31, 1906. Under this agreement there will be a Moorish police force commanded by Moorish Kaid, assisted by French and Spanish instructors and officers, and the force will be inspected by a Swiss Inspector-General, the arrangement to continue for five years. The force will be from 2,000 to 2,500 strong, and will be distributed among the eight ports of Morocco. A state bank is to be instituted with a concession for forty years. It will, to begin with, have a capital of from fifteen to twenty million francs; it will issue bank notes, will act as Treasurer and Paymaster of Morocco, and be the financial agent of the government at home and abroad. It will be required to rehabilitate the currency. Its working will be observed, but not directed, by four censors appointed by the Imperial Bank of Germany, the Bank of England, the Bank of Spain, and the Bank of France. Other provisions deal with the acquisition of land by foreigners, the imposition and collection of taxes, and the authority of the state over the public services and public works. Mulai-Abd-el-Aziz, born February 24, 1878, son of Sultan Mulai-Hassan; succeeded on the death of his father, being proclaimed Sultan in the Sherifian Camp, June 7, 1894; his son, Prince Hassan, was born July, 1899. The present Sultan of Morocco — known to his subjects under the title of "Emir-al-Mumenin," or Prince of True Believers — is the fifteenth of the dynasty of the Alides, founded by Mulai-Ahmed, and the thirty-sixth lineal descendant of Ali, uncle and son-in-law of the Prophet.

Nebraska. The first Constitution, adopted in 1867, was succeeded in 1875 by that which as amended in 1886, is still in force. Amendments proposed in either House of the Legislature, agreed to by a two-thirds majority of each House, and approved by a majority of the electors voting on them at a general election, become part of the Constitution. The Legislature consists of a Senate of thirty-three members and a House of Representatives of 100 members. The Legislators are elected for two years. Money bills must originate in the House of Representatives. The Senate tries cases of impeachment brought by the other House, but if the person impeached is a justice of the Supreme Court, the trial takes place before a court of impeachment consisting of the District Court judges. Legislators must be citizens resident in the district for one year next preceding election. The franchise extends not only to citizens but also to aliens who, thirty days before the election, have declared their intention of becoming citizens. The chief executive officer of the State is the governor, elected for two years. He is commander-in-chief of the militia, and, with advice and consent of the Senate, appoints to various offices, and may grant pardons, etc. He may call special sessions of the Legislature, and he has a veto which may be overridden by a three-fifths vote of each House. Other officials elected for two years, besides those named, are the lieutenant-governor, auditor, treasurer, superintendent of public instruction, attorney-general, and commissioner of public lands and buildings. The treasurer is not eligible for a third consecutive term.

Netherlands. The Constitution of 1848, revised in 1887, vests the executive in the sovereign, and the legislative authority in the sovereign and the states-general, the latter sitting in two chambers: the first, consisting of fifty members, elected for nine years (one-third retiring every three years) by the provincial states from among the most highly-assessed inhabitants and from among a number of specified officials; the second of 100 members, elected for four years by all male citizens of 25 years or more who pay a direct tax to the state, or are householders or own boats of not less than twenty-four tons, or receive a minimum wage or salary of about \$115, or give other evidence of their ability to support themselves and their families. The government and the second chamber alone possesses the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. Alterations in constitution are made by a two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new states-general. A state council of fourteen members appointed by the sovereign is consulted on all legislative and on most executive matters.

Nevada. The original Constitution adopted in 1864, is in force as amended in 1880 and 1889. Amendments proposed in and approved by the Legislature are submitted to the next Legislature and if then approved are referred to the people for ratification. The Legislature consists of a Senate of seventeen members elected for four years, about half their number retiring every two years, and a House of Representatives

of thirty-nine members elected for two years. Any bill may originate in either house. The Senate tries cases of impeachment brought by the House of Representatives. The chief executive officer is the governor, elected for four years. He has the powers and duties usually entrusted to State governors, except that he has not pardoning power, this authority being vested (apart from impeachment cases) in the board of pardons of which he is a member. He has the usual limited veto. Elective officers are the lieutenant-governor, secretary of state, treasurer, comptroller, surveyor-general, and attorney-general.

New Hampshire. The Constitution of 1783, was amended in 1792, in 1852, in 1889, and in 1903. The sense of the people as to the calling of a convention for the revision of the Constitution must be taken every seven years. If a convention is held the amendments to the Constitution which it proposes must be laid before the towns, and approved by two-thirds of the qualified voters present and voting on the subject. The State Legislature, consisting of a Senate and a House of Representatives, meets once in two years and remains in session until prorogued by the governor, generally about three months. The Senate consists of twenty-four members, elected for two years. It cannot originate money bills. Any qualified elector is eligible to sit in the Senate. The House of Representatives consists of from 390 to 400 members, the number varying slightly with each session, as representation is on the basis of population. The House has the power of impeachment and of originating money bills. The governor is chosen by popular election, and holds office for two years. He has the nomination of all judicial officers, the attorney-general, coroners, and all officers of the navy and general and field-officers of the militia. His appointments require the approval of the council. He has the other powers usually entrusted to State governors, including a limited veto and limited pardoning power. The secretary of state is elected by joint ballot of the senators and representatives. The other important State officials are the state treasurer, adjutant-general, and commissioners of labor, immigration, railroads, banks, education, health, agriculture.

New Jersey. The Constitution now in force was ratified on August 13, 1844, amended in 1875 and in 1897. The legislative power is vested in a Senate and a General Assembly, the members of which are chosen by the people, all male citizens (with necessary exceptions) 21 years of age, resident in the State for a year, and in the county for five months preceding the election, having the right of suffrage. The Senate consists of twenty-one Senators, one for each county, elected by the voters for three years, in such manner that the Senate is renewed to the extent of one-third annually. Senators must be 30 years of age, and must have resided, just before their election, four years in New Jersey, and one year in the county for which they are elected. The General Assembly consists of sixty members elected by the voters of the counties in numbers proportioned to the population of the counties as determined by the decennial

Federal census. Money bills must originate in the Assembly, but the Senate may propose amendments. Every bill passed by both Houses requires the assent of the governor, who may within five days remit it for reconsideration to the House in which it originated; if then the bill be approved by a majority of each House it becomes law. The executive of the State is vested in a governor, elected for three years by the legal voters. He must be not less than 30 years of age, have been twenty years a citizen and seven years resident in the State immediately before election. He is not eligible for the next term of the office. His duties include the military command-in-chief, the summoning of the Legislature when necessary, the recommendation of legislation, the granting of commissions, and the supervision of the execution of the laws. The State secretary is appointed for five years by the governor with the advice and consent of the Senate. The treasurer and the comptroller are appointed for three years by the Senate and General Assembly in joint session.

New Mexico. Within the limits assigned by the organic act, legislative authority is vested in a legislative assembly, consisting of a Council and a House of Representatives. The Council has twelve members, one or more for each of nine districts; the House of Representatives has twenty-four members representing fifteen districts, the members for each house being elected for two years. The Legislature meets for sixty days once in two years. The United States Congress may annul acts passed by the Territorial Legislature. To the Federal Congress the Territory sends one delegate, who sits and may speak but not vote in the House of Representatives. The Territory has no vote in the election of the Federal President. The executive authority is vested in a governor, appointed for four years by the Federal President with the advice and consent of the Federal Senate. He has a veto in legislation, but his veto may be overridden by a two-thirds majority in each house. He is commander-in-chief; has power of pardoning, and appoints certain territorial officials with the advice and consent of the Council. The territorial secretary is appointed for four years by the Federal President and Senate. Besides discharging secretarial duties, he succeeds to the position of acting-governor in case of the death, removal, or incapacity of the governor. For local government the Territory is divided into twenty-five counties, each of which is administered by a board of three commissioners, elected for two years by the county voters. There are also, for each county, a sheriff, treasurer, assessor, surveyor, and other officials. Cities (population over 3,000) have a mayor and a board of aldermen; towns (population under 3,000) have a mayor, four trustees, and a recorder.

New York. From 1609 to 1664 the region now called New York was under the sway of the Dutch; then it came under the rule of the English who governed the country till the outbreak of the War of Independence. Between July 9, 1776, and April 20, 1777, a Convention framed a Constitution under which New York was transformed into an independent State, after-

wards, in 1788, entering the Union as one of the thirteen original States. A new Constitution, framed on a wider basis, was ratified by the people in 1822. A third Constitution was enacted in 1846, and a fourth in 1894. The legislative authority is vested in a Senate of fifty members elected every two years, and an Assembly of 150 members elected annually. The senatorial electoral districts are counties, either singly or grouped according to population; the Assembly districts are either counties or parts of counties, the various districts having approximately equal population. Each senatorial and each Assembly district elects one member. Senators and representatives must be citizens of the United States 21 years of age. No member of Congress or Federal officer or officer of any city government, nor any person who within 100 days of the election has held such office, can sit in either house. The two Houses have equal powers, even with respect to money bills. Every law must be passed by both Houses with the assent of the majority of the members of each. Bills appropriating money for local or private purposes require a two-thirds majority. The Legislature is by the Constitution prevented from enacting special laws in numerous matters, and there are important restrictions respecting financial legislation. The principal executive officer of the State is the governor, elected by the people for two years. He must be a citizen of the United States, 30 years of age, and resident in the State for five years next preceding the election. He has a veto in legislation, provided it be exercised within ten days; but it may be overridden by a two-thirds majority of each House. He is commander-in-chief of the military and naval forces; with the assent of the Senate, he appoints many State officers; he may convene the Senate or the Legislature if necessary; he recommends legislative measures and sees that the laws are faithfully executed. He may reprieve or pardon criminals, but not in cases of treason or impeachment. Elective officers are the state secretary who keeps the State records and seal; the comptroller who audits accounts and issues warrants for payments; the treasurer who pays money on warrants; the attorney-general who is law officer of the State; the State engineer and surveyor who has charge of public lands and the construction of canals. The administrative boards (civil service commissioners, railroad commissioners, and many others) are generally appointed by the governor with the assent of the Senate.

New Zealand. The present form of government for New Zealand was established in 1852. By this act the colony was divided into six provinces, afterwards increased to nine, each governed by a superintendent and provincial council, elected by the inhabitants according to a franchise practically amounting to household suffrage. By a subsequent act of the colonial legislature, in 1875, the provincial system of government was abolished, and the powers previously exercised by superintendents and provincial officers were ordered to be exercised by the governor or by local boards. By the terms of this and other amending statutes, the legisla-

tive power is vested in the governor and a general assembly, consisting of two chambers—the first called the legislative council, and the second the house of representatives. The governor has the power of assenting to or withholding consent from bills, or he may reserve them. He summons, prorogues, and dissolves the parliament. He can send drafts of bills to either house for consideration, but in case of appropriations of public money must first recommend the house of representatives to make provision accordingly before any appropriations can become law. He can return bills for amendment to either house. The legislative council consists at present of thirty-eight members, who are paid at the rate of £200 per annum. Those appointed before September 17, 1891, are life members, but those appointed subsequently to that date hold their seats for seven years only, though they are eligible for reappointment. By an act passed in 1900, the number of members of the house of representatives was increased to eighty, including four Maoris, elected by the people for three years. They are paid at the rate of £300 per annum.

North Carolina. The Constitution of 1776, was succeeded by that of 1868, which, amended in 1872, 1875, 1879, 1888, and 1899, is still in force. Amendments proposed in either House, and agreed to by a three-fifths vote of each House of the Legislature, require ratification by a majority vote of the people. The State Legislature, known as the General Assembly, consists of a Senate of fifty members, and a House of Representatives of 120 members, elected for two years. Senators must be United States citizens, 25 years of age, resident in the State for two years next preceding the election; Representatives must be 21 years of age, citizens, and resident in the State one year next before the election. Any bill may originate in either House. The chief executive official is the governor, elected for four years. He is commander-in-chief of the militia; has power to pardon, etc., except in cases of impeachment, but must report to the General Assembly on his exercise of this power; he appoints, with the consent of the Senate, to offices not otherwise provided for. He has no veto. Officials elected for four years are the lieutenant-governor, secretary of state, auditor, treasurer, superintendent of public instruction, and attorney-general.

North Dakota, with its present boundaries, was admitted as a State into the Union in 1889, and the original Constitution is still in force. It may be altered by amendment proposed in either House of the Legislature, agreed to by a majority of all the members of each House, and finally approved by a popular vote. The Legislature, called the Legislative Assembly, consists of a Senate of forty members, elected for four years, and a House of Representatives of 100 members elected for two years. Any bill may originate in either House. The Senate tries cases of impeachment brought by the House of Representatives. Senators must be 25 years of age; Representatives, 21; both must be citizens resident in the State for two years next before election. At the head of the executive is the governor, elected for two years. He

has the powers usually vested in State governors, including limited pardoning power, and a veto which may be overridden by a two-thirds majority of all the members of each House. Officials elected for two years are the lieutenant-governor, secretary of state, auditor, treasurer, and superintendent of public instruction.

Norway. The union with Sweden, which had endured from 1814 to 1905, was dissolved by the action of the Norwegian Storting on June 7, 1905, following a protracted dispute between the two countries as to their diplomatic representation abroad; and the Karlsbad Convention was signed September 24, 1905, settling the details of a mutual agreement for the repeal of the union. King Oscar declined the offer of the throne to a prince of his house, and after a plébiscite it was offered to and accepted by Prince Charles of Denmark, who became King as Haakon VII. The Norwegian Constitution of 1814, several times modified since, vests the legislative power in the Storting, which has 123 members (forty-one from urban and eighty-two from rural districts), who are elected for three years. Every male citizen of 25 who has resided in the country for five years is qualified as an elector, except for legal disabilities. For business purposes it is divided into the Odels-thing, composed of three-fourths of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. The king has the right of vetoing the laws passed by the Storting, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the king with a council of state composed of a minister of state and eight councilors.

Ohio. The Constitution of 1802 was superseded by that of 1851, which, with amendments adopted in 1875, 1883, 1885, and 1903, is still in force. Amendments of the Constitution, proposed in either House of the Legislature and agreed to by a three-fifths majority of the members of each House, must be published in prescribed manner in the counties for six months before the next election of members of the Legislature, and at that election they must be submitted to the electors; if approved by a majority of those who vote, they become part of the Constitution. The question of a general revision of the Constitution is submitted to the people every twenty years, provision being made for the appointment of a convention to draft alterations. The Legislature consists of a Senate of thirty-four members, and a House of Representatives of 118 members, both Houses being elected for two years. Any bill may be proposed in either House and is subject to amendment or rejection in the other. Eligible to either House are all male citizens 21 years of age, resident in the State and in the district one year next before the election, but paid office-holders of the Union or of the State are not eligible. The chief executive authority is vested in the governor, elected for two years (the present governor for three years). He has the powers usually entrusted to State governors, including limited pardoning power and the veto, which may be overridden by a two-thirds majority of

all the members of each House. Officials elected for two years are the lieutenant-governor, secretary of state, attorney-general, treasurer, and a dairy and food commissioner. The common schools commissioner is elected for three years, and the State auditor for four years. Ohio is divided into eighty-eight counties.

Oklahoma. The President of the United States on November 16, 1907, signed the Constitution of Oklahoma and issued a proclamation announcing its admission as a State into the Union. The Census Bureau on September 19, 1907, reported the result of a special census taken of the population of the new State, to be 1,414,042.

The most notable feature of the State Constitution was its provisions for the regulation of corporations. In line with its other corporation provisions were the adoption of 2-cent passenger fares, electric lines not included, and the abolition of the doctrine of the fellow-servant.

The initiative and referendum was given a prominent place in the constitution, but the right of recall usually regarded as practically a parallel proposition, was rejected.

Separate schools for white and negro children were provided; all other races than negroes being classed as "white."

The State was given the right to engage in any business or occupation, but the grant was limited by the qualification that it shall be "for public purposes."

Trial by jury was granted in contempt cases for violations of injunctions or orders of restraint, and an opportunity to be heard must be given on all contempts before punishment is imposed. Three-fourths jury verdicts were provided for in civil cases and criminal cases less than felony. The grand jury system was not made mandatory. Persons were granted immunity from prosecution if their testimony incriminated themselves.

Records, books and films of all corporations shall be subject to full visitation and inquisition, notwithstanding the immunities and privileges conferred by the bill of rights.

For every sale, the applicant must make a sworn statement as to the purpose for which the liquor is to be used, and each sale must be registered.

The control of all public-service corporations was vested in a corporation commission of three members, elected by the people for six-year terms. Commissioners are required to take an oath that they are not interested directly or indirectly in any company which may come under their supervision. All railroads, oil, pipe, car, express, telephone or telegraph lines are required to receive and transport each other's business without delay or discrimination. All railroads were declared public highways. Public service corporations and their officials were prohibited from consolidating with or owning stock in any competing corporation.

"Transportation companies" were defined as including railroads, street railways, canals, steamboat lines, freight car companies or car associations, express companies and sleeping-car companies. "Transportation companies" include telegraph and telephone lines, and both of these classes were rated as common carriers.

The common law doctrine of fellow-servant was abrogated as to all railroad, street or interurban electric lines and mining companies, and recovery may be had as fully in cases where death occurs as where it does not.

Campaign contributions by corporations were forbidden and it was sought to prevent the issuance of watered stock by providing that no stock shall be issued except for money, labor done or property actually received to the amount of the par value of the stock.

Oman. An independent state in South-eastern Arabia extending along a coast line — southeast and southwest — of almost 1,000 miles from the Gulf of Ormuz and inland to the deserts. Area, 82,000 square miles; population, estimated at 800,000, chiefly Arabs. The capital, Maskat, and the adjacent town of Matra have together about 25,000 inhabitants. Maskat was occupied by the Portuguese till the Seventeenth Century. After various vicissitudes it was taken in the Eighteenth Century by Ahmed

bin Sa'eed, of Yemenite origin, who was elected Imam in 1741. His family have since ruled. The present Sultan is Seyyid Feysil bin Turki, second son of the late Seyyid Turki bin Sa'eed bin Sultan, who succeeded his father June 4, 1888, and was formally recognized by the British Government. In the beginning of the present century the power of the Imam of Oman extended over a large area of Arabia, the islands in the Persian Gulf, a strip on the Persian coast, and a long strip of the African coast south of Cape Guardafui, including Socotra and Zanzibar. On the death of Sultan Sa'eed in 1856, one son proclaimed himself Sultan in Zanzibar and another in Muscat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two sultanates. Subsequent troubles curtailed the area of the state in Asia. The closest relations have for years existed between the Government of India and Oman and a British consul and political agent resides at Maskat. The revenue of the Sultan amounts to about \$250,000. The population is poor; inland the Sultan's authority is merely nominal and there is little security for life and property.

Oregon. The Constitution adopted in 1859 is still in force, except as stated below. Amendments proposed in and approved by the Legislature are submitted to the next elected Legislature, and if then approved are formally submitted to the people for ratification; but this method of ratification is not exclusive (see below). The Legislature or Legislative Assembly, consists of a Senate of thirty members, chosen for four years (half their number retiring every two years), and a House of sixty Representatives, elected for two years. Members of either House must be 21 years of age and must have resided in their county or district for one year next before election. Bills for raising revenue must originate in the House of Representatives. The Constitution was amended in 1902, under the terms of which amendment the people reserve to themselves the power to propose laws and amendments to the Constitution and to enact or reject the same at the polls independent of the Legislative Assembly, and also reserve the power at their own option to approve or reject at the polls any act of the Legislative Assembly. This is known as the initiative and referendum. Not more than eight per cent. of the legal voters are required to propose any measure to be voted upon by the people at the next ensuing general election. Measures thus initiated are enacted or rejected at the polls independently of the Legislative Assembly. Under the referendum, any bill passed by the Legislative Assembly, except such as are for the preservation of the public peace, health, and safety, may, by petition signed by five per cent. of the legal voters, be referred to the people to be voted on for approval or rejection at the next ensuing general election. By virtue of this provision several amendments to the Constitution have been voted on, some of which have been rejected and some adopted. A number of laws have been enacted under the initiative covering different subjects. The chief executive officer of the State is the gov-

ernor, who is elected for four years and exercises the powers usually entrusted to governors, including the pardoning power, and a limited veto which does not extend to acts referred to the people. Elective officers are the secretary of state, treasurer, attorney-general, and superintendent of public instruction, State printer, and labor commissioner. There are thirty-three counties in the State.

Panama. The Republic of Panama was constituted on November 3, 1903, having previously been a department of the Republic of Colombia. The inhabitants of the Isthmus of Panama being strongly in favor of the acquisition of the Panama Canal Concession by the United States and the construction by them of the canal, declared their independence. The United States Government at once recognized the new Republic, and concluded with it a treaty on November 18, 1903, guaranteeing and agreeing to maintain its independence. Panama then ratified the treaty. There is a President elected for four years. The Chamber of Deputies consists of thirty-two members elected for two years. The Republic is divided into seven provinces, each under a governor, with other subordinate officials.

Paraguay is a Republic, and is governed, under a Constitution proclaimed in November, 1870, by a President elected for four years, a Congress consisting of a Senate and a Chamber Deputies, both elected by universal suffrage, and five Ministers of State chosen by the President. The President has a salary of \$9,500, ministers of \$3,000, and the Senators and Deputies each receive \$1,000. The state religion is Roman Catholic, but all others are tolerated. Education is free and nominally compulsory. The army numbers about 1,500 men, but every citizen between 20 and 35 is liable to military service.

Pennsylvania. New Constitutions were adopted in 1790 and 1838 and the one now in force was adopted 1873, and amended 1901. The legislative power is vested in a General Assembly consisting of a Senate and a House of Representatives. General elections are held biennially. The Senate consists of fifty members chosen for four years, twenty-five Senators being elected at each General Assembly election. The House of Representatives consists of 204 members chosen for two years. Members of the General Assembly must have been citizens and inhabitants of the State four years and inhabitants of their respective districts one year next before their election. Amendments to the Constitution agreed to by a majority of each House, approved by a majority in each House of Legislature next elected, and ratified by the electors at a special election held for the purpose, become part of the Constitution. The supreme executive power is vested in a governor who is elected at the general election and holds office for four years. He is not eligible for election for the next succeeding term. He must be not less than 30 years of age and have been seven years resident in the State immediately before election; he must not be a member of Congress nor can he hold any office under the United States. His duties include the command of the military and

naval forces of the State, except when these are called into the actual service of the United States, the summoning of the Legislature when necessary, the granting of commissions, and the supervision of the execution of the laws. Every bill passed by both Houses requires the assent of the governor, who may within ten days remit it for consideration to the House in which it originated; if then the bill be approved by a two-thirds majority of each House it becomes law. A lieutenant-governor is chosen at the same time, in the same manner, and for the same term as the governor. A secretary of the commonwealth and an attorney-general are appointed by the governor, by and with the advice and consent of two-thirds of all the members of the Senate, during pleasure, and a superintendent of public instruction is similarly appointed for four years. The qualified electors choose at each general election a secretary of internal affairs for a period of four years, an auditor-general for a period of three years, and a state treasurer for a period of two years.

Persia. The form of government in Persia up to the year 1906 was, in the most important features, similar to that of Turkey. The Shâh, within the limitations imposed by the Mohammedan religion, was an absolute ruler, generally regarded by the people as the vice-gerent of the Prophet. In 1905, however, the Persian people demanded representative institutions, and in January, 1906, the government announced that the Shâh had given his consent to the establishment of a national council. Under the rescript of August 5, 1906, it was decided that the national council should consist of and be elected by members of the reigning dynasty, clergy, chiefs, nobles, landowners, merchants, and tradesmen. An ordinance of September 10, 1906, fixed the number of members at 156, and early in October elections were held. On October 12th, the national council (or as many of its members as could be got together) met, chose a president, and was welcomed by the shâh, whose speech was read before it. The constitution of January 1, 1907, signed by Muzaffer-ad-dîn, the late shâh, and countersigned by the Vali Ahd, the present shâh, and by the grand vizier, deals with the decree of August 5, 1906, and states the powers and duties of the national council, besides making provision for the regulation of its general procedure by the national council itself. The number of members is at present limited to 162, but may be raised to 200; members will be elected for two years; will meet annually, and will have immunity from prosecution, except with the knowledge of the national council. The publicity of their proceedings (except under conditions accepted by the national council) is secured. Ministers (or their delegates) may appear and speak in the national council, and will be responsible to that body which will have special control of financial affairs and internal administration. Its sanction will be required for all territorial changes, for alienation of state property, for the granting of concessions, for the contracting of loans, for the construction of roads and railways, and for the ratification of all treaties, except such as in the interest of the state require secrecy. There is to

be a senate of sixty members, of whom thirty are to be appointed to represent the shâh, and thirty to be elected on behalf of the national council, fifteen of each class being from Teheran, and fifteen from the provinces. Provision is made as to procedure in case of difference of opinion between the national council and the senate. The executive government is carried on under a ministry, the chief departments of which are: minister for war, minister for foreign affairs, minister for finance and treasury, and minister for interior.

Peru. The present Constitution, proclaimed October 16, 1856, was revised November 25, 1860. The legislative power is vested in a senate and a house of representatives. Both senators and deputies are elected by a direct vote. There are fifty-one senators and 116 deputies, and there are as many *suplentes*, or substitutes, as there are members in each chamber. Every two years one-third of the members of each chamber, as decided by lot, retire. Congress meets annually on July 28th, and sits for ninety days only. It may be summoned as often as necessary, but no extraordinary session may last more than forty-five days. The executive power is entrusted to a president, elected for four years, and not re-eligible till after another four years. He receives \$15,000 a year and \$9,000 for expenses. There are two vice-presidents, who take the place of the president only in case of his death or incapacity, and they are elected for four years. The vice-presidents receive no salary as such. The president and vice-presidents are elected by direct vote. The president exercises his executive functions through a cabinet of six ministers, holding office at his pleasure. The ministers are those of the interior, war and marine, foreign affairs, justice, with worship and instruction, finance and public works. Each minister receives \$3,000 a year. None of the president's acts have any value without the signature of a minister.

Portugal. The Constitution of 1826 (amended in 1852, 1885, and 1895), gives a special moderating power to the king. There are two legislative chambers, the peers and the deputies, collectively called the cortes. In case of a disagreement between the two legislative chambers, a committee of both decides, and if the committee disagree, the king decides. The chamber of peers consists of ninety members nominated for life, in addition to the princes of the blood, the twelve bishops of the continental dioceses, and fifty-two hereditary peers. The chamber of deputies is composed of members elected under a system of universal suffrage every four years, to the number of 155, of whom seven are elected by Portuguese colonies. The king has no veto on a law twice passed by both houses.

Prussia. The present Constitution of Prussia was drawn up by the government of King Friedrich Wilhelm IV., with the co-operation of a constituent assembly, sitting August–December, 1849, and was proclaimed January 31, 1850; but subsequently modified by a number of royal decrees. These fundamental laws vest the executive and part of the legislative authority in a king, who attains his majority upon accom-

plishing his eighteenth year. The Crown is hereditary in the male line, according to primogeniture. In the exercise of the government, the king is assisted by a council of ministers, appointed by royal decree. The legislative authority the king shares with a representative assembly, the landtag, composed of two chambers, the first called the "Herrenhaus," or house of lords,

and the second the "abgeordnetenhaus," or chamber of deputies. The assent of the king and both chambers is requisite for all laws. Financial projects and estimates must first be submitted to the chamber of deputies, and be either accepted or rejected *en bloc* by the Herrenhaus. The right of proposing laws is vested in the government and in each of the chambers.

POPULAR VOTE FOR PRESIDENT AND VICE-PRESIDENT
FROM 1789 TO THE PRESENT

Strictly speaking, there is no popular vote for President and Vice-President; the people vote for electors, and those chosen in each State meet therein and vote for the candidates for President and Vice-President. The record of any popular vote for electors prior to 1824 is so meager and imperfect that a compilation would be useless. In most of the States, for more than a quarter century following the establishment of the Government, the State Legislatures "appointed" the Presidential electors, and the people therefore voted only indirectly for them, their choice being expressed by their votes for members of the Legislature. In this tabulation only the aggregate electoral votes for candidates for President and Vice-President in the first nine quadrennial elections appears.

YEAR	PRESIDENTIAL CANDIDATES	STATE	PARTY	VOTE				CANDIDATES FOR VICE-PRESIDENT

* Prior to 1804 each elector was entitled to vote for two candidates for President. The candidate receiving the greatest number of votes was declared elected, while the candidate receiving the next highest vote was declared Vice-President. † Three States not voting. ‡ It is claimed that the first Republican party was the progenitor of the present Democratic party. § As there was no election the choice was decided by the House of Representatives. || Owing to the death of Horace Greeley the Democratic electors scattered their vote.

Rhode Island. On May 29, 1790, the State accepted the Federal Constitution and entered the Union as one of the thirteen original States. The charter of 1663, however, continued to be the constitutional law of the State down to 1842. In that year a new Constitution was adopted, which, with amendments, accepted between 1854 and 1903, provides for a Legislature called the General Assembly, consisting of a Senate and a House of Representatives. The Senate has thirty-eight members, one from each of the cities and towns, besides the governor who is *ex-officio* president, and the lieutenant-governor who is *ex-officio* a senator. The House of Representatives consists of seventy-two members, twelve of whom are from the city of Providence and the remainder from the other cities and towns according to population. Concurrent action between the two legislative bodies is necessary for the enactment of laws. Senators and representatives are elected at town, ward, and district meetings annually in November, and hold office for a year, commencing on the first Tuesday in January. The governor is the chief executive officer of the State, and his duty is to see that the laws are faithfully executed. He has no power to veto in legislation; most of the appointments he makes require the consent of the Senate.

The governor, lieutenant-governor, secretary of state, attorney-general, and the general treasurer are elected annually in the same manner, and at the same time, as the senators and representatives. The State is divided into five counties and thirty-eight cities and towns. The county divisions are now recognized only for the holding of courts and the jurisdiction of sheriffs. In the cities only certain property-holders and tax-payers can vote for members of councils.

Roumania. The Constitution now in force in Roumania was voted by a Constituent Assembly, elected by universal suffrage, in the summer of 1866. It has twice been modified, viz: in 1879, and again in 1884. The Senate consists of 120 members, elected for eight years, including two for the universities, and eight bishops. The heir to the crown is also a senator. The Chamber of Deputies consists of 183 members, elected for four years. A senator must be 40 years of age, and a deputy 25. Members of either House must be Roumanians by birth or naturalization, in full enjoyment of civil and political rights, and domiciled in the country. For the Senate an assured income of 9,400 lei (\$1,880) is required. All citizens of full age, paying taxes, are electors, and are divided into three electoral colleges. For the Chamber

of Deputies, electors who are in possession of property bringing in \$250 or upwards per annum vote in the first college. Those having their domicile and residence in an urban commune, and paying direct taxes to the state of \$4 or upwards annually, or being persons exercising the liberal professions, retired officers, or State pensioners, or who have been through the primary course of education, vote in the second college. The third college is composed of those who, paying any tax, however small, to the State, belong to neither of the other colleges; those of them who can read and write and have an income of 300 lei (\$60) from rural land, vote directly, as do also the village priests and schoolmasters, the rest vote indirectly. For each election every fifty indirect electors choose a delegate, and the delegates vote along with the direct electors of the colleges. For the Senate there are only two colleges. The first consists of those electors having property yielding annually at least \$400; the second, of those persons whose income from property is from \$160 to \$400 per annum. At the election of 1905 there were altogether 93,622 enrolled electors for the Chamber of Deputies, and 64,086 voted; for the Senate there were 24,571 enrolled electors, and 16,648 voted. Both Senators and Deputies receive 20 lei (\$4) for each day of actual attendance, besides free railway passes. The king has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of eight ministers, the president of which is prime minister, and may or may not have a special department.

Russian Empire. The Government of Russia is a constitutional hereditary monarchy, but, in fact, the whole legislative, executive, and judicial power is united in the Emperor, whose will alone is law. On August 6 (19), 1905, however, an elective State Council (*Gosudarstvennaya Duma*) was created, and on October 17 (30) a law was promulgated granting to the population the firm foundations of public liberty, based on the principles of the real inviolability of the person, and of freedom of conscience, speech, assembly, and association, and establishing as an unalterable rule that no law shall come into effect without the approval of the Duma, and that to the elected of the people shall be guaranteed the possibility of a real participation in the control of the legality of the acts of such authorities as are appointed by the Emperor. The Duma consists of members elected for five years and representing the governments or provinces and the greatest cities (St. Petersburg, Moscow, and twenty-six others). The election of the Deputies is indirect, and is made by electoral bodies of the chief towns of governments or provinces and of the greatest cities, composed of delegates chosen by the district or town elective assemblies. In towns, all lodgers occupying for twelve months lodging let to them, may vote in these assemblies, also salaried clerks of state, or of municipal or railway administration; in the country, all owners of a determinate area of land, different in different districts, or of non-industrial estate more than 50,000 roubles in value, are electors; the *volosts* or peasant communities and manufac-

tories with more than fifty work people are represented in the electoral assemblies by delegates, two for each *volost*, and one for each thousand workmen. Students, soldiers, governors of provinces (in provinces governed by them), and police-officers (in the localities for which they act) may not vote. Under a manifesto and ukases published on March 6, 1906 (N. S.), the Council of the Empire is reorganized and changes are made in the constitution of the Duma. The Council of the Empire is to consist of an equal number of elected members and members nominated by the Emperor, and will be convoked and prorogued annually by imperial ukase. The Council of the Empire and the Duma will have equal legislative powers and the same right of initiative in legislation and of addressing questions to ministers. Every measure, before being submitted for the imperial sanction, must be passed by both the Duma and the Council of the Empire, and all such as are rejected by one of the two legislative institutions will not be laid before the Tsar at all. Both the Duma and the Council have the right to annul the election of any of their members. The elective members of the Council will be eligible for nine years, a third of the number being elected every three years. Each assembly of the *Zemstvo* of each government will elect one member. Six members will be returned by the synod of the Orthodox Church, six by the representatives of the Academy of Sciences and the Universities, twelve by the representatives of the bourses of commerce and of industry, eighteen by the representatives of the nobility, and six by the representatives of the landed proprietors of Poland, assembled in congress at Warsaw. The congress of the representatives of the Academy of Sciences, the nobility, and the commercial and industrial communities for the election of their members to the Council of the Empire will meet in St. Petersburg. In those provinces of European Russia which have no *Zemstvo*, a congress of the representatives of the landed proprietors will assemble in the chief town of their province to elect one member for each province to the Council of the Empire. All members of the Council must have attained their 40th year and have an academical degree. The president and vice-president will be appointed by the Tsar. The elective members of the Council will receive an honorarium of 25 roubles (\$12.50) a day during the session. The sittings of both the Duma and the Council of the Empire will be public. The closure of a debate may be voted by a simple majority. Neither the Council of the Empire nor the Duma is empowered to receive deputations or petitions. Ministers will be eligible for the Duma and, in the capacity of elected members, qualified to vote. Members of the Duma are paid 10 roubles (\$5) per day during session, and once a year traveling expenses to and from St. Petersburg at the rate of 5 kopecks per verst (40c. per mile). Laws voted by the two Houses will be submitted for the imperial sanction by the president of the Council of the Empire. The members of both institutions will have the privilege of personal immunity during the session. They will only be liable to arrest with the permission

of the Duma or the Council of the Empire, as the case may be, except in cases of flagrant offences or offences committed in the exercise of their duties. The ukases further provide that bills rejected by the Tsar cannot be brought forward again in the course of the same session, while bills rejected by one of the legislative bodies cannot be brought forward again without the imperial consent. The administration of the empire is still entrusted to great boards, or councils, possessing separate functions. One of the great colleges, or boards of government, is the Ruling Senate or "Pravitelstvuyushchiy Senat," established by Peter I. in the year 1711. The functions of the Senate are partly of a deliberative and partly of an executive character. To be valid, a law must be promulgated by the Senate. It is also the high court of justice for the empire. The Senate is divided into six departments or sections, which all sit at St. Petersburg, two of them being Courts of Cassation. Each department is authorized to decide in the last resort upon certain descriptions of cases. The Senators are mostly persons of high rank, or who fill high stations; but a lawyer of eminence presides over each department, who represents the emperor, and without whose signature its decisions would have no force. In the *plenum*, or general meeting of several sections, the minister of justice takes the chair. A special department consisting of six members is entrusted with disciplinary judgments against officials of the Crown. Another is the college, established by Peter I. in the year 1721, the Holy Synod, and to it is committed the superintendence of the religious affairs of the empire. It is composed of the three metropolitans (St. Petersburg, Moscow, and Kiev), the archbishop of Georgia (Caucasus), and several bishops sitting in turn. All its decisions run in the emperor's name, and have no force till approved by him. A third board of government is the committee of ministers, reorganized by a decree of October 19 (November 1), 1905. The fourth board of government, the most important since the decree for its reorganization issued October 19 (November 1), 1905, is the council of ministers. It consists of all the ministers, and of the general directors of the most important administrations.

Local Government.—The empire is divided into governments or provinces (*oblast*), and districts (*uyezd* or *okrug*). There are seventy-eight governments (forty-nine in European Russia proper, ten in Poland, eight in Finland, seven in Caucasus, four in Siberia); nineteen provinces (one in European Russia, five in Caucasus, nine in Central Asia, four in Siberia, and one section (*otdyel*)—the north part of the island of Sakhalin. Some of the governments or provinces are united into general governments. At the head of each general government is a governor-general, the representative of the emperor, who as such has the supreme control and direction of all affairs, whether civil or military. In Siberia the governors-general are each assisted by a council, which has a deliberative voice. A civil governor assisted by a council of regency, to which all measures must be submitted, is established in each government, and a military

governor in seventeen provinces, one town (Kronstadt) and the island of Sakhalin. A vice-governor is appointed to fill the place of the civil governor when the latter is absent or unwell. There is, also, in each government a council of control under the presidency of a special officer, depending directly on the department of control. Each government is divided into from five to fifteen districts (815 in all Russian Empire), having each several administrative institutions. The townships (*gradonachalstvo*) of St. Petersburg, Moscow, Odessa, Kerch, Nikolayev, and Rostov-on-Don, are administered by special governors (*gradonachalnik*); Cronstadt is under a separate military governor.

Scotland. By the local government act of Great Britain, in 1894, a local government board for Scotland was constituted. It consists of the secretary for Scotland as president, the solicitor general of Scotland, the under secretary for Scotland, and other three members nominated by the Crown. The local government act which was passed for Scotland in 1889, followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the commissioners of supply and road trustees were either wholly or in part transferred to the new councils, which took over their duties and responsibilities in 1890. The act of 1894 provided that a parish council should be established in every parish to take the place of the parochial boards and to exercise powers similar to those of the parish councils in England. Municipal bodies exist in the towns of Scotland, as in those of England, but instead of their magistrates being called aldermen, they are called bailies, and instead of their chief magistrates being called mayors they are called provosts. There are in Scotland five kinds of burghs—(1) burghs of barony; (2) burghs of regality (no practical distinction between these two); the councils of these two classes of burghs ceased to exist in 1893, by statutory enactment; (3) royal burghs, representatives of which meet together annually in a collective corporate character, as the "convention of royal burghs," for the transaction of business; (4) parliamentary burghs, which possess statutory constitutions almost identical with those of the royal burghs; (5) police burghs, constituted under the burgh police (Scotland) act, 1892, in which the local authority are the police commissioners. These two latter burghs, by acts passed in 1879 and 1895, are enabled to send representatives to the convention.

Servia. The independence of Servia, which, was formerly an autonomous province of Turkey, was established by the Treaty of Berlin, 1878. The constitution, voted by the national assembly of 1889, was abrogated by the king in May, 1894, and an older constitution of 1869, temporarily revived; but in 1903 the 1889 constitution was restored. The executive is vested in the king and his ministers, and the legislative authority in the king in conjunction with the national assembly or *narodna-skuptschina* and a state council. The former consists of 160 deputies elected by universal suffrage for four years; the latter of sixteen members, eight nom-

inated by the king and eight elected by the assembly.

Siam. The executive power is exercised by the king advised by a cabinet (*senabodi*) consisting of the heads of the various departments of the government: foreign affairs, interior, justice, finance, public instruction, public works, war, marine, police, etc. Most of the portfolios are held by the king's half-brothers and sons. The law of 1874, constituting a council of state, has now been superseded by the royal decree of 1895, creating a legislative council. The latter is composed of the ministers of state and others, not less than twelve in number, appointed by the Crown. The total membership is now fifty-one. In the preamble of the royal decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least once a week, and it may appoint committees of three or four members, with the addition of competent outsiders who must not outnumber the members. An important article gives the legislative council power to promulgate laws without the royal assent in the event of any temporary disability of the Crown. At other times the royal signature is indispensable. This council has shown considerable legislative activity. The Siamese Malay States are administered by the rajahs mostly under the control of commissioners sent from Bangkok.

South Carolina. The first Constitution, adopted in 1776, was succeeded by others in 1778, 1790, 1865, 1868, and 1895, the last-named being still in force. Amendments proposed in either House of the Legislature, and approved by a two-thirds vote of each House, are submitted to the popular vote; if approved by a majority of the voters, and by a majority of each House of the next Legislature they become part of the Constitution. The Legislature, called the General Assembly, consists of a Senate of forty-one members, elected for four years (half retiring biennially), and a House of Representatives of 124 members, elected for two years. Senators must be 25, and Representatives 21 years of age, and all the Legislators must be duly qualified electors of the State. Revenue bills must originate in the House of Representatives. The chief executive officer of the State is the governor, elected for two years. He is commander-in-chief of the militia; has power to pardon or reprieve, and has a veto which may be overcome by a two-thirds vote of both Houses. He may call special sessions of the Legislature. Other State officials are the lieutenant-governor, the treasurer, the attorney-general, the comptroller-general, the adjutant general, and the superintendent of education.

South Dakota. Under the Constitution of South Dakota, adopted in 1889, the legislative power is vested in a Senate and a House of Representatives; but to the people is reserved the right that not less than 5 per cent. of the electors may (1) propose measures which the Legislature shall enact and submit to a vote of the general body of electors; (2) demand a referendum in respect of laws enacted by the Legislature, before such laws take effect, save in cases of urgency. The Constitution provides that the Senate shall consist of not less than twenty-five and not more

than forty-five members, and the House of Representatives of not less than seventy-five, nor more than 135 members. Both Senators and Representatives must, among other qualifications have reached the age of 25 years, and have resided in the State for two years immediately preceding election. The term of office of both is two years. Any bill may originate in either House. The House of Representatives has the sole power of impeachment; impeachments must be tried by the Senate. The chief executive authority is in the hands of a governor, elected for two years. He himself must be a qualified elector and a citizen of the United States, must have attained the age of 30 years, and have resided in the State during the two years immediately preceding his election. He has the powers usually resident in State governors, including the limited veto and pardoning powers. At the same time as the governor, and for the same period, there are elected a lieutenant-governor, who acts as president of the Senate; a secretary of state, an auditor, a treasurer (who may not hold office for more than two terms consecutively), a superintendent of public instruction, a commissioner of schools and public lands, and an attorney-general.

Spain. By the constitution of 1876, Spain is declared a constitutional monarchy, with the executive power vested in the king, and the legislative power in the cortes with the king. The cortes consists of senate and congress. The senate is composed of three classes: those who sit by right of royal or noble birth or official position, 100 members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the communal and provincial states, the church, the universities, and the largest taxpayers of the kingdom. The elected senators must be renewed by one half every five years, and altogether whenever the cortes are dissolved. The congress contains 406 deputies, elected for five years by citizens of 25 years of age who have enjoyed full civil rights in any municipality for two years. There is some provision for minority representation, and for the election of ten deputies, who, though not returned in any single district, yet receive a cumulative vote of more than 10,000 in several districts. The senate and congress are equal in authority, and either of them, or the king, can introduce new laws. Each of the forty-nine provinces has its own parliament, and each commune its own elected *ayuntamiento*, presided over by the *alcalde*, for municipal and provincial administration; and by the constitution neither the executive nor the cortes can (although they do) interfere in municipal or provincial administration, except for the protection of national and permanent interests. The state religion is the Roman Catholic, and the public worship of any other creed is forbidden.

In 1903, the army was reorganized on the basis of an effective of 80,000 men; the second battalions of the infantry regiments and the fourth squadrons of the cavalry being reduced. In 1907 the effective was raised to 100,000 owing to increased establishments at Ceuta, Melilla, and Minorca, the strengthening of infantry battalions in the Peninsula, and other increases.

ned by Legislature. (g) Or persons *non compos mentis*, convicted of bribery or infamous crime, until restored to right
e, under guardianship. (h) Also persons excused from paying taxes at their own request, and those unable to read the
Constitution in English, or write. (j) No soldier, seaman, or marine deemed a resident because stationed in the State.
habitation not residence. (l) Thirty days in election district. (m) Those able to read and write or who own \$300 worth
property assessed in their name, or whose father or grandfather was entitled to vote on January 1, 1867. (n) Also
s, sailors, and marines in United States service. (x) Owners of real estate, one year.

Sweden. Under the Swedish Constitution of 1809, with subsequent amendments, the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in all other respects such power is exercised jointly by the Diet, which alone may impose taxes. Every new law must have the assent of the king. The Diet consists of two chambers, the first of 150 members (elected by provinces and municipalities for nine years), the second of 230 members (150 representing rural and eighty urban constituencies), elected directly for three years. Members of the second chamber are paid \$330 per session.

Switzerland is a confederation of nineteen entire and six half cantons, which have been united for federal purposes since 1848. The Constitution of 1874 vests supreme legislative and executive authority in two chambers — viz: (1) a state council of forty-four members, chosen two for each canton and one for each half-canton for three years; and (2) a national council of 167 delegates of the Swiss people (of whom twenty-nine are sent by Berne and twenty-two by Zurich), chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the federal assembly, to which is confided the supreme government. The executive authority is deputed to a federal council of seven members, elected for three years by the assembly, the president and vice-president of which are elected annually, and are the first magistrates of the republic. The council sits at Berne, which is the headquarters of the federal administration. The principles of the referendum and of the initiative are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question. The federal government can alone contract treaties or declare war. The army, postal system, finance, and customs are also under its control. Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labor legislation may be initiated either by the confederation or by the cantons. The neutrality of the country is guaranteed by the treaty of Vienna, 1815.

Tennessee. The Constitution adopted in 1796, was superseded by that of 1834, which gave place to that of 1870, now in force. Constitutional amendments proposed in either House of the Legislature and agreed to by a majority of all the members of each are referred to the Legislature next elected. If they are then passed by a two-thirds majority of the members elected to each House, they are submitted to the popular vote, and, if ratified by a majority of those who vote, become part of the Constitution. Amendments, however, may not be proposed in the Legislature oftener than once in six years. The legislature, known as the General Assembly, consists of a Senate of thirty-three members, elected for two years, and a House of Representatives of ninety-eight members elected also for two years. Any bill may originate in either House. Senators must be 30 years of age, and representatives 21; both must have resided in the State three years and in the county or dis-

trict one year next before election. No clergyman of any denomination is eligible to either House. The chief State officer is the governor, who is elected for two years. "He shall not be eligible more than six years of any term of eight." He has the usual powers of State governors, including limited pardoning powers and a veto which may be overridden by a majority of the members of each House. Other State officers are the treasurer, comptroller, adjutant-general, attorney-general, and superintendent of public instruction.

Texas. The Constitution of 1845 was succeeded by new Constitutions in 1866, 1868, and 1876. That of 1876, amended seven times (last in 1904), is still in force. Amendments proposed in either House of the Legislature, approved by a two-thirds majority of the members of each House, and ratified by a majority of the electors voting on them, become part of the Constitution. The Legislature consists of a Senate of thirty-one members, elected for four years (about half their number retiring every two years), and a House of Representatives of 133 members. Bills for raising revenue must originate in the House of Representatives. The Senate tries cases of impeachment brought by the other House. Eligible as Senators are citizens 26 years of age, resident in the State five years next before the election; as Representatives, citizens 21 years of age, resident in the State two years next before the election. The chief executive officer is the governor, elected for two years. He has the authority usually vested in State governors, including the limited veto and pardoning powers. With the advice and consent of the Senate he appoints the State secretary, and also fills vacancies not otherwise provided for. State officials elected for two years are the lieutenant-governor, comptroller, treasurer, commissioner of the general land office, and attorney-general.

Turkey. The commands of the sultan are absolute, unless opposed to the express directions of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the grand vizier and the Sheik-ul-Islam, who are appointed by the sultan, the latter with the nominal concurrence of the ulema or general body of lawyers and theologians, over which the Sheik-ul-Islam, as head of the Church, presides. The grand vizier, as head of the temporal government, is assisted by the medjliss-i-hass or cabinet of ministers, of whom there are twelve, including the grand vizier and the Sheik-ul-Islam. The ten other ministers each take charge of a department, *e. g.*, the interior, war, foreign affairs, finance, justice, etc.

United States. The Declaration of Independence was adopted by the First Congress of the United States, July 4, 1776. On November 30, 1782, Great Britain acknowledged the independence of the colonies, and on September 3, 1783, the treaty of peace was concluded. The form of government is based on the Constitution adopted September 17, 1787, to which ten amendments were added, December 15, 1791; an eleventh amendment, January 8, 1798; a twelfth amendment, September 25, 1804; a thirteenth, December 18, 1865; a fourteenth,

July 28, 1868; and a fifteenth, March 30, 1870. The government is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive is vested in the President, who holds his office during the term of four years. He is commander-in-chief of the army and navy and of the militia in the service of the United States. The Vice-President is, *ex-officio*, president of the Senate, and, in case of the death or resignation of the President, he becomes President for the remainder of the term. Electors for President and Vice-President are chosen in all States the Tuesday after the first Monday in November of every fourth year (leap year), and the President is inaugurated on the 4th of March next following. By an act which became a law January 19, 1886, in case of the removal, death, resignation, or inability of both President and Vice-President, the Secretary of State succeeds, and after him other members of the Cabinet in this order: Secretary of Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy, Secretary of the Interior (the Secretary of Agriculture cannot succeed, as his office was created after the passage of the Acts of the Forty-ninth Congress, Chapter IV). The incumbent shall act as President until the disability of the President is removed or a new President shall be elected. In case of death or removal of the Vice-President the duties of the office shall fall upon the pro tempore president of the Senate, who receives the salary of Vice-President. Members of the Cabinet are appointed by the President, but are confirmed by the Senate. The legislative power is vested in a Congress, which consists of a Senate and a House of Representatives. The judicial power is vested in a Supreme Court consisting of a chief justice and eight associate justices, appointed by the President and approved by the Senate. The United States is composed of thirteen original States, seven States which were admitted without having been organized as Territories, and twenty-six States which have been Territories. States are admitted into the Union by special acts of Congress, either in the form

of “enabling acts,” providing for the drafting and ratification of a State Constitution, in which case the Territory becomes a State as soon as the conditions are fulfilled, or by accepting a Constitution already framed, and at once gaining admission. In four of the six Territories, including Hawaii, there are local Legislatures, the form of which has been prescribed by the Federal Government. Acts made by the Legislatures may be modified or annulled by the Federal Congress. Territorial governors are appointed by the President for terms of four years. The unit of local government in New England is the township, governed directly by the voters. In large cities the city government takes its place. Townships are united to form counties. In the South the unit is the county. In the Middle and Northwestern States the two systems of local government are mixed. In the West the township system is used and public lands are divided into townships six miles square. Representatives to the Federal Congress must not be less than 25 years of age and must have been citizens of the United States for seven years, and residents of the State in which they are elected. In addition to the Representatives from the States, each Territory is allowed a “delegate,” who has a right to speak on any subject and make motions, but not to vote. Senators must be 30 years of age, must have been citizens of the United States for nine years and residents of the State in which they are chosen. The franchise is not absolutely universal. In most States residence for at least one year is necessary; in Kentucky and Rhode Island two years’ residence is necessary; in Michigan and Maine three months is the minimum. In some of the Western States unnaturalized persons who have declared their intention of becoming citizens are admitted to the franchise. Four States admit women to the franchise on equal terms with men. Untaxed Indians are excluded from the right to vote, and in some States convicts, duellists, and fraudulent voters are debarred. The following is a synoptical outline of the main features of the constitutional government of the United States:

THE LEGISLATIVE DEPARTMENT

THE SENATE

Number.—Two Senators from each State.

Elected.—By the State Legislatures.

Term.—Six years; one-third of the Senate being elected every two years.

Eligibility.—Citizen of the United States nine years; resident of the State; minimum age, 30 years.

Salary.—Fixed by law at \$7,500 per year.

President of the Senate.—The Vice-President.

Powers of the Senate:

Confirms or rejects nominations of the President.

Ratifies or rejects treaties with Foreign Powers.

Elects President *pro tempore* of the Senate, and its other officers.

Elects Vice-President of the United States if regular election fails.

Acts as a Court for the Trial of Impeachments.

THE HOUSE OF REPRESENTATIVES

Number.—Three hundred and eighty-six members, according to the present apportionment.*

Elected.—By the voters of the Congressional Districts.

Term.—Two years,—the entire House being elected every two years.

Eligibility.—Citizen of the United States seven years; resident of the State; minimum age, 25 years.

* There are, besides, two Territorial Delegates from the Philippines, and one each from Porto Rico, Hawaii, and Alaska.

Salary.— Fixed by law at \$7,500 per year; the Speaker, \$12,000 per year.

Powers of the House of Representatives:—

Elects its Speaker (presiding officer) and its other officers.

Elects President of the United States if the regular election fails.

Prosecutes Impeachments before the Senate.

Originates all bills for raising revenue.

THE CONGRESS

Consisting of both the Senate and the House of Representatives as coördinate bodies.

Duration.— The term of each Congress is for two years, commencing March 4th of the odd years.

Regular Sessions.— Annual, beginning the first Monday in December.

Special Sessions.— At the call of the President.

Membership.— Each House is the judge of the elections and qualifications of its own members.

Congress has General Powers of Legislation:—

To provide for the raising and disbursement of revenue.

To borrow money; to coin money and to regulate its value; and to fix the standard of weights and measures.

To regulate foreign and interstate commerce.

To declare war, and to maintain an army and navy.

To establish post-offices and post roads.

To enact patent and copyright laws.

To enact uniform naturalization and bankruptcy laws.

To provide for the punishment of crimes against the United States.

To establish courts inferior to the Supreme Court.

To provide for organizing and calling out the militia.

To admit new States into the Union.

To provide for the government of the Territories.

To exercise exclusive jurisdiction over the District of Columbia, public lands, public buildings, forts, and navy yards.

To enact all laws necessary and proper for carrying into execution all the powers vested by the Constitution in the government of the United States.

THE EXECUTIVE DEPARTMENT

THE PRESIDENT

How Elected.— The several steps in the election of the President are:

State Electors are chosen at a General Election held on the *Tuesday following the first Monday of November* of every fourth year; the number of Electors of each State being equal to the number of Senators and Representatives to which the State is entitled in Congress.

The Electors meet in their respective States on the *second Monday in January* following their election, and vote by ballot for President and Vice-President; and at the same time make certificates of their vote and transmit the same to the President of the Senate.

The Senate and House of Representatives meet together on the *second Wednesday of February* next ensuing, and count the votes of the State Electors, when, if there is an election, the President of the Senate declares who is elected President and Vice-President.

In case there is no choice by the State Electors, the President is elected by the House of Representatives from the three candidates who received the most electoral votes for President; in which election the vote is taken by States, each State having but one vote, and a majority of all the States being necessary to a choice.

Term of Office.— Four years.

Eligibility.— A natural born citizen; resident of the United States fourteen years; minimum age. 35 years.

Salary.— Fixed by law at \$75,000 per year.

Powers and Duties of the President:—

Commander-in-Chief of the Army and Navy.

Communicates with Congress by message.

Approves or disapproves Acts of Congress.

Makes treaties with advice and consent of the Senate.

Appoints Public Officers with the advice and consent of the Senate.

Commissions Public Officers of the United States.

Grants reprieves and pardons for offenses against the United States.

The Vice-President:—

Elected by State Electors the same as the President; or

By the Senate, in case there is no choice by the State Electors.

Term of Office,— same as for the President.

Eligibility,— same as required of the President.

Salary,— fixed by law at \$12,000 per year.

The Presidential Succession:— In case of the removal, death, resignation, or inability

Of the President, the Vice-President takes the President's place.

Of both President and Vice-President, the heads of the Executive Departments succeed to

the Presidency in the order in which the Executive Departments are named below; but such officer must be constitutionally eligible to the Presidency, and not under impeachment.

THE EXECUTIVE DEPARTMENTS

Department of State.—Has charge of foreign affairs.

Treasury Department.—Has charge of fiscal affairs.

Department of War.—Has charge of the Army and military affairs.

Department of Justice.—Has charge of the legal affairs of the Government.

Post-office Department.—Has charge of postal affairs.

Navy Department.—Has charge of the Navy and naval affairs.

Department of the Interior.—Has charge of domestic affairs, including public lands, pensions, patents, Bureau of Education, etc.

Department of Agriculture.—Has charge of agricultural affairs, including Weather Bureau, etc.

Department of Commerce and Labor.—Has charge of domestic and foreign affairs, relating to commerce, transportation, Department of Labor, etc.

THE CABINET

Composed of the Heads of the Executive Departments.

Appointed by the President with the advice and consent of the Senate.

Salary.—Fixed by law at \$12,000 per year for each member of the Cabinet.

THE PRESIDENT AND LEGISLATION

Acts of Congress become laws: —

When signed (approved) by the President; or,

By his failure to make objections in writing (veto) within ten days after any act is submitted to him, unless Congress by adjournment within that time prevents its return; but

Congress has power to pass a law over the President's veto by a vote of two-thirds of each House.

THE JUDICIAL DEPARTMENT

JUDGES OF THE UNITED STATES COURTS

Appointed by the President with the advice and consent of the Senate.

Tenure of Office.—During life or good behavior; but may retire on full salary after reaching the age of seventy years, and after ten years' service on the bench.

THE SUPREME COURT OF THE UNITED STATES

Members.—A Chief Justice and Eight Associate Justices.

Salaries.—Chief Justice, \$13,000; Associate Justices, each \$12,500.

Terms of Court.—One each year, beginning on the second Monday in October.

Original Jurisdiction: —

In all cases affecting Ambassadors, Ministers, and Consuls.

In all cases in which a State is a party.

Appellate Jurisdiction: — In cases of law and equity where the Inferior Courts have original jurisdiction, with such exceptions and regulations as Congress has made.

The Chief Justice.—Presides over the Senate when it sits as a Court of Impeachment for the trial of the President.

INFERIOR COURTS

Jurisdiction: —

In cases between citizens of different States.

In cases in which the United States is a party.

In cases of admiralty and maritime jurisdiction.

In trials for crimes against the United States; but the trial of crimes must be by jury, and must be held in the State where the crime was committed.

Appeals to the Supreme Court may be had in all cases of law and equity, with such exceptions and regulations as Congress has made.

KINDS OF INFERIOR COURTS

United States Circuit Courts of Appeals: —

Organized in 1891 to relieve the United States Supreme Court in Appellate Cases.

Number.—One in each Judicial Circuit.

Members.—Three judges selected from the Circuit and District Courts.

United States Circuit Courts: —

Number of Circuits.—Nine.

Number of Judges.—Each Circuit has two, three, or four Circuit Judges, and a Justice of the Supreme Court is assigned to each Circuit. The District Judge also may sit in a Circuit Court.

Salary of Circuit Judges.—Fixed by law at \$7,000 per year.

United States District Courts: —

Number of Districts.—One or more in this State. At present there are seventy-three Judicial Districts.

Salary of District Judge.—Fixed by law at \$6,000 per year.

United States Court of Claims:—

Jurisdiction.—Claims against the United States, including all claims which may be referred to it by Congress.

Members.—One Chief Justice and four Associate Justices.

Salaries.—Chief Justice, \$6,500; Associate Justices, each \$6,000.

In addition to the above named Courts, Congress has established courts of local jurisdiction in the District of Columbia and in the Territories, viz:

Court of Appeals of the District of Columbia.—One Chief Justice and two Associate Justices.

Supreme Court of the District of Columbia.—One Chief Justice and five Associate Judges.

United States Courts in Organized Territories.—One Chief Justice and several Associate Judges, appointed by the President for four years.

District Court of Alaska.—Consisting of three Judges.

United States Courts (special) in Hawaii, Porto Rico, and the Philippines.

Department of State. The Secretary of State is charged, under the direction of the President, with the duties appertaining to correspondence with the public ministers and the consuls of the United States, and with the representatives of foreign powers accredited to the United States; and to negotiations of whatever character relating to the foreign affairs of the United States. He is also the medium of correspondence between the President and the chief executives of the several States of the United States; he has the custody of the Great Seal of the United States, and countersigns and affixes such seal to all executive proclamations, to various commissions, and to warrants for the extradition of fugitives from justice. He is regarded as the first in rank among the members of the Cabinet. He is also the custodian of the treaties made with foreign States, and of the laws of the United States. He grants and issues passports, and exequaturs to foreign consuls in the United States are issued through his office. He publishes the laws and resolutions of Congress, amendments to the Constitution, and proclamations declaring the admission of new States into the Union.

SECRETARIES OF STATE

PRESIDENTS	CABINET OFFICERS	Resi- dences	Date of Ap- point- ment
Washington, .	Thomas Jefferson, . .	Va.	1789

Treasury Department. The Secretary of the Treasury is charged by law with the management of the national finances. He prepares plans for the improvement of the revenue and for the support of the public credit; superintends the collection of the revenue, and directs the forms of keeping and rendering public accounts and of making returns; grants warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submits to Congress estimates of the probable revenues and disbursements of the Government. He also controls the construction of public buildings; the coinage and printing of money; the administration of the Life-Saving, Revenue-Cutter, and the Public Health and Marine-Hospital branches of the public service, and furnishes generally such information as may be required by either branch of Congress on all matters pertaining to the foregoing.

The routine work of the Secretary's office is transacted in the offices of the Supervising Architect, Director of the Mint, Director of Engraving and Printing, Surgeon-General of the Public Health and Marine-Hospital Service, General Superintendent of the Life-Saving Service, and in the following divisions: Bookkeeping and warrants; appointments; customs; public moneys; loans and currency; revenue-cutter; stationery, printing, and blanks; mails and files; special agents, and miscellaneous.

War Department. The Secretary of War is head of the War Department, and performs such duties as are required of him by law or may be enjoined upon him by the President concerning the military service.

He is charged by law with the supervision of all estimates of appropriations for the expenses of the Department, including the military establishment; of all purchases of army supplies; of all expenditures for the support, transportation, and maintenance of the army, and of such expenditures of a civil nature as may be placed by Congress under his direction.

He also has supervision of the United States Military Academy at West Point and of military education in the army, of the Board of Ordnance and Fortification, of the various battle-field commissions, and of the publication of the Official Records of the War of the Rebellion.

He has charge of all matters relating to national defense and seacoast fortifications, army ordnance, river and harbor improvements, the prevention of obstruction to navigation, and the establishment of harbor lines, and all plans and locations of bridges authorized by Congress to be constructed over the navigable waters of the United States require his approval. He also

has charge of the establishment or abandonment of military posts, and of all matters relating to leases, revocable licenses, and all other privileges upon lands under the control of the War Department.

Department of Agriculture. The Secretary exercises personal supervision of public business relating to the agricultural industry. He appoints all the officers and employees of the Department with the exception of the Assistant Secretary and the Chief of the Weather Bureau, who are appointed by the President, and directs the management of all the divisions, offices, and bureaus embraced in the Department. He sustains an advisory relation to the agricultural experiment stations deriving support from the National Treasury; has control of the quarantine stations for imported cattle, of interstate quarantine rendered necessary by sheep and cattle diseases, and of the inspection of cattle-carrying vessels; and directs the inspection of domestic meats and of all imported food products. He also is charged with carrying into effect the laws prohibiting the transportation by interstate commerce of game killed in violation of local laws and excluding from importation certain noxious animals, and has authority to control the importation of other animals.

Department of Commerce and Labor. The Secretary of Commerce and Labor is charged with the work of promoting the commerce of the United States, and its mining, manufacturing, shipping, fishery, transportation, and labor interests. His duties also comprise the investigation of the organization and management of corporations (excepting railroads) engaged in interstate commerce; the gathering and publication of information regarding labor interests and labor controversies in this and other countries; the administration of the Light-House Service, and the aid and protection to shipping thereby; the taking of the census, and the collection and publication of statistical information connected therewith; the making of coast and geodetic surveys; the collecting of statistics relating to foreign and domestic commerce; the inspection of steamboats, and the enforcement of laws relating thereto for the protection of life and property; the supervision of the fisheries as administered by the Federal Government; the supervision and control of the Alaskan fur-seal, salmon, and other fisheries; the jurisdiction over merchant vessels, their registry, licensing, measurement, entry, clearance, transfers, movement of their cargoes and passengers, and laws relating thereto, and to seamen of the United States; the supervision of the immigration of aliens, and the enforcement of the laws relating thereto, and to the exclusion of Chinese; the custody, construction, maintenance, and application of standards of weights and measurements; and the gathering and supplying of information regarding industries and markets for the fostering of manufacturing. He has power to call

upon other Departments for statistical data obtained by them.

It is his further duty to make such special investigations and furnish such information to the President or Congress as may be required by them on the foregoing subject-matters and to make annual reports to Congress upon the work of said Department.

Uruguay. The Republic of Uruguay, formerly a part of the viceroyalty of Spain, and subsequently a province of Brazil, declared its independence, August 25, 1825, which was recognized by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was sworn July 18, 1830. By the terms of this charter, the legislative power is in a Parliament, composed of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from February 15th to July 15th. In the interval of the session, a permanent committee of two senators and five members of the lower house assume the legislative power, as well as the general control of the administration. The representatives are chosen for three years, in the proportion of one to every 3,000 inhabitants, of male adults who can read and write. The senators are chosen by an electoral college, whose members are directly elected by the people. There is one senator for each department, chosen for six years, one-third retiring every two years. There are sixty-nine representatives and nineteen

senators. The executive is given by the Constitution to the president of the Republic, elected for the term of four years. The president is assisted in his executive functions by a council of ministers divided into five departments, namely, that of the interior, foreign affairs, finance, war and marine, and instruction and public works.

Utah. The original Constitution of 1895 is in force as amended in 1900. The Legislature consists of a Senate and a House of Representatives; but the Constitution provides for the initiation of any desired legislation by the legal voters or such number of them as may be determined by law, and such voters may require any law passed by less than a two-thirds vote of each House of the Legislature to be submitted to the voters of the State before coming into effect. The Senate (in part renewed every two years) consists of eighteen members, elected for four years; the House of Representatives has forty-five members elected for two years. Bills may originate in either House. The House of Representatives may impeach; the Senate tries impeachments. Eligible to either House are citizens 25 years of age, three years resident in the State, and one year in the district next before the election. Amendments to the Constitution may be proposed in either branch of the Legislature, but to be embodied in the Constitution, they must be carried by a two-thirds vote of all the members of each House and ratified by a majority vote of the people. The chief executive power is vested in a governor elected for four years. He is commander-in-chief of the militia. With the consent of the Senate he has the appointment of various officials. The governor, justices of the Supreme Court, and attorney-general constitute a board of pardons. The governor has the power of veto but its exercise may be overridden by a two-thirds vote of all the members of each House. Other State officials are the secretary of state, auditor, the treasurer, the attorney-general, and the superintendent of public instruction; all elected for four years. There are twenty-seven counties in the State.

Venezuela. The Republic of Venezuela was formed in 1830, by secession from the other members of the Republic of Colombia. The Constitution in force is that of 1904. Legislative authority is vested in a congress of two chambers, the senate and the chamber of deputies. The former consists of twenty-six members elected for six years, two for each state, Venezuelans by birth and over 30 years of age. The latter is constituted as follows: Each state chooses by direct election one deputy, a Venezuelan by birth and over 21 years of age, for every 40,000 inhabitants, and one more for an excess of 20,000. The federal district and the territories which are sufficiently populous elect deputies in manner prescribed by law. Deputies are elected for six years. Congress meets biennially and sits for ninety days. Executive power is in the hands of the president and cabinet of ministers. The president holds office for six years and cannot be elected for the following term. He must be a Venezuelan by birth and over 30 years of age. In case of temporary or permanent inability to

act, his place is taken by the first and second vice-presidents. The presidents and vice-presidents are chosen by an electoral body which is itself elected by congress within fifteen days of its assembling, and which consists of a senator or deputy for each of the federal entities and one additional for the federal district. The cabinet consists of the ministers of internal affairs, foreign affairs, finance, and public credit, war, and marine, development, public works, public instruction.

Vermont. The Constitution in force at the time of admission was that of 1786. In 1793, a new Constitution was adopted which, with amendments made in 1828, 1836, 1850, 1870, and 1883, is still in force. The State Legislature consists of a Senate and House of Representatives having, the former thirty and the latter 246 members. Senators must be 30 years of age and Representatives 21. The governor is elected for two years. He exercises the chief executive power and appoints all State officers not otherwise provided for by law. He has power to pardon, or in certain cases only to reprieve; his veto can be overridden by a majority vote of each House. Other important officials are the lieutenant-governor, treasurer, and auditor.

Virginia. The first Constitution of Virginia was adopted on June 29, 1776, and with little change it survived till recent years. The Constitution now in force was adopted by the Convention of 1901-02. It provides for a Legislature called the General Assembly, consisting of a Senate and a House of Delegates, the former containing not more than forty nor less than thirty-three members, and the latter not more than 100 nor less than ninety. Senators are elected for four years, one-half retiring every two years. Eligible to either House are persons resident in the district and qualified to vote for members of the General Assembly, except paid office-holders of the State or of the Union. The executive power resides in a governor, elected for four years by the voters of the State. He must be 30 years of age, must have been a citizen of the United States for ten years, and have resided in the State for five years. He is not eligible for the succeeding term. He is required to take care that the laws are faithfully administered; he recommends the legislative measures which he considers necessary; is commander-in-chief of the military forces; has power to grant reprieves and pardons after conviction, but must report to the Legislature on each case. In legislation he has a limited power of veto, which may be overridden by a two-thirds majority of each House, if such majority includes a majority of the elected members. There is a lieutenant-governor; a secretary of the commonwealth, and a State treasurer, each of whom is elected for the same term and in the same manner as the governor. The auditor is appointed for four years by the two Houses sitting together.

Washington was admitted into the Union as a State in 1889. The Constitution of that year was amended in 1894, 1896, 1900, and 1904. Legislative authority is vested in a Legislature consisting of a Senate and a House of Representatives, the latter composed of not less than sixty-three nor more than ninety-nine

members (actually ninety-five in 1907), the number of Senators being not more than half nor less than one-third of that of members of the House of Representatives (actually forty-two in 1907). The membership of both Houses is apportioned anew every five years according to the results of the federal decennial census and of the intervening decennial State census. Eligible for either house are citizens of the United States who are qualified voters in the districts for which the election is held. But members of the United States Congress and holders of United States or State offices are disqualified. The chief executive authority resides in a governor, chosen by the qualified electors of the State and holding office for four years. He is charged to watch over the faithful execution of the laws; he recommends legislative measures, communicating by message every session with the Legislature. He is commander-in-chief of the State military forces; he has pardoning powers as to the use of which he reports to the Legislature; he has a veto in legislation, but his veto may be overridden by a two-thirds majority of each House. He signs all commissions. The executive department consists of the governor, a secretary of state, treasurer, auditor, attorney-general, superintendent of public instruction, and commissioner of public lands, all elected by the qualified voters for four years.

West Virginia. The present Constitution was framed and adopted in 1872, superseding the Constitution of 1863. It was amended in 1879, 1883, and 1902. The Legislature consists of the Senate and the House of Delegates. The members of both Houses are elected by the general electors. The Senate is composed of thirty members elected for a term of four years in such a manner that half the Senate is renewed biennially. Senators must be at least 25 years of age and have been resident five years in the State and in the senatorial districts for which they are severally chosen. The House of Delegates consists of eighty-six members. Every bill passed by both Houses requires the assent of the governor, but if this is refused the bill may become law on being revoted by a majority in the Legislature. The executive department consists of a governor, secretary of state, superintendent of free schools, auditor, treasurer, and attorney-general, each elected for four years. The governor must be at least 30 years of age and is not eligible for reelection. He is commander-in-chief of the State military establishment, convenes the Legislature in extra session, approves or disapproves all acts of the Legislature, fills vacant State offices by appointment, and is president of the board of public works.

Wisconsin was admitted to the Union in 1848. The Constitution of that year is still in force, but has been frequently amended, first in 1869, and most recently in 1904. The legislative power is vested in a Senate and Assembly. The Senate consists of thirty-three members elected for a term of four years, only about one-half of the members being elected at one time. The Assembly consists of 100 members, elected for a term of two years, all of the members being elected at the same time. The powers of the two Houses as to appropriations and revenue bills are

the same. Eligible to the Legislature are all males who are qualified electors in the district to be represented and who have resided one year within the State, except members of Congress and office holders under the United States. The chief executive authority in the State is vested in the governor, who is elected for two years and has the powers usually resident in State governors, including the limited veto and pardoning power. The secretary of state is elected for two years. Other important elective offices are those of lieutenant-governor, treasurer, attorney-general, superintendent of schools, and insurance commissioner. Among the more important appointive offices are the following: commissioner of labor and industrial statistics, appointed for four years, commissioner of banking, dairy and food commissioner, superintendent of public property, and adjutant-general. The railroad commission consisting of three members is appointed by the governor, with the consent of the Senate, for a term of six years. The tax commission is composed of three members similarly appointed for a term of eight years. The civil service commission is appointed for a term of six years, and the board of control for five years.

Wyoming was admitted into the Union as a State in 1890. The original Constitution, adopted in 1889, is still in force. Constitutional amendments proposed in either House of the Legislature, agreed to by a two-thirds vote of all the members of each House, and approved by a majority vote of the people, become part of the Constitution. The Legislature consists of a Senate of twenty-three members, elected for four years (about one-half retiring every two years), and a House of Representatives of fifty members elected for two years. Legislators must be citizens (Senators 25 and Representatives 21 years of age), and must have resided in the county or district one year next preceding the election. Revenue bills must originate in the House of Representatives. The Senate tries cases of impeachment brought by the other House. The chief executive officer of the State is the governor, elected for four years. He may appoint to offices not otherwise provided for by law, has a limited power of pardoning, etc., may call special sessions of the Legislature, and has a veto which may be overridden by a two-thirds vote of each House. Other officials elected for four years, are the secretary of state, auditor, treasurer, and superintendent of public instruction. The treasurer is not eligible for the succeeding term.

Zanzibar. The dominions of the Sultan of Zanzibar include only the islands of Zanzibar and Pemba, and the coast of the British East Africa up to ten miles inland. The Sultan is still the titular sovereign, under a British Protectorate. In October, 1891, a regular government was formed for Zanzibar. All accounts are now kept in English and Arabic, and are always open to the inspection of the British agent and consul-general, and no new undertakings or additional expenditure can be incurred without his consent. On February 1, 1892, Zanzibar was declared a free port, and it remained so until October 1, 1899.

PRODUCTION, MANUFACTURES**

UNION STATION, WASHINGTON

INDUSTRY, INVENTION, COMMERCE

Adulteration, a term not only applied in its proper sense to the fraudulent mixture of articles of commerce, food, drink, drugs, seeds, etc., with noxious or inferior ingredients, but also by magistrates and analysts to accidental impurity, and even in some cases to actual substitution. The chief objects of adulteration are to increase the weight or volume of the article, to give a color which either makes a good article more pleasing to the eye, or else disguises an inferior one, to substitute a cheaper form of the article, or the same substance from which the strength has been extracted, or to give it a false strength. Among the adulterations which are practised for the purpose of fraudulently increasing the weight or volume of an article are the following:—Bread is adulterated with alum or sulphate of copper, which gives solidity to the gluten of damaged or inferior flour; with chalk or carbonate of soda to correct the acidity of such flour; and with boiled rice or potatoes, which enables the bread to carry more water, and thus to produce a larger number of loaves from a given quantity of flour. Wheat flour is adulterated with other inferior flours, as the flour from rice, bean, Indian-corn, potato, and with sulphate of lime, alum, etc. Milk is usually adulterated with water. The adulterations generally present in butter consist of an undue proportion of salt and water, lard, tallow, and other fats; when of poor quality it is frequently colored with a little annatto, and, at times, with the juice of carrots. Genuine butter should not contain less than eighty per cent. of butter-fat. Cheese is also colored with annatto and other substances. Tea is adulterated (chiefly in China) with sand, iron-filings, chalk, gypsum, China clay, exhausted tea leaves, and the leaves of the sycamore, horse-chestnut, and plum, whilst color and weight are added by black-lead, indigo, Prussian-blue (one of the deleterious ingredients used by the Chinese in converting the lowest qualities of black into green teas), gum, turmeric, soapstone, catechu, and other substances. Coffee is mingled with chicory, roasted wheat, roasted beans, acorns, mangel-wurzel, rye-flour, and colored with burned sugar and other materials. Chicory is adulterated with different flours, as rye, wheat, beans, etc., and colored with ferruginous earths, burned sugar, Venetian red, etc. Cocoa and chocolate are mixed with the cheaper kinds of arrowroot, animal matter, corn, sago, tapioca, etc. Sugar (moist) may be adulterated to some extent with sand and flour. Tobacco is mixed with sugar and treacle, aloes, liquorice, oil, alum, etc., and such leaves as rhubarb, chicory, cabbage, burdock, coltsfoot, besides excess of salt and water. Snuffs are adulterated with carbonate of ammonia, glass, sand, coloring matter, etc. Confections are adulterated with flour and sulphate of lime. Preserved vegetables are kept green and poisoned by salts of copper. The acidity of mustard is commonly reduced by flour, and the color of the compound is improved by turmeric. Pepper is adulterated with linseed-meal, flour, mustard husks, etc. Color is given to pickles by salts of copper, acetate of

copper, etc. Ale is adulterated with common salt, *Coccūlus Indicus*, grains of paradise, quassia, and other bitters, sulphate of iron, alum, etc. Porter and stout are mixed with sugar, treacle, salt, and an excess of water. Brandy is diluted with water, and burned sugar is added to improve the color; sometimes bad whiskey is flavored and colored so as to resemble brandy, and sold under its name. Gin is mixed with excess of water, and flavoring matters of various kinds, with alum and tartar, are added. Rum is diluted with water, and the flavor and color are kept up by the addition of cayenne and burned sugar. For champagne, gooseberry, and other inferior wines are often substituted. Port is manufactured from red Cape and other inferior wines, the body, flavor, strength, and color being produced by gum-dragon, the washings of brandy casks, and a preparation of German bilberries. Cheap brown sherry is mixed with Cape and other low-priced brandies, and is flavored with the washings of brandy-casks, sugar-candy, and bitter almonds. Pale sherries are produced by gypsum, by a process called plastering, which removes the natural acids as well as the color of the wine. Other wines are adulterated with elderberry, logwood, Brazil-wood, cudbear, red beetroot, etc., for color; with lime or carbonate of lime, carbonate of soda, carbonate of potash, and litharge, to correct acidity; with catechu, sloe-leaves, and oak-bark for astringency; with sulphate of lime and alum for removing color; with cane-sugar for giving sweetness and body; with alcohol for fortifying; and with ether, especially acetic ether, for giving bouquet and flavor. Medicines, such as jalap, opium, rhubarb, chinchona bark, scammony, aloes, sarsaparilla, squills, etc., are mixed with various foreign substances. Castor-oil has been adulterated with other oils; and inferior oils are often mixed with cod-liver oil. Cantharides are often mixed with golden-beetle and also artificially-colored glass. The adulteration of seeds is largely practiced also, the seed which forms the adulterant being of course of the most worthless kind that can be had. Thus turnip-seed is mixed with rape, wild mustard, or charlock, which are steamed and kiln-dried to destroy their vitality, so as to evade detection in the progress of growth; old and useless turnip-seed is also used fraudulently mixed with fresh seeds. Clover is also much mixed with plantain and mere weeds.

Acts against adulteration have been passed in various countries and at various times. In 1906, the United States Congress passed comprehensive laws against food adulteration, under the titles of the Pure Food Act and the Meat Inspection Act.

Aerial Navigation. The first balloon was sent up by the brothers Stephen and Joseph Montgolfier, paper manufacturers at Annonay, near Lyons, on June 5, 1783, and reached an altitude of nearly a mile. It was inflated with heated air, for which hydrogen gas was soon substituted. The modern balloon is but a slight improvement on that invented by Montgolfier.

In place of heated air or hydrogen, common coal gas is now used. This improvement was introduced by Mr. Green, the English *aéronaut*. As gas expands rapidly as the balloon ascends, and the pressure of the external air is diminished, the neck of the balloon is commonly left open, and the machine is also furnished with a safety valve at the top, which can be opened or shut at pleasure. Mr. Glaisher, a noted English *aéronaut*, is of the opinion that in order to reach great altitudes the balloon must have a capacity of at least 90,000 cubic feet, of which not more than one-third need be inflated with gas, and must carry upward of 600 pounds of ballast. The question of the extreme altitude to which a balloon can ascend can only be theoretically determined, since the vital powers at 37,000 to 40,000 feet of elevation must succumb to the intense cold and the attenuated atmosphere. Mr. Glaisher seriously doubts the practical use of the balloon. He sees no probability that any method of steering it will be invented; but Messrs. Fonvielle and Tissandier believe it possible to devise means for its guidance.

September 15, 1898, Stanley Spencer, *aéronaut*, and Dr. Benson made an ascent in a balloon from London. They effectually steered the machine by means of a rudder and drag-ropes, and crossed the English channel, landing safely in France. They reached an altitude of 27,500 feet, the greatest height yet recorded. In September, 1900, Count von Zeppelin made an ascent in an air-ship of his invention, built chiefly of aluminum and driven electrically by four huge propellers, which seemed under perfect control and made an *aërial* journey of six miles. On May 31, 1909, however, Count von Zeppelin, after repeated trials in which he had been aided materially by the German government and people, broke all records for distance, traveling from Lake Constance to Bitterfeld and return. The only stop was made seventy miles from the finish at Göttingen to obtain a new supply of benzine for the motors. The total trip of 850 miles was made in thirty-six hours. In October, 1909, A. Holland Forbes, carrying a passenger, won the Lahm cup for the longest balloon flight, from St. Louis to Richmond, Va., a distance of $731\frac{1}{4}$ miles in nineteen hours and fifteen minutes, at an average rate of thirty-eight miles an hour.

A more practical type of airship, however, is the *aéroplane*. From the remarkable results obtained within the past two or three years it would seem that the successful flying machine of the future is to be a heavier-than-air machine, a simple *aéroplane*, supported by air and propelled by detached force. In the perfection and management of this type of machine the Wright Brothers, Wilbur and Orville, have outshone all their competitors. On September 12, 1908, their biplane airship made a record flight of one hour fourteen minutes and twenty seconds, rising from a monorail track. On September 17th, in an attempt to meet the United States Government requirements for the signal corps service, at Fort Meyer, Va., Orville Wright was seriously injured and Lieutenant Selfridge, U. S. A., his passenger, was killed. In December of that year Wilbur Wright in a similar machine made a flight of one hour, fifty-three

minutes and fifty-seven seconds; in a second flight he reached a height of 360 feet. On December 31st, Wilbur Wright again broke the record, winning the Michelin cup with a flight of two hours and nine minutes.

On July 23, 1909, Louis Bleriot in a monoplane of his own invention startled the people of England by a remarkable flight across the English Channel from Calais to Dover in thirty-seven minutes, distancing a fast torpedo boat that was to follow him in the event of an accident. A few days later, Hubert Latham succeeded in getting within two miles of the English coast when his motor stopped and he dropped into the sea. On August 7th, Roger Sommer, in a Farnam biplane made a flight of two hours twenty-seven and one-fourth minutes. This is the endurance record for an *aéroplane*. Henry Farnam flew from Chalons to Suippes, France, a distance of forty miles in one hour five and one-half minutes. On July 27th, Orville Wright, carrying Lieutenant Lahm with him, made the record flight for an *aéroplane* carrying two men, the time being one hour, twelve minutes and thirty-six seconds.

Later at Rheims Bleriot drove his monoplane six miles at a rate of forty-six miles an hour. Henry Farnam in his biplane won the \$10,000 prize by a flight of 111 miles in three hours. The international championship was won by an American, Glenn H. Curtiss, who, in a biplane of the Wright type, covered the course of 12.42 miles in fifteen minutes fifty and three-fifths seconds, forty-six miles an hour. On October 18, 1909, at Paris, Count de Lambert, in a Wright biplane, drove thirty-one miles in forty-nine minutes and thirty-nine seconds. On October 26th, Delagrange, in a Bleriot monoplane flew one mile 860 yards in one minute forty-seven and one-fifth seconds, nearly fifty-four miles an hour.

The remarkable record of the past two years seems to indicate that there are greater possibilities than were dreamed of in the line of *aërial* navigation, and support the statement of Wilbur Wright that the near future will witness a transatlantic flight.

Agriculture, the art of farming. From Egypt a knowledge of agriculture extended to Greece, where it flourished 1,000 years before Christ. Hesiod describes a plough consisting of a beam, a share, and handles. The Greek farmers composted with skill, and saved the materials for the compost with care. A high appreciation of agriculture seems to have been a fundamental idea among the early Romans. A tract of land was allotted to every citizen by the state itself, and each one was carefully restricted to the quantity granted. The Roman agriculturists whose works have come down to us are Cato, Varro, Virgil, Columella, Pliny, and Palladius. The difference of soils and their adaptation to particular crops were well understood. Manures were saved with care. Composts were made in suitable places, hollows being scraped out in the form of a bowl to receive the wash from the house, and properly protected from the heat of the sun. But the inhabitants of the East were familiar with many mechanical appliances unknown to the Romans, and proba-

ably their agricultural systems were more complete.—In Britian, the Romans made many improvements during their 400 years of occupation; but the agriculture of the island was extremely rude even when they left it, by far the the greater part being covered with forests and marshes. Then the Saxons overran the country, subsisting mainly by the chase and by keeping cattle, sheep, and especially swine, which readily fatten on the mast of the oak and the beech. In general, the only grains raised were wheat, barley, and oats, and they had but small quantities of these. No hoed crops of edible vegetables were cultivated, and even as late as the reign of Henry VIII. Queen Catharine was obliged to send to Flanders or Holland for salad. Neither Indian corn, potatoes, squashes, carrots, cabbages, nor turnips were known in England till after the beginning of the Sixteenth Century. From that time to the present, the gradual elevation of the middle and lower classes has continued, and agriculture has steadily advanced. The first work on agriculture published in England was the "Boke of Husbandrie," in 1523, by Sir Anthony Fitzherbert.

The advance in the art and science of agriculture in the United States during the last half dozen years has been remarkable, and has had a tremendous effect upon the nation's prosperity. The total value of farm products in 1907 exceeded \$7,000,000,000, and in 1906, \$6,800,000,000. The value of the products in 1906 was eight per cent. greater than that of 1905, ten per cent. over 1904, fifteen per cent. over 1903, and forty-four per cent. over 1899.

This marked progress is due to a number of circumstances and conditions, chief of which are our great variety of soil and climate, superior intelligence of the American farmer, improved machinery and implements, scientific education in all branches of agriculture, and increased pride of occupation.

Among the chief improvements we may mention deep plowing and thorough draining. By the introduction of new or improved implements the labor necessary to the carrying out of agricultural operations has been greatly diminished. Science, too, has been called in to act as the handmaid of art, and it is by the investigations of the chemist that agriculture has been put on a really scientific basis. The organization of plants, the primary elements of which they are composed, the food on which they live, and the constituents of soils, have all been investigated, and most important results obtained, particularly in regard to manures and rotations. Artificial manures, in great variety, to supply the elements wanted for plant growth, have come into common use, not only increasing the produce of lands previously cultivated, but extending the limits of cultivation itself. An improvement in all kinds of stock is becoming more and more general, feeding is conducted on more scientific principles, and improved varieties of plants used as field crops have been introduced. One of the recent innovations in the United States is the introduction of the system of *ensilage* for preserving fodder in a green state, which promises to give valuable results, though it has hardly been tested long enough to decide as to its value.

As a result of the new conditions, to be a thoroughly trained and competent agriculturist requires a special education, partly theoretical and partly practical. In particular, no scientific cultivator can now be ignorant of agricultural chemistry, which teaches the constituents of the various plants grown as crops, their relation to the various soils, the nature and function of different manures, etc. In some countries there are now agricultural schools or colleges supported by the state. In the United States nearly all the States have colleges, or departments of colleges, devoted to the teaching of agriculture, and large allotments of public land have been made for their support. In Germany such institutions are numerous and highly efficient. For teaching agriculture practically model farms are commonly established. In many countries, too, there is a ministry of agriculture as one of the chief departments of government. Our own Department of Agriculture has achieved the foremost place in the world, for its scientific work in practical husbandry and its stimulating influence.

¹ Includes all milk products, the value of which was \$472,369,255. ² Not including products sold with fiber before ginning. ³ Includes value of cider, etc. ⁵ Amount sold as cane only.

Air-pump, an instrument for removing the air from a vessel. The essential part is a hollow brass or glass cylinder, in which an air-tight piston is made to move up and down by a rod. From the bottom of the cylinder, a connecting tube leads to the space which is to be exhausted, which is usually formed by placing a bell-glass, called the receiver, with edges ground smooth, and smeared with lard, on a flat, smooth plate or table. When the piston is at the bottom of the barrel, and is then drawn up, it lifts out the air from the barrel, and a portion of the air under the receiver, by its own expansive force, passes through the connecting tube, and occupies the space below the piston, which would otherwise be a vacuum. The air in the receiver and barrel is thus *rarefied*. The piston is now forced down, and the effect of this is to close a valve placed at the mouth of the connecting tube, and opening inwards into the barrel. The air in the barrel is thus cut off from returning into the receiver, and, as it becomes condensed, forces up a valve in the piston, which opens outwards, and thus escapes into the atmosphere. When the piston reaches the bottom, and begins to ascend again, this valve closes; and the same process is repeated as at the first ascent. Each stroke thus diminishes the quantity of air in the receiver; but from the nature of the process, it is evident that the exhaustion can never be complete. Even theoretically, there must always be a portion left, though that portion may be rendered

less than any assignable quantity; and practically the process is limited by the elastic force of the remaining air being no longer sufficient to open the valves. The degree of rarefaction is indicated by a *gauge* on the principle of the barometer. The air-pump was invented by Otto Guericke, 1654.

Alcohol, the purely spirituous or intoxicating part of all liquids that have undergone vinous fermentation, extracted by distillation — a limpid colorless liquid, of an agreeable smell and a strong, pungent taste. When brandy, whisky, and other spirituous liquors, themselves distilled from cruder materials, are again distilled, highly volatile alcohol is the first product to pass off. The alcohol thus obtained contains much extraneous matter, including a proportion of water, from the first as high as 20 or 25 per cent., and increasing greatly as the process continues. Charcoal and carbonate of soda put in the brandy or other liquor, partly retain the fusel-oil and acetic acid it contains. The product thus obtained by distillation is called *rectified spirits* or *spirits of wine*, and contains from 55 to 85 per cent. of alcohol, the rest being water. By distilling rectified spirits over carbonate of potassium, powdered quicklime, or chloride of calcium, the greater part of the water is retained, and nearly pure alcohol passes over. It is only, however, by very prolonged digestion with desiccating agents and subsequent distillation that the last traces of water can be removed.

The specific gravity of alcohol varies with its purity, decreasing as the quantity of water it contains decreases. This property is a convenient test of the alcoholic strength of liquors that contain only alcohol and water; but on account of the condensation that invariably takes place on the mixture of these two liquids, it can be applied only in connection with special tables of reference, or by means of an instrument specially adapted for the purpose. Its very low freezing-point renders it valuable for use in thermometers for very low temperatures. Alcohol is extremely inflammable, and burns with a pale-blue flame, scarcely visible in bright daylight. It occasions no carbonaceous deposit upon substances held over it, and the products of its combustion are carbonic acid and water. The steady and uniform heat which it gives during combustion makes it a valuable material for lamps. It dissolves the vegetable acids, the volatile oils, the resins, tan, and extractive matter, and many of the soaps; the greater number of the fixed oils are taken up by it in small quantities only, but some are dissolved largely. When alcohol is submitted to distillation with certain acids a peculiar compound is formed, called *ether*. It is alcohol which gives all intoxicating liquors the property whence they are so called. Alcohol acts strongly on the nervous system, and though in small doses it is stimulating and exhilarating, in large doses it acts as a poison. In medicine it is often of great service.

Annuity, a sum of money paid annually to a person, and continuing either a certain number of years, or for an uncertain period, to be determined by a particular event, as the death of the recipient or annuitant, or that of the party liable to pay the annuity; or the annuity may be perpetual. The payments are made at the end of each year, or semi-annually, or at other periods. An annuity is usually raised by the present payment of a certain sum as a consideration whereby the party making the payment, or some other person named by him, becomes entitled to an annuity, and the rules and principles by which this present value is to be computed have been the subjects of careful investigation. The present value of a perpetual annuity is evidently a sum of money that will yield an interest equal to the annuity, and payable at the same periods; and an annuity of this description, payable quarterly, will evidently be of greater value than one of the same amount payable annually, since the annuitant has the additional advantage of the interest on three of the quarterly payments until the expiration of the year. In other words, it requires a greater present capital to be put at interest to yield a given sum per annum, payable quarterly, than to yield the same annual sum payable at the end of each year. The present value of an annuity for a limited period is a sum which, if put at interest, will at the end of that period give an amount equal to the sum of all the payments of the annuity and interest; and, accordingly, if it be proposed to invest a certain sum of money in the purchase of an annuity for a given number of years the comparative value of the two may be precisely estimated, the rate of interest being given. But annuities for uncer-

tain periods, and particularly life annuities, are more frequent, and the value of the annuity is computed according to the probable duration of the life by which it is limited. Such annuities are often created by contract, whereby the government or a private annuity office agrees, for a certain sum advanced by the purchaser, to pay a certain sum in yearly, quarterly, or other periodical payments, to the person advancing the money, or to some other named by him, during the life of the annuitant. Or the annuity may be granted to the annuitant during the life of some other person, or during two or more joint lives, or during the life of the longest liver or survivor among a number of persons named. If a person having a certain capital, and intending to spend this capital and the income of it during his own life, could know precisely how long he should live, he might lend this capital at a certain rate during his life, and by taking every year, besides the interest, a certain amount of the capital, he might secure the same annual amount for his support during his life in such manner that he should have the same sum to spend every year, and consume precisely his whole capital during his life. But since he does not know how long he is to live he agrees with the government or an annuity office to take the risk of the duration of his life, and agree to pay him a certain annuity, during his life in exchange for the capital which he proposes to invest in this way. The probable duration of his life therefore becomes a subject of computation; and for the purpose of making this calculation tables of longevity are made by noting the proportions of deaths at certain ages in the same country or district. Founding on a comparison of many such tables, the British Government has empowered the postmaster-general to grant annuities, which are probably more closely adjusted to their actual value than those of insurance companies and other dealers in annuities. In the United States the granting of annuities is conducted by private companies or corporations. The following are the approximate rates of the best managed companies: In consideration of \$1,000 paid to a company, the annuity granted to a person aged 40 would be \$52.75; aged 45, \$58.10; aged 50, \$64.70; aged 55, \$73.50; aged 60, \$86.20; aged 65, \$100; aged 70, \$123.45; aged 75, \$145.95; aged 80, \$180.15. The purchase of annuities, as a system, has never gained much foothold in America—the endowment plan of life insurance, by which after the lapse of a term of years the insured receives a sum in bulk, being preferred. Massachusetts, however, passed a law in 1907 with the direct purpose of encouraging annuities.

Automobile, or Motor-Car. An automatic-propelling vehicle, the motive power of which is furnished by coal-oil, gasoline, electric-storage battery, compressed air, etc. They are usually supplied with two gearings, one for a low rate of speed and the second for more rapid movement. They are largely in use in America and Europe, taking the place of the horse-drawn carriages and delivery wagons. In the larger cities they are on hire for public use, and have largely replaced hacks and cabs. The engine or dynamo is usually placed beneath the driver's

seat and connects with chains or cranks to the rear axles, leaving the forecarriage free for steering purposes.

World's Motor-cars.—It is estimated that the total number of motor-cars of all kinds in use in the world in 1907 was as follows:

America,	90,000	Austria-Hun-	
Great Britain, .	75,000	gary,	8,000
France,	30,000	Italy,	6,000
Germany,	20,000	Spain,	4,000
Other European countries, including Russia, 5,000; India, 2,000; Egypt, Canada, Australia, and other British colonies, 2,000; Central and South America, 1,000; China, Japan, and East Asia, 500 — amounting to 248,500 vehicles in all.			

Banking was authorized in the United States during the War of the Revolution, a resolution being adopted in Congress on May 26, 1781, approving a plan for a national bank proposed by Robert Morris, of Philadelphia. As a result the Bank of North America was incorporated on December 31st following, with a capital of \$4,000,000, of which \$254,000 had been subscribed by the United States Government. This bank, rechartered from time to time, continues in existence in Philadelphia, and is one of the national banks of the present. Another bank, known as the Bank of the United States, was projected by Alexander Hamilton when the government had been organized under the Constitution. It was duly established, and continued in existence until 1811, when it went out of existence, owing to the failure to obtain a renewal of its charter. A second Bank of the United States was incorporated on April 3, 1816, and went into operation January 7, 1817. Meanwhile other banks had been established in various parts of the country, and these, driven to suspension of specie payments by the War of 1812, were aided by the operation of the new bank to an extent which enabled them to resume. This bank itself, however, was driven to the wall in 1840 by legislation which compelled it to resume specie payments, which it had suspended. The present system of national banks was inaugurated in 1864, under exigencies created by the Civil War. In towns of a population of 3,000 or less the minimum capital allowed national banks is \$25,000. In towns of between 3,000 and 6,000 people the minimum capital allowed is \$50,000; and in cities and towns having a population of 6,000 or more, but not exceeding 50,000, the minimum capital must be \$100,000; while in cities of over 50,000 people the bank must have a capital of at least \$200,000. There is no limit to the amount of excess capital. Every national bank must purchase and deliver to the treasurer of the United States registered United States bonds to an amount not less than \$50,000, except banks with a capital of \$150,000, or less, the minimum amount of bonds required is one quarter of the capital. The government then issues and delivers to the bank circulating notes in denominations of \$5, \$10, \$20, \$50, \$100, as desired, in total amount equal to the par value of the bonds deposited. A bank may deposit bonds and receive circulating notes to an amount equal to its capital. Each bank is required to make a sworn statement of its condition to the comp-

troller of the currency at Washington at least five times a year, and to publish the same in a newspaper. Two examinations a year are made by capable men employed by the government as national bank examiners, their visits being always without notice. Requirement is made in the national bank act for the accumulation of a surplus by each bank from its earnings as an additional protection above its capital to the depositors. The depositors are further protected against loss by the liability of each stockholder to the payment of an amount equal to the par value of the stock held, in event of failure of the bank.

Canal, an artificial water-course for the transportation of goods or passengers by boats or ships, or for purposes of drainage or irrigation. The canals most familiar to ordinary readers are for navigation. These consist usually of a number of different sections, each on one level throughout its course, but differing in relative height from the others. From one section to another boats are transferred by means of *locks*, or it may be by *inclines* or *lifts*. The lock is a water-tight inclosure with gates at either end; constructed between two successive sections of a canal. When a vessel is descending, water is let into the lock till it is on a level with the higher water, and thus permits the vessel to enter; the upper gates are then closed, and by the lower gates being gradually opened, the water in the lock falls to the level of the lower water, and the vessel passes out. In ascending the operation is reversed. The *incline* conveys the vessel from one reach to another, generally on a specially-constructed carriage running on rails, by means of drums and cables. The *lift* consists of two counterbalancing troughs, one going up as the other descends, carrying the vessel from the higher to the lower level, or *vice versa*. Works of great magnitude in the way of cuttings, embankments, aqueducts, bridges, tunnels, reservoirs, for water-supply, etc., are often necessary in constructing canals. Canals have been known from remote times, Egypt being intersected at an early period by canals branching off from the Nile to distant parts of the country, for purposes of irrigation and navigation. Under the Ptolemies, before the Christian era, there existed a canal between the Red Sea and the Nile. In China, also, canals were early made on a very large scale. In Holland, where the country is flat and water abundant, canals were constructed as early as the Twelfth Century. The lock, however, was not invented until the Fifteenth Century, both the Dutch and the Italians claiming the honor. Since then Europe has been provided with numerous canals, which being connected usually with navigable rivers, give access by water to most parts of its interior. Among the numerous canals of Holland, the most important is now the great ship canal, from 200 to 300 feet wide and twenty-three feet deep, which connects Amsterdam with the North Sea. In France there are many canals and canalized rivers, the principal being the Canal du Midi, branching off from the Garonne at Toulouse, and falling into the Gulf of Lyons at Narbonne, thus connecting the Bay of Biscay and Mediterranean, and

three canals connecting the basins of the Rhone, Loire, Seine, and Rhine. The canals of France have a total length of 3,000 miles. In Belgium there is the Ghent-Terneuzen Canal, which allows large vessels to sail to Ghent from the Scheldt estuary. The chief canals in Germany are the Ludwigs Canal in Bavaria, connecting (through the Main and Regnitz) the Rhine and the Danube; and the Holstein Canal, connecting the North Sea and Baltic by means of the Eider. The latter will be superseded by the Great Baltic Canal for sea-going vessels, which is to be constructed at a cost of \$40,000,000, starting near the mouth of the Elbe and reaching the Baltic near Kiel. In Russia there is canal and river communication between the Caspian and the Baltic, a large part of the route consisting of the Volga. In Britain one of the

earliest and most celebrated is the Bridgewater Canal (1761-65), in Lancashire and Cheshire, with a length of thirty-eight miles. In Scotland there are the Forth and Clyde Canal, thirty-five miles long, joining these two rivers; and the Caledonian, sixty and one-half miles (including lakes), from the Moray Firth on the east coast to Loch Eil on the west, passing through Loch Ness, Loch Oich, and Loch Lochy. In the British Islands there is a total length of canal of about 3,000 miles; more than five-sixths being in England. The Manchester Ship Canal, a waterway for ocean-going steamers from the estuary of the Mersey, near Runcorn, to Manchester, through a few locks and partly in the beds of the Mersey and the Irwell, was begun in the latter end of 1887; estimated cost, \$75,000,000.

CANALS

Tabulation showing the cost and date of construction, length, number of locks, and navigable depth of the principal American canals:

CANALS	COST OF CONSTRUCTION*	WHEN COMPLETED	LENGTH MILES	NO. OF LOCKS	DEPTH FEET†	LOCATION
Albemarle and Chesapeake,	\$1,641,363	1860	44	1	7½	Norfolk, Va., to Currituck Sound, N. C.
Augusta,	1,500,000	1847	9	..	11	Savannah River, Ga., to Augusta, Ga.
Black River,	3,581,954	1849	35	109	4	Rome, N. Y., to Lyons Falls, N. Y.
Cayuga and Seneca, . . .	2,232,632	1839	25	11	7	Montezuma, N. Y., to Cayuga and Seneca Lakes, N. Y.
Champlain,	4,044,000	1822	81	32	6	Whitehall, N. Y., to West Troy, N. Y.
Chesapeake and Delaware,	3,730,230	1829	14	3	9	Chesapeake City, Md., to Delaware City, Del.
Chesapeake and Ohio, . .	11,290,327	1850	184	73	6	Cumberland, Md., to Washington, D.C.
Compansys,	90,000	1847	22	1	6	Mississippi River, La., to Bayou Black, La.
Delaware and Raritan, .	4,888,749	1838	66	14	7	New Brunswick, N. J., to Trenton, N. J.
Delaware Division, . . .	2,433,350	1830	60	33	6	Easton, Pa., to Bristol, Pa.
Des Moines Rapids, . . .	4,582,009	1877	7½	3	5	At Des Moines Rapids, Mississippi River.
Dismal Swamp,	2,800,000	1822	22	7	6	Connects Chesapeake Bay with Albemarle Sound.
Erie,	52,540,800	1826	387	72	7	Albany, N. Y., to Buffalo, N. Y.
Fairfield,	4½	None	Alligator River to Lake Mattimuskeet, N. C.
Galveston and Brazos, . .	340,000	1851	38	3½	Galveston, Texas, to Brazos River, Tex.
Hocking,	975,481	1843	42	26	4	Carroll, O., to Nelsonville, O.
Illinois and Michigan, . .	7,357,787	1848	102	15	6	Chicago, Ill., to La Salle, Ill.
Illinois and Mississippi, .	7,250,000	1895	75	3	7	Around lower rapids of Rock River, Ill., connects with Mississippi River.
Lehigh Coal and Navigation Co.,	4,455,000	1821	108	57	6	Coalport, Pa., to Easton, Pa.
Louisville and Portland, .	5,578,631	1872	2½	2	At Falls of Ohio River, Louisville, Ky.
Miami and Erie,	8,062,680	1835	274	93	5½	Cincinnati, O., to Toledo, O.
Morris,	6,000,000	1836	103	33	5	Easton, Pa., to Jersey City, N. J.
Muscle Shoals and Elk River Shoals,	3,156,919	1889	16	11	6	Big Muscle Shoals, Tenn., to Elk River Shoals, Tenn.
Newberne and Beaufort,	3	None	Clubfoot Creek to Harlow Creek, N. C.
Ogeechee,	407,810	1840	16	5	3	Savannah River, Ga., to Ogeechee River, Ga.
Ohio,	4,695,204	1835	317	150	4	Cleveland, O., to Portsmouth, O.
Oswego,	5,239,526	1828	38	18	7	Oswego, N. Y., to Syracuse, N. Y.
Pennsylvania,	7,731,750	1839	193	71	6	Columbia, Northumberland, Wilkesbarre, Huntingdon, Pa.
Portage Lake and Lake Superior,	528,892	1873	25	None	15	From Keweenaw Bay to Lake Superior.
Port Arthur,	1899	7	26	Port Arthur, Tex., to Gulf of Mexico.
Santa Fé,	70,000	1880	10	5	Waldo, Fla., to Melrose, Fla.
Schuylkill Navigation Co.,	12,461,600	1826	108	71	6¼	Mill Creek, Pa., to Philadelphia, Pa.
Sturgeon Bay and Lake Michigan,	99,661	1881	1¼	None	15	Between Green Bay and Lake Michigan.
St. Mary's Falls,	7,909,667	1896	1½	1	21	Connects Lakes Superior and Huron at Sault Ste. Marie, Mich.
Susquehanna and Tidewater,	4,921,345	1840	45	32	5½	Columbia, Pa., to Havre de Grace, Md.
Walhonding,	607,269	1843	25	11	4	Rochester, O., to Roscoe, O.
Welland (ship canal), . .	27,275,869	1833	26¾	26	14	Connects Lake Ontario and Lake Erie.

* And improvements. † Navigable depth.
The Harlem River Ship Canal, connecting the Hudson River and Long Island Sound, by way of Spuyten Duyvil Creek and Harlem River, was opened for traffic on June 17, 1895, and cost about \$2,700,000.

Celluloid is an artificial substance extensively used as a substitute for ivory, bone, hard rubber, coral, etc., having a close resemblance to these substances in hardness, elasticity, and texture. It was invented by J. W. and Isaac Hyatt in 1870. It is composed of cellulose or vegetable fibrine reduced by acids to pyroxyline (or gun-cotton), camphor is then added, and the compound molded by heat and pressure to the desired shape. It is used chiefly for such articles as buttons, handles for knives, forks, and umbrellas, billiard-balls, backs to brushes, piano keys, napkin-rings, opera-glass frames, etc. It can be variously colored. Manufactures of celluloid now run into millions of dollars annually.

Champagne takes its name from the province of Champagne, France, where it was originally produced. There are white and red champagnes; the white is either sparkling or still. Sparkling or effervescent champagne is the result of a peculiar treatment during fermentation. In December, the wine is racked off, and clarified with isinglass, and in March it is bottled and tightly corked. The fermentation being incomplete when the wine is bottled, the carbonic acid gas generated in a confined space dissolves in the wine, and communicates the sparkling property to champagne. To clear the wine of sediment, the bottles are first placed in a sloping position with the necks downward, so that the sediment may be deposited in the necks of the bottles. When this sediment has been poured off, a solution of sugar-candy in cognac is added to the wine, and every bottle is filled up with bright clarified wine, and securely recorked. The effervescence of the wine thus prepared bursts many bottles, in some cases 10 per cent.; and in seasons of early and sudden heat, as many as 20 and 25 per cent. have been bursted. Wine-buyers estimate the value of wine according to the breakage, that which breaks most bottles being considered best. Still or non-effervescent champagne is first racked off in the March after the vintage. Creaming or slightly effervescent champagne has more alcohol but less carbonic acid gas than sparkling champagne. The best varieties of this wine are produced at Rheims and Epernay, and generally on a chalky soil. The fact that the sale of champagne is very extensive and lucrative has naturally given rise to adulterations. Sugar, and the juices of pears or gooseberries, or birch-juice, etc., have been used for making spurious champagne. Probably not even a third part of

the wine sold for champagne is genuine. The greater part of it is readily manufactured by simply charging other light wines with carbonic acid gas. German purveyors have succeeded in preparing light wines — such as Rhenish, Main, Necker, Meissner, and Naumburg — much like genuine champagne. In recent years a considerable amount of champagne of excellent quality has been produced in the United States.

Charcoal, a term applied to an impure variety of carbon, especially such as is produced by charring wood. One kind of it is also obtained from bones; lampblack and coke are also varieties. Wood charcoal is prepared by piling billets of wood in a pyramidal form, with vacuities between them for the admission of air, and causing them to burn slowly under a covering of earth. In consequence of the heat, part of the combustible substance is consumed, part is volatilized, together with a portion of water, and there remains behind the carbon of the wood, retaining the form of the ligneous tissue. Another process consists in heating the wood in close vessels, by which the volatile parts are driven off, and a charcoal remains in the retorts, not so dense as that obtained by the other process. Wood charcoal, well prepared, is of a deep-black color, brittle and porous, tasteless and inodorous. It is infusible in any heat a furnace can raise; but by the intense heat of a powerful galvanic apparatus it is hardened, and at length is volatilized, presenting a surface with a distinct appearance of having undergone fusion. Charcoal is insoluble in water, and is not affected by it at low temperatures; hence, wooden stakes which are to be immersed in water are often charred to preserve them, and the ends of posts stuck in the ground are also thus treated. Owing to its peculiarly porous texture, charcoal possesses the property of absorbing a large quantity of air or other gases at common temperatures, and of yielding the greater part of them when heated. Charcoal likewise absorbs the odoriferous and coloring principles of most animal and vegetable substances, and hence is a valuable deodorizer and disinfectant. Water which, from having been long kept in wooden vessels, as during long voyages, has acquired an offensive smell, is deprived of it by filtration through charcoal powder. Charcoal can even remove or prevent the putrescence of animal matter. It is used as fuel in various arts, where a strong heat is required, without smoke, and in various metal-

lurgic operations. By cementation with charcoal, iron is converted into steel. It is used in the manufacture of gunpowder. In its finer state of aggregation, under the form of ivory-black, lampblack, etc., it is the basis of black paint; and mixed with fat oils and resinous matter, to give a due consistence, it forms the composition of printing-ink.

Clearing-house. The place where is carried on the operation of clearing off balances and adjusting daily accounts between bankers of the same city; thus avoiding the inconvenience of handling large amounts in currency or convertible paper. Each bank, or banker, dispatches a clerk to the clearing-house, who there draws up an abstract of the checks upon other firms, and effects a clearance by exchanging them against those drawn on the bank to which he belongs. The balance is paid over in cash. The first clearing-house in the United States was established in New York in 1833. In England, the railway companies, as well as the banks, make use of the clearing system.

Clay. The name of various earths, which consist of hydrated silicate of aluminium, with small proportions of the silicates of iron, calcium, magnesium, potassium, and sodium. All the varieties are characterized by being firmly coherent, weighty, compact, and hard when dry, but plastic when moist, smooth to touch, not readily diffusible in water, but when mixed not readily subsiding in it. Their tenacity and ductility when moist, and their hardness when dry, has made them from the earliest times the materials of bricks, tiles, pottery, etc. Of the chief varieties, *porcelain-clay*, *kaolin*, or china-clay, a white clay with occasional gray and yellow tones, is the purest. *Potter's-clay* and *pipe-clay*, which are similar but less pure, are generally of a yellowish or grayish color, from the presence of iron. Fire-clay is a very refractory variety, always found lying immediately below the coal; it is used for making fire-bricks, crucibles, etc. *Loam* is the same substance mixed with sand, oxide of iron, and various other foreign ingredients. The *boles*, which are of a red or yellow color from the presence of oxide of iron, are distinguished by their conchoidal fracture. The *ochres* are similar to the boles, containing only more oxide of iron. Other varieties are *fuller's earth*, *Tripoli*, and *boulder-clay*, the last a hard clay of a dark-brown color, with rounded masses of rock of all sizes embedded in it, the result of glacial action. The distinctive property of clays as ingredients of the soil is their power of absorbing ammonia and other gases and vapors generated on fertile and manured lands; indeed no soil will long remain fertile unless it has a fair proportion of clay in its composition. The best wheats both in Britain and the European continent, as well as in America and Siberia, are grown on calcareous clays, as also the finest fruits and flowers of the rosaceous kind.

Coal. A solid, opaque, inflammable substance, mainly consisting of carbon, found in the earth, largely employed as fuel, and formed from vast masses of vegetable matter deposited through the luxuriant growth of plants in former epochs of the earth's history. In the varieties

of coal in common use the combined effects of pressure, heat, and chemical action upon the substance have left few traces of its vegetable origin; but in the sandstones, clays, and shales accompanying the coal, the plants to which it principally owes its origin are presented in a fossil state in great profusion, and frequently with their structure so distinctly retained, although replaced by mineral substances, as to enable the microscopist to determine their botanical affinities with existing species. The sigillaria and stigmaria, the lepidodendron, the calamite, and tree-ferns are amongst the commoner forms of vegetable life in the rocks of the coal formation. Trees of considerable magnitude have also been brought to light, having a recognizable relation to the modern araucaria. The animal remains found in the coal-measures indicate that some of the rocks have been deposited in fresh water, probably in lakes, whilst others are obviously of estuarine origin, or have been deposited at the mouths of rivers alternately occupied by fresh and salt-water. The great system of strata in which coal is chiefly found is known as the carboniferous. There are many varieties of coal, varying considerably in their composition, as *anthracite*, nearly pure carbon, and burning with little flame, much used for furnaces and malt kilns; *bituminous* (popularly so called) or "household coal"; and *cannel*, or "gas-coal," which burns readily like a candle, and is much used in gas-making. All varieties agree in containing from sixty to over ninety per cent. of carbon, the other elements being chiefly oxygen and hydrogen, and frequently a small portion of nitrogen. *Lignite*, or *brown coal*, may contain only fifty per cent. carbon. For manufacturing purposes coals are generally considered to consist of two parts, the volatile or bituminous portion, which yields the gas used for lighting, and the substance, comparatively fixed, usually known as *coke*, which is obtained by heating the coals in ovens or other close arrangements.

China and Japan contain about 200,000 square miles of coal-fields; United States, 210,000; India, 35,000; Russia, 27,000; Great Britain, 9,000; Germany, 3,600; France, 1,800; Belgium, Spain, and other countries, 1,400. Total, 487,800.

DISTRIBUTION OF COAL IN THE UNITED STATES

Coal is found in commercial quantities in twenty-seven of the States and Territories of the United States and in Alaska. The following table shows the area of coal-bearing formations in the several States and the rank of the coal-producing States in area and production:

STATES AND TERRITORIES	AREA OF COAL-BEARING FORMATIONS(Sq. Mls.)	TONS
BITUMINOUS		
Alabama,	8,500	12,851,775
Arkansas,	1,728	1,875,567
California,	280	80,000
Colorado,	18,100	10,308,421
Georgia and N. Carolina,	967	363,463
Illinois,	42,900	38,317,581
Indiana,	9,300	11,422,000

Coal-tar, or Gas-tar, a substance obtained in the distillation of coal for the manufacture of illuminating gas, a dark-colored more or less viscid mass, consisting principally of oily hydrocarbons. It passes over with the gas into the condensers along with ammonia liquor, but being heavier than the latter, it is easily separated from it when the whole is allowed to stand. It was formerly of comparatively little use; but in recent years a great number of valuable products have been derived from it by distillation, such as ammonia, naphtha, creasote, carbolic acid, and benzine, while it is also the source of the whole series of aniline colors, and other dyes, of alizarine, salicylic acid, etc.

Coins and Coinage. Coins were probably used as early as the Eighth Century B. C., and by the Fourth Century every civilized state had its proper coinage. Most of the commoner metals have in turn been used for making coins. The early coins of Asia Minor were of electrum, a mixture of gold and silver, in the proportion of three of the former to one of the latter. Lycurgus made the money of Sparta of iron. Copper formed the early money of the Romans; and when Cæsar landed in Britain, coins of brass and iron were found in use. Tin was coined by Charles II., and James II. even resorted to gun metal and pewter. At the present day, gold and silver, with copper for the lowest denomination, are almost universally employed. Coins of platinum were formerly struck in Russia. Although in a few countries coins have been issued of almost absolute purity, such as the gold sequins of Tuscany, yet for the most part the gold and silver are alloyed with some other metal, generally copper, in definite proportions fixed by law. In the United States an alloy of about nine-tenths copper and one-tenth silver is used with gold. The proportion of alloy varies in different countries. In Great Britain it is one-twelfth; while in the United States, France, Belgium, and some other coun-

tries, one-tenth has been adopted. In the United States the power to coin money is vested by the Constitution in Congress, and is expressly withheld from the States. The earliest colonial coinage was in Massachusetts, in pursuance of an order of the General Court, passed May 27, 1652, which required the coinage of "12 pence, 6 pence, and 3 pence pieces." From 1778 to 1787 the power of coinage was exercised not only by the confederation in Congress, but also by several of the individual States. In Vermont a mint was established in 1785, and copper cents were issued; a few half cents were also coined. Connecticut the same year established a mint at New Haven, and copper coins were issued. New Jersey authorized a copper coinage in 1786. In 1788 cents and half cents were coined by Massachusetts. In 1787 copper cents were coined under authority of Congress. On April 2, 1792, a code of laws was enacted for the establishment and regulation of the mint, under which, with slight amendments, the coinage was executed for forty-two years. The act of February 12, 1873, known as the coinage act of 1873, consolidated the regulations governing the coinage of the United States. The following table gives a complete exhibit of the coinage of the United States from the organization of the mints, 1792 to 1907:

DENOMINATIONS	PIECES	VALUES
GOLD		
Double eagles, . . .	96,599,669	\$1,931,993,380.00

Coke, the carbonaceous residue of coal which has been heated in an oven or retort, or in any way by which little air is admitted, until all volatile matter has been expelled. The simplest method of producing coke is based on the preparation of wood charcoal, the coal being arranged in heaps which are smothered with clay or coal-dust, and then set on fire, sufficient air being admitted to keep the mass at the proper temperature for decomposition without wasting the coke. After the volatile portions are got rid of, the heap is allowed to cool, or is extinguished with water, and the coke is then ready. Methods of heating the coal in close or open ovens until the gaseous and fluid products are driven off are also commonly used. Gas-coke is that which remains in the retorts after the gas has been given off. Good oven-coke has an iron-gray color, sub-metallic luster, is hard, and somewhat vesicular; but gas-coke has rather a slagged and cindery look, and is more porous. Coke contains about ninety per cent. of carbon, and is used where a strong heat is wanted without smoke and flame, and it is accordingly largely consumed in drying malt and similar purposes. It used to be burned regularly in locomotive-engines, but raw coal is now commonly substituted. The largest quantities are consumed in smelting operations.

Cold Storage. A system for the preservation of fruits, meats, and other food stuffs, in which the air of the storage chambers is kept near or below the freezing temperature by refrigerating methods similar to those employed in making artificial ice. By this means food can be kept in an unchanged state for an indefinite period. The system is widely applied both on land and in ocean steamers.

Copper, one of the most anciently known metals, deriving its name from *Cyprus*, large supplies having in Greek and Roman times come from that island. Next to gold, silver, and platinum it is the most ductile and malleable of metals; it is more elastic than any metal except steel, and the most sonorous of all except aluminium. Its conducting power for heat and electricity is inferior only to that of silver. It has a distinct odor and a nauseous metallic taste. It is not altered by water, but tarnishes by exposure to the air, and becomes covered with a green carbonate. It occurs native in branched pieces, dendritic, in thin plates, and rarely in regular crystals, in the primitive and older secondary rocks. Blocks of native copper have sometimes been got weighing many tons. Its ores are numerous and abundant. All the compounds of copper are poisonous. It is found in most European countries, in Australia and Japan, in Africa and in North and South America (especially in the vicinity of Lake Superior). In Britain the mines of Cornwall are the richest.

Copper is extracted from its ores either by the dry or the wet process. For the former, what is known as the Welsh process is most common in Great Britain. It consists in alternately roasting the ore, and then smelting it in a furnace with a suitable slag, until impure or blister copper is obtained. Before this stage is reached a metallic compound of copper, sulphur, and

iron has been produced, technically known as matt, regulus, or coarse metal, and subsequently a tolerably pure sulphide of copper called fine metal. The blister copper is refined by burning off the sulphur, arsenic, and other volatile impurities, and by melting it along with wood charcoal and stirring it with a wooden pole. The quality is then tested, and, if found satisfactory, the copper is cast into ingots. In extracting the metal from pyrites by the wet process, the ore is first roasted to get rid of the larger proportion of sulphur, then the calcined residue still containing sulphur is mixed with common salt, ground and heated in ovens. The copper is thus converted into chloride, part of which volatilizes, but is condensed, along with arsenic and other substances, by passage through flues and water-condensers. After some hours the calcined mixture is raked out of the ovens, cooled, and transferred to tanks, where it is exhausted by successive treatment with water. The solution, containing chloride of copper, sulphate and chloride of sodium, and iron salts, is next heated along with scrap-iron. Copper precipitates in the form of a ruddy, lustrous, tolerably compact mass, with a crystalline appearance, and mixed with metallic-iron and oxide. The larger pieces of iron are picked out, the precipitate washed and drained, and then rendered compact by heating in a furnace. A slag containing the oxide of iron forms, and the copper, when judged sufficiently pure, is run into moulds. Afterwards this crude metal is refined and toughened.

Some of the alloys of copper, especially those containing tin and zinc, are of considerable importance, e. g., bronze, an alloy of copper with about eight or ten per cent. of tin; bell-metal composed of eighty parts of copper and twenty of tin; British bronze coinage, copper ninety-five, tin four, zinc one.

Copper is applied to a great many useful purposes. In sheets it is used for sheathing the bottoms of ships, covering roofs and domes, the constructing of boilers and stills of a large size, etc. It is also used in electrotyping and engraving, for various household utensils and fittings; but its use for household utensils is by no means free from danger on account of the action of acids on it, which produces verdigris.

The copper production in the world, in 1906, was as follows: United States, 416,226 tons; Spain and Portugal, 50,109; Chile, 26,157; Japan, 40,528; Germany, 20,665; Mexico, 62,690; Australasia, 36,830; Canada, 19,106; other localities, 36,312.

In the United States, Montana, Arizona, and Michigan are the chief copper producing States.

Cotton. A soft, downy substance, consisting of fine hair growing round the seeds of plants belonging to the genus *Gossypium*, *O. Malvaceæ*. The genus is indigenous to both the American and Asiatic continents, but it has been so extensively spread by means of cultivation that it is now found throughout all parts of the world, within the limits of 36° north and south of the equator. All the species and varieties form herbaceous or shrubby perennial plants, varying in height according to the climate and soil in which they grow, some not exceeding two or three

feet, while others reach a height of fifteen or twenty feet. Their leaves grow upon stalks placed alternately upon the branches, and are generally heart-shaped, and most commonly either three- or five-lobed, with the lobes sharp or rounded. The flowers are usually large and showy, and grow singly upon stalks in the axils of the leaves. They have a cup-shaped shortly five-toothed calyx, surrounded by a larger outer calyx or involucre of three broad deeply-cut segments, joined together and heart-shaped at the base; a corolla of five petals; many stamens united into a central column; and a three or five-celled ovary. The fruit is a three- or five-celled capsule, which bursts open through the middle of each cell when ripe, exposing the numerous seeds covered with the beautiful cellular filaments known under the name of cotton. The seeds themselves contain a considerable quantity of bland oil, which has been brought greatly into use during the last few years; and the cake formed by pressing the decorticated seeds has proved a valuable food for cattle. *G. Barbadosense* is the species cultivated in the United States, where two well-marked varieties are recognized. First, the Sea Island or long-staple cotton, which was introduced from the Bahamas in 1785, and is only grown on the low islands and sea-coast of Georgia and South Carolina; it is the most valuable kind, having a fine, soft, silky staple from one and one-half to one and three-fourths inches long, and is easily separated from the seed. Second, Upland, Georgian, Bowed, or short-staple cotton, which forms the bulk of American cotton, and is the produce of the upland or inland districts of the Southern States; the staple is only one or one and one-fourth inches long, and it adheres firmly to the seed, which is also covered with short down. Egyptian cotton, and the kind called Bourbon, are likewise referable to this species. *G. herbaceum* is the indigenous Indian species, and yields the bulk of the cotton of that country; it is also grown in the south of Europe and other countries bordering on the Mediterranean, Persia, etc. Its seeds are woolly and yield a very short-stapled cotton. *G. peruvianum* yields the cotton exported from Pernambuco, Bahia, and other parts of Brazil, from Peru, etc. It is sometimes called kidney cotton, on account of its seeds adhering firmly together in the form of a kidney. The harvest of this country commences in August, and lasts till December. After being picked and dried, the cotton is separated from the seeds by means of machines called *gins*, and is then tightly compressed into bales averaging about 500 pounds in weight. Two kinds of gins are used: the *saw-gin*, invented by Eli Whitney in 1793, and the *roller-gin*,—the first consisting of numerous circular saws revolving between iron grids, being used for the short-staple variety; and the latter, which is merely a pair of rollers, for the long-staple. The production of cotton in the United States has grown from 1,038,848 bales in 1831 to 13,551,000 in 1907.

Cotton-spinning, a term employed to describe in the aggregate all the operations involved in transforming raw cotton into yarn. The word "spinning" has also a more limited signification, being used to denote the conclud-

ing process of the series. The following affords a general notion of the nature and order of the successive operations carried on in the manufacture of cotton yarn:— (1) *Mixing*, the blending of different varieties of raw cotton, in order to secure economical production, uniform quality and color, and an even thread in any desired degree. (2) The *willowing*, *scratching*, or *blowing*, an operation which cleans the cotton and prepares it in the form of a continuous lap or rolled sheet for the next process. (3) *Carding*, an operation in which the material is treated in its individual fibers, which are taken from the lap, further cleansed, and laid in a position approximately parallel to each other, forming a thin film, which is afterwards condensed into a sliver—a round, untwisted strand of cotton. (4) *Drawing*, the drawing out of several slivers to the dimensions of one, so as to render the new sliver more uniform in thickness, and to place the fibers more perfectly in parallel order. (5) *Slubbing*, the further drawing or attenuation of the sliver, and slightly twisting it, in order to preserve its cohesion and rounded form. (6) *Intermediate* or *second slubbing*, a repetition of the former operation and further attenuation, not necessary in the production of coarse yarns. (7) *Roving*, a continuation of the preceding, its principal object being to still further attenuate the sliver, and give it a slight additional twist. (8) *Spinning*, which completes the extension and twisting of the yarn. This is accomplished either with the throstle or the mule. By means of the former machine the yarn receives a hard twist, which renders it tough and strong. By means of the latter yarns of less strength are produced, such as warps of light fabrics and wefts of all kinds. Up to the middle of the Eighteenth Century the only method of spinning known was that by the hand-wheel, or the still more primitive distaff and spindle. In 1763, a poor weaver of the name of Hargreaves, residing at Stanhill, near Blackburn, in Lancashire, invented a machine for spinning cotton, which he named a *spinning-jenny*. It consisted at first of eight spindles, turned by a horizontal wheel, but was afterwards greatly extended and improved, so as to have the vertical substituted for the horizontal wheel, and give motion to from fifty to eighty spindles. In 1769, Arkwright, originally a barber's apprentice, took out a patent for spinning by rollers. From the circumstances of the mill erected by Arkwright at Cromford, in Derbyshire, being driven by water-power, his machine received the name of the *water-frame*, and the thread spun on it that of *water-twist*. The next important invention in cotton-spinning was that of the mule, introduced by Mr. Samuel Crompton of Bolton, in 1775, and so called from its combining the principle of the spinning-jenny of Hargreaves with the roller-spinning of Arkwright. Numerous improvements in cotton-spinning have been introduced up to the present day, but they are all modifications of the original inventions. Among these is the *throstle*, an extension and simplification of the original spinning-frame, introduced about the year 1810. The first machines set up in the United States were at East Bridgewater, Mass., in 1786, by two Scotchmen. In 1812, Francis C. Lowell

introduced the Cartwright power-loom at Lowell, Mass., which is now the largest cotton-manufacturing center in America. There are also extensive mills in active operation in Alabama, Georgia, and other Southern States. In 1907, Great Britain had 52,000,000 spindles in operation; the continent of Europe, 35,800,000; United States, 25,924,000; and the East Indies, 5,400,000.

Credit, in finance, is the postponement agreed on by the parties of the payment of a debt to a future day. It implies confidence of the creditor in the debtor; and a "credit system" is one of general confidence of people in each other's honesty, solvency, and resources. By means of a credit system a comparatively small stock of money can be made to do duty for carrying on a number of different transactions; but it is indispensable for every good system of credit that money must be instantly available when required, and this principle applies to every species of transaction where postponed payment is concerned. Public credit is the confidence which men entertain in the ability and disposition of a nation to make good its engagements with its creditors; or the estimation in which individuals hold the public promises of payment, whether such promises are expressed or implied. The term is also applied to the general credit of individuals in a nation; when merchants and others are wealthy and punctual in fulfilling engagements; or when they transact business with honor and fidelity; or when transfers of property are made with ease. So we speak of the credit of a bank when general confidence is placed in its ability to redeem its notes, and the credit of a mercantile house rests on its supposed ability and probity, which induce men to trust to its engagements. When the public credit is questionable it raises the premium on loans.

Cutlery. A term comprising all cutting instruments made of steel, but more particularly confined to the manufacture of knives, scissors, razors, surgical instruments, and swords. Those articles which require the edge to possess great tenacity, at the same time that superior hardness is not required, are made from sheer steel. The finer kinds of cutlery are made from steel which has been in a state of fusion, and which is termed *cast-steel*, no other being susceptible of a fine polish and very keen edge. Razors are made of cast-steel, the edge of the razor requiring the combined advantages of great hardness and tenacity. After the razor-blade is formed, it is hardened by gradually raising it to a bright-red heat, and plunging it into cold water. It is tempered by heating it afterwards till a brightened part appears of a straw color. But the beauty and elegance of polished steel is displayed to great advantage in the manufacture of the finer kinds of scissors. Damascus was anciently famed for its razors, sabers, and swords — the latter especially, which possessed all the advantages of flexibility, elasticity, and hardness, while they presented a beautiful wavy appearance called the *water*. It is not known how this effect is produced; but it is well imitated in Europe by scooping hollows in the blade and filling them up; also by welding together a

bundle of steel bars, cutting and rewelding them, etc. In recent times, the English and German cutlery has been long celebrated for excellence and cheapness. The manufacture of table cutlery in the United States was introduced in 1834 by Mr. John Russell, of Greenfield, Mass., and has assumed such an importance as to command a large export.

Forestry is the act, occupation, or art of forming and cultivating forests; the systematic utilization, reproduction and improvement in productive capacity of trees in masses, including the planting and culture of new forests. The usefulness of forests to man lies: (1) in their furnishing him with timber for fuel and for manufacturing and building purposes as well as with other serviceable products, such as their bark, their sap (by distillation), turpentine, creosote, wood alcohol, vanilin, etc.; also fertilizers, fodders, materials for textile fabrics, dyes, inks, etc. (2) in their influence on climate, by furnishing large tracts of superior coolness, by conserving humidity, decreasing evaporation, breaking the force of winds, etc. (3) In their influence on the waterflow, by keeping the ground more moist, conserving the springs, making the outflow of water more steady and regular, and causing the snow within them to melt more slowly, thus preventing dangerous floods; causing the rainfall to sink slowly into the soil rather than to flow in torrents over the surface; also by holding the soil together with their roots, so keeping the hillsides from being denuded and preventing their soil from being carried down over the cultivable fields below, sanding over valleys and silting up streams. This being the case, not only private interest exists in forests but a public interest, which necessitates at times governmental action — an action to which in the United States we have but recently awaked. Such action rests on the following principles: (1) The widest scope should be allowed to private enterprise in production, care being taken that abundant statistics in regard to supply and demand and opportunity for education on the subject be furnished. (2) Adequate legal protection should be given to forest property. (3) Whenever improper management threatens damage to neighboring property the State should interfere to enforce proper management. (4) Wherever public welfare demands the reforestation of denuded tracts the State should assist individual or communal enterprise in performing this, or else do the reforestation as a work of internal improvement. (5) In cases where a permanent forest is desirable and private interest can not be relied on for its proper management, the State should own and manage it.

The total woodland area in the United States is estimated at 1,094,514 square miles, or about 699,500,000 acres, which is thirty-six and one-half per cent. of the total land area, Alaska not included. The total annual consumption of manufactured forest products in the United States, according to the figures of the census of 1890, is more than 18,000,000,000 cubic feet, divided approximately as follows: Lumber market and manufactures, 2,250,000,000 cubic feet; fuel, 15,000,000,000 cubic feet; railroad ties,

27,000,000 cubic feet; fencing, 30,000,000 cubic feet; other items, 1,000,000,000 cubic feet. The amount of cubic feet of standing timber necessary to produce these quantities of usable material is immensely greater, probably almost double. The value of the annual products of our forests was estimated by the census of 1890, at \$1,038,616,947. At the present rate of cutting, the forest land of the United States cannot long meet the enormous demand made upon it. By far the greater part of the white pine has been cut, and vast inroads have been made into the supply of other valuable timbers. In many sections of the country more timber falls by fire than by the axe. The average annual loss from fire is not less than \$20,000,000.

India-Rubber. A peculiar elastic substance composed of carbon and hydrogen, found in suspension in the milky juice of the *Siphonia Elastica*, and other arboraceous plants. The crude rubber is usually prepared where the juice is collected, by drying the juice over a fire or in the sun on molds of clay, paddles, or lasts; by evaporating the juice in the sun and removing the successive pellicles formed on the surface; or by coagulating the juice, as in Nicaragua, by an application of the juice of the bejuca vine, and kneading and rolling the coagulated mass. Most of the rubber of commerce is derived from South America, from Pará, Central America, Mexico, Carthagena, etc.; smaller quantities from Java, Penang, Singapore, Assam, and South Africa. The purest comes from Pará in large bottles and thick plates. Prior to the introduction of rubber into Europe in the early part of the Eighteenth Century it had already been turned to various domestic and industrial uses, such as the making of bottles, syringes, boots, and waterproofing, by the natives and residents along the banks of the Amazon. In Europe the first important practical applications of it are associated with the names of Mackintosh, the patentee in 1823 of a waterproofing process by the solution of the gum in oil of turpentine and alcohol, and in coal-tar, naphtha; Hancock, the inventor of the "masticator," a machine for the condensation of crude lumps or shreds of caoutchouc, as imported, into compact homogeneous blocks for subsequent division into cakes, sheets, rollers, etc.; and Goodyear, the inventor of the vulcanizing process, patented in 1844. Since then its uses have multiplied so rapidly that it is em-

ployed in every department of industry. Thus apart from its use in blocks and sheets, etc., in tapes or threads for weaving into elastic tissues, and as varnish for waterproofing, it is employed, in combination with other resinous materials in a solvent such as naphtha, as a cement or marine glue. When combined with a small quantity of sulphur, etc., it is used for the manufacture of overshoes, boots, gloves, life-preservers, gas-bags, steam and water packing, belting, fire-hose, tubing, springs, tires, artificial sponges, etc. With a larger proportion of sulphur, and cured or vulcanized by exposure to a high temperature, it is used for the manufacture of combs, pen and pencil holders, rulers, inkstands, buttons, canes, syringes, jewelry, and, when colored with vermilion, for mountings for artificial teeth, etc. In combination with asphalts, oils, and sulphur, etc., and vulcanized (*kerite*) it is used for covering telegraph wires.

Insurance. The act of providing against a possible loss, by entering into a contract with one who is willing to give *assurance*; that is, to bind himself to make good such possible loss, should it occur. The instrument by which the contract is made is denominated a *policy*, and the stipulated consideration is called the *premium*. In this country, Fire and Marine insurance are almost invariably effected by joint-stock companies, whose modes of operations are too well known to call for expatiation here. Life Insurance (to which the word "assurance" is now more generally applied) is a contract by which a party, for a certain premium, agrees to pay a certain sum, should a person, to whose life it relates, die within a time specified; or to pay the executors of the insured a certain sum

at the time of his death. Such policies, however, formerly made an exception in the case of death by suicide. By this means, a family may be furnished with means of support in case of the death of its head. According to general practice, a life insurance is seldom made by the payment of a single sum at the time it is effected, but almost always by the payment of an annual premium during its continuance. An individual, therefore, who has insured a sum on his own life, would forfeit certain advantages of the insurance were he not to continue regularly to make his periodical payments. Life insurance is conducted by several kinds of societies; as the *proprietary*, *mutual insurance*, and *mixed societies*. The proprietary, or joint-stock companies, are formed of persons who have subscribed a capital, on the insurance of which the business of the company is carried on, and who divide the profits entirely among themselves. In the mutual insurance societies, on the other hand, there is no proprietary, the assured being likewise the assurers, and dividing the profits among themselves, after deducting the expenses of management, and reserving a guaranty fund. In the mixed class of offices, which is the most numerous in the United States, there is a proprietary, but, at the same time, the assured are allowed to participate largely in the profits of the society, which are usually divided in the form of bonuses at stated periods. The premiums to be paid are adjusted according to the age of the party on whose life the insurance is made; being lowest on young lives, and increasing from year to year as the expectancy of life diminishes.

It is within the past sixty years that the vast business of life insurance in the United States has been developed. The experimental stage was ended and the era of advance was opened when, in 1843, the Mutual Life Insurance Company of New York began business, its first policy having been issued on February 1st of that year. Since then a large number of life insurance companies have been established. The following list includes those now transacting business which had their inception between 1843 and 1860 inclusive, arranged according to the date of the first policy issued:

Mutual Life Insurance Company, 1843; New England Mutual Life Insurance Company (1), 1844; New York Life Insurance Company, Mutual Benefit Life Insurance Company, State Mutual Life Assurance Company (3), 1845; Connecticut Mutual Life Insurance Company, 1846; Penn Mutual Life Insurance Company, 1847; Union Mutual Life Insurance Company, 1849; National Life Insurance Company of Vermont, United States Life Insurance Company, Aetna Life Insurance Company, Manhattan Life Insurance Company, 1850; Massachusetts Mutual Life Insurance Company, Phoenix Mutual Life Insurance Company, Berkshire Life Insurance Company (4), 1851; Northwestern Mutual Life Insurance Company, 1858; Equitable Life Assurance Society, 1859; Washington Life Insurance Company, Home Life Insurance Company, Germania Life Insurance Company, 1860.

How life insurance has progressed since the early part of 1843 is shown in the subjoined

table by periods of years as indicated, assessment insurance not being included:

YEAR	AMOUNT OF OUTSTANDING INSURANCE	AMOUNT OF ASSETS
1843,	\$6,500,000	\$1,000,000
1867,	1,235,000,000	124,534,000
1892,	4,898,000,000	907,441,000
1899,	6,266,000,000	1,576,000,000
1906,	13,706,797,784	2,924,253,848

The following is the table of expectation of life usually recognized by American life insurance companies:

EXPECTATION OF LIFE

AGE	EXPECTA- TION IN YEARS	AGE	EXPECTA- TION IN YEARS	AGE	EXPECTA- TION IN YEARS	AGE	EXPECTA- TION IN YEARS	AGE	EXPECTA- TION IN YEARS
0	28.15	20	34.22	40	26.04	60	15.45	80	5.85
1	36.78	21	33.84	41	25.61	61	14.86	81	5.50
2	38.74	22	33.46	42	25.19	62	14.26	82	5.16
3	40.01	23	33.08	43	24.77	63	13.66	83	4.87
4	40.73	24	32.70	44	24.35	64	13.05	84	4.66
5	40.88	25	32.33	45	23.92	65	12.43	85	4.57
6	40.69	26	31.93	46	23.37	66	11.96	86	4.21
7	40.47	27	31.50	47	22.83	67	11.48	87	3.90
8	40.14	28	31.08	48	22.27	68	11.01	88	3.67
9	39.72	29	30.66	49	21.72	69	10.50	89	3.56
10	39.23	30	30.25	50	21.17	70	10.06	90	3.43
11	38.64	31	29.83	51	20.61	71	9.60	91	3.32
12	38.02	32	29.43	52	20.05	72	9.14	92	3.12
13	37.41	33	29.02	53	19.49	73	8.69	93	2.40
14	36.79	34	28.62	54	18.92	74	8.25	94	1.98
15	36.17	35	28.22	55	18.35	75	7.83	95	1.62
16	35.76	36	27.78	56	17.78	76	7.40		
17	35.37	37	27.34	57	17.20	77	6.99		
18	34.98	38	26.91	58	16.63	78	6.59		
19	34.59	39	26.47	59	16.04	79	6.21		

Interest is the allowance made for the loan or retention of a sum of money which is lent for, or becomes due at, a certain time; this allowance being generally estimated at so much per cent. per annum, that is, so much for the use of \$100 for a year. The money lent or forborne is called the *principal*; the sum paid for the use of it, the *interest*. The interest of \$100 for one year is called the *rate per cent.*, and the sum of any principal and its interest together, the *amount*. Interest is either *simple* or *compound*. Simple interest is that which is allowed upon the principal only, for the whole time of the loan or forbearance. Compound interest is that which arises from any sum or principal in a given time by increasing the principal, at fixed periods, by the interest then due, and hence obtaining interest upon both interest and principal. The rate of interest, supposing the security for the principal to be equal, depends obviously upon what may be made by the employment of money in various industrious undertakings, or on the rate of profit. Where profits are high, interest is high, and vice versa; in fact, the rate of interest is simply the net profit on capital. Besides this, however, the interest on each particular loan must further vary according to the supposed risk of the lender, etc. Bills and notes, by the usage of trade, carry interest from the date they become due; such interest being recoverable as damages, but the jury are not bound to give it. In the United States interest is generally awarded by the courts on overdue debts.

STATES AND TERRITORIES	INTEREST LAWS			DAYS OF GRACE
	LEGAL RATE PER CENT.	ALLOWED BY CONTRACT PER CENT.	PENALTY FOR USURY	
Alabama,	8	8	Forfeit interest,	3
Arizona,	6	Any	No provision,	0
Arkansas,	6	10	Forfeit principal and interest,	3
California,	7	Any	No provision,	0
Colorado,	8	Any	No provision,	0

In the table above these States have no amount given in the personal property column.

INVENTIONS SINCE THE DISCOVERY OF ELECTRICITY

INVENTIONS	DATE	INVENTOR	NATIVITY
Discoveries of electrical phenomena, Won the title of "founder of the science of electricity,"	{ 1560 1603 1620	William Gilbert,	England
Screw printing-press,	1620	Blaew,	Germany
Spirally grooved rifle barrel,	1620	Koster,	England
Iron furnaces,	1621	Lord Dudley,	England
The use of steam,	1630	David Ramseye,	England
The first authentic reference in English literature to the use of steam in the arts.			
Bay Psalm Book, first book published in the colonies, . .	1640		Massachusetts
Barometer,	1643	Torricelli,	Italy
Steam engine, atmospheric pressure,	1663	Thomas Newcomen, . .	England
Machine for generating electricity,	1681-6	Otto von Guericke, . .	Germany
First newspaper in America, "Public Occurrences," . . .	1690		
First paper mill in America,	1690	William Rittenhouse, .	Pennsylvania
First steam engine with a piston,	1690	Denys Papin,	France,
The manufacture of plate glass established,	1695	France
First to discover difference between electric conductors and insulators,	{ 1696 1736	Stephen Gray,	England
The first practical application of the steam engine,	1702	Thomas Savery,	England
First to produce electric spark,	{ 1708 1716	Dr. J. Wall,	England
Thermometer,	1709	Fahrenheit,	Danzig
Electrometer, the well-known pith ball,	{ 1718 1772	John Cantor,	England
The "Franklin" printing-press,	1725	Benjamin Franklin, . .	United States
Electrical glass plate machine,	{ 1727 1772	Martin de Planta, . . .	France
Stereotyping,	1731	William Ged,	Scotland
First to discover that electricity is of two kinds,	1733-9	Cisternay du Fay, . . .	France
Flying shuttle in weaving,	1733	John Kay,	England
Rotary 3-color printing-press (multi-color),	1743	Platt & Keen,	England
Electric or Leyden Jar,	1745	Kleist,	Germany
Substitution of coke for coal in melting iron,	1750	Abraham Darby,	England
Lightning conductor,	1752	Benjamin Franklin, . .	United States
Spinning jenny,	1763	James Hargreaves, . . .	England
Piano orte, played in public in England in,	1767		England
Drawing rolls in a spinning machine,	1769	Richard Arkwright, . .	England
The introduction of the "Hollander" or beating engine for pulping rags in the manufacture of paper,	1773		
The mule spinner,	1774	Samuel Crompton, . . .	England
Cut nails,	1775	Jeremiah Wilkinson, . .	United States
Circular wood saw,	1777	Miller,	England
Embryo bicycle,	1779	Branchard & Magurier, .	France
Steam engine, the basis of the modern engine,	1782	James Watt,	Scotland
Gas balloon,	1783	J. E. & J. M. Montgolfier,	France
Puddling iron,	1783-4	Henry Cort,	England
Plow, with cast-iron mold board, and wrought and cast- iron shares,	1784	James Small,	Scotland
Power loom,	1785	James Cartwright, . . .	England
First steamboat in the United States,	1786	John Fitch,	United States
Steam road wagon (first automobile),	1787	Oliver Evans,	United States
Grain threshing machine,	1788	Andrew Meikle,	England
Hobby horse, forerunner of bicycle,	1790		England
Rotary steam power printing-press, the first idea of, . . .	1790	Wm. Nicholson,	England
Wood planing machine,	1791	Samuel Bentham,	England
Gas first used as an illuminant,	1792	Wm. Murdoch,	England
Cotton gin,	1792	Eli Whitney,	United States
Art of lithography,	1796	Alois Senefelder,	Germany
Machine for making continuous webs of paper,	1800	Louis Robert,	France
Electric battery discovered,	1800	Volta,	Italy
Steam coach,	1801	Richard Trevithick, . .	England
Wood mortising machine,	1801	M. J. Brunel,	England
Pattern loom,	1801	M. J. Jacquard,	France
First fire-proof safe,	1801	Richard Scott,	England
Steamboat on the Clyde, "Charlotte Dundas,"	1802	William Symington, . .	England
First photographic experiments,	1802	Wedgwood & Davy, . . .	England
Planing machine,	1802	J. Bramah,	England
The application of steam to the loom,	1803	William Horrocks, . . .	England
Steel pen,	1803	Wise,	England
Steam locomotive on rails,	1804	Richard Trevithick, . .	England
Application of twin-screw propellers in steam navigation, .	1804	John Stevens,	United States
Process of making malleable-iron castings,	1804	Lucas,	England
First life preserver,	1805	John Edwards,	England
Electro-plating,	1805	Luigi Brugnatelli, . . .	Italy
Knitting machine, the latch needle in the,	1806	Jeandeau,	France
Steamboat navigation on the Hudson River,	1807	Robert Fulton,	United States
Percussion or detonating compound,	1807	A. J. Forsyth,	Scotland
First street gas lighting in England,	1807	F. A. Winsor,	England
Band wood saw,	1808	Newberry,	England
Voltaic arc,	1808	Sir Humphry Davy, . . .	England
First steamboat to make a trip to sea, the "Phoenix," . . .	1808	John Stevens,	United States
Multi-wire telegraphy,	1809	Sommering,	Germany
Revolving cylinder printing-press,	1810	Frederick Koenig,	Germany
Breech-loading shotgun,	1811	Thornton & Hall,	United States
Storage battery,	1812	J. B. Ritter,	Germany
Dry pile (prototype of dry battery),	1812	Zamboni,	Italy
First practical steam rotary printing-press, paper printed on both sides.	1814	Frederick Koenig,	Germany

INVENTIONS SINCE THE DISCOVERY OF ELECTRICITY

(CONTINUED)

INVENTIONS	DATE	INVENTOR	NATIVITY
First locomotive in United States,	1814	George Stephenson,	England
First circular wood saw made in this country,	1814	Benjamin Cummings,	United States
Heliography,	1814	Jos. N. Niepce,	France
Kaleidoscope,	1814	Sir David Brewster,	England
Miners' safety lamp,	1815	Sir Humphry Davy,	England
Dry gas meter,	1815	S. Clegg,	England
Knitting machine,	1816	Brunel,	England
"Draisine" bicycle,	1816	Baron von Drais,	Germany
"Columbian" press, elbowed pulling bar, number of im- pressions per hour, 50,	1817	George Clymer,	United States
Stethoscope,	1819	Laënnec,	France
Electro-magnetism discovered,	1819	H. C. Oersted,	Denmark
Lathe for turning irregular wood forms,	1819	Thomas Blanchard,	United States
The theory of electro-dynamics first propounded,	1820	Andre Ampère,	France
Electroscope,	1820	Bohenberg,	Germany
The conversion of the electric current into mechanical mo- tion,	1821	Michael Faraday,	England
Galvanometer,	1822	Schweigger,	Germany
Multi-color printing,	1822	P. Force,	United States
Calculating machine,	1822	Charles Babbage,	England
Discovery of thermo-electricity,	1823	Professor Seebeck,	England
Liquefaction and solidification of gas,	1823	Michael Faraday,	England
Water gas, discovery of,	1823	Ibbetson,	England
Portland cement,	1825	Joseph Aspdin,	England
Electro-magnet,	1825	Sturgeon,	England
First passenger railway, opened between Stockton and Dar- lington, England,	1825		
Electrical spur wheel,	1826	Barlow,	England
First railroad in United States, near Quincy, Mass.,	1826		
The law of galvanic circuits formulated,	1827	George S. Ohm,	Germany
Friction matches,	1827	John Walker,	United States
The reduction of aluminum,	1827	Friedrich Wohler,	Germany
Law of electrical resistance,	1827	George S. Ohm,	Germany
Improved rotary printing-press, "London Times," 5,000 impressions per hour,	1827	Cowper & Applegarth,	England
Hot air blast for iron furnaces,	1828	J. B. Neilson,	Scotland
Wood planing machine,	1828	William Woodworth,	United States
Spool electro-magnet,	1828	Joseph Henry,	United States
Tubular locomotive boiler,	1828	Séquin,	France
Spinning ring frame,	1828	John Thorp,	England
The "Washington" printing-press, lever motion and knuckle joint for a screw, number of impressions per hour, 200,	1829	Samuel Rust,	United States
First steam locomotive in United States, "Stourbridge Lion,"	1829		
Double fluid galvanic battery,	1829	A. C. Becquerel,	France
First portable steam fire engine,	1830	Brathwaite & Ericsson,	England
Magneto-electric induction,	1831	Michael Faraday,	England
Chloroform,	1831	G. J. Guthrie,	Scotland
First conception of electric telegraph,	1832	Professor S. F. B. Morse,	United States
First magneto-electric machines,	1832	Saxton,	United States
Rotary electric motor,	1832	Wm. Sturgeon,	England
Chloral-hydrate,	1832	Justus von Liebig,	Germany
Locomotive, "Old Ironsides," built,	1832	M. W. Baldwin,	United States
Link-motion for locomotives,	1832	Sir Henry James,	England
Adoption of steam whistle for locomotives,	1833	George Stephenson,	England
Reciprocating saw-tooth cutter within double guard fingers for reapers,	1833	Obed Hussey,	United States
"McCormick" reaper,	1834	Cyrus H. McCormick,	United States
Rotary electric motor,	1834	M. H. Jacobi,	Russia
Carbolic acid discovered,	1834	Runge,	Germany
Horseshoe machine,	1835	H. Burden,	United States
Constant electric battery,	1836	J. P. Daniell,	England
Acetylene gas discovered,	1836	Edmund Davy,	England
The revolver; a device "for combining a number of long barrels so as to rotate upon a spindle by the act of cock- ing the hammer,"	1836	Samuel Colt,	United States
The screw applied to steam navigation,	1836	John Ericsson,	United States
	1841		
The galvanizing of iron,	1837	Henry Craufurd,	England
Indicator-telegraph,	1837	Cooke & Wheatstone,	England
Photographic carbon printing,	1838	Mungo Ponton,	France
Babbitt metal,	1839	Isaac Babbitt,	United States
Vulcanization of rubber,	1839	Charles Goodyear,	United States
The first boat electrically propelled,	1839	Jacobi,	Germany
Daguerreotype,	1839	Louis Daguerre,	France
(First to produce a direct photographic positive in the camera by means of highly polished silver surfaced plate exposed to the vapors of iodine and subsequent development with mercury vapor.)	1839	Fox Talbot,	England
Making photo-prints from paper negatives,	1839	Profs. Draper & Morse,	United States
(First production of positive proofs from negatives.)	1839	Grove,	England
Photographic portraits (Daguerreotype process),	1840	Draper,	United States
First incandescent electric lamp,	1840		Paris
Celestial photography,	1840

Pianoforte automatically played,	1842	M. Seytre,	France
Water gas, utilization of,	1842	Selligne,	France
Steam hammer,	1842	James Nasmyth,	Scotland
Typewriting machine,	1843	Charles Thurber,	United States
First telegram sent,	1844	Professor S. F. B. Morse,	United States
The use of nitrous oxide gas as an anæsthetic,	1844	Dr. Horace Wells,	United States
The electric arc light (gas retort carbon in a vacuum),	1844	Léon Foucault,	France
First telegraphic message, Washington, Baltimore,	1844	Professor S. F. B. Morse,	United States
Automatic adjustment of electric arc light carbons,	1845	Thomas Wright,	England
Double cylinder printing-press,	1845	R. Hoe & Co.,	United States
Pneumatic tire,	1845	R. W. Thompson,	England
Sewing machine,	1846	Elias Howe,	United States
Printing telegraph,	1846	House,	United States
Suez canal started,	1846	De Lesseps,	France
Ether as an anæsthetic,	1846	Dr. Morton,	United States
Electric cautery,	1846	Crusell,	Russia
Artificial limbs,	1846		
Gun cotton,	1846	Schönbein,	Germany
First pianoforte keyboard player,	1846	Debain,	France
Chloroform in surgery,	1847	Dr. Simpson,	Scotland
Nitro-glycerine,	1847	Sobrero,	
Time-lock,	1847	Savage,	United States
Hoe's lightning press, capable of printing 20,000 impressions per hour,	1847	Richard M. Hoe,	United States
Match-making machinery,	1848	A. L. Dennison,	United States
Breech gun-lock, interrupted thread,	1849	Chambers,	United States
Magazine gun,	1849	Walter Hunt,	United States
Steam pressure gauge,	1849	Bourdon,	France
Lenticular stereoscope,	1849	Sir David Brewster,	England
Latch needle for knitting machine,	1849	J. T. Hibbert,	United States
"Corliss" engine,	1849	G. H. Corliss,	United States
Printing-press, curved plates secured to a rotating cylinder,	1849	Jacob Worms,	France
Mercerized cotton,	1850	John Mercer,	England
Collodion process in photography,	1850	Scott Archer,	England
American machine-made watches,	1850		United States
Electric locomotive,	1851	Dr. Page,	United States
Self-raker for harvesters,	1851	W. H. Seymour,	United States
Breech-loading rifle,	1851	Maynard,	United States
Icemaking machine,	1851	J. Gorrie,	United States
Ophthalmoscope,	1851	Helmholtz,	Germany
The Ruhmkorff coil,	1851	Ruhmkorff,	Germany
Fire-alarm telegraph,	1852	Channing & Farmer,	United States
Reticulated screen for half-tone photographic printing,	1852	Fox Talbot,	England
Soda process of making pulp from wood,	1853	Watt & Burgess,	United States
Laws of magneto-electric induction,	1853	Michael Faraday,	England
Laws of electro-statics,	1853	Michael Faraday,	England
Electrolysis,	1853	Michael Faraday,	England
Duplex telegraph,	1853	Gintl,	Austria
Photographic roll films,	1854	Melhuish,	England
Diamond rock drill,	1854	Herman,	United States
Four-motion feed for sewing machines,	1854	A. B. Wilson,	United States
Magazine firearm,	1854	Smith & Wesson,	United States
Fat decomposed by water or steam at high temperature, since largely used in soap making,	1854	R. A. Tilghman,	United States
Safety matches,	1855	Lundstrom,	Sweden
Iron-clad floating batteries first used in Crimean War,	1855		
Cocaine,	1855	Gaedeke,	Germany
Process of making steel, blowing air through molten pig iron,	1855	Sir Henry Bessemer,	England
Dryplate photography,	1855	Dr. J. M. Taupenot,	
Bicycle,	1855	Ernst Michaux,	France
Sleeping car,	1856	Woodruff,	United States
Aniline dyes,	1856	Perkins,	England
Printing machine for the blind (contains elements of the present typewriting machine),	1856	Alfred E. Beach,	United States
Regenerative furnace,	1856	Wm. Siemens,	England
Refining engine in paper pulp making,	1856	T. Kingsland,	United States
Coal-oil first sold in the United States,	1857	Messrs. Stout & Hand,	United States
First sea-going iron-clad war vessel, the "Glorie,"	1857		France
Ground wood pulp,	1858	Henry Voelter,	Germany
Inclined elevator and platform in the reaper,	1858	J. S. Marsh,	United States
Cable car,	1858	E. A. Gardner,	United States
Breech-loading ordnance,	1858	Wright & Gould,	United States
Feed injector for boilers,	1858	Giffard,	France
First Atlantic cable,	1858	Cyrus Field,	United States
"Great Eastern" launched,	1859		
Storage or secondary battery,	1860	Gaston Planté,	France
Singing telephone,	1860	Philip Reis,	Germany
Ammonia absorption ice machine,	1860	F. P. E. Carré,	France
Improved stereotyping process,	1861	Charles Craske,	United States
Shoe-sewing machine,	1861	George McKay,	United States
Driven well, a tube with a pointed perforated end driven into the ground,	1861	Col. N. W. Green,	United States
Passenger elevator,	1861	E. G. Otis,	United States
Barbed-wire fence introduced,	1861		United States
Calcium carbide produced,	1862	Frederich Woehler,	Germany

First practical typewriting machine,	1868	C. L. Sholes,	United States
Dynamite,	1868	A. Nobel,	France
Oleomargarine,	1868	H. Mege,	France
Water heater for steam fire engine,	1868	W. A. Brickell,	United States
Sulky plow,	1868	B. Slusser,	United States
Railway air-brake,	1868	George Westinghouse,	United States
Tunnel shield (operated by hydraulic power),	1869	Alfred E. Beach,	United States
A curved spring tooth harrow,	1869	David L. Garver,	United States
Dynamo-electric machine,	1870	Gramme,	France
Celluloid,	1870	J. W. & Isaac Hyatt,	United States
Rebounding gun-lock,	1870	L. Hailer,	United States
The Goodyear welt shoe-sewing machine,	1871	Goodyear,	United States
Photographic gelatino-bromide emulsion (basis of present rapid photography),	1871	R. L. Maddox,	England
Continuous web printing-press,	1871	Hoe & Tucker,	United States
Grain binder,	1871	S. D. Locke,	United States
Compressed air rock drill,	1871	S. Ingersoll,	United States
Positive motion weaving loom,	1872	J. Lyall,	United States
Theory that light is an electric phenomenon,	1872	Clerk Maxwell,	England
Automatic air brake,	1872	George Westinghouse,	United States
Automatic car coupler,	1873	E. H. Janney,	United States
The photographic platinotype process, (Prints by this process are permanent.)	1873	Willis,	England
Quadruplex telegraph,	1873	T. A. Edison,	United States
Twine binder for harvesters,	1873	M. L. Gorham,	United States
Gelatino-bromide photographic emulsion (sensitiveness to light greatly increased by the application of heat),	1873	Charles Bennett,	England
Self-binding reaper,	1873	Locke & Wood,	United States
Barbed-wire machine,	1874	Glidden & Vaughan,	United States
Siphon recorder for submarine telegraphs,	1874	Sir William Thompson,	England
Store cash carrier,	1875	D. Brown,	United States
Illuminating water gas,	1875	T. S. C. Lowe,	United States
Roller flour mills,	1875	F. Wegmann,	United States
Middlings purifier for flour,	1875	Geo. T. Smith,	United States
Ice-making machine,	1875	R. P. Pictet,	Switzerland
Speaking telephone,	1876	Alex. G. Bell,	United States
Electric candle, (The first step towards the division of the electric current for lighting.)	1876	Paul Jablochhoff,	Russia
Continuous machine for making tobacco cigarettes,	1876	Russell,	United States
Steam feed saw mills,	1876	D. C. Prescott,	United States
The first Portland cement plant in United States,	1876		Coplay, Pa.
Phonograph,	1877	T. A. Edison,	United States
Gas engine,	1877	N. A. Otto,	United States
Carbon microphone,	1877	T. A. Edison,	United States
Telephone transmitter of variable resistance,	1877	Emil Berliner,	United States
Carbon filament for electric lamp, (Beginning of the incandescent vacuum electric light.)	1878	T. A. Edison,	United States
Rotary disk cultivator,	1878	Mallon,	United States
Decided advance in the "expression" of self-playing pianofortes,	1878	Gally,	United States
Automatic grain binder,	1879	J. F. Appleby,	United States
Cathode rays discovered,	1879	Sir Wm. Crookes,	England
Electric railway,	1879	Siemens,	Germany
Steam plow,	1879	W. Foy,	United States
Magazine rifle,	1879	Lee,	United States
"Blake" telephone transmitter,	1880	Blake,	United States
Hammerless gun,	1880	Greener,	United States
Storage battery or accumulator,	1880	Camille A. Faure,	France
Typhoid bacillus isolated,	1880	Eberth & Koch,	Germany
Pneumonia bacillus isolated,	1880	Sternberg,	United States
Button-hole machine,	1881	Reece,	United States
Improvement in "expression" of self-playing pianofortes,	1882	Schmaele,	United States
Hand photographic camera for plates,	1881	Wm. Schmid,	United States
Tuberculosis bacillus isolated,	1882	Robert Koch,	Germany
Hydrophobia bacillus isolated,	1882	Louis Pasteur,	France

Iron. A metallic element very widely diffused in nature, and occurring in great abundance in many parts of the world. Its symbol is Fe, from the Latin word *ferrum*; atmospheric weight, 56. In the perfectly pure state, iron is almost unknown. In the arts, it is met with in the forms of malleable iron, steel and cast iron. The first being iron as free from impurities as it is possible to get it, and the other two being iron containing carbon in proportions varying from 0.65 to upwards of 5.0 per cent. Good malleable iron, known also as wrought iron, is of a grayish color. Its melting-point approaches that of platinum; although at temperature far below this it assumes a soft, pasty condition, and is capable of being welded together into one mass.

This property of iron is of the greatest value in manufacturing operations. Its hardness and toughness are scarcely altered by heating to redness and cooling suddenly, forming in this respect a striking contrast to steel and cast iron. It is very malleable and ductile, and at a red heat may be hammered and rolled into any desired form. By these operations, it acquires a fibrous texture, and increases greatly in tenacity. The presence of foreign substances modifies the working properties of wrought iron; thus, sulphur in quantities of upwards of 0.01 per cent. renders it what is technically called *red short* — that is, brittle and non-tenacious at a red heat. Phosphorus, if present in quantities of more than 0.5 per cent., renders the iron brittle at the ordinary temperature, or, as it is technically called, *cold short*. In dry air malleable iron is unchanged, but air and moisture quickly oxidize it, forming a red rust, which in time would eat through the whole mass. When heated to whiteness in a current of air, malleable iron burns with vivid scintillations, producing magnetic oxide, and at a red heat decomposes aqueous vapor; forming magnetic oxide and evolving hydrogen. Cast iron, or pig iron, is iron containing the highest amount of carbon. There are two kinds, viz: gray cast iron, which is granular in texture and of a gray color; and white cast iron, which is much whiter, has a crystalline and somewhat conchoidal fracture, and is very hard and brittle. The chief difference between these two kinds of cast iron appears to be due to the state in which the carbon is contained in them. The carbon may be removed from cast iron by heating it to the welding point and stirring it about in the air or with oxide of iron (*Puddling process*), or by blowing air through it in the melted state (*Bessemer process*). In the latter operation the heat produced by the combustion of the carbon is sufficient to raise the temperature to such a degree, that when at last the carbon is all burnt off the resulting malleable iron is still in the liquid state. If these operations are stopped before all the carbon is burnt off, steel of various qualities is produced. Cast iron is the form in which the

metal is almost invariably prepared from its ore, by processes whose description would occupy too much space, the reader being therefore referred to works on metallurgy for further details. The most important iron ores are magnetite, or magnetic iron ore, which has a black metallic luster, sometimes forms mountainous masses, and contains 72.41 per cent. of iron. *Hæmatite red iron ore*, or *oligistic iron*, which is ferric oxide, occurs either crystalline or massive, and contains 70 per cent. of iron. *Specular iron ore*, or *elba iron ore*, which is also a ferric oxide, and is iron gray and crystalline. *Brown iron ore*, which is a hydrated sesquioxide of iron, contains when pure 59.89 per cent. of iron, and is of a compact earthy appearance. *Spathic iron ore*, or *sparry iron ore*, a native protocarbonate of iron, crystallizing in masses of a light yellowish color, and containing 48.27 per cent. of iron. And *clay iron ore*, which consists of hæmatite or spathic iron ore with clay.

In 1906, the production of pig iron and steel in the principal producing countries of the world was as follows:

COUNTRIES	PIG IRON, TONS	STEEL, TONS
Austria-Hungary,	1,403,500	1,195,000
Belgium,	1,431,160	1,185,660
Canada,	550,616	
France,	3,319,032	2,371,377
Germany,	12,478,067	11,135,085
Italy,	30,450	409,000
Russia,	2,350,000	1,763,000
Spain,	387,500	251,600
Sweden,	552,250	351,900
United Kingdom,	10,210,178	6,565,670
United States,	25,712,106	23,738,559
All other countries,	650,000	420,000

In the United States, Pennsylvania is still far in advance as a producer of pig iron. Ohio, Illinois, and Alabama follow in the order named. Pennsylvania produces one-half of the Bessemer pig iron, nearly three-fourths of the low phosphorus, nearly three-fourths of the basic, and high percentages of the other grades, as well as fully 50 per cent. of the cast steel and rolled iron and steel products of the country. Ohio ranks second, Illinois third, and New York fourth in mill products.

Radium. A newly discovered element of intense activity, casting off minute corpuscles at a velocity of 130,000 miles per second, and without appreciably diminishing in substance. Radium is exceedingly rare and costly, enormous quantities of pitchblende yielding only a minute amount of the element. M. and Madame Curie, the discoverers of radium, are authority for the statement that a pound of radium, if it could be had, would have a value of nearly a million dollars, and that the thirtieth part of a grain costs five dollars. Many scientists affirm that radium can give light without heat or combustion. Sir William Ramsay has demonstrated that the emanations of radium, under certain conditions, have the power to transmute certain substances. The same claim was made by Prof. McCoy of the University of Chicago, early in 1908.

Railroad. A road constructed of tracks of iron, called rails, on which roll the wheels of carriages drawn either by horses or by steam-engines, and to which they are confined by ledges or flanges raised on the tires of the wheels. Nearly two centuries before the introduction of the locomotive, wooden rails were used at the collieries, in the north of England; their upper surfaces being, at a later period, covered with a plate or bar of iron, to render them more durable; and about the year 1776, flanges being added to them to keep the wagons from running off. The imperfections of plate, or as they were also called tram rails, led, about the year 1801, to the adoption of edge rails, or those at present exclusively used; and, soon after, cast iron was supplanted by wrought iron, in their manufacture. The use of locomotives, instead of animals, was suggested in 1794; but no locomotive seems to have been constructed until 1805. At first cogged wheels, and various kinds of propellers, were employed with locomotives, from an erroneous supposition that there would not be sufficient friction between the driving-wheels

and rails to prevent the former from turning round, without the production of progressive motions; but in 1814, plain wheels were tried and found perfectly efficient. The locomotive did not come into practical use until the opening of the Liverpool & Manchester Railway in 1830; although the first railway Act received the sanction of the British legislature in 1801, by the incorporation of the Surrey Iron Railway Company. This was indeed a comparatively trifling enterprise, for it extended only from Wandsworth to Croydon, and was merely applicable for the carriage of coals, lime, etc.; the moving-power being derived from horses alone. In the United States a horse-railroad was completed in 1827, from the granite quarries of Quincy, Mass., a distance of three miles, to the Neponset River. A second road was laid out in January, 1827, from the coal-mines of Mauch Chunk, Penn., to the Lehigh River, a distance of nine miles, and with various ramifications the whole length exceeded thirteen miles. The Delaware and Hudson Canal Company, in 1828, constructed a railroad from their coal-mines to Honesdale, the terminus of their canal, and sent a commissioner to England for the purchase of rail, iron, and locomotives. In the spring of 1829, these locomotives arrived in this country. Of the succeeding great railway enterprises, one of the principal was the Baltimore & Ohio line, commenced in 1828, and originally planned for horse-cars only, but, influenced by the success of steam locomotives in England, their employment was adopted on this road instead of horse-power. In August, 1830, the Hudson & Mohawk Railroad, from Albany to Schenectady, was commenced. Several similar enterprises were undertaken in the Pennsylvania coal region in 1830, and in the legislative session of 1830-31 no fewer than twelve railroad companies were incorporated. In 1831 the Baltimore & Susquehanna Railroad commenced

operations. Such were the beginnings of these vast undertakings which now permeate all portions of the United States. The following table, from "Poor's Manual," shows the mileage, assets, liabilities, earnings, expenditures, and traffic of all surface steam railroads in the United States:

MILEAGE	
Mileage of Railroads,	224,382.19
Second Tracks and Sidings,	99,651.19
Total Track,	324,033.38
Steel Rails in Track,	314,713.50
Iron Rails in Track,	9,319.88
Locomotives,	58,301
Cars, Passenger,	35,321
Cars, Baggage, Mail, etc.,	11,952

The capital invested in the railways of the world is approximately: Europe, \$23,049,778,500; United States, \$18,558,881,437; other parts of the world, \$5,063,834,122.

Telegraph. The term is now usually restricted to the electric telegraph, which stands at the head of all mediums for rapid and elaborate communications. As a system, the electric telegraph involves the following apparatus: (1) a battery or other source of electric power;

(2) a line-wire or conductor for conveying the electric current from one station to another; (3) the apparatus for transmitting, interrupting, and, if necessary, reversing the current at pleasure; and (4) the indicator or signaling instrument. The line-wires for overhead lines are usually of iron, protected from atmospheric influence by galvanizing or by being varnished with boiled linseed-oil, a coating of tar, or other means, and are supported upon posts, to which they are attached by insulators. In underground lines the wires are insulated by a gutta-percha or other non-conducting covering, and inclosed in iron or lead pipes. The battery and line-wire are common to all telegraphic systems; it is in the method of producing the signals that the great variation exists; but in all of them advantage has been taken of one or other of the three following properties of the current: (1) its power of producing the deflection of a magnetic needle, as in the galvanometer (which see); (2) its power of temporarily magnetizing soft iron; and (3) its power of producing chemical decomposition.

The *electro-magnetic* instrument of Professor Morse, which, however, in its perfected form owed much to the genius of Morse's associates, Joseph Henry and Alfred Vail, is an application of the second of the above properties. By means of an electro-magnet, an armature, which is attracted when the magnet is temporarily magnetized, a lever moved by the armature, and a style which moves with the lever, this instrument impresses a message in dots and dashes on a ribbon of moving paper, and by it forty words may be sent in a minute. This "dot and dash" system which was invented by Morse, is now in extensive use. A modification of this instrument, called a sounder, in which the lever makes audible sounds by coming in contact with a brass rod, indicates the message by the length of the strokes produced. Frequently the Morse is simultaneously a recorder and sounder. It being necessary that this instrument should produce sharp and distinct impressions, and the current being weak for stages over fifty miles, a relay, or subsidiary electro-magnetic circuit, is added to it in the case of longer distances. The transmitting instrument is a lever, which, on being pressed, permits the current from the battery to flow into the line-wire during the time the contact is made. Both on account of its intrinsic merits and for the sake of uniformity the Morse is the most extensively used system, being that in use in America and on the continent of Europe, and being also largely employed in Britain. Wheatstone's "universal telegraph" is also one in extensive use. The currents employed are magneto-electric, and are alternately positive and negative. They produce successive reversals of polarity in the delicate *mirror* or *reflecting galvanometer*, which Sir W. Thomson invented in connection with the Atlantic telegraph. That distinguished electrician has invented a self-recording instrument, consisting of a light coil of wire, very delicately suspended in a magnetic field, the motions of which coil, when a current is passed through it, are the means by which messages are recorded. The coil is attached to a very light glass siphon in the shape

of an exceedingly fine capillary tube, through which ink from a reservoir is drawn by electric attraction, the reservoir and the moving paper ribbon upon which the ink falls being oppositely electrified. The extremity of the siphon is not in contact with, but only very near, the paper. When there is no current the ink traces a straight line; when the current is passing the marks or deviations constituting the letters are produced. The delicacy and rapidity of this instrument are even greater than those of the mirror galvanometer, and the siphon recorder accordingly is highly valued. About the year 1837 electric telegraphs were first established as commercial speculations in three different countries. Steinheil's system was carried out at Munich, Morse's in America, and Wheatstone and Cooke's in England. The first telegraphs ever constructed for commercial use were laid down by Wheatstone and Cooke on the London and Birmingham and Great Western Railways. The wires, which were buried in the earth, were five in number, each acting on a separate needle, but the expensiveness of this plan soon led to its being given up. The single-needle and double-needle telegraphs of the same inventors have been more extensively used. Among recent improvements in electric telegraphy the most important are those by which a wire can be used for more than one message at a time. In 1872, a workable method of sending simultaneously two messages in opposite directions on the same line was introduced, and it was also discovered that two messages could be sent in the same direction (duplex telegraphy). The two plans being combined formed quadruplex telegraphy, by which the message-carrying powers of the wires have been greatly multiplied.

Wireless Telegraphy has made use of three different methods, which may be classed as conduction, induction, and wave methods. In the first method currents are sent through the earth from an electrode to another at the sending station. By induction, use is made of the property which alternating currents possess of exciting similar currents in neighboring conductors, the aim being to get as intense current as possible in the secondary circuit. Mr. W. H. Preece, England, by combining the two has signaled forty miles thus. The third method is by electro-magnetic waves which are detected by a *coherer* — a glass tube filled with metallic filings, into the end of which the terminals of a relay circuit enter, sent thereto by a transmitter. The wave falls on other conductors, and, the spark gap being replaced by a coherer, the relay circuit is closed and a signal is made. Signor Marconi, an English naturalized Italian, introduced the latter method, by which he has signaled across the Atlantic. To Marconi is generally ascribed the honor of inventing wireless telegraphy, or the sending of telegraphic messages without the use of other medium than the atmosphere. Trans-Atlantic passenger vessels are now fitted out with wireless telegraphic apparatus, by means of which almost constant communication may be maintained between passing vessels or either shore. Wireless telegraphy, from the commercial standpoint, has yet to prove its value over the systems at present in

vogue. Naval and military strategy have undergone changes since the necessity for wire and cable communication has been removed. In the Russo-Japanese War wireless telegraphy was extensively employed with great precision by the fleets of both powers.

The principal system in America is that of the De Forest Wireless Telegraph Company. The inventor, Dr. de Forest, is a graduate of Yale, and claims that he can syntonise his circuits. The receiver in this system is a telephonic apparatus, and from twenty to thirty words a minute can be transmitted and recorded. The main advantage claimed for it is that its usefulness is not impaired by the presence of other systems unless the transmitting stations are practically in juxtaposition. The De Forest Wireless Telegraph Company transmitted a regular daily news service from the St. Louis Exhibition in 1904 to various newspapers, and messages were sent from the long-distance tower to Chicago, 300 miles away. The speed attained was twenty-five to thirty-five words a minute. The capacity of the De Forest system for operating simultaneously several different transmitters was clearly shown, and the ability of the operator to tune his receivers at will to various transmitters with different wave-lengths. The company has five long-distance naval stations, and powerful land stations at New York, Boston, New Orleans, St. Louis, Chicago, etc.; and it is claimed that these stations are able to operate from 300 to 1,200 miles overland.

Telephone, an instrument used for the reproduction of sounds at a distance by means of electricity. To Charles G. Page, in 1837, is due the generic idea from which the invention of the telephone became a reality. Page discovered that the sudden magnetizing and demagnetizing of a wire or rod of iron caused it to give out sound. By the use of a movable, vibrating disc, later inventors discovered the possibility of producing a discontinuous or pulsating current which might be made to set a second membrane in motion and so to reproduce sound. This "make-and-break" method of varying the electric current transmitted perfectly the pitch and intensity of tones, but omitted the third and necessary characteristic of articulate speech, quality. The current must be varied continuously, not broken. This was accomplished by Alexander Graham Bell, in 1876. Elisha Gray, also, invented a practical speaking telephone at about the same time, but the courts, after extended litigation, decided in Bell's favor.

In reality very simple in construction, the telephone is difficult to explain in words. To the ordinary user it seems as if the voice, recognizable in articulate words, and even clearly distinguishable from every other voice, were carried for miles over a wire. There is probably no more common misconception. The listener does not hear any person talk. All that goes over the wire is thousands of continuously varying impulses of electricity. The secret of the apparent actual transmission of the human voice lies in electrical induction.

It is a well-established, and generally known physical law that electricity produces magnet-

ism. It is also true, however, that this process can be reversed, that magnetism produces electricity, and it was of this fact that Bell took advantage in his original telephone, and upon this principle that the modern telephone, modified only slightly in action, is constructed. An approach to, or a receding from, a wire carrying a current, produces an induced current. If one of the pieces be a magnet, and there is a rapid approach and receding by a piece of soft iron, an induced current is also produced. Bell's system consisted of a transmitter, line wires, and a receiver, the two instruments being similar. In the transmitter a long, horseshoe magnet is placed, upon one end of which several layers of finely insulated wire are wound. The ends of these bobbins are attached to the line wires and thus they become part of the circuit. No current passes over this circuit ordinarily, but one can be induced, if a piece of iron is made to move quickly, to tremble near the bar magnet. Hence, a thin disc of sheet iron is fastened securely very near and crosswise to the end of the magnet. The voice impinging upon one of the discs causes it to vibrate, approaching and receding from the magnet in consonance with the sound waves. As the vibrations are very small, and the disc has little tendency to vibrate of itself, the vibrations follow the sound waves in every change of pitch and quality. Every time one of these vibrations occurs in the disc, a small impulse is sent from the magnet out over the circuit whose coil incloses it. These impulses, acting upon the receiving disc, cause it to vibrate in unison with the original vibrations in the transmitter, and a similar sound is produced. It is simply the reversal of the process; if sound waves will move a disc in a certain way, the moving of a disc in the same way by some other means will produce sound.

The modern telephone, enabling communication at a distance of hundreds of miles, has been rendered possible by the substitution of a battery current and a carbon disc for the magnet and sheet-iron plates. It is now used throughout the civilized world, and, by the adaptation of various mechanical contrivances, though upon the same principle, each telephone is placed into a possible communication with every other one.

Its invention and perfection have been one of the most remarkable achievements of the past few years, and it is doubtful if, among all the productions of human genius, there will ever be anything more useful or more miraculous than the telephone.

Telescope, an optical instrument essentially consisting of a set of lenses fixed in a tube or a number of sliding tubes, by which distant objects are brought within the range of distinct or more distinct vision. The law of action by which the telescope assists human vision is twofold, and that under all the varieties of its construction. A distant object viewed by the unaided eye is placed in the circumference of a large circle, having the eye for its center, and consequently the angle under which it is seen is measured by the minute portion of the circumference which it occupies. Now, when the distance is great, it is found that this angle is too

small to convey to the retina any sensible impression — all the light proceeding from the object is too weak to affect the optic nerve. This limit to distinct vision results from the small aperture or pupil of the eye. The telescope substitutes its large object lens or reflector for the human eye, and consequently receives a quantity of light proportioned to its area or surface; hence a distant point, inappreciable by the eye alone, is rendered visible by the aid of the telescope.

The telescope almost universally employed in modern times is the astronomical telescope, made up of two converging lenses, known as the refracting telescope.

The best specimens of the astronomical telescope in existence are the thirty-six-inch glass of the Lick observatory and the forty-inch glass of the Yerkes observatory, both made by the late Alvan G. Clark. On good nights these instruments permit the use of a magnifying power of from 2,000 to 3,000.

This invention is noticed by Leonard Digges, about 1571. Roger Bacon, about A. D. 1250, described telescopes and microscopes exactly, and yet neither were made till one Metius, at Alkamær, and Jansen, of Middleburgh, made them about the same time; the latter from an accidental discovery made by his children, 1590–1609. Galileo imitated their invention by its description, and made three in succession, one of which magnified a thousand times. With these he discovered Jupiter's moons and the phases of Venus. Telescopes became very popular, and were improved by Zucchi, Huygens, Gregory, and Newton; and finally by Martin, Hall, Dolland, Herschel, Clark, and others.

Trades-unions. A trade society is defined in the report of the Social Science Committee on the subject appointed at Bradford, in 1859, "as a combination of workmen to enable each to secure the conditions most favorable for labor"; and although trades-unions, as they are generally called, almost always have other objects in view in addition to that specified in the definition, that object is their distinguishing one. Combinations of this sort in Great Britain are considerably more than three centuries old, for there is a statute of the year 1548 expressly directed against them. Trades-unions generally endeavor to regulate the prices and the hours of labor, and in many cases the number of men engaged by an employer, the number of apprentices which may be bound in proportion to the journeymen employed by a master, and the like. As accessories, these unions may collect funds for benefit societies, and undertake the insurance of tools, libraries, and reading-rooms; but their fund, to which every member must regularly contribute a stated sum, is principally reserved for enabling the men to resist, by strikes and otherwise, such action on the part of the employers as would tend to lower the rate of wages or lengthen the hours of labor. That trades-unions enable the men to benefit by the state of trade more than they otherwise would have done would appear from the fact that the worst-paid trades are those without unions. Trades-unions are also said to have furthered the safety of the laborer by producing beneficial modifications of the conditions in which he works. Some hostility against trades-unions has been produced by the outrages of a more or less serious nature of which some of the unions, or members of them, have been guilty, such outrages being directed against the property of employers, or against the persons and tools of non-union men. The trades-unions of the United States embrace over 27,000 local organizations, and about 2,000,000 affiliated members; in late years having increased rapidly. In 1905, there were 1,136 unions in Britain with a membership of 1,887,000.

Trusts. A corporation derives certain benefits from the state, and is in turn subject to certain state control. To avoid this state control, and in order thus to enable the largest firms and corporations in any particular trade to combine, and by combined action to limit production and raise prices while killing off the com-

petition any outsider may dare to offer, what are known as trusts have been devised. A trust is merely the combination for the above purposes of the large interests in any branch of trade. There is no incorporation. There is an agreement between the parties; the profits of all are divided into certain ascertained proportions, and the public cannot from any sensible sign know whether or not such a combination exists. Secrecy and irresponsibility are its objects.

Turbine, either a horizontal or vertical water-wheel, made to revolve by the escape of water through orifices, under the influence of pressure derived from a fall. Turbines are now made after a vast variety of patterns. The oldest and simplest is the Scotch turbine, or Barker's mill. In another common form the water passes vertically down through the wheel between the fixed screw blades, which give it a spiral motion, and then strike similar blades attached to a movable spindle, but placed in the opposite direction, so that the impact of the water communicates a rotatory motion to the blades and spindles. Or the water may be passed from the center horizontally outwards through fixed curved blades, so as to give it a tangential motion, and thereby cause it to act on the blades of the wheel which revolves outside. The steam turbine has been successfully applied to the propulsion of vessels, notably in the great ocean liners, "Lusitania" and "Mauretania," and is steadily growing in favor. The number of vessels so fitted is not large, but the development is none the less remarkable when we remember that pleasure, and cross-channel steamers, torpedo-boat destroyers, and yachts are now fitted with these engines, while ten years ago not one turbine vessel was in service. The principal point in favor of a turbine is, that it has no reciprocating motion, like that of the piston of a common engine, and therefore the hull of a vessel is not shaken so much as by reciprocating engines. Turbine engines weigh much less, and occupy less room, than ordinary engines of the same power, so that passenger accommodation can be increased. Usually three sets of engines are employed, each driving a separate propeller shaft, which again conduces to steadiness of motion.

Type. The name given to the stamps or dies which impress the letters on the paper in printing. Printers, in early times, made the letters which they used, but in process of time the necessity for a division of labor created the distinct business of type-founding. The type-metal is a compound of lead and antimony, with a large proportion of tin. The antimony gives hardness and sharpness of edge to the composition, while the tin gives toughness and tenacity, and removes the brittleness which antimony causes when used in a large proportion without tin. The proper proportions of these metals are regulated by the size of the type, a greater quantity of antimony being employed for small letters. A complete assortment of types is called a *font*, which may be regulated to any extent. Every type-founder has a scale showing the proportional quantity of each letter required for a font; and a peculiar scale is required for every language. For the English language, the following is a type-founder's scale for

the small letters of a font of types of a particular size and weight:

a	8,500	h	6,400	o	8,000	v	1,200
b	1,600	i	8,000	p	1,700	w	2,000
c	3,000	j	400	q	500	x	400
d	4,400	k	800	r	6,200	y	2,000
e	12,000	l	4,000	s	8,000	z	200
f	2,500	m	3,000	t	9,000		
g	1,700	n	8,000	u	3,400		

Beginning with the largest, the subjoined specimens show the various sizes of type commonly used on book-work.

Eighteen Point.
Fourteen Point. Twelve Point.
Eleven Point. Ten Point. Nine Point.
Eight Point. Seven Point. Six Point.
Five and one-half Point. Five Point. Four and one-half Point.

Emerald is a type now little used, and in size is between Seven Point and Six Point.
Type-writer, a machine used as a substitute for the pen, and by which the letters are

produced by the impression of inked types. The essential elements in such machines are a movement to bring the type into position, an inking device, an impression movement, and means for letter and line spacing. A successful form of the machine has a series of letter keys arranged in rows, to be worked by the fingers of both hands, a letter being imprinted on the paper (which moves automatically) each time a key is struck. The best known, probably, are the Remington, Hammond, Bar-Lock, Smith Premier, Oliver, Underwood, Royal, American, etc. Many improvements have been made from time to time. One of the latest is the "English" typewriter, which has only two rows of keys, numbering twenty-nine in all. Each key works a lever to which is attached a capital letter, an ordinary Roman letter, and a figure. The capital letters and the figures are brought into play by means of two small shift stops, and the printing as it is performed is in full view of the operator.

EIGHTH BOOK

SCIENCE, EDUCATION, RELIGION

LELAND STANFORD, JR., UNIVERSITY

SCIENCE, EDUCATION, RELIGION

Acetic Acid. An acid produced by the oxidation of common alcohol, and of many other organic substances. Pure acetic acid has a very sour taste and pungent smell, burns the skin, and is poisonous. From freezing at ordinary temperatures (58° or 59°) it is known as *glacial acetic acid*. Vinegar is simply dilute acetic acid, and is prepared by subjecting wine or weak spirit to the action of the air; also from malt which has undergone vinous fermentation. Acetic acid, both concentrated and dilute, is largely used in the arts, in medicine, and for domestic purposes.

Acetylene. A gaseous hydro-carbon; it is a constituent of coal-gas, and burns with a bright, smoky flame. A method of preparing acetylene in large quantities has been recently devised, by the use of carbide of calcium, formerly a rare and expensive product, but now manufactured cheaply and abundantly in the electric furnace. When this substance is thrown into water a rapid chemical transformation takes place, and acetylene is given off as one of its products. It has also been discovered that if this gas be passed through pipes and burned at a small aperture, like ordinary illuminating gas, it yields an intense white flame, surpassing in brilliancy any light known but the arc electric light. By compression, acetylene can be reduced to the liquid state, and if permitted to escape slowly into pipes, can be burned for house illumination.

Acid. A class of compounds whose general properties are: solubility in water; sour taste; power of reddening litmus; faculty of decomposing carbonates with effervescence; and the power of neutralizing alkalies and bases, forming salts. The progress of modern chemistry is gradually rendering the term *acids* less definite; and it is not improbable that it will be dropped altogether in strictly scientific writing, although in ordinary language it will be retained as a convenient term for expressing a very wide class of substances. All the above characteristics are seldom possessed together, many acids having only one or two of these properties, and some substances which are not acids possessing all of them. Thus, silicic acid is not soluble in water, has no sour taste, and does not redden litmus.

Acoustics (*a-kou'stiks*). The science of sound. It teaches the cause, nature, and phenomena of such vibrations of elastic bodies as affect the organ of hearing; the manner in which sound is produced, its transmission through air and other media, the doctrine of reflected sound or echoes, the properties and effects of different sounds, including musical sounds or notes, and the structure and action of the organ of hearing, etc. The propagation of sound is analogous to that of light, both being due to vibrations which produce successive waves, and Newton was the first to show that its propagation through any medium depended upon the elasticity of that

medium. Regarding the intensity, reflection, and refraction of sound, much the same rules apply as in light. In ordinary cases of hearing the vibrating medium is air, but all substances capable of vibrating may be employed to propagate and convey sound. When a bell is struck its vibrations are communicated to the particles of air surrounding it, and from these to particles outside them, until they reach the ear of the listener. The intensity of sound varies inversely as the square of the distance of the body sounding from the ear. Sound travels through the air at the rate of about 1,090 feet per second; through water at the rate of about 4,700 feet. Sounds may be musical or non-musical. A musical sound is caused by a regular series of exactly similar pulses succeeding each other at precisely equal intervals of time. If these conditions are not fulfilled the sound is a noise. Musical sounds are comparatively simple, and are combined to give pleasing sensations according to easy numerical relations. The *loudness* of a note depends on the *degree* to which it affects the ear; the *pitch* of a note depends on the *number* of vibrations to the second which produce the note; the *timbre*, *quality*, or *character* of a note depends on the *body* or *bodies* whose vibrations produce the sound, and is due to the form of the paths of vibrating particles. The gamut is a series of eight notes, which are called by the names, Do, Re, Mi, Fa, Sol, La, Si, Do₂; and the numbers of vibrations which produce these notes are respectively proportional to 24, 27, 30, 32, 36, 40, 45, 48. The numerical value of the interval between any two notes is given by dividing one of the above numbers corresponding to the higher note by the number corresponding to the lower note. The intervals from Do to each of the others are called a *second*, a *major third*, a *fourth*, a *fifth*, a *sixth*, a *seventh*, and an *octave*, respectively. The interval from La to Do₂ is a *minor third*. An interval of $\frac{9}{8}$ is a *major tone*; $\frac{10}{9}$ is a *minor tone*; $\frac{16}{15}$ is called a *limma*. The properties of sound were mathematically investigated by Bacon and Galileo, but it remained for Newton, Lagrange, Euler, Laplace, Helmholtz, etc., to bring the science to its present state.

Aerolite. A stone falling from the air or atmospheric regions; a meteoric stone; some suppose them to be projected by lunar volcanoes, by others they are thought to be formed in the air by the union of simpler forms of matter volatilized from the earth's surface; but they are doubtless cosmical bodies of the same nature as shooting-stars, revolving round the earth, and falling when they come within its attraction. Analyzed, they are found to consist of twenty-two of the elements found in terrestrial minerals, the most prominent being malleable metallic iron and nickel.

Agricultural Colleges. Educational institutions, chiefly under government patron-

age, for the promotion of scientific farming. In 1862, the United States Congress passed a so-called land grant act, by which land scrip, representing 30,000 acres for every Senator and Representative, was issued to the States and Territories, the object being to provide a special fund for the creation of State and Territorial agricultural colleges. The land granted to the States by the act of 1862 amounted to somewhat more than 10,000,000 acres, which by 1900 had produced a permanent fund of \$10,262,944, with lands still unsold of the estimated value of \$4,062,850, the entire proceeds being in round numbers somewhat over \$14,250,000. To this have been added other land-grant funds amounting to \$1,441,577; other permanent funds, \$14,442,194; farms and grounds, \$5,543,108; buildings, \$16,274,000; apparatus, \$1,955,859; machinery, \$1,373,696; libraries, \$1,854,942; and miscellaneous equipment, \$1,997,690, making a grand total of permanent plant of the value of \$58,944,137. On this basis sixty-five of these institutions have been established.

Three of the land-grant colleges in Southern States (Mississippi, North Carolina, and South Carolina) have recently established courses of study in textile industry, with special reference to the manufacture of cotton goods. These institutions have provided buildings of regular cotton-mill design, equipped with machinery and apparatus for textile work.

The Act of 1862 was supplemented by a second (August 30, 1890), so that under both acts, each State and Territory having an agricultural college receives an appropriation annually from the United States treasury for its support. The past few years have witnessed the establishment of short courses of study in agriculture, dairying, mechanic arts, household economy, etc., for persons who cannot take a regular course.

Albumen or Albumin (L., from *albus*, white). A substance, or rather group of substances, so named from the Latin for the white of an egg, which is one of its most abundant known forms. It may be taken as the type of the protein compounds or the nitrogenous class of food stuffs. One variety enters largely into the composition of the animal fluids and solids, is coagulable by heat at and above 160°, and is composed of carbon, hydrogen, nitrogen, and oxygen, with a little sulphur. It abounds in the serum of the blood, the vitreous and crystalline humors of the eye, the fluid of dropsy, the substance called coagulable lymph, in nutritive matters, the juice of flesh, etc. The blood contains about seven per cent. of albumen. Another variety called vegetable albumen exists in most vegetable juices and many seeds, and has nearly the same composition and properties as egg albumen. When albumen coagulates in any fluid it readily encloses any substances that may be suspended in the fluid. Hence it is used to clarify syrupy liquors. In cookery white of eggs is employed for clarifying, but in large operations like sugar-refining the serum of blood is used. From its being coagulable by various salts, and especially by corrosive sublimate, with which it forms an insoluble compound, white of egg is a convenient antidote in cases

of poisoning by that substance. With lime it forms a cement to mend broken ware.

In botany the name *albumen* is given to the farinaceous matter which surrounds the embryo, the term in this case having no reference to chemical composition. It constitutes the meat of the cocoanut, the flour or meal of cereals, the roasted part of coffee, etc.

Alchemy (from the Arabic article *al* and *kimia*, secret, hidden), a false science, founded on no true scientific principles, which existed in some form or other from the earliest ages, but which, in Europe at least, was made the subject of considerable study and research during the period extending from the Twelfth to the Seventeenth Century. Although it was unproductive in itself, we are yet indebted to it, if not as the parent of modern chemistry, at any rate as the science out of which chemistry has been largely developed. The enthusiasts who devoted themselves to this subject were styled *Alchemists*, and the task which they set themselves to perform was threefold, viz: (1) to discover the *philosopher's stone*, a mineral that would, by mere contact, transmute the baser metals into gold; (2) to prepare the *elixir of life*, a substance which would prolong life indefinitely; and (3) to discover the *alcahest*, or universal solvent. These three substances, and more especially the first, they firmly believed to be obtainable, and to need only a fortunate combination of materials for the production of each of them; and, accordingly, fortunes were expended, and lives wasted, in these futile endeavors. The history of Alchemy is somewhat obscure and unconnected, owing to the secrecy with which its operations were carried on; but among the most prominent characters connected with it may be mentioned the celebrated English monk, Roger Bacon, to whom the invention of gunpowder is popularly attributed, and who wrote a work entitled "The Mirror of Alchymy."

Alembic. The alembic is one of the oldest forms of vessels for distillation, and the type of all later kinds of apparatus for that purpose. It consists of a flask, composed of either glass or copper, with a wide neck, on which is fitted a head connected with a downward running tube, the whole so arranged that all vapors condensed against the inside of the head run through a surrounding gutter to the tube and so into a receiver. In some manufacturing processes alembics are still advantageously employed, more so in France than elsewhere. For the larger chemical processes, however, it is now largely superseded by the retort and worm-still.

Alexandrian Library, the largest collection of books of the ancient world, founded by Ptolemy Soter in the city of Alexandria towards the beginning of the Third Century B. C. At one time it is said to have contained 700,000 manuscripts, embracing the collected literature of Rome, Greece, India, and Egypt. It was partly destroyed by fire by a mob of fanatic Christians in A. D. 391, and was finally dispersed or destroyed during the siege of Alexandria by the Arabs under Amru (A. D. 638).

Alimentary Canal. Another name for the digestive tract of an animal. It includes the

whole passage traversed by the substances taken in as food, from their entrance into the mouth to the excretion of the indigestible residue from the rectum. In the mammalia it is made up of the following parts, viz: (1) the *mouth*; (2) the *pharynx*, a funnel-shaped cavity at the back of the mouth, which communicates with the nostrils; (3) the *œsophagus* or gullet, a straight and narrow tube which pierces through the diaphragm or midriff; (4) the *stomach*, a bag-pipe shaped cavity, the wide expanded part of which is termed the *cardiac pouch*, and the narrow, tapering part the *pylorus*; (5) the *small intestine*, remarkable for its length and for the manner in which it is necessarily coiled, and divided, for the sake of convenience, into three parts, the *duodenum*, the *jejunum*, and the *ileum*; (6) the *large intestine*, which is thick, and presents externally a peculiar, gathered-up appearance, also divided into three parts, the ascending, transverse, and descending *colon*; (7) the *rectum*, a short, wide, smooth tube, the terminal aperture of which is called the *anus*. A portion of the large intestine which projects beyond the point of its union with the small intestine is called the *cæcum*, and a little worm-like appendage to this cæcum, the function of which has not exactly been determined, is called the *vermiform appendix*. The commencement as well as the end of the small intestine, is guarded by valves — the *pyloric valve*, in the form of a sphincter muscle, separating the pylorus from the duodenum, and the *ileo-cæcal valve*, separating the ileum from the large intestine.

Alkaloids. The name given to a series of bodies derived from the vegetable kingdom, which closely resemble in their chemical action the volatile alkali *ammonia*. They all contain nitrogen, and exert a powerful influence on the ray of polarized light. Like ammonia, they combine directly with acids to form salts. The alkaloids act most powerfully on the animal economy; some, such as strychnine and nicotine, form the most violent poisons with which we are acquainted, while others, such as quinine and morphine, are valuable medicines.

Aluminium (*āl-u-mīn'e-ūm*). A metal of which the earth alumina, the chief constituent of clay, is an oxide. It is only of late years that chemists have succeeded in inventing a process for extracting it in sufficient quantities and sufficiently cheap to enable it to be used for manufacturing purposes. It has a white color somewhat resembling tin; its specific gravity is only 2.6 (about that of common glass), and hence it is frequently used in the construction of articles where lightness is an object. The melting point is much below that of silver. When heated in oxygen it burns with brilliancy and produces alumina. It is not affected by sulphuretted hydrogen like silver. From its sonorousness it will probably be employed in the construction of musical instruments: With from 92½ to 95 per cent. of copper it forms an alloy named *aluminium-bronze*, which is scarcely distinguishable by the eye from gold, whilst it is nearly as hard as iron. This alloy is coming into use in the manufacture of ornamental articles.

Amphibia. A class of vertebrate animals, which in their early life breathe by gills

or branchiæ, and afterwards *partly* or *entirely* by lungs. The frog, breathing in its tadpole state by gills and afterwards throwing off these organs and breathing entirely by lungs in its adult state, is an example of the latter phase of amphibian existence. The Proteus of the underground caves of Central Europe exemplifies forms in which the gills of early life are retained throughout life, and in which lungs are developed in addition to the gills. A second character of this group consists in the presence of two occipital "condyles," or processes by means of which the skull articulates with the spine or vertebral column; Reptiles possessing one condyle only. The class is divided into four orders: the Ophiomorpha (or serpentiform), represented by the blindworms, in which limbs are wanting and the body is snake-like; the Urodela or "Tailed" Amphibians, including the newts, proteus, siren, etc.; the Anoura, or Tailless Amphibia, represented by the frogs and toads; and the Labyrinthodontia, which includes the extinct forms known as Labyrinthodons.

Aorta. In anatomy, the great artery or trunk of the arterial system, proceeding from the left ventricle of the heart, and giving origin to all the arteries except the pulmonary. It first rises towards the top of the breast-bone, when it is called the *ascending aorta*; then makes a great curve, called the transverse or *great arch of the aorta*, whence it gives off branches to the head and upper extremities; thence proceeding towards the lower extremities, under the name of the *descending aorta*, it gives off branches to the trunk; and finally divides into the two iliacs, which supply the pelvis and lower extremities.

Apocrypha (from the Greek *apokruptō*, I conceal). The name given especially to those additional Jewish writings which are not contained in the Hebrew Bible, or the Old Testament, but which were introduced into the Septuagint, from whence they were transferred into the Vulgate, and into many subsequent translations. By the Jews they are not held to be canonical. They are received by the Roman Catholic Church; but by the Church of England, and by other Protestant Churches, though they are held to be of value for historical purposes and for "instruction of manners," they are not used for "establishment of doctrine." Besides the Apocrypha of the Old Testament, which belong to the literature of the later Jews, there are certain apocryphal Christian writings, which are usually described as the Apocrypha of the New Testament.

Apostle. One who is sent off or away from; one sent on some important mission; a messenger; a missionary. The name given, in the Christian Church, to the twelve men whom Jesus selected from His disciples as the best instructed in His doctrines, and the fittest instruments for the propagation of His religion. Their names were as follows: Simon Peter, Andrew, his brother; James the greater, and John, his brother, who were sons of Zebedee; Philip of Bethsaida, Bartholomew, Thomas, Matthew; James, the son of Alphaeus, commonly called James the less; Lebbeus, his brother, who was surnamed Thaddeus, and was called Judas, or Jude; Simon the Canaanite, and

Judas Iscariot. Of this number, Simon Peter, John, James the greater, and Andrew were fishermen; and Matthew, a publican or tax-gatherer. When the apostles were reduced to eleven, by the suicide of Judas, who had betrayed Christ, they chose Matthias by lot, on the proposition of St. Peter. Soon after, their number became thirteen, by the miraculous vocation of Saul, who under the name of Paul became one of the most zealous propagators of the Christian faith.

Arabian Numerals. The numeral characters now used in our arithmetic. They were introduced into Europe (Spain) about the close of the Tenth Century, by the Moors or Arabs; but they were known to the Hindus as early as the Sixth Century, and they might more properly therefore be called *Hindu numerals*. They were brought to England in the Fourteenth or Fifteenth Century, but their use was not general till the introduction of the art of printing. Up to the Sixteenth Century, accounts continued to be kept in the old Roman numerals.

Arian. A follower of Arius, Presbyter of Alexandria in the Fourth Century A. D., or one holding the system of doctrine associated with his name. In the year 317, Alexander, Bishop of Alexandria, having publicly expressed his opinion that the Son of God is not only of the same dignity as the Father, but of the same essence (in Greek, *ousia*). Arius, one of the Presbyters, considered this view as leaning too much to Sabellianism, and, rushing to the other extreme, he declared that the Son of God was only the first and noblest of created beings, and though the universe had been brought into existence through His instrumentality by the Eternal Father, yet to that Eternal Father He was inferior, not merely in dignity, but in essence. The views of Arius commended themselves to multitudes, while they were abhorrent to still more; fierce controversy respecting them broke out, and the whole Christian world was soon compelled to take sides. The Arians greatly weakened themselves by splitting into sects, and the doctrines regarding the relation of the three Divine Personages authoritatively proclaimed at Nice were at last all but universally adopted. They may be found detailed in what are popularly termed the Nicene and the Athanasian Creeds. They were held almost without a dissentient voice through the Middle Ages, and were cordially accepted by the leading reformers.

Arteries. The blood-vessels by which the blood is carried out from the heart, and distributed to the general system and to the lungs. The arteries which proceed to the general system all commence in one large vessel, the *aorta*, which divides and subdivides into a large number of branches, which become, like those of a tree, more and more minute as they are farther removed from the trunk, until they ultimately terminate in what are called the *capillaries*. These arteries all contain pure, oxidized, scarlet blood, which is hence known as *arterial blood*. The arteries which proceed to the lungs, on the other hand,—the *pulmonary arteries*, as they are called,—are two vessels which have their origin in the right ventricle of the heart, and

carry the blood to the right and left lung respectively. They contain unpurified, dark-colored blood, the same as that which is contained in the veins, and hence known as *venous blood*. The principal arteries are the two *carotid* arteries, which supply the head; the two *subclavian* arteries, which proceed to the arms or front limbs; the two *iliac* arteries, to the legs or hind limbs; the *cæliac axis*, which supplies the liver, spleen, stomach, and intestines; and the *renal* arteries, which supply the kidneys. The arteries and the veins may readily be distinguished from each other in the dead body, the former being round or cylindrical, and having their walls comparatively stiff and thick, while the walls of the latter are collapsed and flaccid. It is owing to this fact that an artery when cut continues to bleed until death ensues, and the only way to arrest the bleeding is to tie the severed end nearest the heart; the flow of blood, too, from a cut artery is of a jet-like nature, owing to the force with which the blood is propelled from the heart, while from a cut vein the blood merely trickles out. The inner lining of the arteries is perfectly smooth, and there are no valves as in the veins. The arteries derived their name from the fact of their having been supposed by the ancients to contain air, being generally found empty after death.

Articles, The Thirty-nine, of the Church of England, a statement of the particular points of doctrine, thirty-nine in number, maintained by the English Church; first promulgated by a convocation held in London in 1562-1563, and confirmed by royal authority; founded on and superseding an older code issued in the reign of Edward VI. The five first articles contain a profession of faith in the Trinity; the incarnation of Jesus Christ, His descent to Hell and His resurrection; the divinity of the Holy Ghost. The three following relate to the canon of the Scripture. The eighth article declares a belief in the Apostles', Nicene, and Athanasian creeds. The ninth and following articles contain the doctrine of original sin, of justification by faith alone, of predestination, etc. The nineteenth, twentieth, and twenty-first declare the Church to be the assembly of the faithful; that it can decide nothing except by the Scriptures. The twenty-second rejects the doctrine of purgatory, indulgences, the adoration of images, and the invocation of saints. The twenty-third decides that only those lawfully called shall preach or administer the sacraments. The twenty-fourth requires the liturgy to be in English. The twenty-fifth and twenty-sixth declare the sacraments effectual signs of grace (though administered by evil men), by which God excites and confirms our faith. They are two: baptism and the Lord's Supper. Baptism, according to the twenty-seventh article, is a sign of regeneration, the seal of our adoption, by which faith is confirmed and grace increased. In the Lord's Supper, according to article twenty-eighth, the bread is the communion of the body of Christ, the wine the communion of His blood, but only through faith (article 29); and the communion must be administered in both kinds (article 30). The twenty-eighth article condemns the doctrine of transubstantia-

tion, and the elevation and adoration of the Host; the thirty-first rejects the sacrifice of the mass as blasphemous; the thirty-second permits the marriage of the clergy; the thirty-third maintains the efficacy of excommunication. The remaining articles relate to the supremacy of the king, the condemnation of Anabaptists, etc. They were ratified anew in 1604 and 1628.

Asteroids, or Planetoids. A numerous group of very small planets revolving round the sun between the orbits of Mars and Jupiter, remarkable for the eccentricity of their orbits and the large size of their angle of inclination to the ecliptic. The diameter of the largest is not supposed to exceed 450 miles, while most of the others are very much smaller. They number over 330, and new members are being constantly discovered. Ceres, the first of them, was discovered January 1, 1801, and within three years more Pallas, Juno, and Vesta were seen. The extraordinary smallness of these bodies, and their nearness to each other, gave rise to the opinion that they were but the fragments of a planet that had formerly existed and had been brought to an end by some catastrophe. For nearly forty years investigations were carried on, but no more planets were discovered till December 8, 1845, when a fifth planet in the same region was discovered. The rapid succession of discoveries that followed was for a time taken as a corroboration of the disruptive theory, but the breadth of the zone occupied makes the hypothesis of a shattered planet more than doubtful. Their mean distances from the sun vary between 200,000,000 and 300,000,000 miles; the periods of revolution between 1,191 days (Flora) and 2,868 (Hilda). Their eccentricities and inclinations are on the average greater than those of the earth, but their total mass does not exceed one-fourth that of the earth.

Athanasian Creed. A formulary or confession of faith, said to have been drawn up by Athanasius, Bishop of Alexandria, in the Fourth Century, to justify himself against the calumnies of his Arian enemies. That it was really composed by this father seems more than doubtful; and modern divines generally concur in the opinion of Dr. Waterland, that it was written by Hilary, Bishop of Arles, in the Fifth Century. It is certainly very ancient; for it had become so famous in the Sixth Century as to be commented upon, together with the Lord's Prayer and Apostles' Creed, by Venantius Fortunatus, Bishop of Poitiers. It was not, however, then styled the Athanasian Creed, but simply the Catholic Faith. It is supposed to have received the name of Athanasius on account of its agreeing with his doctrines, and being an excellent summary of the subjects of controversy between him and the Arians. The true key to the Athanasian Creed lies in the knowledge of the errors to which it was opposed. The Sabellians considered the Father, Son, and Holy Spirit as one in person; this was "confounding the persons": the Arians considered them as differing in essence; this was "dividing the substance"; and against these two errors was the creed originally framed. This creed was used in France about the year 850; was

received in Spain about 100 years later, and in Germany about the same time. It was both said and sung in England in the Tenth Century; was commonly used in Italy at the expiration of that century, and at Rome a little later. This creed is appointed to be read in the Church of England.

Atom. A part so small as not to be divisible. An ultimate particle of matter. Two opinions, directly opposed to each other, have long had currency with regard to the constituent particles of material things; the one, that matter is composed of an assemblage of minute particles, or atoms, incapable of further division; the other, that there is no limit to its divisibility, the smallest conceivable particle still consisting of an infinity of parts. The first of these theories, which is commonly distinguished by the name of *Atomic Philosophy*, was originated in Greece by Leucippus; it was supported by Democritus, and subsequently improved by Epicurus and his disciples. The Epicureans professed to account for the origin and formation of all things by supposing that these atoms were endued with gravity and motion, and thus came together into the different organized bodies we now see.

Atomic Theory. A theory as to the existence and properties of atoms (see *Atom*); especially, in chemistry, the theory accounting for the fact that in compound bodies the elements combine in certain constant proportions, by assuming that all bodies are composed of ultimate atoms, the weight of which is different in different kinds of matter. It is associated with the name of Dalton, who systematized and extended the imperfect results of his predecessors. On its practical side the atomic theory asserts three *Laws of Combining Proportions*: (1) the Law of Constant or Definite Proportions, teaching that in every chemical compound the nature and proportion of the constituent elements are definite and invariable; thus water invariably consists of eight parts by weight of oxygen to one part by weight of hydrogen; (2) the Law of Combination in Multiple Proportions, according to which the several proportions in which one element unites with another invariably bear towards each other a simple relation; thus one part by weight of hydrogen unites with eight parts by weight of oxygen to form water, and with sixteen parts (*i. e.*, 8×2) of oxygen to form peroxide of hydrogen; (3) the Law of Combination in Reciprocal Proportions, that the proportions in which two elements combine with a third also represent the proportions in which, or in some simple multiple of which, they will themselves combine; thus in olefiant gas hydrogen is present with carbon in the proportion of one to six, and in carbonic oxide oxygen is present with carbon in the proportion of eight to six, one to eight being also the proportions in which hydrogen and oxygen combine with each other. The theory that these *proportional numbers* are, in fact, nothing else but the relative weights of atoms so far accounts for the phenomena that the existence of these laws might have been predicted by the aid of the atomic hypothesis long before they were actually discovered by analysis. In themselves.

however, the laws do not prove the theory of the existence of ultimate particles of matter of a certain relative weight; and, although many chemists, even without expressly adopting the atomic theory itself, have followed Dalton in the use of the terms *atom* and *atomic weight*, in preference to *proportion*, *combining proportion*, *equivalent*, and the like, yet in using the word *atom* it should be held in mind that it merely denotes the proportions in which elements unite. These will remain the same whether the atomic hypothesis which suggested the employment of the term be true or false. Dalton supposed that the atoms of bodies are spherical, and invented certain symbols to represent the mode in which he conceived they might combine together.

Augsburg, Confession of. Name given to the celebrated declaration of faith, compiled by Melancthon, revised by Luther and other reformers, and read before the Diet of Augsburg, June 25, 1530. It consisted of twenty-eight articles, seven of which refuted Roman Catholic errors, and the remaining twenty-one set forth the Lutheran creed. Soon after its promulgation, the last hope of reforming the Roman Catholic Church was abandoned and complete severance followed. An answer by the Roman Catholics was read August 3, 1530; when the Diet declared that it had been refuted. Melancthon then drew up another confession. The first is called the unaltered, and the second, the altered form.

Aurora Borealis, called variously *North-ern Lights*, *Polar Lights*, or *Streamers*, a phenomenon which generally appears in the northern parts of the sky, and presents an appearance somewhat resembling the dawn or break of day. It is a luminous meteor, and appears to proceed from a sort of haze or cloud in the northern part of the heavens. The upper edge of the cloud is whitish, the lower often dark or thick, and from the upper part streams of light shoot up in the form of a column, with, in general, a tremulous motion. This phenomenon generally commences two or three hours after sunset, and continues for a few hours, sometimes the whole night; it most frequently occurs in autumn and the early part of winter. Auroras are visible in most countries in high latitudes of the northern hemisphere, and it is asserted that similar appearances have been witnessed in high southern latitudes, but they are not known in tropical regions. No satisfactory answer has yet been furnished as to the cause of these polar lights; there is no doubt, however, that they are the result of electricity in the upper regions of the atmosphere, but how produced we are at present unable to say.

Bap'tists. A denomination of evangelical Christians, who differ from others in respect to baptism. They baptize all who repent and believe the gospel, at whatever age, and reject the substitution of sprinkling for immersion, which they maintain was originally practiced in the administration of baptism, and (except in the case of the sick) universally observed throughout Christendom for 1,300 years. Open communion the Baptists of the United States generally regard as an anomaly. They believe in the spiritual unity of the whole believing Church

under Christ. Their government is congregational, each church being complete in itself for the management of its internal affairs. They associate, invite councils for advice, and coöperate in benevolent, educational, and missionary enterprises; but all such associations disclaim the slightest jurisdiction over the churches. Baptists make no distinction but that of office between clergymen and laymen. Elders, as evangelists and missionaries, are ordained and sent out to preach the gospel. In the United States the Baptist, with one exception, is now the largest denomination of evangelical Christians. In 1845, the southern Baptists, by mutual consent, formed separate organizations for their benevolent enterprises. As early as 1764, the Baptists founded their first college in Rhode Island. They have publication societies at Philadelphia, Charleston, and Nashville, and maintain about fifty periodical organs, including a quarterly review. The Baptists of the United States also support the American and foreign Bible society, the American Baptist missionary union, the southern Baptist board of foreign and domestic missions, the Baptist home mission society, and in part the "American Bible Union." Their missions are planted in Canada, Oregon, California, New Mexico, Hayti; in France, Spain, Germany, Denmark, Sweden, Norway; in western and central Africa; in southern India, Assam, Burmah, Siam, and China. In doctrine the Baptists of this country are Calvinistic, but with much freedom and moderation. Besides the general body of Baptists, there are in the United States nine smaller bodies agreeing with them in regard to baptism, but differing more or less on other points, viz: the Seventh-day, Free-will, Anti-mission, and General or Six-principle Baptists, Tunkers, Mennonites, Christians, Campbellites, and Winebrennarians. Some Baptists trace their history in a succession of pure churches from the Third Century to the Reformation. Cyril of Alexandria and Innocent I. of Rome began the persecution which they suffered for centuries. In England, from the time of Henry VIII. to William III., the Baptists struggled to gain their footing, and to secure liberty of conscience for all. In the time of Cromwell they first gained a fair hearing. Introduced into Rhode Island with Roger Williams and John Clark in 1638, their history for more than a century, in most of the colonies, is that of proscribed and banished men. Their prosperity dates from the Revolutionary War.

Blood. The nutritive fluid of the tissues, consists of a transparent colorless fluid, the *liquor sanguinis*, and minute solid bodies, the "corpuscles," which float in it. The liquor sanguinis consists of water, in which are dissolved fibrine, albumen, chlorides of sodium and potassium, phosphates of soda, lime, and magnesia, together with fatty and extractive matters, the latter the product of the metamorphosis of the tissues. The corpuscles are of two kinds — white and red; the white are larger and less numerous than the red, being in healthy blood in the proportion of two or three to 1,000. In certain forms of disease the number of these white blood-corpuscles is increased. They pre-

sent a granular appearance on the surface, have a nucleolus which is speedily brought into view by the action of dilute acetic acid, and are identical with the lymph-corpuscle. Under the microscope they vary their forms in the same way as the *amæba*; hence these movements are called *amæboid*. The red corpuscles are peculiar to vertebrates, and seem to have their origin in the white corpuscles, are oval and nucleated in fishes, reptiles, and birds, but in man and the mammalia generally they are non-nucleated, and are biconcave, flattened disks, their edges being thicker than the center; hence the dark appearance of the latter when seen under the microscope. The color of the blood varies. In the arteries it is of a bright scarlet color, while in the veins it is of a dark purple color. The chief difference between arterial and venous blood is that the former contains more oxygen and less carbonic acid than the latter. The red blood corpuscles possess great powers of absorbing oxygen. They receive oxygen in the lungs, where they become colored, and carry it all over the body to the tissues to form new combinations. After a time the corpuscles become dissolved in the liquor sanguinis, which fluid they serve to elaborate. The products of the metamorphosis of the tissues are poured into the blood, so that it is really a very complex fluid.

Brahma (*bra'ma*). The religion of the Hindoos, that which is frequently styled *Brahmanism*, or Brahminism, inculcates a belief in a supreme deity under the name of Brahma, who is an impersonal divine substance, the object merely of devout contemplation, not of worship. There is also Brahma, the creator of the universe and the first of the *Trimurti* or triad of divinities; of whom Vishnu, the preserver, and Siva, the destroyer, are the others. In sculpture, Brahma is represented as having four faces. It is said that there are not any temples exclusively dedicated to him in India; but prayers are addressed to him, and he is worshiped along with the other members of the triad. Vishnu and Siva, however, have a great number of worshipers, and the sects who acknowledge each as their chief object of devotion are not to be counted. The greatest confusion exists as to the names and attributes of these deities. Great changes in belief have taken place in the progress of time, and the most learned Brahman is unable to explain the great majority of the rites and articles of belief. Transmigration of souls is the leading tenet of Hindoo belief.

Brah'mans, Brah'mins. (Followers of Brahma.) The highest of the Hindoo castes. To its members belong the exclusive duty of expounding the *Vedas*, and they were formerly considered bound to abstain from all laborious occupations, and to confine themselves to serving the gods and meditating on holy things. Though the members of this caste exact and receive respect from the other Hindoos, as their superiors, they are found following many occupations from which they are in strictness interdicted. The Gurus hold the first rank among them; they are the priests or spiritual advisers, having authority in matters of religion and edu-

cation. To them we are indebted for our knowledge of the Sanskrit, or ancient language of the country, in which their sacred books are written.

Buddhism (*būd'izm*). A system of religion founded by Buddha Gautama, also called *Sakya Muni*, who lived probably in the Sixth Century B. C. His father was King of Bahar, in Hindustan, and was early distinguished for his superior intellect. Becoming a religious teacher, he went through various provinces of India, propagating his doctrines, a kind of reformed Brahmanism. He is said to have lived till his 80th year, and the date usually given for his death is 543 B. C. But his appearance is placed by some as early as the Fourteenth, and by others as late as the Fourth Century B. C. It is certain that his religion was triumphant in Hindustan in the middle of the Third Century B. C. Between the Fifth and Seventh Centuries of our era, Buddhism was expelled from India proper by the persecution of the Brahmins, and nearly every trace of it has now disappeared from there; but under several denominations it has become the prevailing creed of the Peninsula of India beyond the Ganges, Thibet, Ceylon, China, and Japan. In China the name of Buddha has been corrupted into *Fo-ta*, or *Fo*. After the death of Buddha, and to fill his place, a succession of perfectly virtuous souls have descended upon earth, and assumed human forms, for the welfare of mankind; and it is believed in Thibet that the Grand Lama of Thibet is his successor for the time being. The sacred writings of the Buddhists are very numerous; they were originally composed in Sanskrit, from which they were afterwards translated into other tongues. It would seem that there was a belief in a primeval deity named Adi-Buddha, or the First Buddha, and he was the first person of the trinity, the other two persons being Dhurma and Sunga, answering to Brahma, Siva, and Vishnu, of the Brahmins. The trident borne by the priests is emblematical of this trinity. The principal tenets of Buddhism are, that the world and all it contains are manifestations of the Deity, but of a transient and delusive character; that the human soul is an emanation of the Deity, and, after death, will be bound to matter, and subjected to the miseries of life, unless the individual to whom it belongs, by the attainment of wisdom through prayer and contemplation, secures its reabsorption into the Deity. The authority of the *Vedas*, the sacred books of the Brahmins, is rejected, as well as the sacrifices, ceremonies, and other religious observances of the Hindoos. There is no distinction of caste, and the priests, who are not forbidden the use of animal food, are derived from all classes. Monasteries and nunneries abound wherever Buddhism flourishes. The ceremonies have so many resemblances to those of the Roman Catholic Church, as to strike spectators with surprise.

Capillary Action, or Capillarity. In *Physical Science*, the name applied to certain phenomena which are exhibited when liquids are placed in contact with the surfaces of solids. Suppose a glass rod to be dipped for a portion of its length in water; then the liquid, as if not subject to the laws of gravity, is raised upwards

against the sides of the solid, and its surface, instead of being horizontal, becomes slightly concave. If, instead of a solid rod, a hollow tube be immersed in the water, not merely is the liquid raised around the tube, but it rises in the inside to a height which is greater the narrower the tube, and the surface of the liquid inside the tube also assumes a concave form. If a glass tube, however, be immersed in mercury instead of water, the liquid in the tube is depressed instead of being raised, and the surface, which was previously concave, now becomes convex. The reason for this difference of action resides in the fact that mercury will not wet the tube as water does, for, if a metallic tube, such as one of copper, be substituted for the glass tube, the mercury in it will rise and have a concave surface, because it is able to wet the sides of the tube. Hence, whenever a liquid is able to adhere to a solid, it rises in contact with it. It is from capillarity that sap rises in plants, and that oil rises in the wicks of lamps. If the end of a towel be left in a basin of water, it is through capillarity that the basin is soon emptied of its contents. The phenomenon of capillarity is intimately connected with what is known as the surface tension of liquids, and its amount varies with the chemical nature of the particular liquid. The word is derived from the Latin *capillus*, a hair, because these phenomena are best seen in narrow hair-like tubes.

Carbon. One of the elements, existing uncombined in three forms, charcoal, graphite, or plumbago, and the diamond; chemical symbol C, atomic weight twelve. The diamond is the purest form of carbon; in the different varieties of charcoal, in coal, anthracite, etc., it is more or less mixed with other substances. Pure charcoal is a black, brittle, light, and inodorous substance. It is usually the remains of some vegetable body from which all the volatile matter has been expelled by heat; but it may be obtained from most organic matters, animal as well as vegetable, by ignition in close vessels. Carbon being one of those elements which exist in various distinct forms is an example of what is called allotropy. The compounds of this element are more numerous than those of all the other elements taken together. With hydrogen especially it forms a very large number of compounds, called hydrocarbons, which are possessed of the most diverse properties, chemical and physical. With oxygen, again, carbon forms only two compounds, but union between the two elements is easily effected. It is one of the regular and most characteristic constituents of both animals and plants.

Cardinal. An ecclesiastical prince in the Roman Catholic Church, who has a voice in the conclave at the election of a pope, the popes being taken from the cardinals. The cardinals are appointed by the pope, and are divided into three classes or orders, comprising six bishops, fifty priests, and fourteen deacons, making seventy at most. These constitute the Sacred College and compose the pope's council. Originally they were subordinate in rank to bishops; but they now have the precedence. The chief symbol of the dignity of cardinal is a low-crowned, broad-brimmed red hat, with two cords depend-

ing from it, one from either side, each having fifteen tassels at its extremity. Other insignia are a red biretta, a purple cassock, a sapphire ring, etc.

Carnegie Institution. An educational body incorporated January 4, 1902, in Washington, D. C., by John Hay, Secretary of State; Edwin D. White, Justice of the Supreme Court; Daniel C. Gilman, ex-president of Johns Hopkins University; Charles D. Walcott, superintendent of the United States Geological Survey; Dr. John S. Billings, director of the New York Public Library; and Carroll D. Wright, United States Commissioner of Labor. The aims of the institution, as expressed by the founder are: (1) To increase the efficiency of the universities and other institutions of learning throughout the country by utilizing and adding to their existing facilities, and by aiding teachers in the various institutions for the experimental and other work in these institutions as far as may be advisable. (2) To discover the exceptional man in every department of study, whenever and wherever found to enable him by financial aid to make the work for which he seems especially designed his life work. (3) To promote original research, paying great attention thereto as being one of the chief purposes of this institution. (4) To increase the facilities for higher education. (5) To enable such students as may find Washington the best point for their special studies to avail themselves of such advantages as may be open to them in the museums, libraries, laboratories, observatory, meteorological, piscicultural, and forestry schools and kindred institutions of the several departments of the government. (6) To insure the prompt publication and distribution of the results of scientific investigation, a field considered to be highly important.

On January 29, 1902, the institution received from Mr. Carnegie a deed of gift of \$10,000,000. In 1907, the foundation was increased to \$12,000,000.

Carnivora. In *Zoölogy*, the name applied to the order of mammals which feed mainly upon flesh, and the majority of which are commonly known as Beasts of Prey. They are distinguished by the adaptation of their teeth to an animal diet. The incisors or front teeth are generally six in each jaw; the canines or eye-teeth are two in each jaw, and are always long and pointed; the grinders are mostly furnished with sharp cutting edges, adapted for dividing flesh, but one or more of the hinder ones are generally furnished with a simple crown, adapted for bruising rather than for cutting. The feet in the *Carnivora* are always furnished with strong curved claws, and the collar-bones are quite rudimentary, or are altogether wanting. The order *Carnivora* is divided into the following three sections:—(1) *Digitigrades*, in which the heel is raised from the ground, and the animal walks upon tiptoe: to this section belong the dogs, the hyænas, and the cats. (2) *Plantigrades*, in which the whole or nearly the whole of the foot is applied to the ground, so that the animal walks upon the soles of the feet: to this section belong the bears. (3) *Pinnigrades*, in which the both fore and hind legs are short, and

the feet form broad webbed swimming paddles: this section comprises the seals and the walruses.

Carotid Arteries. The two great arteries which convey the blood from the aorta to the head and brain. The *common carotids*, one on either side of the neck, divide each into an external and an internal branch. The *external carotid* passes up to the level of the angle of the lower jaw, where it ends in branches to the neck, face, and outer parts of the head. The *internal carotid* passes deeply into the neck, and through an opening in the skull behind the ear enters the brain, supplying it and the eye with blood. Wounds of the carotid trunks cause almost immediate death.

Catholic Church, Roman. The community of Christians throughout the world who recognize the spiritual supremacy of the Pope or Bishop of Rome, and are united together by the profession of the same faith and the participation of the same sacraments. Although a few other points of doctrinal differences separate the Roman Church from the Greek, Russian, and Oriental communions, yet the most palpable ground of division lies in the claim of supremacy in spiritual jurisdiction on the part of the Roman bishop. The history of the Roman Church, therefore, in relation to the Oriental Churches, is, in fact, the history of this claim to supremacy.

In the minds of Roman Catholics the claim of supremacy on the part of the Bishop of Rome rests on the belief that Christ conferred on Peter a "primacy of jurisdiction"; that Peter fixed his see and died at Rome; and thus, that the Bishops of Rome, as successor of Peter, have succeeded to his prerogatives of supremacy. The letters of Pope Leo the Great show beyond question that the Bishops of Rome, in the commencement of the Fifth Century, claimed to speak and act with supreme authority; and the first direct challenge to this claim was made by the Patriarch of Constantinople, Acacius; and although Constantinople, in the time of Gregory the Great, and again of Nicholas I., renewed the struggle for supremacy, or even equality, the superior position of Rome continued to be recognized. The separation of the Greek Church and her dependencies, under the patriarch Michael Cerularius, in the year 1054, was but a narrowing of the territorial jurisdiction of Rome; and even Protestants have recognized the Roman Church of the mediæval period as absorbing in itself almost the whole of European Christendom, and as the only public representative of the Church in the West. The modern political institutions which then began to break upon the world so modified the public relations of Church and State as by degrees to undo the condition of society in which the temporal power of the popes had its foundation. The great revolution of the Sixteenth Century completed the process. Nor was the revolution with which the popes thus found themselves face to face without its influence in the external history of the Roman Church. The latter half of the Sixteenth Century was a period of new life in the Roman Church. The celebration of local synods, the establishment of episcopal seminaries, the organization of schools, and other provisions for religious instruction —

above all, the foundation of active religious orders of both sexes — had the effect of arresting the progress of Protestantism, which in many countries had been at first rapid and decisive. From the end of the Sixteenth Century, therefore, the position of the Roman Catholic Church, especially in her external relations, may be regarded as settled. The local distribution of the rival churches in the world has hardly been altered, except by migration, since that time. But in her relations to the state the Roman Church has since passed through a long and critical struggle. The new theories to which the French Revolution gave currency have still further modified these relations; but in most of the European kingdoms they were readjusted after 1815 either by concordat or by some similar mutual agreement. The details of the doctrinal system of the Roman Catholic Church will be best collected and explained from the latest authentic creed, that commonly called "the creed of Pius V.," drawn up as a summary of the authoritative teaching of that ecclesiastical body till the time at which it was written, and published together with certain later doctrinal pronouncements. It is only necessary to premise that, while in the view of Catholics all doctrine must be based on the word of God, written or unwritten, the Church is the only authoritative judge of that rule of faith. The creed of Pius V. is as follows:

"I, N. N., with a firm faith believe and profess all and every one of these things which are contained in that creed which the holy Roman Church maketh use of. To wit: I believe in one God, the Father Almighty, Maker of heaven and earth, of all things visible and invisible, and in one Lord Jesus Christ, the only begotten Son of God, born of the Father before all ages; God of God, Light of Light; true God of the true God; begotten, not made; consubstantial with the Father, by whom all things were made. Who for us men, and for our salvation, came down from heaven, and was incarnate by the Holy Ghost of the Virgin Mary, and was made man. He was crucified also for us under Pontius Pilate, suffered and was buried. And the third day he rose again according to the Scriptures: he ascended into heaven, sitteth at the right hand of the Father, and shall come again with glory to judge the living and the dead; of whose kingdom there shall be no end. I believe in the Holy Ghost, the Lord and life-giver, who proceedeth from the Father and the Son; who, together with the Father and the Son, is adored and glorified; who spake by the prophets; and in one holy, Catholic, and Apostolic Church. I confess one baptism for the remission of sins; and I look for the resurrection of the dead, and the life of the world to come. Amen."

The doctrine of the Immaculate Conception of the Blessed Virgin Mary, and a still more comprehensive body of articles in the memorable *Syllabus* issued by Pope Pius IX. and in the decrees of the Vatican Council, celebrated under the presidency of the same pontiff, have been added to the former creeds. The doctrinal decisions of this latter council are divided into two sections, the first "on the Catholic Faith," the second "on the Church of Christ." Each section contains "a scheme of doctrine," in which the

heads of belief, and the grounds on which they rest, are explained. In the scheme "upon the Church of Christ" are contained, in "an additional chapter," the celebrated declaration regarding the infallibility of the pope.

Under the generic name Roman Catholics are comprised all those Christians who acknowledge the supremacy of the Roman pontiff, even though they be not of the Roman or Latin Rite. Not a few individuals and churches of other rites are included under this designation, Greeks, Slavonians, Ruthenians, Syrians (including Maronites), Copts, and Armenians; and these communities are permitted to retain their own national liturgy and language, and for the most part their established discipline and usages. As regards its organization for the purposes of ecclesiastical government the normal territorial distribution of the Roman Catholic Church of the several rites in the various countries where it exists is into provinces, which are subject to archbishops, and are subdivided into bishoprics, each governed by its own bishop. The following summary shows the statistics of the Church in the United States, for 1907:

Archbishops, 14; Bishops, 89; clergy, secular, 11,135; clergy, religious, 3,958; churches, 12,148; colleges for boys, 198; academies for girls, 678; parishes, with schools, 4,364; parish school population, 1,096,842; orphan asylums, 255; orphans cared for, 40,588; charitable institutions, 992; total Catholic population under United States flag, 22,474,440.

Celibacy. The state of being celibate or unmarried; specially applied to the voluntary life of abstinence from marriage followed by many religious devotees and by some orders of clergy, as those of the Roman Catholic Church. The ancient Egyptian priests preserved a rigid chastity; the priestesses of ancient Greece and Rome were pledged to perpetual virginity; and celibacy is the rule with the Buddhist priests of the East. Among Christians the earliest aspirants to the spiritual perfection supposed to be attainable through celibacy were not ecclesiastics as such, but hermits and anchorites who aimed at superior sanctity. During the first three centuries the marriage of the clergy was freely permitted, but by the Council of Elvira (305) continence was enjoined on all who served at the altar. For centuries this subject led to many struggles in the Church, but was finally settled by Gregory VII. positively forbidding the marriage of the clergy. The Council of Trent (1545) confirmed this rule. In the Greek Church celibacy is not compulsory on the ordinary clergy. Protestants hold that there is no moral superiority in celibacy over marriage, and that the Church has no right to impose such an obligation on any class of her ministers.

Chemistry. The science which is concerned with the study of the properties of the different forms of matter, and their mutual reactions, just as *Physics* is concerned with the study of force and energy. It has developed from the alchemy of the Middle Ages. The chemist finds by actual experiment that he is able to divide all substances into two great classes, viz: *compounds*, which can be split up into two or more different substances of a sim-

pler nature, and *elements*, which he cannot split up into anything differing from themselves. All the varied forms of matter which we see around us are produced by the combinations of these elementary substances. Combination between different substances is due to the existence of *chemical attraction*, or, as it is often called, *chemical affinity*, between the atoms of which they are composed. The exact nature of this attraction is not understood. It differs from heat, electricity, and other forms of energy, in that it entirely changes the properties of the substances between which it acts, and, moreover, acts only between bodies which are in the most intimate possible contact. Chemical action consequently takes place most rapidly between gases, somewhat less rapidly between liquids, and much less rapidly between solids. Chemical changes may conveniently be classed under three heads: (1) *Combination* or *synthesis*, in which two or more substances combine to form a new compound of more complex composition; (2) *Decomposition* or *analysis*, in which a compound is split up into its constituent elements, or into other compounds of simpler nature; (3) *Double decomposition* or *metathesis*, in which a reaction takes place between two or more compounds, accompanied by a mutual interchange of elements, and ending in the formation of a new series of compounds. The occurrence of chemical change is generally rendered evident by an alteration in the physical properties of the bodies affected by the change. In many cases there is development of heat, sometimes, if the reaction is very energetic, accompanied by the production of light. There may also be production, destruction, or change of color, conversion of solids or liquids into gases, or condensation of gases into solids or liquids, production of solids from liquids, or *vice versa*. The occurrence or non-occurrence of chemical change depends in the first place on the nature of the substances brought into contact, and also on certain physical conditions. In many cases the reaction takes place at ordinary temperatures, in others the substances have to be heated before any change occurs. On the other hand, substances which react on one another at ordinary temperatures are without action at very low temperatures. Further, many compounds are decomposed or split up when heated, and, indeed, heat is one of the main agents which bring about decomposition. Generally speaking, a moderately high temperature is favorable to combination or double decomposition, while a higher temperature tends to produce decomposition. Oxygen and mercury, for example, combine together directly only at a temperature approaching the boiling-point of the latter, but if the oxide of mercury thus formed is still more strongly heated, it splits up again into its constituent elements. If two or more substances are brought together in a state of solution, and by their mutual reaction can produce a new substance insoluble in the particular liquid used, then, with very few exceptions, this compound will be produced and will be *precipitated*, or thrown out of solution. The production or non-production of chemical action is affected also by the relative quantities or masses

in which the different substances are present, by the relative volatility, etc., of the bodies which may be formed, and by various other conditions, for a discussion of which reference must be made to special treatises on chemistry. It is found that, as a general rule, those elements most readily combine together which exhibit the greatest differences in their properties. Chlorine, for example, readily combines with sodium or antimony, but has very little attraction for bromine, which it closely resembles in many of its properties. It is found, moreover, that combination always takes place in certain definite proportions, and not in any haphazard quantities. For example, 16 parts by weight of oxygen always combine with 2 parts of hydrogen to form 18 parts of water, and 35.5 parts of chlorine always combine with 1 part of hydrogen to form 36.5 parts hydrochloric acid. Indeed, it is possible to find by experiment for each element a number which always represents the proportion by weight in which it combines with other elements. This is termed its *combining* or *atomic weight*. Further, it is found that if a piece of iron is placed in a solution of sulphate of copper, metallic copper is deposited on the iron, whilst a portion of the latter is dissolved, and for every 63.4 parts of copper deposited, 56 parts of iron are always dissolved. Again, when iron is placed in dilute sulphuric acid, hydrogen gas is given off and the metal is dissolved, and it is found that for every 1 part of hydrogen given off, 28 parts of iron are dissolved. It follows that 56 parts of iron are capable of replacing, or are chemically equivalent to, 63.4 parts of copper or two parts of hydrogen. Many examples of a similar kind might be quoted. Briefly, it is found that a certain definite quantity of each element is capable of combining with, or of replacing in compounds, certain definite quantities of other elements, and these are termed their *chemical equivalents*. For the sake of comparison, one part of hydrogen is usually taken as the standard to which all other equivalents are referred, and from the example given above it is evident that the equivalent of iron is 28, and so on. In some cases, the number representing the equivalent of an element is the same as that representing its atomic weight; but in many cases, for reasons which cannot be entered into here, the latter is some simple multiple of the former. The *equivalent* is a quantity determined by actual experiment, the *atomic weight* is to a certain extent a matter of theory. A similar series of facts is observed in the case of compounds. For example, 56.1 parts of potash will neutralize as much acid as 40 parts of soda or 17 parts of ammonia; 56.1 parts of potash, 40 parts of soda, and 17 parts of ammonia, are therefore chemically equivalent to each other. Chemistry was formerly divided into two branches: *Inorganic chemistry*, or the chemistry of the mineral kingdom, and *Organic chemistry*, or the chemistry of the vegetable and animal kingdoms, i. e., of those substances which are produced by vital action. It was believed that there was an essential difference between the two, and that it was impossible to prepare artificially in the laboratory those compounds formed in the bodies of plants and animals.

In 1828, however, the substance *urea*, a body essentially characteristic of vital action, was prepared artificially, and even built up from its elements, by the German chemist, Wöhler. Since that time a large number of the compounds found in plants and animals have been produced from inorganic substances, or built up from other organic bodies, and it is now known that there is no essential difference whatever between organic and inorganic chemistry. The same forces are at work in both, subject to the same laws. One element, however, is contained in all organic bodies, viz, *carbon*. Carbon has the peculiar property of combining as it were with itself, and by virtue of this property it gives rise to an enormous number of derivatives, some of very complex composition and constitution. *Simply for the purposes of study*, these are still classed together under the head of Organic chemistry, which is defined as the *chemistry of the carbon compounds*. The greater number of the carbon compounds now known are artificial products which do not occur in nature. The majority of them may be regarded as derived from the hydro-carbons by the replacement of one or more atoms of hydrogen by some other element or group of elements. Amongst the most important of the series thus derived are the *haloid derivatives*, *alcohols*, *ethers*, *acids*, *aldehydes*, *ketones*, and *amines*. There are, however, important groups of substances, the relationships of which are not yet clearly made out. Amongst these are the *carbo-hydrates* and the *alkaloids*. The constitution and relationships of the *proteids* or *albuminoid substances*, and of some others found only in the bodies of plants or animals, are still less understood. Notwithstanding the differences already alluded to, chemical attraction is closely related to the various forms of energy, and, indeed, is itself a form of potential energy. Of late years, the study of the changes in the distribution of energy which accompany chemical change has become of great importance. Chemical combination is in the majority of cases accompanied by development of heat, and the quantity of heat thus developed by the formation of a given weight of a particular substance is always the same, and the decomposition of any compound requires the expenditure, in the form of heat or otherwise, of exactly the same amount of energy as was liberated by its formation. On the other hand, the formation of some compounds is attended by absorption of heat, and exactly the same amount of heat is liberated when the compound decomposes. That branch of the science which deals specially with the development or absorption of heat which accompanies chemical reactions is termed *thermo-chemistry*. It is found that those compounds in the formation of which the greatest amount of heat is developed or set free are the most stable, i. e., the most difficult to decompose, and vice versa. Further, when several substances which *theoretically* can react in several different ways, producing several different compounds, are mixed together, it is always found that those bodies are produced in the formation of which the greatest amount of heat is developed. This important law is known as the *principle of maximum work*.

TABLE OF CHEMICAL ELEMENTS

ELEMENT	SYM-BOL	ATOMIC WEIGHT	DISCOVERER	YEAR	SPECIFIC GRAVITY*	FUSING OR MELTING POINT*
Aluminium,	Al	27.0	Wöhler,	1828	2.58	627° C., 1,160° F.
Antimony (stibium),	Sb	120.0	Valentine,	1450	6.70	432° C., 808° F.
Argon,	A	19.7	Rayleigh and Ramsey,	1894	1.5†	-128° C.

Yttrium,	Yt	89.1	Wöhler,	1828	3.8	
Zinc (zincum), . . .	Zn	65.3	Paracelsus,	1520	7.12	433° C., 811.5° F.
Zirconium,	Zr	90.06	Berzelius,	1824	4.15	Above sulphur.

* The factors in the columns of specific gravities and melting points naturally vary with the form which the element takes (e. g., in carbon the specific gravity varies as diamond, charcoal, or lampblack is taken), but as far as possible the factor of the most typical form is given.
† Of the liquid element. ‡ Diamond. § Of the liquid at -181° C. ¶ b. p.—boiling point; m. p.—melting point, Fahrenheit.

Christ, Disciples of. A denomination of Christians in the United States commonly known as the Christian Church, or Church of Christ, and sometimes called Campbellites. In September, 1809, Thomas Campbell, a Scotch minister of the seceders' branch of the Presbyterian Church, then living in Western Pennsylvania, issued a "Declaration and Address" deploring the divided state of the Church, and urging as the only remedy a complete restoration of apostolic Christianity and the rejection of all human creeds and confessions of faith. The Christian Association of Washington, Pa., was formed for the purpose of promoting the principles set forth in this "declaration." It was not the intention of the Campbellites to form a distinct religious body, but to effect the proposed reforms in the Churches. The Disciples maintained that having accepted the Bible as their only rule of faith and practice, and the only divine basis for the union of all Christians, they were led to reject infant baptism and adopt believers' immersion only. They observe the Lord's Supper each first day of the week, and heartily and practically accept and exalt the doctrine of the divinity of Christ. In 1907 the denomination had 7,153 ministers, 11,110 churches, and 1,264,758 communicants, besides several universities and colleges of high rank, and a number of religious publications.

Christian Endeavor, Young People's Society of. A society distinctly religious in all its features; organized February 2, 1881, in Williston Church, Portland, Me., by the Rev. Francis E. Clark, D. D. From one small association it expanded, up to 1908, into over 69,256 societies, in all parts of the world, with an aggregate membership of 3,462,800. In addition to the main organizations in the United States it has been found necessary to form branches, among which are the Juniors, organized March 27, 1884, at Tabor, Ia., by the Rev. J. W. Cowan and Miss Belle Smith; the Intermediate, organized by the Rev. A. Z. Conrad, of Worcester, Mass.; and the Mothers', suggested by Mrs. Amanda B. Fellows, of Chicago, and organized in April, 1893, at Topeka, Kan., by Mr. F. C. Barton. The first Christian Endeavor Society in England was organized in 1887, and was followed by similar ones in other countries, and the constitution has been printed in over thirty different languages. The movement is not a denominational one. Any society belonging to an evangelical Church, which adopts the leading principles as set forth in the constitution, is admitted to all the privileges of the organization.

Christianity. The religion instituted by Jesus Christ. Though the great moral principles which it reveals and teaches, and the main doctrines of the gospel, have been preserved without interruption, the genius of the different nations and ages have materially colored its character. The first community of the followers of Jesus was formed at Jerusalem soon after the death of their Master. Another at Antioch in Syria first assumed (about 65) the name of *Christians*; and the travels of the apostles spread Christianity through the provinces of the Roman

Empire. Palestine, Syria, Asia Minor, Greece, the islands of the Mediterranean, Italy, and the northern coast of Africa, as early as the First Century, contained societies of Christians. At the end of the Third Century almost one-half of the inhabitants of the Roman Empire, and of several neighboring countries, professed this belief. While Christianity as a system was thus spreading, many heretical branches had sprung from the main trunk. From the Gnostics, who date from the days of the apostles, to the Nestorians of the Fifth Century, the number of sects was large, and some of them exist to the present day. The most important events in the subsequent history of Christianity are the separation of the Eastern and Western Churches early in the Eighth Century; and the Western reformation, which may be said to have commenced with the sectaries of the Thirteenth Century and ended with the establishment of Protestantism in the Sixteenth. The number of Christians now in the world is computed at 475,000,000. Of these about 230,000,000 are Roman Catholics, 98,000,000 belong to the Greek Church, and 145,000,000 are Protestants. Of the various sects of Protestants in the English-speaking world the most numerous are the Episcopalians, Methodists, Baptists, and Presbyterians.

Christian Science, a religious and theological system propounded in 1866 by Mrs. Mary Baker Eddy, Lynn, Mass., practiced by thousands of disciples in America and Europe. The members acknowledge and adore one Supreme God, taking the Scriptures for their guide. They confess God's Son, and the Holy Ghost, and man as the Divine image and likeness. They hold that Christian Science is the explication of Truth to be the power over all error, sin, sickness, and death. The curative system is spoken of as Christian Science Mind Healing, or Metaphysical healing, being based on the unreality or non-existence of matter. In her book, "Retrospection and Introspection," Mrs. Eddy says: "I claim for healing scientifically the following advantages: (1) It does away with all material medicines and recognizes the antidote for all sickness, as well as sin, in the immortal mind; and mortal mind is the source of all the ills which befall mortals. (2) It is more effectual than drugs, and cures when they fail, or only relieve, thus proving the superiority of metaphysics over physics. (3) A person healed by Christian Science is not only healed of his disease, but he is advanced morally and spiritually. The mortal body being but the objective state of the mortal mind, this mind must be renovated to improve the body." The absence of creed and dogma in the Christian Science Church, its freedom from materialism, mysticism, and superstition, also the simplicity, uniformity, and impersonality of its form of worship and organization are among the distinguishing features which characterize this modern religious movement. Hypnotism, mesmerism, spiritualism, theosophy, faith-cure, and kindred systems are foreign to true Christian Science. Those practicing these beliefs are denied admission to the Christian Science Church.

In June, 1906, the \$2,000,000 extension of the Mother Church, the First Church of Christ Scientist, in Boston, was dedicated. At the annual meeting, June, 1907, an increase of 4,000 members over the previous year was reported. The total membership, resident and non-resident, was given at 43,876. It is estimated that there are upward of 700 churches and societies of this denomination in the United States, with a membership of, approximately, 85,000.

Chronology (Greek *chronos*, time, and *logos*, discourse). The science which treats of time, and has for its object the arrangement and exhibition of historical events in order of time and the ascertaining of the intervals between them. Its basis is necessarily the method of measuring or computing time by regular divisions or periods, according to the revolutions of the earth or moon. The motions of these bodies produce the natural division of time into years, months, and days. As there can be no exact computation of time or placing of events without a fixed point from which to start, dates are fixed from an arbitrary point or *epoch*, which forms the beginning of an *era*. The more important of these are the creation of the world among the Jews; the birth of Christ among Christians; the Olympiads among the Greeks; the building of Rome among the Romans; the Hejira or flight of Mohammed among the Mohammedans, etc.

Destruction of Jerusalem,	" 69, Sept. 1
Mohammedan Era,	" 622, July 16

Chrysalis (*krîs'ah-lîs*). A name strictly belonging to those *pupæ* of butterflies which are adorned with golden spots, but extended to the *pupæ* of lepidopterous insects generally. The chrysalis is inclosed in a somewhat horny membranous case; sometimes very angular, sometimes nearly round; generally pointed at the abdominal end, sometimes at both ends; and before the caterpillar undergoes its transformation into this state it often spins for itself a silken cocoon, with which earth and other foreign substances are sometimes mixed, so as to increase its size, and within which the chrysalis is concealed. Chrysalis are often suspended by cords, and generally remain nearly at rest; some have the power of burying themselves in the earth; others are bound by a single silken thread which

passes round their middle; some twirl themselves round when touched, or when the stalk or leaf to which they are suspended is touched; and, in general, they give signs of life, when disturbed, by violent contortions of the abdominal part.

Cinematograph. A continuous band of instantaneous photographs which are by means of an arrangement similar to that of a magic lantern projected on a screen in such rapid succession that the image of one remains on the retina till it is succeeded by the next, and so the pictures are blended and suggest the moving object or objects originally photographed—a horse race, a moving crowd, dancing, etc.

Circulation. The natural motion of the blood in a living animal, by which it proceeds from the heart to all parts of the body by the arteries, and returns to the heart by the veins. The *circulation of the blood* is performed in the following manner: It is returned to the right auricle of the heart by the descending and ascending vena cava, which, when distended, contracts and sends it into the right ventricle; from the right ventricle it is propelled through the pulmonary artery, to circulate through and undergo a change in the lungs, being prevented from returning into the right auricle by the closing of valves. Having undergone this change in the lungs, it is brought to the left auricle of the heart by the four pulmonary veins, and thence is evacuated into the left ventricle. The left ventricle, after having been distended, contracts, and throws the blood through the aorta to every part of the body, by the arteries, to be returned by the veins into the vena cava. It is prevented from passing back from the left ventricle into the auricle by a valvular apparatus; and the beginning of the pulmonary artery and aorta is also furnished with similar organs, which prevent its returning into the ventricles.

Cloud. A collection of visible vapor or watery particles suspended in the atmosphere at some altitude. They differ from fogs only by their height and less degree of transparency. The average height of clouds is calculated to be two and one-half miles, thin and light clouds being much higher than the highest mountains, while thick heavy clouds often touch low mountains, steeples, and even trees. Clouds differ much in form and character, but are generally classed into three simple or primary forms, viz: (1) The *cirrus*, so called from its resemblance to a lock of hair, and consisting of fibers which diverge in all directions. Clouds of this description float at a great height, usually from three to five miles above the earth's surface. (2) The *cumulus* or *heap*, a cloud which assumes the form of dense convex or conical heaps, resting on a flattish base, called also summer-cloud. Under ordinary circumstances these clouds accompany fine weather, especially in the heat of summer. They attain their greatest size early in the afternoon and gradually decrease towards sunset. (3) The *stratus*, so named from its spreading out uniformly in a horizontal layer, which receives all its augmentations of volume from

below. It belongs essentially to the night, and is frequently seen on calm summer evenings after sunset ascending from the lower to the higher grounds, and dispersing in the form of a cumulus at sunrise. These three primary forms of clouds are subdivided as follows: (1) The *cirro-cumulus*, composed of a collection of cirri, and spreading itself frequently over the sky in the form of beds of delicate snow-flakes. (2) The *cirro-stratus* or *wane-cloud*, so called from its being generally seen slowly sinking, and in a state of transformation; when seen in the distance, a collection of these clouds suggests the resemblance of a shoal of fish, and the sky, when thickly mottled with them, is called in popular language a *mackerel sky*. (3) The *cumulo-stratus* or *twain-cloud*, one of the grandest and most beautiful of clouds, and consisting of a collection

of large fleecy clouds overhanging a flat stratum or base. (4) The *nimbus*, *cumulo-cirro-stratus*, or *rain-cloud*, recognizable, according to Mr. Howard, by its fibrous border and uniformly gray aspect. It is a dense cloud spreading out into a crown of cirrus and passing beneath into a shower. It presents one of the least attractive appearances among clouds, but it is only when the dark surface of this cloud forms its background that the splendid phenomenon of the rainbow is exhibited in perfection.

College Fraternities. Societies existing in American colleges which are named from the letters of the Greek alphabet and therefore commonly called "Greek Letter Societies." They are secret organizations only in their grips and passwords. They are organized chiefly for literary and social purposes.

GENERAL FRATERNITIES FOR MEN

FRATERNITY	MEMBER-SHIP	ACTIVE CHAPTERS	INACTIVE CHAPTERS	NO. HOUSES	WHERE AND WHEN FOUNDED
Alpha Chi Rho,	490	11	1	11	Trinity, 1895.
Alpha Delta Phi,	11,274	23	6	23	Hamilton, 1832.

Color is the name given to distinguish the various sensations that lights of various rates of vibration give to the eye. As is the case with many of the words that denote our sensations, the word *color* is also applied to the properties of bodies that cause them to emit the light that thus affects our senses. The molecular constitution of a body determines the character and number of the light vibrations it returns to the eye, and so gives to each body its own characteristic color; hence the term color is used to denote that in respect of which bodies have a different appearance to the eye independently of their form.

Ordinary white light (the light which comes from an incandescent solid or liquid) when transmitted through triangular prisms of glass or other media differing in dispersive power from the atmosphere, is shown to consist of a number of colored lights, which, meeting the eye, together produce the sensation of white light. The colors thus shown are usually said to be seven — red, orange, yellow, green, blue, indigo, violet; although in reality there is an enormous, if not an infinite, number of perfectly distinct colors in light. The seven colors are frequently called the primary colors, and other tints and shades are producible by mixing them; but in a stricter sense the primary colors are three in number, namely, red, green, and violet (or blue). These three colors or kinds of light cannot be resolved into any other. In the scientific sense of the word white and black are not considered colors, a white body reflecting and a black body absorbing all the rays of light without separating them, whereas the colors proper are due to separation of the rays of light by partial absorption and reflection or by refraction. If a body absorbs every other kind of light and reflects or transmits red light only, it will appear of a red color; if

it absorbs every kind except blue rays, it will appear blue; and so on. If more than one kind of light be transmitted or reflected the object will appear of a color compounded of these different rays of light.

In art the term color is applied to that combination or modification of tints which produces a particular and desired effect in painting. The colors of the spectrum have to be distinguished from colors used in reference to *pigments*. The pigments red, blue, and yellow, regarded in the arts as the primary colors, produce effects, when mixed, very different from those produced by admixture of the corresponding spectrum colors. These three pigment colors form other colors thus: red and yellow make orange, yellow and blue make green, and red and blue make purple; but red, blue, and yellow cannot be produced by any combination of the other colors.

— *Local colors* are those which are natural to a particular object in a picture, and by which it is distinguished from other objects.— *Neutral colors*, those in which the hue is broken by partaking of the reflected colors of the objects which surround them.— *Positive colors*, those which are unbroken by such accidents as affect neutral objects.— *Complementary colors*, colors which together make white; thus any of the primary colors is complementary to the other two.— *Subjective* or *accidental colors*, the imaginary complementary colors seen after fixing the eye for a short time on a bright-colored object, and then turning it suddenly to a white- or light-colored surface.

Combustion. The operation of fire on inflammable substances; or the union of an inflammable substance with oxygen or some other supporter of combustion, attended with heat and in most instances with light. In consequence of the combination of the carbon in fuel with the

oxygen of the air being the universal method of getting heat and light, and as when the action takes place the fuel is said to burn or undergo combustion, the latter term has been extended to those cases in which other bodies than carbon — for example, phosphorus, sulphur, metals, etc. — burn in the air or in other substances than air — for example, chlorine. Though the action between the gas and the more solid material, as coal, wood, charcoal, of whose combination combustion is the result, is mutual, the one having as much to do with the process as the other, yet the former, as oxygen, chlorine, iodine, and the compounds which they form with each other and with nitrogen, have received the name of supporters of combustion, while to the latter the term combustibles has been assigned.

Spontaneous Combustion is the ignition of a body by the internal development of heat without the application of fire. It not unfrequently takes place among heaps of rags, wool, and cotton when lubricated with oil; hay and straw when damp or moistened with water; and coal in the bunkers of vessels. In the first case the oil rapidly combines with the oxygen of the air, this being accompanied with great heat; in the second case the heat is produced by a kind of fermentation; in the third by the pyrites of the coal rapidly absorbing and combining with the oxygen of the air. The term is also applied to the extraordinary alleged phenomenon of the human body being reduced to ashes without the direct application of fire. It is said to have occurred in the aged and persons that were fat and hard drinkers; but most chemists reject the theory and altogether discredit it.

Comet. A celestial body presenting a nebulous aspect, and traveling under the sun's attraction. Many of these bodies are distinguished by a remarkable tail-like appendage. The greater number of those hitherto known have revolved round the sun on a path whose observed portion belonged to an exceedingly elongated ellipse, or was even parabolic or hyperbolic. A few, however, travel in closed orbits around the sun in known periods. Among the most remarkable comets in recent times were those of 1780, 1807, 1811, 1815, 1819, 1825, 1843, 1847, 1858, 1861, and 1874. We know so little respecting the physical conditions of comets that it would be hazardous to speculate at present concerning their real nature. A theory of great ingenuity, and (what is novel in this branch of speculation) founded on physical experiments which really seem to have some bearing on the subject, were put forward by Professor Tyndall, who is disposed to regard the tails of comets as resulting from the formation of a species of actinic cloud by the action of the solar rays, *after* their character has been altered during their passage through the comet's head. At present, however, it is difficult to say whether such a theory is well or ill founded.

Conchology. The science of shells, that department of zoölogy which treats of the nature, formation, and classification of the shells with which the bodies of many mollusca are protected; or the word may be used also to include a knowledge of the animals themselves, in which case it is equivalent to *malacology*. In systems

of conchology shells are usually divided into three orders: Univalves, Bivalves, and Multivalves, according to the number of pieces of which they are composed.

Conductor. A body capable of transmitting the electric fluid. It is called also a *non-electric*; for, unless insulated, it will not exhibit electrical excitement, the electricity being carried off along it as fast as it is communicated to or excited upon it. The metals are the best conductors; resinous substances are very bad ones. Bodies incapable of transmitting electricity are called *non-conductors*; and, because electricity may be communicated to or excited upon them, without artificial insulation, they are termed *electrics*. There is no body a perfect conductor, or a perfect non-conductor. The non-conducting power depends very much on the extent of non-conducting surface. In frictional electricity, the best conductors are the metals, as before stated; after which come graphite, sea-, spring-, and rain-water. Ice is a worse conductor than fluid or water. Alcohol, ether, paper, dry wood, and straw, are also weak conductors. Shellac, wax, amber, and sulphur become conductors when fused; and glass at a red heat conducts readily. A conductor is said to be *insulated* when it rests upon non-conducting supports. A lightning-conductor is a pointed metallic rod fixed to the upper parts of buildings to secure them from the effects of lightning. It is connected with the earth, or, what is better, the nearest water, by a good conductor, which is sufficiently thick not to be melted in transmitting the electricity; and which, where attached to the wall, is insulated by non-conductors, so that the electricity may not be diverted to the building, instead of passing harmlessly away. This useful instrument was invented by Franklin in 1755.

Congregationalists. A large and influential Christian sect, called also *Independents* in England, because they hold that every single congregation of Christians, when properly constituted with deacons and a pastor, forms an independent body, competent to its own direction and government, without interference from any other church, or any presbyteries, bishops, etc. They therefore hold that each congregation has inherent in itself power to fix its own tenets and form of religious worship, and to exercise ecclesiastical government. They hold a Christian Church to be a congregation of true believers; *i. e.*, persons who both openly profess their faith in the essential doctrines of the Gospel, and evince the earnestness of their belief by a corresponding change of disposition and demeanor. The doctrines of the Congregational Churches are almost identical with those embodied in the Articles of the Presbyterian Church, interpreted according to their Calvinistic meaning. They disavow all subscription to creeds, confessions, or articles of faith; nevertheless, they are distinguished by a singular degree of uniformity in faith and practice. As to the origin of Independency, it is probable that some conventicles were secretly established in England soon after the accession of Elizabeth; but the first prominent advocate of Congregational principles appeared in 1580, in the person

of Robert Brown. The Plymouth and Massachusetts Bay settlements in this country were founded by Congregational pilgrims in 1620 and 1628; and others, a few years afterwards, in Massachusetts and Connecticut. Congregationalism gave New England the distinctive character it bears in history, and, in return, the development of the New England Churches, and the teachings of their pastors, gave Congregationalism substantially its form. "From the earliest settlement of New England, there was a definite but peculiar relation between the Churches and the State. It was neither that in which the State rules the Church, nor that in which the Church rules the State, but rather a peculiar blending of the two. Townships were incorporated with a view to ability to maintain a settled ministry, and to the convenience of the people in attending public worship. Provision was made by law for the support of pastors, and for all necessary expenses. The choice of a pastor belonged to the Church." Throughout the whole of the early history of New England, the affairs and discussions of Church and State were blended in what would now seem an extremely curious manner. Though the doctrine of Congregationalism is, that, according to Scripture, every Church is confined to the limits of a single congregation, "the fellowship of the Churches has always been maintained, and all 'matters of common concernment' have been decided by the common consent of the whole body, and sometimes embodied in the pronounced opinions of general bodies convened for the special occasion. Denying the authority of any standing judicatory, Congregationalists recognize the necessity and desirableness of occasional synods for deliberation and advice on great public interests." Until within recent times the Congregational Churches had not made rapid growth west of the Hudson River; but, latterly, movements to spread the sect in all parts of the United States have been pushed with great energy, and the Churches have increased rapidly.

Constellations are the groups into which astronomers have divided the fixed stars, and which have received names for the convenience of description and reference. It is plain that the union of several stars into a constellation, to which the name of some animal, person, or inanimate object is given, must be entirely arbitrary, since the several points (the stars) may be united in a hundred different ways, just as imagination directs. The grouping adopted by the Egyptians was accordingly modified by the Greeks, though they retained the Ram, the Bull, the Dog, etc.; and the Greek constellations were again modified by the Romans, and again by the Arabians. At various times, also, Christianity has endeavored to supplant the pagan system, the Venerable Bede having given the names of the twelve apostles to the signs of the zodiac, and Judas Schillerius having, in 1627, applied Scripture names to all the constellations. Weigelius, a professor of Jena, even grouped the stars upon a heraldic basis, introducing the arms of all the princes of Europe among the constellations. The old constellations have, however,

been for the most part retained. Ptolemy enumerated, in the "Syntaxis," forty-eight constellations, still called the *Ptolemaean*. They are the following: (1) The twelve signs of the zodiac. (2) Twenty-one constellations found in the northern hemisphere — the Great Bear (*Ursa Major*), the Little Bear (*Ursa Minor*), Perseus, the Dragon, Cepheus, Cassiopeia, Andromeda, Pegasus, Equuleus (Horse's Head), the Triangle, the Charioteer (*Auriga*), Boötes, the Northern Crown (*Corona Borealis*), Ophiuchus, the Serpent (*Serpentarius*), Hercules, the Arrow (*Sagitta*), the Lyre, the Swan (*Cygnus*), the Dolphin, the Eagle (*Aquila*). (3) Fifteen constellations in the southern hemisphere — Orion, the Whale (*Cetus*), Eridanus, the Hare (*Lepus*), the Great Dog (*Canis Major*), the Little Dog (*Canis Minor*), Hydra, the Cup (*Crater*), the Crow (*Corvus*), the Centaur, the Wolf (*Lupus*), the Altar (*Ara*), the Southern Fish (*Piscis Australis*), the Argo, the Southern Crown (*Corona Australis*). Others were subsequently added, this being especially rendered necessary by the increased navigation of the southern hemisphere, and now the different groups of stars have come to be associated with all sorts of animals and objects, including the Camelopard, the Fly, the Air-pump, the Compasses, etc.

Continuity, Law of. The principle that nothing passes from one state to another without passing through all intermediate states. From this law, for instance, if it be known that at two instants of time a body had a temperature of 20°, and at another a temperature of 40°, then there must have been an instant between these at which the temperature was 30°. If a body, at two different times, had velocities of twelve feet and twenty feet per second, respectively, we may conclude, from the law of continuity, that between these times it had all velocities between twelve feet and twenty feet. The principle is of considerable use in investigations on motion and physical change; it was distinctly laid down by Galileo, who ascribed it to Plato; but Leibnitz was the first to apply it extensively to test physical theories. He established its truth by the method of *reductio ad absurdum*. If a change were to happen without the lapse of time, the thing changed must be in two different conditions at the same instant, which is obviously impossible.

Contractile Force or Contractility. That property or power inherent in certain elastic bodies, on account of which, after having been extended, they reduce themselves again to their former dimensions, if permitted to do so. It has been calculated from Joule's data that the force exerted by heat in expanding a pound of iron between 0° and 100° during which it increases about $\frac{1}{288}$ of its bulk, is equal to 16,000 foot pounds; that is, it could raise a weight of seven tons through a height of one foot. An application of this contractile force is seen in the mode of securing the tires on wheels. The tire being made red-hot, and thus considerably expanded, is placed on the circumference of the wheel and then cooled. The tire, when cold, embraces the wheel with such force as not only to secure itself on the rim, but also to press home the joints of the spokes into the felloes and nave.

Convection. When a liquid is heated from above, the temperature of the mass rises with extreme slowness, because liquids possess but little conducting power for heat; thus water may be boiled on ice, although separated from it by a very thin stratum of water. But if the liquid be heated from below, we notice at once that currents of liquid ascend from the bottom to the top of the vessel, and the liquid acquires a uniform temperature. This transport of heat by masses of matter is known as Convection. The layers of a liquid or gas which are nearest to the source of heat are expanded, and thus become specifically lighter than surrounding portions, consequently they rise; while colder, and consequently heavier, portions descend, are heated in their turn, and then ascend to make way for other colder portions. Thus, however badly a liquid or gas conducts heat, it can rapidly acquire a uniform temperature by the convection of heat; and convection takes place in gases far more readily than in fluids, because for equal increments of heat they expand to a greater extent than liquids.

Cooper Union or Cooper Institute.

An institute founded in New York City in 1857, by Peter Cooper. Its object is to provide free schools of art and science, and free reading rooms and library for the working classes. There are lecture courses, a museum, an art gallery, and a library of 31,000 volumes, with a reading room containing current numbers of nearly 500 magazines and newspapers. The institute was built at a cost of \$630,000 and was endowed by Mr. Cooper with \$300,000. It has received additional gifts from time to time from Edward Cooper and Abram S. Hewitt, and in 1899 Andrew Carnegie gave it \$300,000 for the founding of a mechanical day art school.

Correlation of the Physical Forces.

The principle that any one of the various forms of physical force may be converted into one or more of the other forms. Thus, heat may mediate or immediately produce electricity, electricity may produce heat, and so of the rest, each merging itself as the force it produces becomes developed; and that the same must hold good of other forces, it being an irresistible inference from observed phenomena that a force cannot originate otherwise than by devolution from pre-existing force or forces. This principle is also called *Transmutation of Energy*.

Cosmogony. A theory of the origin or formation of the universe. Such theories may be comprehended under three classes: (1) The first represents the world as eternal, in form as well as substance. (2) The matter of the world is eternal, but not its form. (3) The matter and form of the universe is ascribed to the direct agency of a spiritual cause; the world had a beginning, and shall have an end. Aristotle appears to have embraced the first theory; but the theory which considers the *matter* of the universe eternal, but not its *form*, was the prevailing one among the ancients, who, starting from the principle that nothing could be made out of nothing, could not admit the creation of matter, yet did not believe that the world had been always in its present state. The prior state of the world subject to a constant succes-

sion of uncertain movements which chance afterwards made regular, they called *chaos*. The Phenicians, Babylonians, and also Egyptians, seem to have adhered to this theory. One form of this theory is the atomic theory, as taught by Leucippus, Epicurus, and Lucretius. According to it atoms or indivisible particles existed from eternity, moving at hazard, and producing, by their constant meeting, a variety of substances. After having given rise to an immense variety of combinations they produced the present organization of bodies. The third theory of cosmogony makes God, or some deity, the Creator of the world out of nothing. This is an ancient and widely-spread theory, and is that taught in the book of Genesis. Anaxagoras was the first among the Greeks who taught that God created the universe from nothing. The Romans generally adopted this theory, notwithstanding the efforts of Lucretius to establish the doctrine of Epicurus.

Councils of the Church. General councils, called also œcumenical or universal, are summoned by the Pope of Rome, and are designed to settle questions affecting the Universal Church. The Roman Catholic Church recognizes twenty-one general councils; the Greek Church, the first seven of these, besides that of Jerusalem; and the Protestant Churches generally admit the full authority of none of them, and reckon as œcumenical only the first six. The following are the most notable of the councils of the Church of Rome:

A. D.

50. Of the Apostles at Jerusalem.
314. Of the Western Bishops at Arles, in France, to suppress the Donatists; three fathers of the English Church went over to attend it.
325. The first Œcumenical or General Nicene, held at Nice, Constantine the Great presided; Arius and Eusebius condemned for heresy. This council composed the Nicene Creed.
335. At Tyre, when the doctrine of Athanasius was canvassed.
337. The first held at Constantinople, when the Arian heresy gained ground.
342. At Rome, concerning Athanasius, which lasted eighteen months.
347. At Sardi; 370 bishops attended.
359. Of Rimini; 400 bishops attended, and Constantine obliged them to sign a new confession of faith.
381. The second General at Constantinople; 350 bishops attended and Pope Damasius presided.
431. The third at Ephesus, when Pope Celestine presided.
451. Fourth at Chalcedon; the Emperor Marcian and his Empress attended.
553. The fifth at Constantinople, when Pope Vigilius presided.
650. The sixth at Constantinople, when Pope Agatho presided.
715. Authority of the six general councils reestablished by Theodosius.
787. The second Nicene Council, seventh General; 350 bishops attended.
869. Of Constantinople, eighth General; the Emperor Basil attended.
1122. The first Lateran, the ninth General; the right of investitures settled by treaty between Pope Calixtus II. and the Emperor Henry V.
1139. The second Lateran, tenth General, Innocent II. presided; the preservation of the temporal ties of ecclesiastics, the principal subject which occasioned the attendance of 1,000 fathers of the Church.
1179. The third Lateran, eleventh General; held against schismatics.
1215. Fourth Lateran, twelfth General; 400 bishops and 1,000 abbots attended; Innocent III. presided.

A. D.

1245. Of Lyons, the thirteenth General, under Pope Innocent IV.
 1274. Of Lyons, the fourteenth General, under Gregory X.
 1311. Of Vienne in Dauphine, the fifteenth General; Clement V. presided and the kings of France and Arragon attended. The order of the Knights Templar suppressed.
 1409. Of Pisa, the sixteenth General; Gregory XII. and Benedict XIII. deposed, and Alexander elected.
 1414. Of Constance, the seventeenth General; Martin V. is elected pope; and John Huss and Jerome of Prague condemned to be burnt.
 1431. Of Basil, the eighteenth General.
 The fifth Lateran, the nineteenth General, begun by Julius II.
 1512. Continued under Leo X., for the suppression of the Pragmatic sanction of France against the Council of Pisa, etc.
 1545. Of Trent, the twentieth Œcumenical, as regarding the affairs of all the Christian world; it was held to condemn the doctrines of the reformers, Luther, Zuinglius, and Calvin.
 1870. Of Rome, the last Œcumenical which adopted the dogma of Papal infallibility.

Creed. A summary of belief, from the Latin *credo* (I believe), with which the Apostles' and Nicene Creeds begin. These two creeds, together with the Athanasian Creed, are the most ancient authoritative Christian creeds, though numerous ancient formularies of faith are preserved in the writings of the early fathers. The Nicene Creed was set forth by the Council of Nicea in 325, and is closely similar in wording to ancient creeds of Oriental Churches, and specially founded upon the baptismal creed of the Church of Cæsarea in Palestine. The Apostles' Creed was originally a baptismal confession, and not a summary of apostolic teaching.

Dew. The moisture which rises into the atmosphere during the day, and is afterwards deposited on the earth in gentle drops during the night. The air, when heated during the day, is capable of holding a larger quantity of water in solution as vapor, than when cooled during the night, the low temperature of which causes some of the water to separate. The separated particles, uniting, form drops of dew. When the night is cloudy, the surfaces on which the dew would be deposited are not sufficiently cooled down for the purpose, since the clouds give back some of the heat which passed off by radiation.

Digestion is that process in the animal body by which the aliments are so acted upon that the nutritive parts are prepared to enter the circulation, and separated from those which cannot afford nourishment to the body. The organs effecting this process are called the *digestive* organs, and consist of the stomach, the great and small intestines, etc., the liver, and pancreas. When the aliments, after being properly prepared and mixed with saliva by mastication, have reached the stomach, they are intimately united with a liquid substance called the *gastric juice*, by the motion of the stomach. By this motion the aliments are mechanically separated into their smallest parts, penetrated by the gastric juice, and transformed into a uniform pulpy or fluid mass. The gastric juice acts upon the albuminous parts of the food, converting them into peptones, which can pass through organic membranes and thus enters the blood. This action is aided by the warmth of the stomach. The pulpy mass called *chyme* proceeds from the stomach, through the pylorus, into that part

of the intestinal canal called the small intestine, where it is mixed with the pancreatic juice, bile, and intestinal juice. The pancreatic juice converts starch into sugar, albumins into peptones, and emulsionizes fats, so that all these kinds of food are rendered capable of absorption. The process is aided by the intestinal juice. The bile also acts upon fats, and thus the food is formed into the *chyle*, which is absorbed into the system by the capillary vessels called *lacteals*, while the non-nutritious matters pass down the intestinal canal and are carried off.

Dissenter. One who secedes from, or is opposed to, the service and worship prescribed by any established or state Church. In England, the term is applied (indifferently with that of *Nonconformist*) to those who do not conform to the rites and services of the Church as established by law of the land. It must be understood that the term does in no case apply to either Jews or Roman Catholics. Thus the apparent paradox exists that in England the Presbyterian body are Dissenters, while in Scotland they form the Established Church, leaving the Episcopalians as the chief dissenting body. In this country, there being no state Church, such differences in the ecclesiastical polity have, necessarily, no existence.

Distillation. An operation by which a liquid is converted into vapor by heat, which vapor is condensed by cold in a separate vessel. It may be employed for various purposes: thus simple distillation purifies liquids; it enables a more volatile to be separated from a less volatile substance; by its means a liquid possessing a definite boiling-point may be separated from other liquids possessing other boiling-points. This latter is known as *fractional distillation*, and is much used in the separation of hydrocarbons, the various products being collected at intervals of, say, ten degrees of temperature. The essential parts of a distilling apparatus are a vessel in which the substance is heated, called sometimes a *still* and sometimes a *retort*; a *condenser* or *refrigerator*, in which the vapor is cooled, and a *receiver*, in which the condensed products are collected. Distillation was an important operation in the earliest alchemical processes of which we have any record; it does not, however, appear to have been known before the time of Pliny.

Dominicans. An order of preaching friars, founded at Toulouse in 1215, by the Spanish St. Dominic de Guzman, who was born in Old Castile, in 1170, became one of the instigators of the crusade against the Albigenses, and died in 1221. This order, confirmed by bull of Pope Honorius, 1216, rapidly multiplied in Christendom. In course of time, however, the Dominicans were superseded in the schools by the Jesuits, and were also eclipsed by the great rival order of the Franciscans. Among the lights of the Dominican order may be counted St. Thomas Aquinas and Albertus Magnus. In more modern times, the order has been resuscitated in France by the propaganda of Père Lacordaire, and they are likewise to be found in Belgium, Hungary, Switzerland, and the United States. Their rule is very strict, including rigorous fasting and total abstinence from flesh. They wear a

white robe, with a black gaberdine, and a pointed black cap.

Drawing. The art of representing on a flat surface the forms of objects, and their positions and relations to each other, was prehistoric in origin.

Drawings may be divided into five classes: sketches, finished drawings, studies, academic drawings, and cartoons. First sketches are the ideas put on paper by an artist, with the intention of carrying them out with more completeness and detail in some more elaborate work. They are merely intended to fix and retain his first thoughts. Finished drawings are such as are carefully executed and made complete in all their parts. By studies are generally understood separate parts of objects carefully drawn either from life or from figures in relief; for example, heads, hands, feet, arms; but sometimes the term is applied to drawings of entire figures. To this class also belong drawings of the skeleton and muscles, as well as of draperies, animals, trees, foregrounds, or other parts of landscapes. Academic drawings are those made in art academies from a living model in lamplight which brings out the shadows more than daylight. The position of the model is carefully arranged at the commencement of each sitting, and in that position he is required to remain. In this way the learners practice the drawing of the figure in various attitudes. In studying drapery and dress, a lay figure, made of wood and with movable joints, is clothed in various styles, and drawings made from it. Cartoons are drawings made on stout paper of the size of the painting to be executed from them. They are mostly employed for pictures of large size, and are regularly used by fresco painters. The design is pricked through or traced from the cartoon on the surface that receives the finished picture.

Dream. A series of mental impressions occurring to sleeping persons, and which, therefore, are not under the command of reason. Dreams have been referred to various causes; among others, to direct impressions on the organs of sense during sleep; to the absence of a power to test the inaccurate conclusions drawn from one set of impressions by other impressions; to a disordered state of the digestive organs; to a less restrained action of the mental faculties; to the suspension of volition while the powers of sensation continue, etc. In health there is a less tendency to dream than in disease; in the earlier than in the later periods of life; and the very act of dreaming shows that the brain is not enjoying a complete state of rest. The phenomena of dreams are yet too little studied to enable us to attest much with certainty regarding them. The popular belief has frequently ascribed them to supernatural agency, especially where there has been any coincidence between a dream and an external event; and it may be said that if many of the instances of remarkable dreams may be explained by natural causes, there are others so well authenticated that we cannot altogether discredit them that are manifestly unexplained by any scientific theory.

Dynamics. That branch of the science which treats of the action of force in producing motion. It treats of bodies not in equilibrium,

as *statics* treats of bodies at rest. Dynamics is divided into two parts — *kinematics*, which investigates the circumstances of mere motion without reference to the bodies moved, the forces producing the motion, or to the forces called into action by the motion; and *kinetics*, which investigates the nature and relation of the forces which produce motion. Dynamics has to do with the primary conceptions of space, matter, time, and velocity, each of which admits of numerical estimation by comparison with units arbitrarily chosen; hence dynamics is a science of numbers. It is usual to consider the subject in two parts: the dynamics of a particle, and the dynamics of a rigid body. The science owes its origin to Galileo, to whom is due the law of the acceleration of falling bodies. Huyghens added the theories of the pendulum and centrifugal force, and Newton developed the science, and applied it to the infinitesimal calculus.

Electricity, from the Greek *elektron* (amber), the name applied originally to the unknown cause of the attractions, repulsions, sparklings, etc., which attend the friction of amber and similar substances. The same cause is now recognized as giving rise, under various circumstances, to many phenomena. Many attempts have been made to ascertain the true nature of electricity, but it cannot be said that we have yet any sure knowledge of what this subtle agent really is. Electricity behaves as if it were an incompressible fluid substance, but it differs from all known fluids in so many particulars that it may be asserted that whatever else it may be, it is not a fluid in the ordinary sense of the word. Neither is it a form of energy, though electrification as distinguished from electricity certainly is such. Many scientific men hold the view that electricity is the ether itself (the elastic, incompressible medium pervading all space and conveying luminous and other vibrations), and that the phenomena of positive and negative electrifications are due to displacement of the ether at the surfaces of bodies. The researches of Hertz, who, by direct experiment, verified James Clerk Maxwell's brilliant theory that electrical action is propagated through space by wave motion in the ether, differing only in respect of wave length and period from the vibrations which constitute light, have been of the utmost value in helping to arrive at a solution of this question. Investigations into the phenomena of electric discharges in high vacua, followed by the discovery of Roentgen of the X-Rays, have also thrown great light on the subject. The applications of electricity are extremely varied. Its employment for telegraphy and electro-metallurgy, for chemical and for medical and physiological purposes, for the production of light to illuminate streets and buildings, for driving vehicles and machinery of various kinds, may be mentioned as examples.

Motor. For practical purposes, to produce continuous power, it is most convenient to use a machine called a *motor*, which is so arranged that the electricity traverses a wire wound (in the form of one or more coils) many times around a suitably-shaped frame of iron called a field magnet or simply a field. The current so circulating round the field magnetizes, or as it is

called, excites it, causing it to exert an attraction or pull upon another part of the machine known as the armature. The armature is also wound with wire through which the current passes, and is placed between the extremities of the field magnet which are called poles. The electrical connections are so adjusted that the attraction or pull between the field and armature is up on one side of the armature and down on the other, thus causing the latter to rotate with any desired speed and power according to the size of the motor. The power may be brought in by wires through the window-casing, and the whole machinery started and stopped by turning a switch. Being entirely noiseless, perfectly clean, susceptible of being started, regulated, or stopped as stated by the mere pressure of a button, and cheap, both in constructing and operating, its utility for the lighter kinds of industrial service is beyond question. There is no delay with electric motors similar to that in getting up steam in a steam-engine, and this quality is of the utmost importance in the fire-engine service, and is made use of in the electric fire-engine. Upon reaching a fire the connecting wires from the electric engine are hooked into the box on the electric light post, from which wires run up to the electric light wires above. The engine is then ready for instant operation at full power. The revival of interest in the electric motor causes it to seem like a new invention to those not familiar with the record of electrical science. As a matter of fact, the electrician Jacobi, under the patronage of the Czar of Russia, propelled a boat on the Neva by electricity more than half a century ago; and not many years later Professor Page, in this country, succeeded in driving a car by an electric locomotive between Washington and Bladensburg at a speed of nineteen miles an hour. But nothing resulted from those early experiments on account of the rudimentary methods of generating electricity; and had not the dynamo machine been made commercially successful the motor would still be floating in the brain of scientists as a future but very indefinite possibility. Now, however, it has been caught and made objective. Thousands of electric motors are at work in various parts of the country, ranging in capacity from one-half to twenty horse-power, and they are transferring freight and passengers, running printing-presses, lifting elevators, driving ventilators, and making themselves generally useful at domestic and industrial service. The adaptability of the motor for operating street railways is its chief recommendation to the American people.

The Dynamo. This machine is very like the modern motor just described. In fact a dynamo may be used as a motor by supplying it with electricity from another dynamo or any other source of electricity, and if the armature of a motor be rotated by a steam-engine or other prime mover, it will give a current of electricity and become for the time being a dynamo. The only difference between the dynamo and motor is in the proportioning of parts, the modes of regulating speed power, etc. Only after the invention of the modern dynamo was this fact discovered, and in the early and partially suc-

cessful attempts to make both, the experimenters did not appear to even guess that there was any particular connection between them. The designing of motors does not stop with the simple application of the revolving wheel principles explained above, but furnishes unlimited room for skill in making them in forms convenient for use, and adapted for direct connection to various kinds of machinery. American ingenuity has undoubtedly taken the lead in making motors of all kinds.

The Trolley. An electric street car, such as may be seen in the majority of towns and cities throughout the Union, is known as a trolley car because the current is taken from the overhead wire through the trolley or wheel, whence it goes down the pole and through a wire to the motor which is situated under the floor, then into car wheels and so to the rails and ground and back to the generator or dynamo in the power station.

Electric Light, is one of the many electric processes which depend upon the faculty of being easily converted into heat at any desired place and in any part of its conductor. In itself electric lighting covers a range of sizes or powers more extensive than the candle, the gas-burner, and the calcium light combined. Heat is the vibratory motion of the atoms which compose substances, which kind of motion electricity always produces when moving through a conductor. The temperature increases with the current, and it becomes possible, therefore, to raise the temperature of a given conductor to a red or white heat. If such a current be sent through an iron, a copper, or a platinum wire it will glow very brightly and be in danger of fusing; but if a filament of carbon be used instead, inclosed in a vacuum, it cannot fuse, but gives out a bright light. It is also a great advantage to be able to produce intense heat at a particular spot by passing a current through a wire and thinning the wire at the desired place. The higher incandescent or luminous heat is obtained by making the section of the wire still thinner, which brings it to a heat of dazzling brilliancy. This is the whole principle of the incandescent electric light in a nutshell. Electric lights are of two classes, known as "arc" and "incandescent." The latter, named from the incandescent heat of the thin wire, consists of a fine wire or filament of any substance which will stand enormous heat, inclosed in a glass, with the air removed to prevent its burning up at the high temperature. These lights, which are usually small, are very soft and pleasant to the eye, and are used for indoor illumination. The arc light is produced by the current passing from the end of one rod of carbon to the end of another rod through the vapor produced by the burning of the carbon and is named from the curved or arc-shaped path which the current takes in passing through this vapor. The passage of the current heats the particles of carbon in the vapor as well as the tips of the rods to an intense degree, and gives off a light of absolutely unapproached brilliancy. They are used for street illumination, man-of-war search-lights, etc., and have been tried in the more important light-houses of the world. An ordinary gas-burner

is of 16 candle-power. The bright electric lights in the street are 1,200 to 1,500 candle-power. The Statue of Liberty light is 48,000 candle-power. Going to the other extreme, we have very small lights of 1, $\frac{1}{2}$, and even $\frac{1}{8}$ candle-power for special purposes. They are used for house decorations, in the hair with ball costumes, in bouquets, etc., but the important uses are for illuminating for exploration places into which no burning light could be introduced, as in the method recently devised by medical electricians of illuminating the interior of the stomach for examination.

Engineering, the branch of science dealing with the design, construction, and operation of various machines, structures, and engines used in the arts, trades, and everyday life. Engineering is divided into many branches, the more important being civil, mechanical, electrical, mining, military, marine, and sanitary engineering. Mechanical engineering has to do with the design, construction, and operation of machinery, the design of manufacturing plants, and all branches of industrial production. The mechanical engineer's education should be similar to that of the civil engineer, with the addition of a knowledge of the theory and practice of machine construction. Electrical engineering is a branch of mechanical engineering and includes the application of electricity to mechanical and industrial pursuits, as derived from some other source of energy. Mining engineering is a combination of the three preceding branches as applied to the discovery and operation of mines, the building of mineral working plants, and treatment of ores. Military engineering deals entirely with the arts of war, the design, construction and maintenance of fortifications, machines of defense and attack, ordnance, and the surveying of country in preparation for military operations. Marine engineering is partly military and partly civil, embracing naval architecture, building and operating of ships and naval accessories. In the military sense, it comprises the construction of war vessels and the construction and placing of torpedoes, submarine mines, etc. Sanitary engineering consists of the construction of sewers and drains, providing for the cleaning of city streets and the disposal of garbage and sewage, reclaiming of swamps, and overcoming of all conditions tending to interfere with public health. The education and training of the engineer in modern times have called for the establishment of technical schools and courses in engineering in the large colleges and universities. These schools provide the student with the theories of mathematics, mechanics, and engineering, and by means of extensive laboratory and outside work provide him with practice in the design, construction, and use of modern engineering appliances.

Episcopal Church, Protestant, a denomination in the United States directly descended from the Church of England, which doctrinally claims to be based on the Holy Scriptures, as interpreted in the Apostles and other ancient creeds of the Church that have been universally received, and to have kept herself aloof from all the modern systems of faith,

whether of Calvin, or Luther, or Arminius, leaving its members free to enjoy their own opinions on all points not represented in the Scriptures as necessary to soul's health, and refusing to be narrowed down to any other creed or creeds than those of the Apostles and the Primitive Church. It claims also to have retained all that is essential to Church organization in its episcopate, and in its liturgy to have not only a wise and judicious compend of doctrine and devotion, but also one of the most effectual of all possible conservative safeguards for the faith once delivered to the saints. Three clerical orders are recognized — bishops, priests, and deacons — the first deriving their office in direct succession from the apostles by episcopal consecration, and the others receiving ordination at the hands of a bishop. Those of the second order are entitled archdeacons, deans, rectors, vicars, or curates, according to their functions. A reader is a layman licensed by the bishop to read in a church or chapel where there is no clergyman. Parson signifies a clergyman in possession of a parochial church. From the time of the first congregations of the Church of England, in America, in 1607, to the close of the Revolution, all the clergy in the colonies were regarded as under the supervision of the Bishop of London. The first American Bishop was Rev. Samuel Seabury, who, in 1783, was consecrated in Scotland as Bishop of Connecticut. All Protestant Episcopal Churches in the United States are associated in one national body, called the General Convention, which meets triennially.

Fathers of the Church, the name given to certain writers, or apologists, of the early Christian Church. They are usually divided into three classes — the Apostolic Fathers, the Primitive Fathers, and (simply) the Fathers. The *Apostolic Fathers*, who were contemporary to some extent with the apostles, are Hermas, Barnabas, Clemens Romanus, Ignatius, and Polycarp. The *Primitive Fathers*, who lived in the Second and Third Centuries, include Justin Martyr, Irenæus, Athenagoras, Clemens Alexandrinus, Hippolytus, and Origen (who wrote in Greek), and Tertullian, Minutius Felix, and Cyprian (who wrote in Latin). The *Fathers*, or those of the Fourth and Fifth Centuries, belonged either to the Greek or to the Latin Church. The principal Greek Fathers are Eusebius, Athanasius, Ephraem Syrus, Basil, Cyril of Jerusalem, Gregory Nazienzen, Macarius, Gregory Nyssen, Epiphanius, John Chrysostom, Cyril of Alexandria, and Theodoret. The principal Latin Fathers are Hilary, Lactantius, Ambrose, Jerome, and Augustine.

Friends, Society of, the organization commonly called Quakers, founded in the middle of the Seventeenth Century by George Fox. They are distinguished from other Christian bodies by the special stress they lay on the immediate teaching and guidance of the Holy Spirit, and their belief that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total silence. The Friends believe that the sacraments of Baptism and the Lord's

Supper are to be taken spiritually, and not in an outward form. Their protests against the use of oaths and against the exaction of tithes and church rates cost them much suffering and frequent imprisonment during the first fifty years of their existence. The simplified dress which Friends adopted from conviction 200 years ago became stereotyped into a uniform. This dress has generally been given up, as have also the antipathy to music and singing in its rigid application, and the peculiarities of speech, such as the use of "thee" and "thou" instead of "you" (though many Friends still retain this custom among themselves), and the avoidance of all titles of courtesy. Of late years there has been a very decided evangelical movement among Friends, under the influence of which the old quietism is dying out. As a result of this change the influence of the Society beyond its own borders, through home and foreign missions and adult First Day (Sunday) Schools, has developed to a remarkable extent. There is in the United States a numerous body of Friends called Hicksites (from their founder, Elias Hicks), who separated from the orthodox community. They hold latitudinarian views. The Wilburite section are conspicuous in Pennsylvania by their adherence to the livery and the "plain language." Large numbers of persons who do not appear in the statistical returns attend the Mission meetings of the Society of Friends, and very large numbers come under their influence in the foreign mission field.

Greek Church, The, taken in the widest sense, comprehends all those Christians following the Greek or Greco-Slavonic rite who receive the first seven general councils, but reject the authority of the Roman pontiff and the later councils of the Western Church. The Greek Church calls itself "the Holy Orthodox Catholic and Apostolic Church," and it includes three distinct branches—the Church within the Ottoman Empire, subject directly to the patriarch of Constantinople; the Church in the kingdom of Greece; and the Russo-Greek Church in the dominions of the czar. The proper history of the Greek Church as a separate body dates from the commencement of the Greek schism, or rather from the commencement of the efforts on the part of the Church of Constantinople to establish for itself a distinct jurisdiction, and an independent headship in the eastern division of the empire. The ecclesiastical preëminence of Constantinople, it need hardly be said, followed upon the political distinction to which it rose as the seat of the imperial residence and the center of the imperial government. Originally Byzantium was but a simple episcopal see, subject to the metropolitan of Heraclea; but the rank of the see rose with the fortunes of the city; and before the close of the Fourth Century a canon of the council of Constantinople, held in 381, assures to it, on the ground that "Constantinople is the new Rome," the "precedence of honor" next after the ancient Rome. The United Greek Church comprehends those Christians who, while they follow the Greek rite, observe the discipline of the Greek Church and make use of the Greek liturgy, are yet united with the Church of Rome, admitting the double

procession of the spirit and the supremacy of the Roman pontiff, and accepting all the doctrinal decisions subsequent to the Greek schism which have force as articles of faith in the Roman Church. The United Greeks are found chiefly in southern Italy, in the Austrian dominions, in Poland, and the Russian Empire. In Italy they are computed at 80,000; in Austria at about 4,000,000; and in Poland at about 250,000. In Russia it is difficult to ascertain their number; it has fallen off considerably in late years. In Austria they are divided into Roumanians and Ruthenians—the former being settled in Wallachia, Transylvania, and eastern Hungary; the latter, in Little Russia, Galicia, and north-eastern Hungary. The union of the Greek Christians of Wallachia and Transylvania dates from the end of the Twelfth Century; and although the Reformation made some progress among them, they still for the most part remained true to the union. The union of the Galician Greeks or Ruthenians is of much later date, about the close of the Seventeenth Century. It is only necessary to add that the usage of the United Greek Church as to the law of celibacy is, with the consent of the Roman pontiffs, the same as among the other Greeks. They are also permitted to administer communion under both kinds.

Heart. A hollow muscular organ, the function of which is to maintain the circulation of the blood. The human heart is formed of a firm thick muscular tissue, composed of fibers interlacing with each other, and is supplied with nerves and vessels, which are termed *coronary*. Its coronary arteries branch off from the aorta, and the coronary veins return the blood in the right auricle. Its nerves are branches of the eighth and great intercostal pairs. It is divided in the middle by a strong partition, and on each side by two cavities, called *ventricles*; one the right or *pulmonic*, and the other the left or *systemic*. Attached to the base of the heart are two *auricles*, so-called from their resemblance to an ear. In the right auricle there are four apertures: two of the *venæ cavæ*, one of the coronary vein, and one an opening into the right ventricle. There are five apertures in the left auricle; one into the left ventricle, and those of the four pulmonary veins. Each ventricle has two orifices; one from the auricle, and another into the artery. The ventricles are supplied with valves; those at the arterial opening being, from their form, called *semi-lunar*; those at the orifice of the right auricle, *tricuspid*; and those at the orifice of the left auricle, *mitral*. The valve at the termination of the *vena cava inferior*, just within the auricle, is called the *valve of Eustachius*. The dilatation of the heart is called *diastole*; its contraction, *systole*. The alternate contraction and dilatation of the heart are entirely involuntary, and dependent on the nervous system. It has been calculated that the daily work of an ordinary human heart, in propelling the blood, is equal to the lifting 124 tons a foot high.

Horse Power, the measure of a steam engine's power, as originally settled by James Watt, being a lifting power equal to 33,000 pounds raised one foot high per minute. Thus,

an engine is said to be of 100 horse power (h. p.) when it has a lifting capacity equivalent to 3,300,000 pounds one foot high per minute. To ascertain the horse power of an engine multiply together the pressure in pounds on a square inch of the piston, the area of the piston in inches, the length of the stroke in feet, and the number of strokes per minute, divide the result by 33,000 and the quotient, less one-tenth, allowed for loss by friction, will give the horse power. Engines are frequently said to be of so many horse power nominal; the real or indicated horse power, however, often exceeds the nominal by as much as three to one.

Illiteracy. The following percentages indicate the relative illiteracy of the chief nations of the world. In Rumania, 88.4 per cent. of the population can neither read nor write; in Servia, 79.3 per cent.; in Portugal, 79.2; in Spain, 68.1 per cent.; in Russia, 61.7 per cent.; in Hungary, 47.8 per cent.; in Austria, 35.6 per cent.; in Italy, 32.9 per cent.; in Greece, 30 per cent.; in Belgium, 10 per cent.; in Ireland, 7.9 per cent.; in France, 4.7 per cent.; in England, 3 per cent.; in Scotland, 2.5 per cent.; in The Netherlands, 2.3 per cent.; in Finland, .5 per cent.; in Denmark, .2 per cent.; in Switzerland, .13 per cent.; in Sweden and Norway, .08 per cent.; in The German Empire, .05 per cent.; and in Saxony, Bavaria, Württemberg and some other German states only rarely a person can be found who cannot read and write. In the United States the ratio of illiteracy among the whites is 6.2 per cent.

Libraries. Libraries existed in ancient Egypt and Assyria, and Pisistratus is credited with the honor of introducing a public library at Athens about B. C. 337. Cicero and various wealthy Romans made collections of books, and several Roman Emperors established libraries, partly with books obtained as spoils of war. By far the most celebrated library of antiquity was the Alexandrian. In the West, libraries of any note were founded in the second half of the Eighth Century by the encouragement of Charlemagne. In France one of the most celebrated was that in the Abbey of St. Germain des Près, near Paris. In Germany the libraries of Fulda, Corvey, and in the Eleventh Century that of Hirschau, were valuable. In Spain, in the Twelfth Century, the Moors had seventy public libraries, of which that of Cordova contained 250,000 volumes. In Britain and Italy libraries were also founded with great zeal. After the invention of printing this was done more easily and at less expense. The principal libraries of modern times are:

LIBRARY	CITY	No. OF VOLS.
Bibliothèque nationale, . . .	Paris,	3,000,000
British Museum,	London,	2,000,000
Imper. publicnaja biblioteka, . .	St. Petersburg, . .	2,000,000
Library of Congress,	Washington, . . .	1,550,000
Public Library — Astor, Lenox, and Tilden Foundation,	New York City, . .	1,350,000
Königliche bibliothek,	Berlin,	1,230,000
New York State,	Albany,	1,000,000
Kon. Hof-u. Staatsbibliothek,	Munich,	1,000,000
Public Library,	Boston,	963,000
K.u.k. Hofbibliothek,	Vienna,	900,000
Universitäts- u. landesbibliothek,	Strasburg,	814,000
Harvard University Library, . .	Cambridge (U. S.),	804,000
Publicnyj i Rumjancovskij musej,	Moscow,	800,000

LIBRARY	CITY	No. OF VOLS.
Cambridge University Library,	Cambridge(Eng.)	700,000
Bodleian Library,	Oxford,	700,000
Det store kongelige bibliotek,	Copenhagen, . . .	650,000
Biblioteca nacional,	Madrid,	650,000
K. k. Universitäts-bibliothek,	Vienna,	650,000
Leipsc University,	Leipsc,	600,000
National Library,	Rome,	600,000
Yale University,	New Haven, . . .	550,000
Universitäts-bibliothek,	Göttingen,	550,000
Universiteit bibliotheek,	Amsterdam, . . .	500,000
Bibliotheca Nazionale Centrale,	Florence,	500,000
Kön bibliotheek,	The Hague,	500,000

Other large and valuable libraries are: the royal libraries at Stuttgart and Dresden; the university libraries of Genoa, Prague, Upsal, and Dublin; also the libraries of Venice, Milan, Bologna, Naples, and the Advocates', Edinburgh. The Vatican library, Rome, and the Bodleian, Oxford, are particularly valuable in rare books and manuscripts. The spread of education has called into existence innumerable smaller libraries, ready of access, and providing such literature as the special class of readers demand. This public library system has naturally been most developed in highly-educated countries, such as Germany, France, Great Britain, and the United States.

Light. That peculiar property of matter which affects the nerves of sight, and causes us to see. A *ray of light* is an exceedingly small portion of light as it comes from a luminous body. A *beam of light* is a collection of parallel rays. A *medium* is a body which affords a passage for the rays of light. A *pencil of rays* is a mass of diverging or converging rays. *Converging* rays are those which tend to a common point; *diverging* rays, those which come from one point, and continually separate as they proceed. The rays of light are *parallel*, where the lines which they describe are so. The *radiant point* is the point from which diverging rays proceed. The *focus* is the point to which the converging rays are directed. Light passes off from a luminous body in all directions; and its intensity decreases as the square of the distance increases: thus, if one object is twice as far from a luminous body as another of the same size, it will receive only one-fourth as much light as the latter. The velocity with which light travels is enormous; it was estimated, on astronomical data, at 183,-470 miles per second; but according to Léon Foucault's recent experiments with the "turning mirror," it is 185,170 English miles per second; and it requires little more than a quarter of an hour to pass through the diameter of the earth's orbit. When light encounters an obstacle, some of it is reflected, some absorbed, and, if the interposed body is not opaque, some of it is transmitted. During transmission it is modified, being in some cases, as with doubly refracting crystals, decomposed into two white rays, possessing different properties; and in others, as with glass prisms, decomposed into a number of *colored* rays, accompanied by rays which are colorless, and in fact *invisible*, but which have marked chemical and calorific properties. When luminous rays pass into a dark chamber through a small aperture, and are received upon a screen, they form images of external objects. These

images are inverted; their shape is always that of the external objects, and is independent of the shape of the aperture. The inversion of the images arises from the fact that the luminous rays proceeding from external objects, and penetrating into the chamber, cross one another in passing the aperture. Continuing in a straight line, the rays from the higher parts meet the screen at the lower parts, and inversely, those which come from the lower parts meet the higher parts of the screen. Hence the inversion of the image. Light, heat, and the chemical principle seem to be modifications of the same element; but there are circumstances in which they differ.

Liquid Air is based upon the cooling that air undergoes when it is subject to expansion and passes from a given to a lower pressure. To obtain a liquefaction of the air at atmospheric pressure it is necessary to cool it to -191° ; that is, to compress it to 800 atmospheres before expanding it. This is accomplished by an electric motor actuating a pump which sucks air from the atmosphere. It is then dried by passing over chloride of calcium, thence into a liquid ammonia refrigerating apparatus. It is successfully employed in the production of oxygen. It is of little use as a motive power or refrigerant, partly on account of its cost.

Lungs, the sole breathing organs of reptiles, birds, mammals, and in part of amphibians (frogs, newts, etc.), the latter forms breathing in early life by branchiæ or gills, and afterwards partly or entirely by lungs. The essential idea of a lung is that of a sac communicating with the atmosphere by means of a tube, the *trachea* or windpipe, through which air is admitted to the organ, and through structural peculiarities to its intimate parts, the air serving to supply oxygen to the blood and to remove carbonic acid. In the Mammalia, including man, the lungs are confined to and freely suspended in the cavity of the thorax or chest, which is completely separated from the abdominal cavity by the muscular diaphragm or "midriff." In man the lungs are made up of honeycomb-like cells which receive their supply of air through the bronchial tubes. If a bronchial tube is traced it is found to lead into a passage which divides and subdivides, leading off into air-cells. The walls of these air-cells consist of thin, elastic, connective tissue, through which run small blood-vessels in connection with the pulmonary artery and veins. By this arrangement the blood is brought into contact with, and becomes purified by means of, the air. The impure blood enters at the root of the lung through the pulmonary artery at the right side of the heart, and passes out purified through the pulmonary veins towards the left side of the heart. Both lungs are enclosed in a delicate membrane called the *pleura*, which forms a kind of double sac that on one side lines the ribs and part of the breast bone, and on the other side surrounds the lung. Pleurisy arises from inflammation of this membrane. The lungs are situated one on each side of the heart, the upper part of each fits into the upper corner of the chest, about an inch above the collar-bone, while the base of each rests upon the diaphragm.

The right lung is shorter and broader than the left, which extends downwards further by the breadth of a rib. Each lung exhibits a broad division into an upper and lower portion or *lobe*, the division being marked by a deep cleft which runs downwards obliquely to the front of the organ; and in the case of the right lung there is a further division at right angles to the main cleft. Thus the left lung has two, whilst the right lung has three lobes. These again are divided into *lobules* which measure from one-fourth to one-half inch in diameter, and consists of air-cells, blood-vessels, nerves, lymphatic vessels, and the tissue by which the lobules themselves are bound together. The elasticity of the lungs by which they expand and expel the air is due to the contractile tissues found in the bronchial tubes and air-cells, this elasticity being aided by a delicate, elastic, surface tissue. The lungs are popularly termed "lights," because they are the lightest organs in the body, and float when placed in water, except when they are diseased.

Lutherans. A designation originally applied by their adversaries to the Reformers of the Sixteenth Century, and afterward appropriated among Protestants themselves to those who took part with Martin Luther against the Swiss Reformers, particularly in the controversies regarding the Lord's Supper. It is so employed to this day as the designation of one of the two great sections into which the Protestant Church was divided, the other being known as the Reformed Church. Lutheranism is the prevailing form of Protestantism in Germany; it is the national religion of Denmark, Sweden, and Norway; and there are Lutheran churches in the Baltic provinces of Russia, in Holland, France, Poland, and the United States. The growth in Continental Europe has been most marked. Among the Lutheran symbolical books the "Augsburg Confession," Luther's "Shorter Catechism," and the "Formula Concordiæ" ("Formula of Harmony"), hold the principal place. It is often alleged that the chief difference between the Lutherans and the Reformed is that the Lutherans hold to the doctrine of consubstantiation and reject transubstantiation. This, however, is repudiated by the Church's theologians without a dissenting voice. In the "Wittenberg Concord," prepared in 1536, and signed by Luther and the other leaders in the Church, it is said: "We deny the doctrine of transubstantiation, as we do also deny that the body and blood of Christ are locally included in the bread." The "Formula of Concord" says: "The presence of Christ in the supper is not of a physical nature, nor earthly, nor Capernaitish, and yet it is most true." In its constitution the Lutheran Church is generally unepiscopal without being properly Presbyterian. It is consistorial, with the civil authorities so far in place of bishops. In Denmark, Sweden, and Norway there are bishops, and in Sweden an archbishop (of Upsala), but their powers are very limited. In the United States wider extremes in the mode of worship have existed than in other parts of the world. There are four general bodies of Lutherans in the United States, besides fifteen independent synods, with a total of 8,040

ministers, 13,169 churches, and over 2,000,000 members.

Meth'odist. A branch of the Christian Church which originated in England during the Eighteenth Century. In 1729 John Wesley, with his brother Charles and a few other associates at Oxford, organized a meeting for their mutual moral improvement. They were soon joined by others, among them Mr. Hervey and George Whitefield, till at the end of six years they numbered fourteen or fifteen. The term "Methodists" was applied to them on account of their methodical mode of life and work. After his return from Georgia, in 1738, Wesley began to preach with great fervor. In the early part of 1739, Whitefield set the first example of open-air preaching at Kingswood, near Bristol, addressing an immense crowd of colliers. John Wesley, as well as his brother Charles, followed this example. Being denied admission to the churches by the clergy, they preached in private houses, barns, market places, and the open fields. The converts made by their preaching were either despised or utterly neglected by the Church, and hence Wesley, at their own request, formed them into societies for mutual edification and improvement, called "the United Societies." For their government a few simple rules were proposed by the Wesleys, which, with slight exceptions, are still recognized as the "General Rules" by all branches of the Methodist Church. Methodism strove at first only to restore a purified and intensified spiritual life. The substance of its doctrines is to be found in the writings of John Wesley, John Fletcher, Richard Watson, and others, and in the generally uniform teachings of the Methodist pulpit. The articles which Wesley prepared for the Methodist Church in America were taken substantially from the thirty-nine articles of the Church of England. Methodism holds that the salvation or non-salvation of each human being depends solely on his own free action in respect to the enlightening, renewing, and sanctifying inworkings of the Holy Spirit; hence it is Arminian in distinction from Calvinistic. It emphasizes the doctrine of assurance, *i. e.*, that the Holy Spirit bears witness of pardon and acceptance to the justified sinner. It also makes prominent the doctrine of Christian perfection, or perfect love. Methodist polity, like the Methodist confession, is to be understood only by regarding Methodism as a revival and missionary movement. Wesley thought as little of establishing a separate Church polity as of publishing a separate theology. But the neglect and frequent ridicule of the converts by the clergy of the establishment caused many to relapse; and this led him to consent reluctantly to the appointment of lay preachers. The first assembly that took the name of "conference" was held in the Foundery, London, June 25, 1744, and thereafter annually. Secession was discouraged, and they distinctly denied that they were dissenters. Previous to the conference of 1744, the greater portion of England had been divided into "circuits," and provision had been made to supply these with preachers for such time as the need of the work seemed to indicate. Wesley's views of ecclesiastical authority and polity underwent radical

changes, and led him, at the recognition of the independence of the American colonies, to provide a separate Church organization for the Methodists of America, and at his death to perpetuate his work by constituting the "United Societies" a distinct ecclesiastical body in regular legal form. Methodism holds to no inspired or divinely imposed Church polity. In Great Britain it recognizes but one order of clergy, while in America it has provided two.

The Methodist Episcopal Church is the original and largest body of Methodists in the United States. Wesley and Whitefield, during their visits to America, had organized no Methodist societies. In 1766, a class was formed by Philip Embury, greatly assisted by Captain Thomas Webb, an officer of the British Army stationed in New York, one of Wesley's local preachers. Webb preached and formed classes during 1768, on Long Island, and in New Jersey, Delaware, and Philadelphia. In the same year the first chapel was dedicated in John Street, New York; and in 1770, the first Methodist Church in Philadelphia was erected. In 1769, Boardman and Pilmore, the first missionaries sent to America by Wesley, arrived in New York. In 1771, Francis Asbury arrived, and the next year he was appointed by Mr. Wesley superintendent of the American societies. He was soon superseded by Thomas Rankin. The first American conference was held in 1773, and consisted of ten preachers, all of European birth. The societies then aggregated 1,160 members. At the beginning of the revolutionary struggle nearly all the preachers of English descent, except Asbury, returned home. During the war the English Church in America was nearly extinguished, and the dependence of the Methodists on the English clergy for the sacraments almost entirely failed them. Wesley in 1780, applied to the Bishop of London to ordain at least one presbyter to administer the sacraments among the American Methodists, but was refused. Therefore, in 1784, Wesley, assisted by the Rev. Thomas Creighton and Richard Whatcoat, presbyters, ordained the Rev. Thomas Coke, LL. D., as superintendent of the American Methodist Churches, with the instruction that Asbury should be assistant superintendent. On Coke's arrival a general conference of sixty ministers met in Baltimore, December 24, 1784, adopted the episcopal form of government, made the episcopal office elective, and held the superintendents amenable to the body of ministers and preachers. The "Sunday Service" and twenty-five "Articles of Religion" were adopted. In 1800, Richard Whatcoat was elected bishop, and in 1808, William McKendree. In 1808, the plan of a delegated general conference was adopted. This body, composed of ninety members, held its first session in 1812. The doctrines of the Methodist Episcopal Church are expressed in the twenty-five "Articles of Religion," which, with the exception of the twenty-third, which recognizes the civil authority of the United States, were prepared by Mr. Wesley from the thirty-nine articles of the Church of England.

There are five judicatory bodies, termed respectively the "general conference," the "judicial conference," the "annual conference," the

"district conference," and the "quarterly conference." Prior to 1872, the general conference was composed exclusively of preachers. It subsequently consisted of two laymen for each annual conference and one minister for every forty-five members. In 1900, the representation was made equal. The general conference meets quadrennially, and is presided over by the bishops. It is the sole legislative body of the Church. It elects bishops, missionary and educational secretaries, book agents, and editors of its periodicals, and is also the court of final appeal. The annual conference consists of traveling preachers. A bishop is the presiding officer, or in his absence the conference may appoint its president. Its powers are simply administrative. It holds its members responsible, passing their character under examination each year. The district conference is composed of the presiding elder of the district, pastors, local preachers, exhorters, and one steward and Sunday school superintendent from each pastoral charge.

Mohammedanism, the name commonly given in Christian countries to the creed established by Mohammed. His followers call their creed *Islam*. Their common formula of faith is, "There is no God but Allah, and Mohammed is his prophet." The dogmatic or theoretical part of Mohammedanism embraces the following points: (1) Belief in God, who is without beginning or end, the sole Creator and Lord of the universe, having absolute power, knowledge, glory, and perfection. (2) Belief in his angels, who are impeccable beings, created of light. (3) Belief in good and evil Jinn (genii), who are created of smokeless fire, and are subject to death. (4) Belief in the Holy Scriptures, which are his uncreated word revealed to the prophets. Of these there now exist, but in a greatly corrupted form, the Pentateuch, the Psalms, and the Gospels; and in an uncorrupted and incorruptible state the Koran, which abrogates and surpasses all preceding revelations. (5) Belief in God's prophets and apostles, the most distinguished of whom are Adam, Noah, Abraham, Moses, Jesus, and Mohammed. Mohammed is the greatest of them all, the last of the prophets and the most excellent of the creatures of God. (6) Belief in a general resurrection and final judgment, and in future rewards and punishments, chiefly of a physical nature. (7) The belief, even to the extent of fatalism, of God's absolute foreknowledge and predestination of all events both good and evil. The practical part of Mohammedanism inculcates certain observances or duties, of which four are most important. The first is prayer, including preparatory purifications. Prayer must be engaged in at five stated periods each day. On each of these occasions the Moslem has to offer up certain prayers held to be ordained by God, and others ordained by his prophet. During prayer it is necessary that the face of the worshiper be turned towards the kebla, that is, in the direction of Mecca. Prayers may be said in any clean place, but on Friday they must be said in the mosque. Second in importance to prayer stands the duty of giving alms. Next comes the duty of fasting. The Moslem must abstain from eating and drinking, and from every indulgence of the senses,

every day during the month of Ramadhan, from the first appearance of daybreak until sunset, unless physically incapacitated. The fourth paramount religious duty of the Moslem is the performance at least once in his life, if possible, of the pilgrimage to Mecca, after which he becomes a Hadji. Circumcision is general among Mohammedans, but is not absolutely obligatory. The distinctions of clean and unclean meats are nearly the same as in the Mosaic code. Wine and all intoxicating liquors are strictly forbidden. Music, games of chance, and usury are condemned. Images and pictures of living creatures are contrary to law. Charity, probity in all transactions, veracity (except in a few cases), and modesty, are indispensable virtues. After Mohammed's death Abu Bekr, his father-in-law, became his successor, but disputes immediately arose, a party holding that Ali, the son-in-law of Mohammed, was by right entitled to be his immediate successor. This led to the division of the Mohammedans into the two sects known as Shiites and Sunnites. The former, the believers in the right of Ali to be considered the first successor, constitute at present the majority of the Mussulmans of Persia and India; the latter, considered as the orthodox Mohammedans, are dominant in the Ottoman Empire, Arabia, Turkestan, and Africa. The total Mohammedan population of the world is estimated at fully 215,000,000.

Moon. The orb which revolves round the earth; a secondary planet or satellite of the earth, whose borrowed light is reflected to the earth and serves to dispel the darkness of night. Its mean distance from the earth is about 237,000 miles; its diameter is 2,160 miles and its magnitude about one-forty-ninth of that of the earth. It completes its revolution round the earth, in a mean or average period of twenty-seven days, seven hours, forty-three minutes, eleven and one-half seconds, which constitutes the sidereal month. The satellite of any planet.

Moravians. A religious sect, called at first Bohemians, and constituting a branch of the Hussites, who, when the Calixtines came to terms with the council of Basel, in 1433, refused to subscribe the articles of agreement, and constituted themselves into a distinct body. Their tenets were evangelical. In 1522, they made advances to Luther, who partially recognized them, but they ultimately adopted Calvinistic views as to the Lord's Supper. Driven by persecution, they scattered abroad, and for a time their chief settlement was at Fulnek in Moravia, whence they were called Moravian Brethren, or Moravians. On May 26, 1700, was born Nicolaus Ludwig, Count von Zinzendorf, son of the chamberlain and state minister of Augustus II., Elector of Saxony and King of Poland. Having met with a Moravian refugee, who told him of the persecutions to which his sect was exposed in Austria, Count Zinzendorf offered him and his coreligionists an asylum on his estate. The man, whose name was David, accepted the offer, and in 1722, settled with three other men, at a place called by Zinzendorf "Herrnhut" (the Lord's guard). Under his fostering care, the sect greatly increased in strength. Till his death, on May 9, 1760, he

traveled, largely spreading their views. Though they have never been numerous, yet in the latter part of the Eighteenth Century and the beginning of the Nineteenth they acquired great reputation from having a larger proportion of their membership engaged in foreign missions than any Christian denomination since apostolic times. Statistics of the denomination in the United States show about 129 ministers, 119 churches, and 17,200 members.

Mormons, a sect founded in 1830, by Joseph Smith, a native of the United States. The distinguishing peculiarities of the sect are—the belief in a continual divine revelation through the inspired medium of the prophet at the head of their Church, the practice of polygamy, and a complete hierarchical organization. The supreme power, spiritual and temporal, rests with the president or prophet (elected by the whole body of the Church), who alone works miracles and receives revelations. The Mormons accept both the Bible and the Book of Mormon as divine revelations, but hold them equally subject to the explanation and correction of the prophet. The latter mentioned book (in large part a kind of historical romance written by one Solomon Spaulding, in 1812), pretends to be a history of America from the first settlement of the continent after the destruction of the tower of Babel up to the end of the Fourth Century of our era, at which time flourished the legendary prophet Mormon, its reputed author. It was said to have been written on gold plates, and concealed until its hiding place was revealed to Smith by an angel. The name given to it was evidently owing to the important part which Spaulding had assigned to Mormon and his son Moroni in his novel; but Smith and his coadjutors, instead of confining themselves to the original manuscript, had clumsily engrafted upon it a number of maxims, prophecies, etc., evidently garbled from the sacred volume, and interpolated in such a manner as to involve anachronisms and contradictions. The doctrine of the Mormons is a mixture of materialism and millenarianism, and their most distinctive feature, polygamy, which, though originally condemned in the Book of Mormon, was introduced under a theory of “spiritual wives,” and a mysterious system of unrestricted marriage called “sealing.” The Mormons first appeared at Manchester, New York, whence they were compelled by the persevering hostility of their neighbors to flee, first to Kirtland in Ohio (1831), then to Nauvoo, the “City of Beauty,” in Illinois (1838), and finally to the Salt Lake in Utah (1848). In 1844, the founder, Joseph Smith, was shot by a mob in Carthage prison, where his lawless behavior had brought him. The advance made by Mormonism seems to have been due far more to the abilities of Brigham Young, the successor of Smith, than to the founder himself, who was little better than a dissipated and immoral scamp. Under Young’s direction large tracts of land at Salt Lake were brought under cultivation, an emigration fund was established, and a skillful system of propagandism set on foot, by which large numbers of converts were brought from Europe, especially from Great Britain. A State was organized under the name of Deseret.

Congress refused to recognize it, but erected Utah into a Territory, and Brigham Young was appointed governor of it. He was soon removed by the United States authorities, but after a time the Mormons were left pretty much to themselves. In 1870, Congress passed a bill to compel them to renounce polygamy, or quit the United States. A prosecution was instituted against Brigham Young, who was sentenced to fine and imprisonment. In 1877, Young died and was succeeded by John Taylor, an Englishman, during whose presidency the United States Government has passed several bills for the abolition of polygamy. The Reorganized Church of Jesus Christ of Latter-Day Saints, sometimes called non-polygamous Mormons, claim to be true to the doctrines proclaimed by Joseph Smith, insisting that Brigham Young’s followers were led by him from the truth, and deny that Young’s revelation in 1852 concerning polygamy was genuine.

Mosque (mosk), a Mohammedan temple or house of worship. The first mosque, square and capacious, erected by Mohammed at Medina, partly with his own hands, became in its plan the model for all others, which was, however, subsequently modified by the addition of the cupola and minaret. This mosque, that at Mecca, and the mosque of Omar at Jerusalem are considered peculiarly holy by the Moslems. The *jumma musjid* or great mosque at Delhi, built by Shah Jehan in 1631–37, is generally considered the noblest building ever erected for Mohammedan worship. The chief officer of a mosque is the Nazir, under whom are two Imáms, a kind of religious official, in no way to be compared with what we understand by a clergyman of a creed, but who performs a certain number of religious rites as long as the Nazir allows him to do so, and who, being very badly remunerated, generally has to find some other occupation besides. With many of the larger mosques there are schools, academies, and hospitals connected, and public kitchens, in which food is prepared for the poor.

Music. The origin of music is involved in obscurity, and it has been said that speech and song are coeval. From several passages in the Old Testament it is evident that music was made use of at an early period, but probably without any regard to rhythm. The Greeks, who inherited the art from the Egyptians, were the first to reduce music to a system; but it was not until the introduction of Christianity into Western Europe that marked signs of improvement took place, and not until the Fifteenth Century that any rapid progress was made. The great distinction between the music of the ancients and that of modern times lies in the peculiarity of the scales in which it is written. The scales or modes of the ancients varied from four to fourteen, and were distinguished by the position of the semitones, as in our modern major and minor scales. Many of our national melodies are written in these ancient scales, their peculiar character being derived from the position of the semitones. *Melody* was probably the sole characteristic of the music of the ancients, and it was not until the Seventh Century that composition in harmony, either vocal or

instrumental, came into use. In the Eleventh Century we also find an innovation by the introduction of notes of unequal length, giving variety to melody; and the question of time and rhythm came into consideration. It is supposed that the art of composition was first cultivated in Flanders. The earliest example is of the Tenth Century, and consists simply of a succession, of fourths and fifths. *Harmony* probably belongs exclusively to the music of the most civilized nations of modern times. In the Sixteenth and Seventeenth Centuries we have Palestrina and his contemporaries, Boyd, Gibbons, etc., who enriched the art by their compositions, simplifying the harmonies, and giving more flowing and natural melodies. In the Seventeenth and Eighteenth Centuries we have Handel, Bach, Haydn, Mozart; and in the Eighteenth and Nineteenth Centuries, perfection of the art has almost been attained in Beethoven, Spohr, Weber, Cherubini, Mendelssohn, Chopin, and Schumann, etc. The science of music is treated in works on acoustics, and has reference to the nature of musical sounds and their relation to each other. Under this branch of the science are classed musical sounds, the vibrations required to produce them, pitch, harmonies, etc. The theory of music has reference to the symbols and the language in which music is expressed, and to the rules generally laid down in order to produce correct and effective musical composition. The symbols used in music are scales, clefs, forms of notes and equivalent rests, tune divisions, and others, respecting which information may be obtained from any catechism of music. These symbols and signs were not completed in their present form until very recent times. Having obtained the necessary materials, the laws of composition may be studied, the simplest form being that of melody, produced by a single voice or instrument. The higher branches of the art are harmony, composition, modulation, and counterpoint, the rules for which are laid down in text-books on the subject.

Ozone. A substance discovered by Schönbein, occasionally existing in the atmosphere, and having a peculiar odor resembling that produced when repeated electric sparks, or electric discharges, from a point are transmitted through the air. It is supposed to be an allotropic form of oxygen. It is also formed in certain cases of the slow action of air upon phosphorus. The ozone existing from time to time in the atmosphere has been supposed to have an influence on the health of the community, and observations with regard to it are frequently made by means of an apparatus called an ozonometer, the essential parts of which consist of strips of paper steeped in a mixture of starch and iodide of potassium. Ozone turns the paper brown, the tint varying with the quantity of ozone.

Paganism. The religion of the heathen world, in which the deity is represented under various forms, and by all kinds of images or idols; it is therefore called idolatry or image-worship. The theology of the pagans was of three sorts — fabulous, natural, and political or civil. The *fabulous* treats of the genealogy, worship, and attributes of their deities, who were for the most part the offspring of the imagination

of poets, painters, and statuary. The *natural* theology of the pagans was studied and taught by the philosophers, who rejected the multiplicity of gods introduced by the poets, and brought their ideas to a more rational form. The *political* or civil theology of the pagans was instituted by legislators, statesmen, and politicians, to keep the people in subjection to the civil power. This chiefly related to their temples, altars, sacrifices, and rites of worship. The word *pagan* was originally applied to the inhabitants of the rural districts, who, on the first propagation of the Christian religion, adhered to the worship of false gods, or who refused to receive Christianity after it had been adopted by the inhabitants of the cities. In the Middle Ages, this name was given to all who were not Jews or Christians, they only being considered to belong to a true religion; but in more modern times, Mohammedans, who worship the one supreme God of the Jews and Christians, are not called *pagans*.

Pagoda. A Hindoo place of worship, containing an idol. It consists of three portions: an apartment surmounted by a dome, resting on columns, and accessible to all; a chamber into which only Brahmins are allowed to enter; and, lastly, a cell containing the statue of the deity, closed by massive gates. The most remarkable pagodas are those of Benares, Siam, Pegu, and particularly that of Juggernaut, in Orissa.

Parsees. The name given in India to the fire-worshipping followers of Zoroaster, chiefly settled in Bombay, Surat, etc., where they are amongst the most successful merchants. They have a great reverence for fire in all its forms, since they find in it the symbol of the good deity Ahurâ-Mazda (Ormuzd). To this divinity they have dedicated "fire-temples," on whose altar the sacred flame is kept continually burning. Benevolence is the chief practical precept of their religion, and their practice of this finds its evidence in their many charitable institutions. One of the most curious of their customs is in the disposal of their dead. For this they erect what are called "towers of silence," built of stone, about twenty-five feet high, and with a small door to admit the corpse. Inside is a large pit with a raised circular platform round it on which the body is exposed that it may be denuded of flesh by vultures, after which the bones drop through an iron grating into the pit below.

Perfectionists, or Bible Communists, popularly named Free-lovers, an American sect founded in 1838 by John Humphrey Noyes. Noyes was employed as a law-clerk at Putney, in Vermont, when the fierce religious revival of 1830 spread over the New England States, but he abandoned law for religion, and took upon himself the restoration of the primitive Christian ideal. His distinctive doctrines were: (1) reconciliation to God and salvation from sin — purely matters of faith; (2) recognition of the brotherhood and the equality of man and woman; and (3) community of labor and its fruits. In 1838 he succeeded in organizing a society giving expression to his views at Putney. Besides himself this included his wife, his mother, and his sister and brother, who were joined by several other families. All property

was thrown into a common stock; all debts, all duties fell upon the society, which ate in one room, slept under one roof, and lived upon one common store. All prayer and religious service were stopped, Sunday was unobserved, family ties were broken up, and a complex marriage system was established, by which each man became the husband and brother of every woman; every woman the wife and sister of every man. They held that true believers are free to follow the indications of the Holy Spirit in all things, nothing being good or bad in itself. Consequently, they rejected all laws and rules of conduct, except those which each believer formulated for himself; but to prevent the inconveniences arising from an ignorant exercise of individual liberty, they introduced the "principle of sympathy," or free public opinion, which, in fact, constituted the supreme government of the sect.

Presbyterian Church. A name applied to those Christian denominations which hold that there is no order in the Church as established by Christ and His apostles superior to that of presbyters, and who vest Church government in presbyteries, constituted of ministers and elders, possessed of equal powers, thus without superiority among themselves. Presbyterianism does not recognize the term bishop as the superior of the presbytery, because these two names or titles in the New Testament, are used interchangeably of the same persons. Presbyterians hold that the authority of their ministers is derived from the Holy Spirit, which is symbolized by the imposition of the hands of presbytery collectively. They affirm that all Christian ministers, being ambassadors of Christ, are equal by their commission. The congregation elects its own minister and elders, and also its deacons and trustees—the former of the last two, takes charge of the charities of the Church, and the latter of its temporal or financial affairs. The session, consisting of the minister and elders, has the spiritual oversight of the church members. The Presbytery is constituted by ministers and elders in equal numbers. A congregation for the time without a pastor can be represented in the presbytery by an elder. An appeal may be made to the presbytery from congregations or sessions. A synod consists of a number of presbyteries within defined boundaries. The general assembly is the highest court of the Church, and consists of representatives from all the presbyteries, each minister is accompanied by an elder from the same presbytery. The first Presbyterian Church in modern times was founded in Geneva by John Calvin, about 1541; and the constitution and doctrines were thence introduced, with some modifications, into Scotland by John Knox, about 1560, though the Presbyterian was not legally recognized as the national form of Church government till 1592. The first Presbyterians in America were emigrants from the British Isles, and the first Presbyterian Church in America was founded in the colony of Massachusetts in 1629. It was the outgrowth of a Presbyterian congregation that landed there in 1625. This movement was projected by Presbyterian leaders in the south of England and also in London. It was designed to be a colonization on

a higher principle than the desire for gain. The Church now has five theological seminaries. A revision of the confession was commenced in 1891, and is now in progress. It is also proposed to formulate a creed which shall express the doctrine of all the branches of the Church. There are several branches which virtually hold the polity of the Presbyterian Church in the United States, each having its own theological seminaries and colleges, such as the Presbyterian churches northern and southern, the Cumberland, Reformed, the United Presbyterian, the Reformed Dutch and German, etc. The Presbyterian Church in Canada is strong and prosperous, with six theological colleges. Recent statistics show the total number of Presbyterians in Canada to be about 850,000. In the Australasia colonies, Presbyterianism is also vigorous. In the Cape Colony and minor colonies, Presbyterianism is also represented.

Reformed Church. In general, comprehends those Churches which were formed at the Reformation; but the term is specifically applied to those Protestant Churches which did not embrace the doctrines and discipline of Luther. The title was first assumed by the French Protestants, but afterwards became the common denomination of all the Calvinistic churches on the European continent. The Reformed Church of America is a body known up to 1867 as the Reformed Protestant Dutch Church, being founded by settlers from Holland and holding Calvinistic doctrines. The first minister was the Rev. George Michael Weiss, who emigrated with about 400 people of the Palatinate in 1727. These and most of the immigrants who followed settled in Pennsylvania, east of the Susquehanna. In 1746, the Rev. Michael Schlatter was commissioned by the synods of North and South Holland to visit their German missions in America, and to regulate their ecclesiastical relations. He assembled in Philadelphia the first synod (or, as it was then called, *coetus*) of the German Reformed Church, September 29, 1747. The German Reformed *coetus* continued under the jurisdiction of the Church of Holland till 1793, when an independent synod was formed. It increased rapidly in membership and congregations. The spread of the English language led to a closer connection with other Protestant Churches of the United States; and many ministers and congregations showed a tendency to drop certain customs of the Church, as confirmation and church holidays. The first triennial general synod, with jurisdiction over the whole Church, met in Pittsburgh in November, 1863. The general synod of 1869, resolved to drop the word German from the name of the Church. The Heidelberg catechism is the only standard of doctrine. As this book was intended to harmonize the Melancthonian and Calvinistic tendencies, it has been construed by theologians of these two schools in different ways. In the German Reformed Church the Melancthonian element has been predominant, so that many representative theologians have incurred the charge of Romanizing tendencies. The worship of the Church is liturgical; its government is presbyterian.

*These statistics necessarily change with the growth of the denominations. Their value is chiefly comparative.

Respiration. A function proper to animals, the object of which is, to place the materials of the blood — the mixture of the venous blood with lymph and chyle — in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs*. In man, the respiration consists of mechanical and chemical phenomena. The mechanical are *inspiration* and *expiration*. The evident chemical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapor. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about thirty-five per minute in the first year of life; twenty-five during the second; twenty at puberty; and eighteen in the adult age — during which time he inhales about eighteen pints of air. The air drawn in and expelled by the lungs in respiration is called *breath*.

Salvation Army, The. The Salvation Army is a missionary organization set on foot in England by William Booth, who was called the "General" of the army. The plan of operation is for a company to march about cities, towns, and villages, singing popular sacred songs and speaking between whiles for about five minutes. The army has also a large number of religious periodicals and small books. Mr. Booth was a minister of the Methodist New Connexion, which he left in 1861, to begin "revivalistic services" in a tent in Whitechapel. In 1865, his little band of followers called themselves "The East London Christian Revival Society," afterwards changed to "The Christian Mission." In 1869, the Mission made expeditions to provincial towns. Lastly in 1873, the name was changed to "The Salvation Army." Its literary organ, called "The Christian Mission," first appeared monthly in 1874. In 1879, it was called "The Salvationist," and in the same year its title was changed into "The War Cry." Its flag now flies in fifty-one countries or colonies, where, under the charge of 20,000 officers and employees, with 46,000 local officers, and about 50,000 musicians. The army has sixty-three weekly newspapers and magazines, with a total weekly circulation of 1,300,000, and published in twenty-four languages.

Sciences. The name for such portions of human knowledge as have been more or less generalized, systematized, and verified. The term "Philosophy" is to a certain extent, but not altogether, coincident with science, being applied to the early efforts and strainings after the explanation of the universe, that preceded exact science in any department. Both names denote the pursuit of knowledge as knowledge, or for intellectual satisfaction, in contrast to the search that is limited to immediate practice or utility.

The sciences have been variously classified, and the principles of their classification have been a subject of discussion. We shall here describe the mode of classifying them in accordance with present usage, and with the principles

most generally agreed upon. It is convenient to prepare the way by distinguishing between Theoretical Sciences, which are the sciences properly so called, and Practical Science. A Theoretical Science embraces a distinct department of nature, and is so arranged as to give, in the most compact form, the entire body of ascertained (scientific) knowledge in that department: such are mathematics, chemistry, physiology, zoölogy. A practical science is the application of scientifically obtained facts and laws in one or more departments to some practical end, which end rules the selection and arrangement of the whole; as, for example, navigation, engineering, mining, medicine. Navigation selects from the theoretical sciences — mathematics, astronomy, optics, meteorology, etc.— whatever is available for guiding a ship on the seas, and converts the knowledge into rules or prescriptions for that purpose. The arts that can thus draw upon the exact sciences are by so much the more certain in their operations; they are the scientific arts.

Another distinction must be made before laying down the systematic order of the theoretical sciences. A certain number of these sciences have for their subject matter each a separate department of natural forces or powers; thus, biology deals with the department of organized beings, psychology with mind. Others deal with the application of powers elsewhere recognized to some region of concrete facts or phenomena. Thus, geology does not discuss any natural powers not found in other sciences, but seeks to apply the laws of physics, chemistry, and biology to account for the appearances of the earth's crust. The sciences that embrace peculiar natural powers are called abstract, general, or fundamental sciences; those that apply the powers treated of under these to regions of concrete phenomena are called concrete, derived, or applied sciences.

The abstract or theoretical sciences, as most commonly recognized, are these six: mathematics, physics, chemistry, biology (vegetable and animal physiology), psychology (mind), sociology (society). The concrete sciences are the natural history group — meteorology, mineralogy, botany, zoölogy, geology, also geography, and we might, with some explanations, add astronomy. The abstract or fundamental sciences have a definite sequence, determining the proper order for the learner, and also the order of their arriving at perfection. We proceed from the simple to the complex, from the independent to the dependent. Thus, mathematics relates to *quantity*, the most pervading, simple, fundamental, and independent attribute of the universe. The consideration of this attribute has therefore a natural priority; its laws underlie all other laws. As mathematics is at present understood, it has an abstract department, which treats of quantity in its most general form, or as applied to nothing in particular — including arithmetic, algebra, and the calculus — and a concrete or applied department — viz: *geometry*, or quantity in space or extension. It has been suggested that general mechanics, or the estimation of quantity in *force*, should be considered a second concrete

department. But usually mechanics ranks with the next fundamental science in order, called physics.

Natural philosophy has long been considered the name of a distinct department of science: the designation physics is now more common. This science succeeds mathematics, and precedes chemistry. Of all the fundamental sciences, it has the least unity, being an aggregate of subjects with more or less connection. Mechanics, hydrostatics, hydraulics, pneumatics, acoustics, astronomy, are all closely related; they represent the phenomenon of movement in *mass*, as applied to all the three states of matter, solid, liquid, and gas. The remaining subjects — heat, light, and electricity — together with the attractions and repulsions that determine cohesion, crystallization, etc., are described as relating to movement in the *molecule*. We have thus molar physics and molecular physics; and the tendency is now to treat the two separately.

Chemistry lies between physics and biology, reposing upon the one and supporting the other. It assumes all the physical laws, both molar and molecular, as known, and proceeds to consider the special phenomenon of the composition and decomposition of bodies considered as taking place in definite proportions, and leading to change of properties. The composition of a cup of tea from water, sugar, milk, and infusion of tea-leaf, is physical; the composition of marble from oxygen, carbon, and calcium, is chemical. In the one case, the properties of the separate ingredients are still discernible; in the other, these are merged and untraceable.

Biology, or the science of living organization, involves mathematical, physical, and chemical laws, in company with certain others, called vital. It is most usually expounded under the designations vegetable and animal physiology; and in the concrete departments, botany, zoölogy, and anthropology.

Psychology, or the science of mind, makes a wide transition, the widest that can be taken within the whole circle of the sciences, from the so-called material world, to the world of feeling, volition, and intellect. The main source of our knowledge of mind is self-consciousness; and it is only from the intimate connection of mind with a living organism, that the subject is a proper sequel to biology. Not until lately has any insight into mind been obtained through the consideration of the physical organ — the brain; so that psychology might have been placed anywhere, but for another consideration that helps to determine the order of the sciences — viz: that the *discipline*, or method, of the simpler sciences is a preparation for the more abstruse. Mathematics and physics especially are an admirable training of the intellect for the studies connected with mind proper, although the laws of physics may not of themselves throw any direct light on the successions of thought and feeling.

These five sciences embrace all the fundamental laws of the world, and, if perfect, their application would suffice to account for the whole course of nature. To a person fully versed in them, no phenomenon of the explained universe can appear strange; the concrete sciences

and the practical sciences contain nothing fundamentally new. They constitute a liberal scientific education. It is not uncommon, however, to rank sociology, or the laws of man in society, as a sixth primary science following on psychology, of which it is a special development.

The practical sciences do not admit of any regular classification. They are as numerous as the separate ends of human life that can receive aid from science, or from knowledge scientifically constituted. Connected with mind and society, we have ethics, logic, rhetoric, grammar, philology, education, law, jurisprudence, politics, political economy, etc. In the manual and mechanical arts, there are navigation, practical mechanics, engineering, civil and military, mining and metallurgy, chemistry applied to dyeing, bleaching, etc.

The medical department contains medicine, surgery, midwifery, materia medica, medical jurisprudence. A science of living, or of the production of happiness by a skilled application of all existing resources, would be the crowning practical science.

Septuagint (*sěp'tu-a-jěnt*). A Greek version of the books of the Old Testament; so called because the translation is supposed to have been made by seventy-two Jews, who, for the sake of round numbers, are usually called the *seventy interpreters*. It is said to have been made at the request of Ptolemy Philadelphus, King of Egypt, about 280 years B. C. It is that out of which all the citations in the New Testament and the Old are taken. It was also the ordinary and canonical translation made use of by the Christian Church in the earliest ages; and is still retained in the Churches both of the East and West. According to the chronology of the Septuagint, there were fifteen hundred years more from the creation to Abraham than according to the present Hebrew copies of the Bible.

Shorthand. An art by which writing is abbreviated, so as to keep pace with speaking. Its great and general utility has been recognized in every age, and numberless systems have been devised to facilitate its acquirement. It was practiced by the ancients for its secrecy as well as for its brevity, and a work is extant on the art, which is ascribed to Tiro, the freedman of Cicero. The first English treatise on stenography, in which marks represent words, was published in 1588, by Timothy Bright, M. D., under the title, "Characterie: an Art of Short, Swift, and Secret Writing by Character." In 1837, appeared Pitman's "Phonography" — the first really popular system. Melville Bell, following in the path marked out by Pitman, founded his system on the sounds of the language. The first sketch appeared in 1849; in 1852, the first complete edition, under the title "Semi-Phonography." Shorthand is now largely practiced in both the United States and England, and has extended its benefits to many classes besides that of the professional reporter. This is due chiefly to the excellences of Pitman's system and to his activity in disseminating its principles. The existence of two styles of phonography, one adapted for letter writing and the other for reporting — the second, however, being

only an extension of the first, and not a new system in itself — has been the chief basis of the popularity of phonetic shorthand. Popular modifications of Pitman's system have been made in the United States by Graham, Burnz, and Munson.

Skeleton. A term which is popularly used to denote the system of hard parts forming the bony framework of the body. The skeleton of mammalia consists of an axial portion which comprises the skull, the vertebral column, the sternum and ribs, and an appendicular portion consisting of the limbs. The skull consists mainly of the cranium, which is the strong bony case or frame which encloses the brain, and affords support and protection to the organs of smell, taste, sight, and hearing. To the inferior surface of the cranium are suspended the mandible, or lower jaw, and also a group of skeletal structures termed the hyoidean apparatus, which supports the tongue, etc. The vertebral or spinal column consists of a series of bones called vertebræ, arranged in close connection with each other on the dorsal side of the neck and trunk. It generally extends posteriorly beyond the trunk to form the tail, and anteriorly it articulates with the skull. The number of distinct bones of which the vertebral column consists varies in different animals, the variation being mainly due to the development of the tail. The vertebræ differ in form in the different regions of the column, but they are nevertheless constructed on a common plan. The sternum consists of a series of bones placed longitudinally in the middle line of the ventral side of the thorax or chest, and connected on each side with the vertebral column by a series of long, narrow, and more or less flattened bones termed the ribs. The anterior limbs consist of the following bones: the humerus, or arm-bone; the radius and ulna, which together constitute the forearm; the carpal, or wrist bones; and the metacarpals and phalanges, or bones of the hand. The posterior limbs consist of the femur, or thigh bone; the tibia and fibula, or leg bones; the tarsal bones, forming the ankle; and the meta-tarsals and phalanges, constituting the bones of the foot.

Skin. The integument which invests and surrounds the exterior of the body. The skin of man consists of two fundamental layers, viz: the cuticle, or epidermis, and the cutis, dermis, or true skin. The cuticle, or epidermis, is a layer of epithelial cells; it differs in thickness in different parts of the body, is without blood-vessels and nerves, and is, therefore, quite devoid of sensibility. It may be divided into two groups of strata, a superficial and a deep stratum. The superficial one is what is usually termed the epidermis, in the more precise meaning of the word. The inner or deep layer is molded on to the true skin, and consists of softer, moister, and more rounded cells than the outer layer. It is sometimes called the Malpighian layer, or rete mucosum; and it is the seat of the coloring material or pigment of colored races, such as the negro. The cutis or dermis, or true skin, forms the more complex lower layer of the skin. It consists of densely-interwoven tissues, and is well supplied with

blood-vessels and nerves. This layer contains the sudoriparous or sweat-glands, which excrete the perspiration, and also the sebaceous glands, which secrete oily matter, and the function of which it is to keep the skin soft and flexible. The papillæ of the skin consist of small conical processes on the surface of the cutis. The central portion of each papilla contains a group of blood-vessels and a nerve, and on the more sensitive parts of the skin touch-corpuscles are also present. Hair, nails, etc., are developed from skin. The skin is the organ of the sense of touch; it protects the superficial parts of the body; is an organ of respiration, excretion, and absorption; and regulates the temperature of the body.

Smithsonian Institution. A scientific institute in Washington, organized by Act of Congress in 1846, to carry into effect the provisions of the will of James Smithson, the founder. Smithson was a natural son of the Duke of Northumberland; was educated at Oxford, and was, in 1790, elected a Fellow of the Royal Society. He died at Genoa in 1829, leaving his property (worth \$600,000) to his nephew, with the condition that if the latter died without issue the property was to go to the United States to found an establishment for the increase and diffusion of knowledge. In 1835, the nephew died childless, and in 1838, the sum of \$515,169 was paid to the treasury of the United States. In 1846, the interest on this sum (the principal itself must remain untouched) was applied to the erection of a suitable building, with apartments for the reception and arrangement of objects of natural history, including a geological and mineralogical cabinet, a chemical laboratory, a library, a gallery of art, and the necessary lecture-rooms. The building is one of the finest in Washington. A portion of the funds of the institution is devoted to scientific researches and the publication of works too expensive for private enterprise. Three series of publications are issued: "Contributions to Knowledge," "Miscellaneous Collections," and "Annual Reports." The institution contains the National Museum, which is, however, wholly maintained by the government. The institution is administered by regents, composed of the chief-justice of the United States, three members of the Senate, and three of the House of Representatives, with six other persons, not members of Congress. The president vice-president, and members of the cabinet for the time being have the position of governors or visitors of the institution, the president being *ex officio* at the head.

Stars, The, are mostly suns, but being, the nearest of them, at a distance from us more than 500,000 times our distance from the sun, are of a size we cannot estimate, but are believed to be 300 times larger than the earth; they are of unequal brightness, and are, according to this standard, classified as of the first, second, down to the sixteenth magnitude; those visible to the naked eye include stars from the first to the sixth magnitude, and number 3,000, while 20,000,000 are visible by the telescope; of these in the Milky Way alone there are 18,000,000; they are distinguished by their colors as well

as their brightness, being white, orange, red, green, and blue, according to their temperature and composition; they have from ancient date been grouped into constellations of the northern and the southern hemispheres and of the zodiac, the stars in each of which being noted by the Greek letters, according to their brightness.

Stomach. In comparative anatomy, a membranous sac, formed by a dilation of the alimentary canal, in which food is received and subjected to the processes of digestion. The human stomach is an elongated, curved pouch, from ten to twelve inches long, and four or five inches in diameter at its widest part, lying almost immediately below the diaphragm, nearly transversely across the upper and left portion of the abdominal cavity, and having the form of a bagpipe. It is very dilatable and contractile, and its average capacity is about five pints. The food enters the stomach through the œsophagus by the cardia or cardiac orifice, and after having been acted on by the gastric juice, is passed on in a semi-fluid or pulpy state through the pylorus into the small intestines. Owing to the recent improvements in electrical apparatus, the physiology and pathology of the human stomach in life is becoming much better known. Medical electricians have recently devised a plan by which the interior of the human stomach may be illuminated for examination. The patient is laid on the operating table and a slender tube, carrying a glass bead on its end, is introduced into the stomach. A small light inside the bead is supplied by fine wires running out through the tube and connected to a small battery. The interior of the stomach is plainly lighted and all its parts are brought into view by a small movable mirror at the end of the tube.

Sun. The central orb of the solar system, that around which revolve the earth and the other planets. The sun appears to be a perfect sphere, with a diameter of 866,900 miles; its mean density is about one-fourth, taking that of the earth as one; its mean distance from the earth is taken as 93,000,000 miles. It rotates on its own axis; this axis of rotation being inclined to the ecliptic at an angle of $82^{\circ} 40'$; and its rotation period is variously estimated at from twenty-five to twenty-eight days. The mass of the sun is about 750 times that of all the other members of the solar system combined, and the center of gravity of the solar system lies somewhere in the sun, whatever may be the relative positions of the planets in their orbits. The dark spots on the sun discovered by Galileo have been shown to be hollows, and their depth has been estimated at from 3,000 to 10,000 miles. The spots are very changeable in their figure and dimensions, and vary in size from mere points to spaces of 50,000 miles or more in diameter. It is from observations of these spots that the sun's rotation on its axis has been calculated. The frequency of sun spots attains a maximum every ten and a half years, the number of spots falling off during the interval to a minimum, from which it recovers gradually to the next maximum. This periodicity has been thought to be intimately connected with the meteorological phenomena observed on the

earth, especially with the rainfall. Spots are called *maculae*, brighter portions of the sun are called *faculae*, and the lesser markings are called *mottlings*. The sun is now generally believed to be of gaseous constitution, covered with a sort of luminous shell of cloud formed by the precipitation of the vapors which are cooled by external radiation. This dazzling shell is termed the *photosphere*. The spots are supposed to be cavities in this cloud-layer, caused by the unequal velocities of neighboring portions of the solar atmosphere. Zöllner, who considers the body of the sun to be liquid, sees therein slags or scoriæ floating on a molten surface, and surrounded by clouds. It is estimated that the sun's radiation would melt a shell of ice covering its own surface to a depth of between thirty-nine and forty feet in one minute, but the temperature of the surface has not yet been ascertained. It is evident, however, that the temperature and radiation have remained constant for a long period. The photosphere is overlaid by an atmosphere which is shown by the spectroscope to contain nearly all the materials which enter into the composition of the sun. The region outside the photosphere in which these colored prominences are observed has been called the *chromosphere*, which has an average depth of from 3,000 to 8,000 miles. The incandescent hydrogen clouds stretch out beyond this to altitudes of 20,000 to 100,000 miles, and jets of chromospheric hydrogen have been observed to reach a height of 200,000 miles in twenty minutes, and disappear altogether within half an hour. Outside the chromosphere, extending very far out from the sun, is the *corona*, an aurora of light observed during total eclipses. The amount of light sent forth by the sun is not exactly measurable, but the amount of heat has been pretty accurately computed, and it is equivalent in mechanical effect to the action of 7,000 horse-power on every square foot of the solar surface, or to the combustion on every square foot of upwards of thirteen and one-half hundred pounds of coal per hour.

Theology is the science which treats of the existence of God, his attributes, and the Divine will regarding our actions, present condition, and ultimate destiny. In reference to the sources whence it is derived theology is distinguished into *natural* or *philosophical* theology, which relates to the knowledge of God from His works by the light of nature and reason; and *supernatural*, *positive*, or *revealed* theology, which sets forth and systematizes the doctrines of the Scriptures. With regard to the contents of theology it is classified into *theoretical* theology or *dogmatics*, and practical theology or ethics. As comprehending the whole extent of religious science, theology is divided into four principal classes, *historical*, *exegetical*, *systematic*, and *practical* theology. Historical theology treats of the history of Christian doctrines. Exegetical theology embraces the interpretation of the Scriptures and Biblical criticism. Systematic theology arranges methodically the great truths of religion. Practical theology consists of an exhibition, first, of precepts and directions; and, secondly, of the motives from which we should be expected to

comply with these. *Apologetic* and *polemic* theology belong to several of the above-mentioned four classes at once. The *Scholastic theology* attempted to clear and discuss all questions by the aid of human reason alone, laying aside the study of the Scriptures, and adopting instead the arts of the dialectician.

Theos'ophy, according to its etymology the science of divine things. But the name of *theosophists* has generally been applied to persons who in their inquiries respecting God have run into mysticism, as Jacob Böhme, Swedenborg, St. Martin, and others. At the present day the term is applied to the tenets of the Theosophical Society, founded in New York in 1875 by a Col. Olcott, the objects of which are: to form the nucleus of a universal brotherhood of humanity, to promote the study of Eastern literature and science, and chiefly to investigate unexplained laws of nature, and the physical powers of man, and generally the search after divine knowledge—divine applying to the divine nature of the abstract principle, not to the quality of a personal God. The theosophists assert that humanity is possessed of certain powers over nature, which the narrower study of nature from the merely materialistic standpoint has failed to develop.

Unitarian Church. A communion comprising all who maintain that God exists in one person only. The name Unitarian is applied specially to a small Christian sect whose distinguishing tenet is the unity as opposed to the trinity of the Godhead. In the more general sense the name of course includes the Jews and the Mohammedans. From the middle of the Second Century to the end of the Third Century there was a succession of eminent Christian teachers—Monarchians—who maintained, against the ecclesiastical doctrine of the Logos, the undivided unity of God. There are said to have been two classes of them—those who taught that Christ was God in such a sense that it was the Father who became man and those who held that Christ was in nature a mere man, but exalted above all other prophets by the superior measure of Divine wisdom with which he was endowed. The latter class was represented by Theodotus, Artemon, and especially Paul of Samosata. The grand theological struggle which followed in the Fourth Century between the Arians and the Athanasians may be regarded as a phase of the Unitarian controversy. Unitarians of all shades of opinion are agreed in rejecting the entire orthodox scheme—including the doctrines of the Trinity, the vicarious atonement, the deity of Christ, original sin, and everlasting punishment—as both unscriptural and irrational. They celebrate the Lord's Supper in their churches, not as a sacrament, but as a service commemorative of Christ's death, and expressive of spiritual communion with Him. They also adhere generally to the rite of infant baptism, though there are a few Unitarian Baptist churches.

United Brethren in Christ. A denomination of evangelical Christians, founded through the labors of Rev. William Otterbein, a minister of the German Reformed Church.

His meeting with Rev. Martin Boehm, a minister of the Mennonite Society, about 1766, marked the beginning of a wide-spread revival, in which he and Boehm were the recognized leaders. Preachers were licensed, the Church was to a certain extent brought under system, conferences were held in 1789 and 1791, but the religious movement did not take the form of a Church till 1800, in which year an important conference was held at Peter Kemp's in Frederick County, Maryland. At this time the name of the denomination was definitely fixed, and Otterbein and Boehm were chosen bishops. Thereafter conferences were held yearly. The Church is Arminian in doctrine, very aggressive in work, and has been characterized by a strong reform spirit, standing from the first opposed to slavery, intemperance, and connection with secret societies.

Universalists. A religious sect who maintain as a fundamental article of their belief that saving grace is given to all men, without reserve, and that its operation is *universal*—whence their denomination. Universalists, it may be observed, generally differ from the prevalent bodies of Christians in other important doctrines, though it is not because of such differences that they have received their name, nor is it necessary to merit the name that one should share these differences. Most of them agree with Unitarians—but there are eminent examples to the contrary—in rejecting the doctrine of the Trinity; they are also Pelagian in the matter of original sin, and reject the notion that the new birth is something supernatural. Universalism, as a mode of belief, is of very ancient origin; but it was in 1770, that the Rev. John Murray became a propagator of Universalist views, and some years later Universalism, as a sect, was founded in the United States by Hosea Ballou (commonly called "Father Ballou"), a learned divine and indefatigable preacher.

X-Rays. Invisible rays producing fluorescence upon striking certain substances and acting upon a photographic plate. Obtained by discharging a high-pressure electric current through a vacuum glass tube. They differ from cathode rays in not being deflected by a magnet. Their practical use in photographing the skeleton and interior organs of the human body is of great service in locating foreign bodies in surgical operations, and facilitating the setting of broken bones, etc.

Young Men's Christian Associations. Among the first of these was that founded in London, in 1844, by Mr. George Williams. Its object was the holding of religious meetings in business houses in the center of London. The movement extended, and became one not only for the religious but for the general culture and social well-being of young men engaged in business. In 1908, the young men's Christian Associations, all of which are self-governing while forming an organized union, were 7,771 in number. Of these, 1,952 associations, with 437,178 members, were in the United States and Canada. In the United States, in 1907, current expenses, \$6,000,000; value of property, over \$34,000,000.

NINTH BOOK

NATURAL HISTORY

DAVID STARR JORDAN — NATURALIST

NATURAL HISTORY

Alligator. A genus of saurian reptiles. They differ from the true crocodiles in having a shorter and flatter head, cavities or pits in the upper jaw, into which the long canine teeth of the under jaw fit, and feet much less webbed. Their habits are less perfectly aquatic. The largest grows to the length of seventeen or eighteen feet. The female lays her eggs in the sand, to be hatched by the heat of the sun. They are found only in tropical America. Among the fossils of the south of England, however, are remains of a true alligator.

Ant. An insect belonging to the same order as the bees and wasps. Like bees, the ants form communities, consisting of males, females, and neuters. The males and females are winged, and are produced in great numbers at a particular time of the year; they then quit the nest and pair, after which the males die, while the females, losing their wings, become the queens of fresh societies. The neuters are divided into two classes, workers and soldiers, the former doing all the necessary work, except defending the nest, which devolves upon the latter. Many singular habits and instincts of ants have been observed. Two of the most interesting are the instinct of making slaves, and that of milking, so to speak, the little plant-lice. As regards the former, it is found that certain ants capture the *pupæ* of other species of ants (*i. e.*, when they are in the quiescent or chrysalis stage), and bring them up as slaves.

Antelope. In Zoölogy, a genus of ruminating mammals, belonging to the hollow-horned family, and distinguished by the round, annulated form of their horns, which are unbranched, and by the grace and symmetry of their proportions. Externally, they very much resemble deer, from which, however, they are to be distinguished by various points of structure, such as the horns, which in the deer are solid and branched, and by the absence of front teeth in the upper jaw. Generally speaking, antelopes are gregarious, and unite in large flocks or herds. Africa may be considered the headquarters of the antelope. The species are numerous, and include the spring bok, hartbeest, gnu, eland, and gazelle, among others. There are two European antelopes, the chamois which inhabits the Alps, and the saiga from Eastern Russia.

Ape. A name somewhat loosely employed, in common language, as a synonym for monkey, but, in its more restricted sense, applicable only to the highest section of the order *Quadrumanæ*, or four-handed mammals; those which make a nearer approach, in anatomical structure, to the human species than do any other animals. The group of apes includes the gibbons, orangoutangs, chimpanzees, and gorillas. They are all devoid of tails and cheek-pouches; the arms are remarkable for their extreme length, and the hind limbs for their comparative shortness. On the ground these animals are awkward and

waddling; they tread rather on the outer edge of the sole than on the sole itself, which imparts to their hind-limbs a bowed appearance; while their long fore-limbs are employed somewhat after the manner of crutches, on the half-closed fists of which, planted firmly on the ground, they rest their bodies. The great length of their arms, on the other hand, gives these animals peculiar advantages in their native forests, and they climb to the topmost branches, or pass from tree to tree, with surprising facility. They do not repose, like ordinary monkeys, on their hams, but stretch themselves on their sides, like human beings. The apes in general appear to be more grave, and less petulant and mischievous, than the ordinary monkey.

Apple. The name applied to a tree belonging to the rose family of plants, as well as to its fruit. There are two real types, the common apple, *Pyrus malus*, and the crab apple, *Pyrus baccata*, from which all the cultivated apples of the world have developed. The fruit of the apple is a pome, consisting of a thickened fleshy portion, resulting from the development of the calyx, inclosing the horny cells forming the core, and covering the true seeds. The apple has been known since prehistoric times. The genus extends around the world in the north temperate zone. The crab apple is of value chiefly because it transmits its hardness to its crosses with the common apple, producing a fruit of good quality that can endure northern climates. America is the chief apple growing country, producing annually about 200,000,000 bushels. The export trade to Europe is constantly increasing. The apple is used principally as a dessert, for cooking, and for making cider, vinegar, and brandy.

Baboon. The name applied in popular language to a genus of the zoölogical order *Quadrumanæ* (four-handed mammals), or monkeys. The baboons rank next to the apes in the ascending series of animals, and are distinguished externally by a short tail and by the large head, which has a muzzle resembling that of a dog, the nostrils being situated at its extremity. They are large, strong animals, extremely unattractive in outward appearance, and of great ferocity. More than any other of the monkeys, they employ the fore-limbs in terrestrial progression, running upon all fours with the greatest ease; and, though they climb trees with facility, they prefer, as a rule, to dwell among craggy rocks and precipices. They are all inhabitants of Africa, and one of them, the *Mandrill*, attains very nearly the height of a man. The *Common Baboon*, a native of Guinea, is very often brought to Europe, and is that most usually seen in menageries and museums. It is of a uniform reddish-brown color, with black face and white eyelids; when young it is gentle, curious, gluttonous, and incessantly in motion, but as it grows older it ceases to be familiar, and assumes all the morose look and

repulsive manners which characterize the baboons in general.

Bacteria (Gr. *baktērion*, a rod). A class of very minute microscopic organisms, often of a rod-like form, which are regarded as of vegetable nature, and as being the cause of putrefaction; they are also called *microbes* or *microphytes*. The genus *Bacterium*, in a restricted sense, comprises microscopic unicellular rod-shaped vegetable organisms, which multiply by transverse division of the cells. Species are found in all decomposing animal and vegetable liquids. The bacilli are often spoken of as bacteria, this latter term being used in a wide sense and comprising organisms of various forms and with several distinct names, as *spirillum*, *micrococcus*, etc. They consist of a mass of protoplasm inclosed in a membrane, and all have at some stage or other cilia serving for locomotion. Reproduction is asexual and by division.

Badger. A plantigrade, carnivorous mammal, allied both to the bears and to the weasels, of a clumsy make, with short, thick legs, and long claws on the fore-feet. The common badger (*Meles vulgāris*) is as large as a middling-sized dog, but much lower on the legs, with a flatter and broader body, very thick, tough hide, and long, coarse hair. It inhabits the north of Europe and Asia, burrows, is indolent and sleepy, feeds by night on vegetables, small quadrupeds, etc. Its flesh may be eaten, and its hair is used for artists' brushes in painting. The American badger belongs to a separate genus. *Badger baiting*, or *drawing the badger*, is a barbarous sport formerly, and yet to some extent, practiced, generally as an attraction to public-houses of the lowest sort. A badger is put in a barrel, and one or more dogs are put in to drag him out. When this is effected he is returned to his barrel, to be similarly assailed by a fresh set. The badger usually makes a most determined and savage resistance.

Balata. A gum yielded by *Mimūsops Balata*, a tree growing abundantly in British, French, and Dutch Guiana, Honduras, and Brazil, obtained in a milky state by "tapping" the tree, and hardening to a substance like leather. Used for similar purposes to india-rubber, and in the United States chewed as a masticatory.

Balm of Gilead. The exudation of a tree, *Balsamodendron gileadense*, nat. order *Amyridaceæ*, a native of Arabia Felix, and also obtained from the closely allied species *Balsamodendron Opobalsānum*. The leaves of the former tree yield when bruised a strong aromatic scent; and the balm of Gilead of the shops, or balsam of Mecca or of Syria, is obtained from it by making an incision in its trunk. It has a yellowish or greenish color, a warm, bitterish, aromatic taste, and an acidulous, fragrant smell. It is valued as an odoriferous unguent and cosmetic.

Balsam. An aromatic, resinous substance, flowing spontaneously or by incision from certain plants. A great variety of substances pass under this name. But in chemistry the term is confined to such vegetable juices as consist of resins mixed with volatile oils, and yield the

volatile oil on distillation. The resins are produced from the oils by oxidation. A balsam is thus intermediate between a volatile oil and a resin. It is soluble in alcohol and ether, and capable of yielding benzoic acid. The balsams are either liquid or more or less solid; as, for example, the balm of Gilead, and the balsams of copaiba, Peru, and Tolu. Benzoin, dragon's-blood, and storax are not true balsams, though sometimes called so. The balsams are used in perfumery, medicine, and the arts.

Bamboo. The common name of the arborescent grasses belonging to the genus *Bambūsa*. There are many species, belonging to the warmer parts of Asia, Africa, and America, and growing from a few feet to as much as 100, requiring much moisture to thrive properly. The best-known species is *B. arundinacēa*, common in tropical and sub-tropical regions. From the creeping underground rhizome, which is long, thick, and jointed, spring several round jointed stalks, which send out from their joints several shoots, the stalks also being armed at their joints with one or two sharp, rigid spines. The oval leaves, eight or nine inches long, are placed on short footstalks. The flowers grow in large panicles from the joints of the stalk. Some stems grow to eight or ten inches in diameter, and are so hard and durable as to be used for building purposes. The smaller sticks are used for walking-sticks, flutes, etc.; and, indeed, the plant is used for innumerable purposes in the East Indies, China, and other Eastern countries. Cottages are almost wholly made of it; also, bridges, boxes, water-pipes, ladders, fences, bows and arrows, spears, baskets, mats, paper, masts for boats, etc. The young shoots are pickled and eaten, or otherwise used as food; the seeds of some species are also eaten. The substance called *tabasheer* is a siliceous deposit that gathers at the internodes of the stems. The bamboo is imported into Europe and America as a paper material as well as for other purposes.

Banyan, or Banian, a tree of India, of the fig genus. The most peculiar feature of this tree is its method of throwing out from the horizontal branches, supports which take root as soon as they reach the ground, enlarge into trunks, and extending branches in their turn, soon cover a prodigious extent of ground. A celebrated banyan-tree has been known to shelter 7,000 men beneath its shade. The wood is soft and porous, and from its white, glutinous juice bird-lime is sometimes prepared. Both juice and bark are regarded by the Hindoos as valuable medicines.

Baobab, or Monkey-bread Tree. A tree belonging to the natural order (or sub-order) *Bombaceæ*, and the only known species of its genus, which was named after the naturalist, Adanson. It is one of the largest of trees, its trunk sometimes attaining a diameter of thirty feet; and as the profusion of leaves and drooping boughs sometimes almost hides the stem, the whole forms a hemispherical mass of verdure 140 to 150 feet in diameter and sixty to seventy feet high. It is a native of Western Africa, and is found also in Abyssinia; it is cultivated in many of the warmer parts of the world. The roots are of extraordinary length,

a tree seventy-seven feet in girth having a tap-root 110 feet in length. The leaves are deep green, divided into five unequal parts, lanceolate in shape, and radiating from a common center. The flowers resemble the white poppy, having snowy petals and violet-colored stamens; and the fruit, which is large and of an oblong shape, is said to taste like gingerbread, with a pleasant acid flavor. The wood is pale-colored, light and soft. The tree is liable to be attacked by a fungus which, vegetating in the woody part, renders it soft and pithlike. By the negroes of the west coast these trunks are hollowed into chambers, and dead bodies are suspended in them. There they become perfectly dry and well preserved, without further preparation or embalming. The baobab is emollient and mucilaginous; the pulverized leaves constitute *lalo*, which the natives mix with their daily food to diminish excessive perspiration, and which is even used by Europeans in fevers and diarrhœas. The expressed juice of the fruit is used as a cooling drink in putrid fevers, and also as a seasoning for various foods.

Banana. A plant of the genus *Musa*, natural order Musaceæ, being *M. sapientum*, while the plantain is *M. paradisiæca*. It is originally indigenous to the East Indies, and an herbaceous plant with an underground stem. The apparent stem, which is sometimes as high as thirty feet, is formed of the closely compacted sheaths of the leaves. The leaves are six to ten feet long and one or more broad, with a strong midrib, from which the veins are given off at right angles; they are used for thatch, basket-making, etc., besides yielding a useful fiber. The spikes of the flowers grow nearly four feet long, in bunches, covered with purple-colored bracts. The fruit is four to ten or twelve inches long, and one inch or more in diameter; it grows in large bunches, weighing often from forty to eighty pounds. The pulp is soft and of a luscious taste; when ripe it is eaten raw or fried in slices. The banana is cultivated in tropical and sub-tropical countries, and is an important article of food. Manilla hemp is the product of a species of banana.

Barbary Ape. A species of ape, or tailless monkey, with greenish-brown hair, of the size of a large cat, remarkable for docility, also called the *magot*. It is common in Barbary and other parts of Africa, and some used to live formerly on Gibraltar Rock, being the only European monkey, though probably not indigenous. It has been the "showman's ape" from time immemorial.

Barberry. A genus of shrubs, the common barberry having bunches of small, beautiful red berries, somewhat oval; serrated and pointed leaves; thorns, three together, upon the branches and hanging clusters of yellow flowers. The berries nearly approach the tamarind in respect of acidity, and when boiled with sugar make an agreeable preserve, rob, or jelly. They are also used as a dry sweetmeat, and in sugar-plums or comfits; are pickled with vinegar, and are used for the garnishing of dishes. The bark is said to have medicinal properties, and the inner bark and roots with alum yield a fine yellow dye. The shrub was originally a native

of eastern countries, but is now generally diffused in Europe, as also in North America. In England it has been almost universally banished from hedgerows, from the belief that it causes rust on corn — a supposition supported by the fact that it is subject itself to attacks of a sort of epiphyte. Numerous other species belong to Asia and America.

Barbets. A family of climbing birds with a thick, conical beak, having tufts of bristles at its base. Their wings are short and their flight somewhat heavy. They have been divided into three sub-genera: The *barbicans* (*Pogonias*), inhabiting India and Africa, and feeding chiefly on fruit; the *barbets* proper (*Bucco*), found in Africa and America, and nearly related to the woodpeckers; and the *puff-birds* (*Tamatia*), inhabiting America, and feeding on insects.

Bark. The exterior covering of the stems of exogenous plants. It is composed of cellular and vascular tissue, is separable from the wood, and is often regarded as consisting of four layers: (1) The *epidermis* or *cuticle*, which, however, is scarcely regarded as a part of the true bark; (2) the *epiphylæum* or outer cellular layer of the true bark or cortex; (3) the *mesophylæum* or middle layer, also cellular; (4) an inner vascular layer, the *liber* or *endophylæum*, commonly called *bast*. Endogenous plants have no true bark. Bark contains many valuable products, as gum, tannin, etc.; cork is a highly useful substance obtained from the epiphylæum; and the strength and flexibility of bast makes it of considerable value. Bark used for tanning is obtained from oak, hemlock-spruce, species of acacia growing in Australia, etc. Angostura bark, Peruvian or cinchona bark, cinnamon, cascarilla, etc., are useful barks.

Bark, Peruvian, is the bark of various species of trees of the genus *Cinchona*, found in many parts of South America, but more particularly in Peru, and having medicinal properties. It was formerly called *Jesuit's bark*, from its having been introduced into Europe by Jesuits. Its medicinal properties depend upon the presence of *quinine*, which is now extracted from the bark, imported, and prescribed in place of nauseous mouthfuls of bark.

Barley. The name of several cereal plants yielding a grain used as food and also for making malt, from which are prepared beer, porter, and whisky. Barley has been known and cultivated from remote antiquity, and beer was made from it among the Egyptians. Excellent barley is produced in Britain. The species principally cultivated are *Hordæum distichum*, two-rowed barley; *H. vulgäre*, four-rowed barley; and *H. hexastichum*, six-rowed, of which the small variety is the sacred barley of the ancients. The varieties of the four and six-rowed species are generally coarser than those of the two-rowed, and adapted for a poorer soil and more exposed situation. Some of these are called *bere* or *bigg*. In Britain barley occupies about the same area as wheat, but in North America the extent of it as a crop is comparatively small, being in Canada, however, relatively greater than in the States, and the Canadian barley is of very high quality. Barley is better adapted for cold climates than any other grain, and some of the

coarser varieties are cultivated where no other cereal can be grown. Some species of the genus, three of which are natives of Britain, are mere grasses. *Pot* or *Scotch barley* is the grain deprived of the husk in a mill. *Pearl barley* is the grain polished and rounded and deprived of husk and pellicle. *Patent barley* is the farina obtained by grinding pearl barley. *Barley-water*, a decoction of pearl barley, is used in medicine as possessing emollient, diluent, and expectorant qualities.

Barnacle. The name of a family of marine crustaceous animals. They are enveloped by a mantle and shell, composed of five principal valves and several smaller pieces, joined together by a membrane attached to their circumference; and they are furnished with a long, flexible, fleshy stalk or peduncle, provided with muscles, by which they attach themselves to ships' bottoms, submerged timber, etc. They feed on small marine animals, brought within their reach by the water and secured by their tentacula. Some of the larger species are edible. According to an old fable, these animals produced barnacle geese.

Barnacle Goose. A summer visitant of the northern seas, in size rather smaller than the common wild goose, and having the forehead and cheeks white, the upper body and neck black. A fable asserts that the crustaceans called barnacles (see preceding article) changed into geese, and various theories have been framed to account for its origin. Max Müller supposes the geese were originally called *Hiberniculæ* or Irish geese, and that barnacle is a corruption of this; but the resemblance of a barnacle to a goose hanging by the head may account for it. The Brent Goose is also sometimes called the Barnacle Goose, but the two should be discriminated.

Basalt. A well-known igneous rock occurring in the ancient trap and the recent volcanic series of rocks, but most abundantly in the former. It is a fine-grained, heavy crystalline rock, consisting of felspar, augite, and magnetic iron, and sometimes contains a little olivine. Basalt is amorphous, columnar, tabular, or globular. The columnar form is straight or curved, perpendicular or inclined, sometimes nearly horizontal; the diameter of the columns from three to eighteen inches, sometimes with transverse semispherical joints, in which the convex part of one is inserted in the concavity of another; and the height from five feet to 150. The forms of the columns generally are pentagonal, hexagonal, or octagonal. When decomposed it is found also in round masses, either spherical or compressed and lenticular. These rounded masses are sometimes composed of concentric layers, with a nucleus, and sometimes of prisms radiating from a center. Fingal's Cave, in the island of Staffa, furnishes a remarkable instance of basaltic columns. The pillars of the Giant's Causeway, Ireland, composed of this stone, and exposed to the roughest sea, for ages, have their angles as perfect as those at a distance from the waves. Basalt often assumes curious and fantastic forms, as for example, those masses popularly known as "Sampson's Ribs" at Arthur's Seat, Edinburgh, and "Lot"

and "Lot's Wife" near the southern coast of St. Helena.

Bass. The name of a number of fishes of several genera, but originally belonging to the perch family, distinguished from the true perches by having the tongue covered by small teeth and the preoperculum smooth. *Labrax lupus*, the only British species, called also sea-dace, and from its voracity, sea-wolf, resembles somewhat the salmon in shape, and is much esteemed for the table, weighing about fifteen pounds. *Labrax lineatus*, or striped bass, an American species, weighing from twenty-five to thirty pounds, is much used for food, and is also known as rock-fish. Both species occasionally ascend rivers, and attempts have been made to cultivate British bass in fresh-water ponds with success. Two species of black bass, American fresh-water fishes, are excellent as food and give fine sport to the angler. The former is often called the large-mouthed black bass, from the size of its mouth. Both make nests and take great care of their eggs and young. The *Centropristis nigricans*, an American sea-fish of the perch family, and weighing two to three pounds, is known as the sea-bass.

Bat. One of the group of wing-handed, flying mammals, having the fore-limb peculiarly modified so as to serve for flight, and constituting the order *Cheiroptera*. Bats are animals of the twilight and darkness, and are common in temperate and warm regions, but are most numerous and largest in the tropics. All European bats are small, and have a mouse-like skin. The body of the largest British species, *Vespertilio noctula*, is less than that of a mouse, but its wings stretch about fifteen inches. During the day it remains in caverns, in the crevices of ruins, hollow trees, and such-like lurking-places, and flits out at evening in search of food, which consists of insects. Several species of the same genus are common in North America. Many bats are remarkable for having a singular nasal cutaneous appendage, bearing in some cases a fancied resemblance to a horse-shoe. Two of these horse-shoe bats occur in Britain. Bats may be conveniently divided into two sections: the insectivorous or carnivorous, comprising all European and most African and American species; and the fruit-eating, belonging to tropical Asia and Australia, with several African forms. An Australian fruit-eating bat, commonly known as the kalong or flying-fox, is the largest of all the bats; it does much mischief in orchards. At least two species of South American bats are known to suck the blood of other mammals, and thence are called "vampire-bats" (though this name has also been given to a species not guilty of this habit). The best known is the *Desmodus rufus* of Brazil, Chile, etc. As winter approaches, in cold climates bats seek shelter in caverns, vaults, ruinous and deserted buildings, and similar retreats, where they cling together in large clusters, hanging head downwards by the feet, and remain in a torpid condition until the returning spring recalls them to active exertions. Bats generally bring forth two young, which, while suckling, remain closely attached to the mother's teats, which are two, situated upon the chest.

The parent shows a strong degree of attachment for her offspring, and, when they are captured, will follow them, and even submit to captivity herself rather than forsake her charge.

Batrachia (from the Gr. *batrachos*, a frog). An order of amphibious animals, which includes the frogs and toads; it is also designated by the name of *Anoura*, or "tailless" amphibians. In the batrachia, the adult is destitute of gills and tail, and the two pairs of limbs are always present; there are no ribs, and the skin is soft; the mouth is sometimes without teeth, but the upper jaw is usually provided with teeth, and, more rarely, both jaws; the hind-limbs usually have the toes webbed for swimming, and are much larger than the fore-limbs. In the adult batrachia the breathing is carried on by means of lungs; but, as there are no movable ribs, the process of breathing is somewhat peculiar — in fact, it is one of swallowing, and it is possible to suffocate a frog simply by holding its mouth open. The moist and delicate skin, however, also performs an important part in respiration. The young, or *larvæ*, of frogs and toads are familiarly known as "tadpoles." The eggs are deposited in masses in water, and the young, when hatched, are fish-like in form, with a broad, rounded head and a compressed tail. There are at first two sets of gills, one external and the other internal; but the outer ones disappear very shortly after birth, and the inner ones are subsequently replaced by lungs. The hind-limbs first make their appearance, and are followed by the fore-limbs; and as the limbs become fully developed the tail gradually disappears. In both the common frog and the toad the tongue is fixed to the front of the mouth, whilst it is free behind, so that it can be protruded for some distance from the mouth. The *Tree-frogs* have the toes of all the feet furnished with terminal suckers, by the help of which they climb with ease; they are mostly found in America, but one species is European. The *Surinam toads* (found in Surinam and also in Brazil) rarely have teeth, and the mouth is destitute of a tongue.

Bdellium (*del'i-um*). An aromatic gum resin brought chiefly from Africa and India, in pieces of different sizes and figures, externally of a dark reddish brown, internally clear, and not unlike glue. To the taste it is slightly bitterish and pungent; its odor is agreeable. It is used as a perfume and a medicine, being a weak deobstruent. Indian bdellium is the produce of *Balsamodendron Roxburghii*; African of *B. africanum*; Egyptian bdellium is obtained from the doum palm; and Sicilian is produced by *Daucus gummifer*, a species of the genus to which the carrot belongs. The bdellium mentioned in Genesis ii. was apparently a precious stone, perhaps a pearl.

Bean. A name given to several kinds of leguminous seeds and the plants producing them, probably originally belonging to Asia. They belong to several genera, particularly to *Faba*, garden and field bean; *Phaseolus*, French or kidney bean; and *Dolichos*, tropical bean. The common bean (*F. vulgāris*) is cultivated both in fields and gardens as food for man and beast. There are many varieties, as the maza-

gan, the Windsor, the long-pod, etc., in gardens, and the horse or tick bean in fields. The soil that best suits is a good, strong clay. The seed of the Windsor is fully an inch in diameter; the horse-bean is much less, often not much more than half an inch in length and three-eighths of an inch in diameter. Beans are very nutritious, containing 36 per cent. of starch and 23 per cent. of nitrogenous matter called legumin, analogous to the caseine in cheese. The bean is an annual, from two to four feet high. The flowers are beautiful and fragrant. The *kidney-bean*, *French bean*, or *haricot*, is the *Phaseolus vulgāris*, a well-known culinary vegetable. There are two principal varieties, annual dwarfs and runners. The beans cultivated in America and largely used as articles of food belong to the genus *Phaseolus*. The *scarlet-runner bean* (*Phaseolus coccinēus*), a native of Mexico, is cultivated on account of its long, rough pods and its scarlet flowers. *St. Ignatius' bean* is not really a bean, but the seed of a large climbing shrub, of the order Loganiaceæ, nearly allied to the species of *Strychnos* which produces nux vomica.

Bear. The name of several large plantigrade carnivorous mammals of the genus *Ursus*. The teeth are forty-two in number, as in the dog, but there is no carnassial or sectorial tooth, and the molars have a more tubercular character than in other carnivores. The eyes have a nictitating membrane, the nose is prominent and mobile, and the tail very short. The true bears are about ten in number, natives chiefly of Europe, Asia, and North America. They generally lie dormant in their den during the winter months. The brown or black bear of Europe is the *Ursus arctos*. It is a native of almost all the northern parts of Europe and Asia, and was at one time common in the British islands. It feeds on fruits, roots, honey, ants, and, in case of need, on mammals. It sometimes reaches the length of seven feet, the largest specimens being found farthest to the north. It lives solitarily. The American black bear is the *Ursus americanus*, with black shining hair, and rarely above five feet in length. It is a great climber, is less dangerous than the brown bear, and is hunted for its fur and flesh. It is very amusing in captivity. The grizzly bear (*Ursus ferox* or *horribilis*) is an inhabitant of the Rocky Mountains; it is a ferocious animal, sometimes nine feet in length, and has a bulky and unwieldy form, but is nevertheless capable of great rapidity of motion. The extinct cave-bear (*Ursus spelæus*) seems to have been closely akin to the grizzly. The Siberian bear (*Ursus collāris*) is perhaps a variety of the brown bear. The polar or white bear (*Ursus maritimus*) is characterized by its flat head and comparatively long neck.

Beaver. A quadruped of the order *Rodentia*, or gnawers, the only species of its genus. It is very widely distributed, being found in the northern parts of Europe, Asia, and America, nowadays most abundantly in the northern and thinly peopled parts of North America, dwelling in communities on the banks of rivers and lakes. At one time immense numbers of these animals were killed for their fur, which was largely used in making hats, but in more recent times they

have suffered less persecution on this account, their fur now not being held in the same estimation. The beaver is about two feet in length; its body thick and heavy; the head compressed, and somewhat arched at the front, the upper part rather narrow; the snout much so. The eyes are placed rather high on the head, and the pupils are rounded; the ears are short, elliptical, and almost concealed by the fur. The skin is covered by two sorts of hair, of which one is long, rather stiff, elastic, and of a gray color for two-thirds of its length next the base, and terminated by shining, reddish-brown points; the other is short, thick, tufted, and soft, being of different shades of silver-gray or light lead color. The hair is shortest on the head and feet. The hind legs are longer than the fore, and are completely webbed. The tail is ten or eleven inches long, and, except the part nearest the body, is covered with hexagonal scales.

Bee. A well-known family of insects, belonging to the order *Hymenoptera*, an order which also includes the wasps, ants, and gall-flies. Man appears from the very earliest ages to have known the value of bees, and to have taken advantage of their produce. The Bible makes mention of honey-bees, and the Latin poet Virgil has celebrated them in the fourth book of his *Georgics*, where he has summed up all that the ancients knew about them. During the greater part of the year the population of our hives is composed exclusively of two sorts of individuals, namely, the female or mother bee, called also the *queen bee*, and the working bees or neuters, which are, properly speaking, females imperfectly developed. A third kind of individuals, the males, called also *drones*, are generally not met with except from May to July. The working bees constitute essentially the bee community: they are recognized by their small size, reddish-brown color, and, above all, by the palettes and brushes with which the hind legs are furnished. The three pairs of legs, which are inserted in the thorax, or chest, of the bee, are its tools. The two hind legs are longer than the other pairs, and present on the exterior a triangular depression, resembling a *palette*, which is surrounded by stiff hairs, forming the borders of a sort of basket in which the insect deposits the pollen of flowers. To each of these hind legs is jointed a square expanded piece, which might be termed the ankle, smooth on the exterior, but having hairs on its interior surface, which has caused it to be named the *brush*, and which is employed in collecting the pollen. The other tools of the working bee consist of a pair of movable mandibles, which close the mouth on its two sides, and of a trunk, or proboscis, which may be considered as a sort of tongue; this latter organ has a hairy surface, to which the honey of flowers adheres, whence it is conveyed to the mouth, and from it to the stomach, to be subsequently disgorged. The males, or drones, are larger and more hairy than the working bees; they emit a buzzing sound, have no palettes, and no sting. The female, or queen, has a longer body than the workers, and the wings shorter in proportion. The only part she has to play is that of laying eggs, and so she has no palettes or brushes. Only one

queen lives in each hive, of which she is perfect sovereign, all the workers submissively obeying her. The number of males is scarcely one-tenth that of the working bees, and they live only about three months. The wax of which the cells of the honeycomb are constructed is supposed to be secreted by an organ situated in the abdomen, or belly, of the bee; but, in addition to wax, another substance, much resembling it, but not identical, called *propolis*, is elaborated from the juices of certain plants, and employed to line the inner surface of the hive. The cells are hexagonal in shape, that is, having six equal sides — the most economical form as regards space — and are of two kinds, namely, store-cells, which are filled with honey, as a reserve store of food, and cradle-cells, in which the eggs are desposited. At a certain time of the year the queen leaves the hive, accompanied by the drones, and takes what is called her “nuptial flight” through the air. About forty-eight hours after her return to the hive she begins laying her eggs, at the rate of about two hundred a day. The eggs which are destined to develop into workers are first laid, then those which are to produce males, and lastly those which give birth to females. The eggs are not long in being hatched, and the *larvæ*, or caterpillars, which emerge from them are tended by the workers, and fed by them on a peculiar paste, which is apparently a preparation of pollen. In five or six days the *larvæ* pass into the condition of *pupa*, or chrysalis, and in about seven or eight days after this the perfect insect is hatched.

Beet (*Beta*). A genus of plants, distinguished by its fruit being inclosed in a tough woody or spongy five-lobed enlarged calyx. Two species only are known in general cultivation namely, the sea-beet (*Beta maritima*) and the garden beet (*Beta vulgaris*). The former is a tough-rooted perennial, common on many parts of the British coast and sometimes cultivated for its leaves, which are an excellent substitute for spinach. Of the garden beet, which differs from the last in being of only biennial duration and in forming a tender fleshy root, two principal forms are known to cultivators, the chard beet and the common beet. In the chard beet the roots are small, white, and rather tough, and the leaves are furnished with a broad, fleshy midrib (*chard*), employed as a vegetable by the French, who dress the ribs like sea-kale under the name of *poirée*. Some writers regard this as a peculiar species, and call it *Beta cicla* or *hortensis*. The common beet includes all the fleshy-rooted varieties, such as red beet (with a fleshy large carrot-shaped root), yellow beet, sugar-beet, mangel-wurzel, etc. For garden purposes the best is the red beet of Castelnau-dary, so called from a town in the southwest of France. The beet requires a rich light soil, and being a native of the Mediterranean region is impatient of severe cold, requiring to be taken up in the beginning of winter and packed in dry sand, or in pits like potatoes, the succulent leaves having been first removed. Red beet is principally used at table, but if eaten in great quantity is said to be injurious. The beet may be taken out of the ground for use about the end of August, but it does not attain its full size and perfection till the month

of October. A good beer may be brewed from the beet, and it yields a spirit of good quality. From the white beet the French, during the wars with Napoleon I., succeeded in preparing sugar. Since that time, with the increase of chemical and technical knowledge, the making of beet-sugar has become an important industry in France, Germany, Austria, Russia, Belgium, Holland, and some parts of the United States. It has even been tried in England, and the failure of attempts to produce beet-sugar on a large scale there seems to have been mainly due to artificial conditions of trade competition.

Beetle. A name often used as synonymous with the term *Coleoptera*, but restricted by others to include all those insects that have their wings protected by hard cases or sheaths, called elytra. Beetles vary in size from a mere point to the bulk of a man's fist, the largest, the elephant beetle of South America, being four inches long. The so-called "black beetles" of kitchens and cellars are not properly beetles at all, but cockroaches, and of the order *Orthoptera*.

Begonia. An extensive genus of succulent-stemmed herbaceous plants, order *Begoniaceæ*, with fleshy oblique leaves of various colors, and showy unisexual flowers, the whole perianth colored. They readily hybridize, and many fine varieties have been raised from the tuberous-rooted kinds. From the shape of their leaves they have been called *elephant's ear*. Almost all the plants of the order are tropical, and they have mostly pink or red flowers.

Belladonna. A European plant (*Atröpa Belladonna*), or deadly nightshade. It is native in Britain. All parts of the plant are poisonous, and the incautious eating of the berries has often produced death. The inspissated juice is commonly known by the name of extract of belladonna. It is narcotic and poisonous, but is of great value in medicine, especially in nervous ailments. It has the property of causing the pupil of the eye to dilate. The fruit of the plant is a dark brownish-black shining berry. The name signifies "beautiful lady," and is said to have been given from the use of the plant as a cosmetic.

Betel (*Betle*). A species of pepper, *Chavica Betel*, a creeping or climbing plant, native of the East Indies, native order *Piperaceæ*. The leaves are employed to inclose a piece of the areca or betel-nut and a little lime into a pellet, which is extensively chewed in the East. The pellet is hot and acrid, but has aromatic and astringent properties. It tinges the saliva, gums and lips a brick-red, and blackens the teeth.

Birch (*Betula*). A genus of trees, order *Betulaceæ*, which comprises only the birches and alders, which inhabit Europe, Northern Asia, and North America. The common birch is indigenous throughout the north, and on high situations in the south of Europe. It is extremely hardy, and only one or two other species of trees approach so near to the north pole. There are two varieties natives of Britain, *Betula alba*, and *Betula alba pendula*, or weeping-birch, the latter a very beautiful tree. The wood of the birch, which is light in color, and firm and tough in texture, is used for chairs, tables, bedsteads, and the woodwork of furniture generally, also

for fish-cases and hoops, and for smoking hams and herrings, as well as for many small articles. In France wooden shoes are made of it. The bark is whitish in color, smooth and shining, separable in thin sheets or layers. Fishing-nets and sails are steeped with it to preserve them. In some countries it is made into hats, shoes, boxes, etc. In Russia the oil extracted from it is used in the preparation of Russian leather, and imparts the well-known scent to it. In Lapland bread has been made from it. The sap, from the amount of sugar it contains, affords a kind of agreeable wine, which is produced by the tree being tapped during warm weather in the end of spring or beginning of summer, when the sap runs most copiously. The dwarf birch, *Betula nana*, a low shrub, two or three feet high at most, is a native of all the most northerly regions. *Betula lenta*, the cherry-birch of America, and the black birch (*Betula nigra*) of the same country, produce valuable timber, as do other American species. The largest of these is the yellow birch (*Betula lutëa* or *excelsa*), which attains the height of eighty feet. It is named from its bark being of a rich yellow color. The paper birch of America (*Betula papyracëa*) has a bark that may be readily divided into thin sheets almost like paper. From it the Indian bark canoes are made.

Bird-catching Spider. A name applied to gigantic spiders of the genera *Mygale* and *Epeira*, more especially to the *Mygale avicularia*, a native of Surinam and elsewhere, which preys upon insects and small birds, which it hunts for and pounces on. It is about two inches long, very hairy, and almost black; its feet when spread out occupy a surface of nearly a foot in diameter.

Bird of Paradise. The name for members of a family of birds of splendid plumage allied to the crows, inhabiting New Guinea and the adjacent islands. The family includes eleven or twelve genera and a number of species, some of them remarkably beautiful. The largest species is over two feet in length. The king bird of paradise (*Paradisëa regia*), is possibly the most beautiful species, but is rare. It has a magnificent plume of feathers, of a delicate yellow color, coming up from under the wings, and falling over the back like a jet of water. The feathers of the *Paradisëa major* and *Paradisëa minor* are those chiefly worn in plumes. These splendid ornaments are confined to the male bird.

Birds. A class of animals comprising all oviparous vertebrates which are clothed with feathers, furnished with a bill, and organized for flight. They have warm blood, and a complete double circulation. They are all bipeds; the body is inclined before their feet, the thighs are directed forward, and the toes elongated, forming a broad supporting base. The head and neck are more or less prolonged, the latter very flexible, and generally containing twelve or more vertebræ. The posterior extremities present five principal modifications, affording characters which distinguish five primary orders. In the first order the foot has three toes before and one behind, all armed with long, strong, crooked, and more or less retractile talons,

adapted to seize and lacerate a living prey; this structure is associated with a strong, curved, sharp-edged and sharp-pointed beak, often armed with a lateral tooth; a very muscular body, and capability of rapid and long-continued flight. This order is termed *Raptores* or *Accipitres*. The second type of foot presents three toes before and one behind, and placed on the same level; slender, flexible, of moderate length, and provided with long, pointed, and slightly curved claws. The two external toes are united by a very short membrane. A foot so constructed is especially adapted for the delicate operations of nest-building, and for grasping and perching among the slender branches of trees; hence the order so characterized has been termed *Insessores*, and from including the smaller tribes of birds, *Passeres*. In the third type of foot the hinder toe is raised above the level of the three anterior ones; this lessens the power of perching; but the other toes are strong, straight, and terminated by robust obtuse claws, adapted for scratching up the soil, and for running along the ground; the legs are for this purpose very strong and muscular, and the order so characterized is termed *Rasores*, or *Gallinæ*. The modification by which birds are enabled to wade and seek their food in water along the margins of rivers, lakes, and estuaries, is gained simply by elongating the bones of the leg (tibia and metatarsus), which are covered with a naked scaly skin. The three anterior toes are very long and slender, as in the Parra Jacana, by which the bird can support itself upon the broad floating leaves of aquatic plants; sometimes the toes are united by intervening webs; the legs are placed behind the center of equilibrium; the body is protected by a dense covering of feathers, and a thick down next to the skin; and the whole organization is especially adapted for aquatic life. Hence the order is termed *Natatores*.

Bison. The name applied to two species of ox. One of these, the European bison or aurochs (*Bos bison* or *Bison europæus*), is now nearly extinct, being found only in the forests of Lithuania and the Caucasus. The other, or American bison, improperly termed buffalo (*Bison americanus*), is found only in the region lying north and south between the Great Slave Lake and the Yellowstone River, and in parts of Kansas and Texas, and is rapidly becoming extinct in the wild state, though formerly to be met with in immense herds. The two species closely resemble each other, the American bison, however, being for the most part smaller, and with shorter and weaker hind-quarters. The bison is remarkable for the great hump or projection over its fore-shoulders, at which point the adult male is almost six feet in height; and for the long, shaggy, rust-colored hair over the head, neck, and forepart of the body. In summer, from the shoulders backwards, the surface is covered with a very short fine hair, smooth and soft as velvet. The tail is short and tufted at the end. The American bison used to be much hunted for sport as well as for its flesh and skin. Its flesh is rather coarser grained than that of the domestic ox, but was considered by hunters and travelers as superior in tenderness

and flavor. The hump is highly celebrated for its richness and delicacy. Their skins, especially that of the cow, dressed in the Indian fashion, with the hair on, make admirable defenses against the cold, and are known as *buffalo robes*; the wool has been manufactured into hats, and a coarse cloth. The American bison has been found to breed readily with the common ox, the issue being fertile among themselves.

Bittern. The name of several grallatorial birds, family *Ardeidæ* or herons, genus *Botaurus*. There are two British species, the common bittern (*Botaurus stellāris*) and the little bittern (*Botaurus minūtus*), a native of the South, and only a summer visitor to Britain. Both, however, are becoming rare from the reclamation of the marshy grounds that form their favorite haunt. The common bittern is about twenty-eight inches in length, about forty-four in extent of wing; general color, dull yellowish-brown, with spots and bars of black or dark brown; feathers on the breast long and loose; tail short; bill about four inches long. It is remarkable for its curious booming or bellowing cry, from which come the provincial names of *miredrum* and *butter-bump*, etc. The eggs (greenish-brown) are four or five in number. The little bittern is not more than fifteen inches in length. The American bittern (*Botaurus lentiginōsus*) has some resemblance to the common European bittern, but is smaller.

Bitter-root (*Gentiana catesbæi*). A plant of Canada and part of the United States, order *Mesembryaceæ*, so called from its root being bitter though edible, and indeed esteemed as an article of food by whites as well as Indians. From the root, which is long, fleshy, and tapering, grow clusters of succulent green leaves, with a fleshy stalk bearing a solitary rose-colored flower rising in the center, and remaining open only in sunshine. Flower and leaves together, the plant appears above ground for only about six weeks. California bitter-root (*Echinocystis fabacæa*) and Natal bitter-root (*Gerrardanthus macrorrhiza*) both belong to the gourd family.

Blackbird (*Turdus merūla*), called also the *merle*, a well-known species of thrush, common in Britain and throughout Europe. It is larger than the common thrush, its length being about eleven inches. The color of the male is a uniform deep black, the bill being an orange-yellow; the female is of a brown color, with blackish-brown bill. The nest is usually in a thick bush, and is built of grass, roots, twigs, etc., strengthened with clay. The eggs, generally four or five in number, are of a greenish-blue, spotted with various shades of brown. The song is rich, mellow, and flute-like, but of no great variety or compass. Its food is insects, worms, snails, fruits, etc. The blackbirds or crow-blackbirds of America are quite different from the European blackbird, and are more nearly allied to the starlings and crows. The red-winged blackbird (*Agelaius phœnicæus*), belonging to the starling family, is a familiar American bird that congregates in great flocks.

Blood-hound. A variety of dog, with long, smooth and pendulous ears, remarkable for the acuteness of its smell, and employed to recover game or prey which has escaped wounded

from the hunter, by tracing the lost animal by the blood it has spilt: whence the name of the dog. There are several varieties of this animal, as the English, the Cuban, and the African bloodhound. In former times blood-hounds were not only trained to the pursuit of game, but also to the chase of man. In America they used to be employed in hunting fugitive slaves.

Blue-bird. A small denti-rostral, insessorial bird, the *Erythæca*, or *Sialia Wilsoni*, very common in the United States. The upper part of the body is blue, and the throat and breast of a dirty red. It makes its nest in the hole of a tree or in the box that is so commonly provided for its use by the friendly farmer. The blue-bird is the harbinger of spring to the Americans; its song is cheerful, continuing with little interruption from March to October, but is most frequently heard in the serene days of the spring. It is also called *blue robin* or *blue redbreast*, and is regarded with the same sort of sentiments as the robin of Europe.

Blue-fish (*Temnōdon* or *Pomatōmus saltātor*). A fish common on the eastern coasts of America, allied to the mackerel, but larger, growing to the length of three feet or more, and much esteemed for the table. It is very destructive to other fishes. It is also called horse-mackerel, green-fish, skip-jack, etc.

Boa. A genus of serpents, family *Boidæ*, having the jaws so constructed that these animals can dilate the mouth sufficiently to swallow bodies thicker than themselves. They are also distinguished by having a hook on each side of the vent; the tail prehensile; the body compressed and largest in the middle, and with small scales, at least on the posterior part of the head. The genus includes some of the largest species of serpents, reptiles endowed with immense muscular power. They seize sheep, deer, etc., and crush them in their folds, after which they swallow the animal whole. The boas are peculiar to the hot parts of South America. The *Boa constrictor* is not one of the largest members of the genus, rarely exceeding twenty feet in length; but the name *boa* or *boa constrictor* is often given popularly to any of the large serpents of similar habits, and so as to include the Pythons of the Old World and the Anaconda and other large serpents of America.

Boneset or Thoroughwort (*Eupatorium perfoliātum*). A useful annual plant, indigenous to America, and easily recognized by its tall stem, four or five feet in height, passing through the middle of a large double hairy leaf, and surmounted by a broad, flat head of light purple flowers. It is much used as a domestic medicine in the form for an infusion, having tonic and diaphoretic properties.

Bony Pike or Gar-fish. A remarkable genus of fishes inhabiting North American lakes and rivers, and one of the few living forms that now represent the order of ganoid fishes so largely developed in previous geological epochs. The body is covered with smooth enameled scales, so hard that it is impossible to pierce them with a spear. The common gar-fish attains the length of five feet, and is easily distinguished by the great length of its jaws.

Borax. Biborate of sodium. Native borax has long been obtained under the name of *tincal*, from India, the main source being not India but a series of lakes in Tibet. As imported it is in small pieces of a dirty yellowish color, and is covered with a fatty or soapy matter. Tincal, which contains various impurities, was formerly the only source of borax; but besides Tuscany other sources of boracic acid, more particularly in North and South America, and the salt mines at Stassfurt, etc., in Germany, have been rendered available. North America yields large quantities, there being rich deposits of borax and boracic minerals on the Pacific slope. Pure borax forms large, transparent, six-sided prisms, which dissolve readily in water, effloresce in dry air, and when heated melt in their water of crystallization, swell up, and finally fuse to a transparent glass. Borax has a variety of uses.

Bower-bird. A name given to certain Australian birds of the starling family from a remarkable habit they have of building bowers to serve as places of resort. The bowers are constructed on the ground, and usually under overhanging branches in the most retired parts of the forest. They are decorated with variegated feathers, shells, small pebbles, bones, etc. At each end there is an entrance left open. These bowers do not serve as nests at all, but seem to be places of amusement and resort, especially during the breeding season. The *Satin Bower-bird* is so called from its beautiful glossy plumage, which is of a black color. Another common species is the *Spotted Bower-bird*, which is about eleven inches long, or rather smaller than the first mentioned, and less gay in color, but is the most lavish of all in decorating its bowers.

Box-tree. A shrubby evergreen tree, twelve or fifteen feet high, order *Euphorbiaceæ*, a native of England, Southern Europe, and parts of Asia, with small oval and opposite leaves, and greenish, inconspicuous flowers, male and female on the same tree. It was formerly so common in England as to have given its name to several places — Boxhill, in Surrey, for instance, and Boxley, in Kent. The wood is of a yellowish color, close-grained, very hard and heavy, and admits of a beautiful polish. On these accounts it is much used by turners, wood-carvers, engravers on wood (no wood surpassing it in this respect), and mathematical-instrument makers. Flutes and other wind-instruments are formed of it. The box of commerce comes mostly from the regions adjoining the Black Sea and Caspian, and is said to be diminishing in quantity. In gardens and shrubberies box-trees may often be seen clipped into various formal shapes. There is also a dwarf variety reared as an edging for garden walks and the like.

Bramble. The name commonly applied to the bush with trailing prickly stems, which bears the well-known berries usually called in Scotland brambles, and in England blackberries. It is similar to the raspberry, and belongs to the same genus, natural order *Rosaceæ*. It is rarely cultivated, but as a wild plant it grows in great abundance. The flowers do not appear

till late in the summer, and the fruit, which is deep purple or almost black in color, does not ripen till autumn.

Brazil-wood. A kind of wood yielding a red dye, obtained from several trees of the genus *Cæsalpinia*, order *Leguminosæ*, natives of the West Indies and Central and South America. The best kind is *Cæsalpinia echināta*; other varieties are *Cæsalpinia brasiliensis*, *Cæsalpinia crista*, and *Cæsalpinia Sappan*. The wood is hard and heavy, and as it takes on a fine polish it is used by cabinet-makers for various purposes, but its principal use is in dyeing red. The dye is obtained by reducing the wood to powder and boiling it in water, when the water receives the red coloring principle, which is a crystallizable substance called *brazilin*. The color is not permanent unless fixed by suitable mordants.

Bread-fruit. A large, globular fruit of a pale-green color, about the size of a child's head, marked on the surface with irregular six-sided depressions, and containing a white and somewhat fibrous pulp, which, when ripe, becomes juicy and yellow. The tree that produces it grows wild in Otaheite and other islands of the South Seas, whence it was introduced into the West Indies and South America. It is about forty feet high, with large and spreading branches and has large, bright-green leaves deeply divided into seven or nine spear-shaped lobes. The fruit is generally eaten immediately after being gathered, but is also often prepared so as to keep for some time either by baking it whole in close underground pits or by beating it into paste and storing it underground, when a slight fermentation takes place. The eatable part lies between the skin and the core, and is somewhat of the consistence of new bread. Mixed with cocoanut milk it makes an excellent pudding. The inner bark of the tree is made into a kind of cloth. The wood is used for the building of boats and for furniture. The jack, much used in India and Ceylon, is another member of this genus.

Bread-nuts. The seeds of the *Brosimum alicastrum*, a tree of the same order as the bread-fruit. The bread-nut tree is a native of Jamaica. Its wood, which resembles mahogany, is useful to cabinet-makers, and its nuts make a pleasant food, in taste not unlike hazel-nuts.

Brussels Sprouts. One of the cultivated varieties of cabbage, having an elongated stem four or five feet high, with small, clustering, green heads like miniature cabbages. They are cultivated in great quantities near Brussels, as well as in other parts of the world.

Buckwheat or **Brank.** A plant with branched herbaceous stem, somewhat arrow-shaped leaves, and purplish-white flowers, growing to the height of about thirty inches, and bearing a small triangular grain of a brownish-black without and white within. The shape of its seeds gives it its German name *Buchweizen*, "beech-wheat," whence the English name. The plant was first brought to Europe from Asia by the Crusaders, and hence in France is often called Saracen corn. It grows on the poorest soils. It is cultivated in China and other eastern countries as a bread-corn. In Europe buckwheat has been principally cultivated as food

for oxen, swine, and poultry; but in Germany it serves as an ingredient in pottage, puddings, and other food, and in America buckwheat cakes are common.

Bull-dog. A variety of the common dog, remarkable for its short, broad muzzle, and the projection of its lower jaw, which causes the lower front teeth to protrude beyond the upper. The head is massive and broad; the lips are thick and pendulous; the ears pendent at the extremity; the neck robust and short; the body long and stout; and the legs short and thick. The bull-dog is a slow-motivated, ferocious animal, better suited for savage combat than for any purpose requiring activity and intelligence. For this reason he is often employed as a watch-dog. It was formerly used — as its name implies — for the barbarous sport of bull-baiting. The *bull terrier* was originally from a cross between the bull-dog and the terrier. It is smaller than the bull-dog, lively, docile, and very courageous.

Bull-frog. A large species of frog found in North America, eight to twelve inches long, of a dusky-brown color mixed with a yellowish-green, and spotted with black. These frogs live in stagnant water, and utter a low, croaking sound resembling the lowing of cattle, whence the name.

Bull-head. The popular name of certain fishes. One of these, the *Cottus gobio*, a British fish, is about four inches long, with head very large and broader than the body. It is often called also *Miller's-thumb*. The armed bull-head is found in the Baltic and northern seas; the six-horned bull-head is a North American species. In America this name is given to a species of *Cat-fish* and *Horned-pout*.

Bustard. A bird belonging to the order *Cursores*, or runners, but approaching the waders. The great bustard is the largest European bird, the male often weighing thirty pounds, with a breadth of wing of six or seven feet. The bustard is now rare in Britain, but abounds in the south and east of Europe and the steppes of Tartary, feeding on green corn and other vegetables, and on earth-worms. Its flesh is esteemed. All the species run fast, and take flight with difficulty. The little bustard occasionally visits Britain. The Australian species is a magnificent bird highly prized as food.

Butterfly. The family of the butterflies is a very extensive one, and naturalists differ much as to the manner of subdividing it. One of the most remarkable and interesting circumstances connected with these beautiful insects is their series of transformations before reaching a perfect state. The female butterfly lays a great quantity of eggs, which produce larvæ, commonly called caterpillars. After a short life these assume a new form, and become chrysalids or pupæ. These chrysalids are attached to other bodies in various ways, and are of various forms; they often have brilliant golden or argentine spots. Within its covering the insect develops, to emerge as the active and brilliant butterfly. These insects in their perfect form suck the nectar of plants, but take little food, and are all believed to be short-lived, their work in the perfect state being almost confined to the propa-

gation of the species. Butterflies vary greatly in size and coloring.

Buzzard. The name of raptorial birds which form one of the sub-families of the diurnal birds of prey; characters, a moderate-sized beak, hooked from the base, long wings, long tarsi, and short, weak toes. The common buzzard is distributed over the whole of Europe as well as the north of Africa and America. Its food is very miscellaneous, and consists of moles, mice, frogs, toads, worms, insects, etc. It is sluggish in its habits. Its length is from twenty to twenty-two inches. The rough-legged buzzard, so called from having its legs feathered to the toes, is also a native of Britain. Its habits resemble those of the common buzzard. The red-tailed hawk of the United States is a buzzard. It is also called hen-hawk, from its raids on the poultry-yard. The honey-buzzard is so called because of its feeding specially on bees and wasps.

Cabbage. The popular name of various species of cruciferous plants of the genus *Brassica*, and especially applied to the plain-leaved, hearting, garden varieties of *Brassica oleracea*, cultivated for food. The wild cabbage is a native of the coasts of Britain, but is much more common on other European shores. The kinds most cultivated are the common cabbage, the savoy, the broccoli, and the cauliflower. The common cabbage forms its leaves into heads or bolls, the inner leaves being blanched. Its varieties are the white, the red or purple, the tree or cow cabbage for cattle (branching and growing when in flower to the height of ten feet), and the very delicate Portugal cabbage. The garden sorts form valuable culinary vegetables, and are used at table in various ways.

Cabbage-rose. A species of rose (*Rosa centifolia*) of many varieties, supposed to have been cultivated from ancient times, and eminently fitted for the manufacture of rose-water and attar from its fragrance. It has a large, rounded, and compact flower. Called also *Provence Rose*.

Cacao, or Cocoa. The seeds of a plant known as *Theobroma Cacao* (or "Food of the Gods," as Linnæus named the tree), a native of the West Indies and of tropical America, and cultivated in Asia and Africa. It is a small tree, seldom more than sixteen or eighteen feet high, with large oblong leaves, and clusters of flowers which have rose-colored sepals and yellowish petals. Its fruits vary from six to ten inches in length, and from three to five in breadth, each containing between fifty and a hundred seeds, and it is from these that the cocoa is prepared. When ripe the fruits turn yellow outside, and they are then gathered by hand, and afterwards split open and the seeds removed. The seeds are oval, and about as large as an olive. To prepare them for use they are roasted, and then bruised to loosen their skins which are removed by fanning; the seed-lobes, commonly called "cocoa-nibs," are next crushed and ground between rollers, which reduces them to a uniform pasty consistence. This paste, when sweetened, flavored with vanilla or cinnamon, and dried, constitutes *Chocolate*. Cocoa contains an active principle called *theo-bromine*, resembling caffeine,

the alkaloid in tea and coffee. A fatty or oily matter, called *butter of cacao*, is also present in the cocoa-seeds, to the extent of one-half their weight. Cocoa must not be confounded with *Cuca*, or *Coca*, a plant chewed by the Indians of South America.

Cactus. A Linnæan genus of plants, now used as a name for any of the Cactaceæ, a natural order of dicotyledons, otherwise called the Indian fig order. The species are succulent shrubs, with minute scale-like leaves (except in the genus *Pereskia*, tree-cactus, with large leaves), and with clusters and spines on the stems. They have fleshy stems, with sweetish watery or milky juice, and they assume many peculiar forms. The juice in some species affords a refreshing beverage where water is not to be got. All the plants of this order, except a single species, are natives of America. They are generally found in very dry localities. Some are epiphytes. Several have been introduced into the Old World, and in many places they have become naturalized. The fruits of some species are edible, as the prickly-pear and the Indian fig, cultivated throughout the Mediterranean region. The flowers are usually large and beautifully colored, and many members of the order are cultivated in hothouses.

Camel. The Camel family, including hornless ruminant animals distinguished by the presence of two incisors in the upper jaw. The genus *Camelus* embraces two species, which are only known in the domesticated state. The dromedary, or African camel, has one hump on the back; the common, or Asiatic camel, has two humps. The camel, by its power of sustaining abstinence from drink for many days, from the peculiar formation of its stomach, and of subsisting on a few coarse shrubs, is peculiarly fitted for the parched and barren lands of Asia and Africa. The Arabians live chiefly on the milk of their camels; and without them they could neither carry on trade, nor travel over their sandy deserts.

Camellia (*ka-mēl'ya*). A genus of plants, order *Ternstræmiaceæ* (the tea order), with showy flowers and elegant dark-green, shining, laurel-like leaves, nearly allied to the plants which yield tea, and named from George Joseph Kamel, a Moravian Jesuit. The *Camellia japonica*, in Japan and China, is a lofty tree of beautiful proportions. It is the origin of many double varieties of our gardens. Besides this species, the *Camellia Sasanqua*, with small white scentless flowers, and the *Camellia reticulata* (net-veined), with its large peony-like flowers, are cultivated in United States.

Camelopard. The Camelopard or Giraffe, a genus of ruminant animals, family *Cervidæ*. The only known species, *Camelopard girafa*, is a native of several parts of Africa, living in forests, and feeding on the leaves of trees. It has two straight horns, without branches, six inches long, covered with hair, truncated at the end, and tufted. The shoulders are of such a length as to render the fore part of the animal much higher than the hind part. The neck is very long, the head slender and elegant, and the color of the body is a dusky white, with large rusty spots. It is mild and inoffensive, and in

case of danger has recourse to flight for safety, but when obliged to stand on self-defense, it kicks its adversary.

Canary. A popular song bird of the finch family, native of the Canary Islands. It has been domesticated for over three hundred years. There are many varieties, and in Great Britain an intense interest is displayed in the frequent canary shows. The bird usually possesses remarkable qualities as a songster. Practically all the caged varieties are of a yellow plumage, though in the native state they are of a dull greenish color. It is generally used as a house bird in the United States. The birds frequently command a price of upwards of one hundred dollars.

Candleberry, Candleberry Myrtle, Wax Myrtle, etc. A shrub, growing from four to eighteen feet high, and common in North America, where candles are made from its drupes or berries, which are about the size of peppercorns, and covered with a greenish-white wax popularly known as Blayberry tallow. The wax is collected by boiling the drupes in water and skimming off the surface. A bushel of berries yields from four to five pounds of wax. Another plant belonging to the same genus is the sweetgale, which grows abundantly in bogs and marshes in Scotland—a small shrub, with leaves somewhat like the myrtle or willow, of a fragrant odor and bitter taste, and yielding an essential oil by distillation.

Canvas-back Duck. A bird peculiar to North America, and considered the finest of the water-fowl for the table. They arrive in the United States from the North about the middle of October, sometimes assembling in immense numbers. The plumage is black, white, chestnut brown, and slate color; length about twenty inches.

Caper. The unopened flower-bud of a low trailing shrub, which grows from the crevices of rocks and walls, and among rubbish, in the countries bordering the Mediterranean. Picked and pickled in vinegar and salt they are much used as a condiment (caper-sauce being especially the accompaniment of boiled mutton). The plant was introduced into Britain as early as 1596, but has never been grown on a large scale. The flower-buds of the marsh-marigold and nasturtium are frequently pickled and eaten as a substitute for capers.

Caraway. An umbelliferous biennial plant, with a tapering fleshy root, a striated furrowed stem, and white or pinkish flowers. It produces a well-known seed used in confectionery, and from which both a carminative oil is extracted and the liqueur called *kümmel* prepared.

Cardinal Bird. A North American bird of the finch family, with a fine red plumage, and a crest on the head. Its song resembles that of the nightingale, hence one of its common names, *Virginian Nightingale*. In size it is about equal to the starling. Called also *Scarlet Grosbeak* or *Cardinal Grosbeak* and *Redbird*.

Carrot. A biennial umbelliferous plant. In gardens there are three chief varieties. The leaves are tripinnate, of a handsome feathery appearance. The plants rise to the height of

two feet, and produces white flowers. The root, in its wild state, is small, tapering, of a white color, and strong-flavored; but that of the cultivated variety is large, succulent, and of a red, yellow, or pale-straw color, and shows remarkably the improvement which may be effected by cultivation. It is cultivated for the table and as a food for cattle. Carrots contain a large proportion of saccharine matter, and attempts have been made to extract sugar from them. They have been also employed in distillation.

Cat. A well-known domesticated quadruped, order Carnivora, the same name being also given to allied forms of the same order. It is believed that the cat was originally domesticated in Egypt, and the gloved cat of Egypt and Nubia has by some been considered the original stock of the domestic cat, though more probably it was the Egyptian cat. It was seldom, if at all, kept by the Greeks and Romans, and till long after the Christian era was rare in many parts of Europe. Some have thought that the domestic breed owed its origin to the wild cat; but there are considerable differences between them, the latter being larger, and having a shorter and thicker tail, which also does not taper. The domestic cat belongs to a genus—that which contains the lion and tiger—better armed for the destruction of animal life than any other quadrupeds. The short and powerful jaws, trenchant teeth, cunning disposition, combined with nocturnal habits (for which their eyesight is naturally adapted) and much patience in pursuit, give these animals great advantages over their prey. The cat, in a degree, partakes of all the attributes of its race. Its food, in a state of domestication, is necessarily very various, but always of flesh or fish if it can be obtained. Instances of its catching the latter are known, though usually the cat is extremely averse to wetting itself. It is a very cleanly animal, avoiding to step in any sort of filth, and preserving its fur in a very neat condition. Its fur is very easily injured by water on account of the want of oil in it, and it can be rendered highly electric by friction. The cat goes with young for sixty-three days, and brings forth usually from three to six at a litter, which remain blind for nine days. It is usually regarded as less intelligent than the dog, but this is by no means certain. It has a singular power of finding its way home when taken to a distance and covered up by the way. Among the various breeds or races of cat may be mentioned the tailless cat of the Isle of Man (and the Crimea); the tortoiseshell, with its color a mixture of black, white, and brownish or fawn color; the large Angora or Persian cat, with its long silky fur; and the blue or Carthusian, with long, soft, greyish-blue fur.

Cat-bird. A well-known species of American thrush, which, during the summer, is found throughout the Middle and New England States, frequenting thickets and shrubberies. Its note is strikingly similar to the plaint of a kitten in distress. The plumage is a deep slate-color above and lighter below, and it is about nine inches in length. In habit it is lively, familiar, and unsuspicious; the song is largely

imitative of those of other birds. During the winter it inhabits the extreme south of the United States, and is found also in Mexico and Central America. The cat-bird frequently attacks the common black snake, which, in the absence of the bird, rifles its nest.

Cedar. A tree which forms fine woods on the mountains of Syria and Asia Minor, and other parts of the world. It is an evergreen, grows to a great size, and is remarkable for its durability. Of the famous cedars of Lebanon comparatively few now remain, and the tree does not grow in any other part of Palestine. The most celebrated group is situated not far from the village of Tripoli, at an elevation of about 6,000 feet above the sea. The circumference of the twelve largest trees here varies from about eighteen to forty-seven feet. Cedar timber was formerly much prized, but in modern times is not regarded as of much value, perhaps from the trees not being of sufficient age. Some fine cedars are met with in America and England. The name is given also to the deodar, which is indeed regarded by many botanists as a mere variety of the cedar of Lebanon, and which produces excellent timber. It is a native of India, and is a large and handsome tree, growing in the Himalayas to the height of 150 feet, with a circumference of thirty. It has wide-spreading branches, which droop a little at the extremities. The leaves are tufted or solitary, larger than those of the cedar of Lebanon and very numerous, of a dark-bluish green, and covered with a glaucous bloom. The cones are rather larger than those of the Lebanon cedar, and very resinous. The wood is well adapted for building purposes, being compact and very enduring.

Chameleon (*ka-mē'li-on*). A genus of reptiles belonging to the Saurian or lizard order, a native of parts of Asia, Africa, and the south of Europe. The best-known species has a naked body six or seven inches long, with a prehensile tail of about five inches, and feet suitable for grasping branches. The skin is cold to the touch, and contains small grains or eminences of a bluish-gray color in the shade, but in the light of the sun all parts of the body become of a grayish-brown or tawny color. It possesses the curious faculty, however, of changing its color, either in accordance with its environment, or with its temper when disturbed, the change being due to the presence of clear or pigment-bearing contractile cells placed at various depths in the skin, their contractions and dilatations being under the influence of the nervous system. Their power of fasting and habit of inflating themselves gave rise to the fable that they lived on air, but they are in reality insectivorous, taking their prey by rapid movements of a long viscid tongue. In general habit they are dull and torpid.

Chamois. A species of goat-like antelope inhabiting high inaccessible mountains in Europe and Western Asia. Its horns, which are about six or seven inches long, are round, almost smooth, perpendicular and straight until near the tip, where they suddenly terminate in a hook directed backwards and downwards. Its hair is brown in winter, brown fawn color in

summer, and grayish in spring. The head is of a pale yellow color with a black band from the nose to the ears and surrounding the eyes. The tail is black. Its agility, the nature of its haunts, and its powers of smell, render its pursuit an exceedingly difficult and hazardous occupation.

Chimpanzee. The native Guinea name of a large West and Central African ape belonging to the anthropoid or man-like monkeys, and to the same genus as the gorilla. When full grown it is sometimes about five feet high, with black hair, and is not so large and powerful as the gorilla. Like the orang, it has the hair on its forearm turned backwards, but differs from it in having an additional dorsal vertebra and a thirteenth pair of ribs. It walks erect better than most of the apes. It feeds on fruits, often robs the gardens of the natives, and constructs a sort of nest amongst the branches. It is common in menageries, where it shows much intelligence and docility.

Chrysanthemum. A genus of herbaceous or slightly shrubby plants, distinguished by their hemispherical involucre being composed of imbricated scales which are membranous at the edges, and large naked receptacles. The ox-eye daisy is a common weed in hay-fields, where its flowers, which are white with a yellow disk, are conspicuous. The corn marigold has large golden-yellow flowers. It is a handsome but mischievous weed in cornfields. The species, however, which holds so high a rank among florists' flowers is a plant which has been long familiar to us from its frequent appearance in Chinese drawings, but has of late years been improved to such an extent as to be prized for its intrinsic beauty, and not simply from its valuable property of blooming in November and December.

Cloves. A very pungent aromatic spice, the dried flower-buds of *Caryophyllus aromaticus*, a native of the Molucca Islands, belonging to the myrtle tribe, now cultivated in Sumatra, Mauritius, Malacca, Jamaica, etc. The tree is a handsome evergreen from fifteen to thirty feet high, with large elliptic smooth leaves and numerous purplish flowers on jointed stalks. Every part of the plant abounds in the volatile oil for which the flower-buds are prized. The spice yields a very fragrant odor, and has a bitterish, pungent, and warm taste. It is sometimes employed as a hot and stimulating medicine, but is more frequently used in culinary preparations.

Cocoanut or Coco-nut. A woody fruit of an oval shape, from three or four to six or eight inches in length, covered with a fibrous husk, and lined internally with a white, firm, and fleshy kernel. The tree which produces the cocoa-nut is a palm, from forty to sixty feet high. The trunk is straight and naked, and surmounted by a crown of feather-like leaves. The nuts hang from the summit of the tree in clusters of a dozen or more together. The external rind of the nuts has a smooth surface. This incloses an extremely fibrous substance, of considerable thickness, which immediately surrounds the nut. The fibrous coat of the nut is made into the well-known cocoa-nut matting; the coarse yarn obtained from it is called *coir*, which is also

used for cordage. The hard shell of the nut is polished and made into a cup or other domestic utensil. The fronds are wrought into baskets, brooms, mats, sacks, and many other useful articles; the trunks are made into boats or furnish timber for the construction of houses. By boring the tree a white sweetish liquor called *toddy* exudes from the wound, and yields by distillation one of the varieties of the spirit called *arack*. A kind of sugar called *jaggery* is also obtained from the juice by inspissation.

Coffee. Is the seed of an evergreen shrub which is cultivated in hot climates, and is a native of Abyssinia and of Arabia. This shrub is from fifteen to twenty feet in height; the leaves are green, glossy on the upper surface, and the flowers are white and sweet-scented. The fruit is of an oval shape, about the size of a cherry, and of a dark-red color when ripe. Each of these contains two cells, and each cell a single seed, which is the coffee as we see it before it undergoes the process of roasting. Great attention is paid to the culture of coffee in Arabia. The trees are raised from seed sown in nurseries and afterwards planted out in moist and shady situations, on sloping grounds or at the foot of mountains. Care is taken to conduct little rills of water to their roots, which at certain seasons require to be constantly surrounded with moisture. When the fruit has attained its maturity cloths are placed under the trees, and upon these the laborers shake it down. They afterwards spread the berries on mats, and expose them to the sun to dry. The husk is then broken off by large and heavy rollers of wood or iron. When the coffee has been thus cleared of its husk it is again dried in the sun, and, lastly, winnowed with a large fan, for the purpose of clearing it from the pieces of husks with which it is intermingled. A pound of coffee is generally more than the produce of one tree; but a tree in great vigor will produce three or four pounds. The best coffee is imported from Mocha, on the Red Sea. It is packed in large bales, each containing a number of smaller bales, and when good appears fresh and of a greenish-olive color. Next in quality to the Mocha coffee may perhaps be ranked that of Southern India and that of Ceylon, which is strong and well flavored. Java and Central America also produce large quantities of excellent coffee. Brazilian coffee, though produced more abundantly than any other, stands at the bottom of the list as regards quality. Liberian coffee may also be mentioned. American coffee holds in the judgment of all Orientals the very last rank. The Dutch were the first to extend the cultivation of coffee beyond the countries to which it is native. About 1690, some coffee seeds were brought to Java, where they were planted and produced fruit. By 1718, the Dutch planters of Surinam had entered on the cultivation of coffee with success, and ten years after it was introduced from that colony by the English into Jamaica, and by the French into Martinique. It was not till 1774, that the planters of Brazil, now the greatest producers of coffee in the world, commenced its cultivation. Coffee as an article of diet is of but comparatively recent introduction. To the Greeks and Romans it was wholly

unknown. From Arabia it passed to Egypt and Turkey, whence it was introduced into England by a Turkey merchant named Edwards in 1652, whose Greek servant, named Pasqua, first opened a coffee-house in London. In 1671, an Armenian named Pascal set up a coffee-house in Paris. In Great Britain much less is drunk than on the continent of Europe or in the United States and Canada, tea being the British national beverage. The excellence of coffee depends in a great measure on the skill and attention exercised in roasting it. If it be too little roasted it is devoid of flavor, and if too much it becomes acrid, and has a disagreeable, burned taste.

Condor. A South American bird, one of the largest of the vulturine birds. In its essential features it resembles the common vultures, differing from them mainly in the large cartilaginous caruncle which surmounts its beak, and in the large size of its oval and longitudinal nostrils placed almost at the extremity of the cere. Despite the many stories of its gigantic proportions, Humboldt met with no specimens whose wings exceeded nine feet in expanse, though it has occasionally been known to attain an expanse of fourteen feet. It is found in greatest numbers in the Andes chain, frequenting regions from 10,000 to 15,000 feet above the level of the sea where they breed, depositing their two white eggs on the bare rock. They are generally to be seen in groups of three or four, and only descend to the plains under stress of hunger, when they will successfully attack sheep, goats, deer, and bullocks. They prefer carrion, however, and, when they have opportunity, gorge themselves until they become incapable of rising from the ground, and so become a prey to the Indians.

Crab. The popular name for a considerable group of invertebrate animals belonging to the class *Crustacea*, of which there are numerous species, exceedingly various in size, color, and modes of living. Like other crustaceans, their bodies are covered by an external skeleton or calcareous crust; they have ten jointed limbs, adapted for walking; and the breathing is performed by means of gills, which are somewhat like a pyramid in form, and in the edible crabs are popularly called dead men's fingers. The head and breast are united, constituting the *cephalothorax*, and the whole covered by a strong carapace, which is broader than it is long. The tail, or abdomen, is very short, and is tucked up beneath the cephalothorax out of view; it is employed by the females to carry the eggs. In all the essential points of their anatomy the crabs do not differ from the lobster and the crayfish, but they are decidedly higher in their organization. The sense of sight is peculiarly acute, and enables them to distinguish the approach of objects at a considerable distance. The mouth is furnished with several pairs of strong jaws; in addition to which the stomach has its internal surface studded with hard projections, or teeth, for the purpose of grinding the food. The liver is of great size, and constitutes that soft, rich, yellow substance, found immediately beneath the shell, and called the fat of the crab. The crabs, like the lobsters, "moult," or throw off their entire calcareous covering, periodically, when they are soft and help-

less, and usually bury themselves in the sand until a new crust is formed. Most of them are littoral in their habits, dwelling upon the shores of the sea or those of creeks and rivers, but some few live inland, and are known as land crabs. One remarkable species inhabits holes in the highest hills and mountains of Jamaica and other islands of the West Indies. When the season for spawning arrives, they proceed to the sea in a body of many millions, a journey which occupies some weeks. Having deposited their eggs in the sand, they return, traveling only by night, and arrive emaciated and exhausted.

Crane. A genus of birds belonging to the order *Grallæ*. They are chiefly remarkable for their long migrations. In these journeys they usually fly in large flocks led by a single leader, the whole assemblage assuming a wedge-like form, and the leadership is continually changed, so that it is occupied in succession by every crane in the flock. The common crane breeds in the north of Europe and in Siberia, and migrates southwards at the approach of winter. It is a fine bird, attaining nearly five feet in height; with the exception of the neck, which is black, the body is of a uniform ashy-grey; it has a noble and graceful carriage, and the feathers on its tail, which rise up in undulating clusters, adds much to its elegance. It frequents large plains and marshes, and feeds miscellaneously on fish, reptiles, frogs, molluses, worms, insects, and even small mammals. When the breeding season arrives, the birds break up their social compact, and pair off for the purpose of reproduction and rearing the young. The nest, in which are usually laid two eggs, is roughly constructed on the ground, and the male shares with the female the cares of incubation. When caught young, cranes are easily tamed. The games and dances in which they are said to indulge are not mere idle stories; it is certainly true that these birds form groups in various fashions, advance towards one another, make a kind of salutation, and adopt the strangest postures. The Demoiselle crane is remarkable for two beautiful clusters of white feathers on either side of its head, and for a black pendent tuft down the breast. Its size is about the same as that of the common crane, and its shape is still more elegant. It is a native of Turkey, Northern Africa, and some parts of Asia. The crested crane has the top of its head adorned with a tuft of feathers, which it has the power of spreading out like a fan. It inhabits the eastern and northern coasts of Africa, and some of the islands of the Mediterranean.

Crocodile. A genus, family, and order of saurian reptiles, comprising the largest living forms of reptiles. The characters of the order *Crocodylia* are as follows: The skin is covered with square, bony plates; the tail is long and compressed laterally. The four feet are short, and there are five toes on each of the two forefeet, and four on each of the two hindfeet, the latter more or less webbed; the limbs are feeble. The jaws are long and their gape of enormous width. The nostrils are at the extremity of the snout, and capable of being closed to prevent ingress of water. The heart is four-chambered. The families now existing are the

Alligatoridæ, *Crocodylidæ*, and *Gavialidæ*. The alligators are all New World forms. The gavial proper is confined to the East Indies. The *Crocodylidæ*, to which family the crocodile belongs, have unequal teeth and no abdominal plates, and the cervical and dorsal plates are distinct for the most part. The crocodile of the Nile is the best-known member of the order; another species is met with in South Asia, Sunda, and the Moluccas. The crocodile is formidable from its great size and strength, but on shore its shortness of limb, great length of body, and difficulty of turning enable men and animals readily to escape pursuit. In the water it is active and formidable. It is exclusively carnivorous, and always prefers its food in a state of putrefaction. In Egypt it is no longer found except in the upper or more southern parts, where the heat is greatest and the population least numerous. Crocodiles are still common enough in the river Senegal, the Congo, Niger, etc. They grow sometimes to a length of thirty feet, and apparently live to a vast age.

Crow, the crow family. They are very omnivorous, and remarkable for their intelligence. The family, widely diffused over the world, includes the common crow, and the raven, the fish-crow, the rook, the jay, and the magpie. The common crow of North America is remarkable for its gregarious and predatory habits. They pair in March; the old repair their nests, the young frame new ones; but they are such thieves, that while the one is fetching materials, the other must keep watch to prevent the rising fabric from being plundered by their neighbors. As soon as the nest is finished and the eggs produced (five, bluish-green, with dark blotches), the male takes upon himself the care of providing for his mate, which he continues during the whole period of incubation. They frequent the same rookeries for years, but allow no intruders into their community. They feed chiefly on worms and the larvæ of insects; they also eat grain and seeds, whence they have sometimes been supposed injurious to the farmer; but they amply repay him for what they take by destroying the vermin in his fields.

Cypress. A genus of coniferous trees. The common European cypress is a dark-colored evergreen with extremely small leaves, entirely covering the branches. It has a quadrangular, or, where the top branches diminish in length, pyramidal shape. Cypress trees, though of a somewhat somber and gloomy appearance, may be used with great effect in shrubberies and gardens. They are much valued also on account of their wood, which is hard, compact, and very durable, of a reddish color and a pleasant smell. It was used at funerals and as an emblem of mourning by the ancients. Amongst other members of the genus are the Indian cypress; the *Cypress pendula*, a native of China and Japan; the incense-bearing cypress, a native of Mexico; and the evergreen American cypress or white cedar. The deciduous cypress of the United States and Mexico, is frequently called the Virginian cypress. Its timber is valuable, and under water is almost imperishable. In parts of the United States this cypress constitutes forests hundreds of miles in extent.

Deer. A genus of ruminant quadrupeds now constituting the family *Cervidæ*, which some naturalists have divided into a number of genera, whilst others still regard it as forming only one. Deer are animals of graceful form, combining much compactness and strength with slenderness of limb and fleetness. They use their powerful horns for weapons of defense, and sometimes of offense; but in general they trust to flight for their safety. They have a long neck, a small head, which they carry high, large ears, and large full eyes. In most of them there is, below each eye, a sac or fold of the skin, sometimes very small, sometimes of considerable size, called the *suborbital sinus*, *lachrymal sinus*, or *tear-pit*, the use of which is not well known. Deer have no cutting teeth in the upper, but eight in the lower jaw; the males have usually two short canines in the upper, but neither sex has any in the lower jaw; the præmolars are three, and the true molars three on each side in each jaw. They are distinguished from all other ruminants by their branching horns (antlers), which in most of the species exist in the male sex only; they are solid and deciduous, *i. e.*, fall off annually, and are renewed with increase of size, and of breadth of palmation, and number of branches, according to the kind, until the animal has reached old age, when the size of the horns begins to diminish on each annual renewal. Deer are found in almost all parts of the globe except Australia and the south of Africa, their place in the latter region being supplied by antelopes in extraordinary number and variety. Some of them live amidst the snows of very northerly regions, and some in tropical forests; the greater number inhabit the warmer temperate countries, and they are chiefly found in wide plains and hills of moderate height, none dwelling on those lofty mountain summits which are the chosen abode of some animals of the kindred families of *Antilopidæ*, *Capridæ* and *Moschidæ*, as the chamois, the bouquetin, and the musk. The flesh (venison) of most kinds of deer is highly esteemed for the table, and they have long been regarded as among the noblest objects of the chase. Only one species, the reindeer, can be said to have been fully domesticated and reduced to the service of man although individuals of many species have been rendered very tame.

Dog. An animal well known for its attachment to mankind, and remarkable for the almost infinite varieties, as to size, form, color, and quality of the hair, which the influence of domestication has brought about in the species. It belongs to the order of carnivorous mammals, and to that section of quadrupeds which is distinguished as *digitigrade*. The zoölogical genus is termed *Canis*, and includes, besides the dog, the jackal and the wolf; and by many writers the fox is also placed in the same genus. It is a question of considerable interest what was the parent stock of the dog. Some zoölogists are of opinion that the breed is derived from the wolf; others that it is a familiarized jackal; all agree that no trace of it is to be found in a primitive state of nature. That there are wild dogs, we know. The *Dhole* of India and the *Dingo* of Australia are remarkable examples,

which exist in a state of complete independence, and without any indication of a wish to approach the dwellings of man. These dogs, however, throw very little light upon the question. They may have escaped from the dominion or half-dominion of man, and have betaken themselves to a vagabond life. The food of the dog is various. It will live on cooked vegetable matter, but prefers animal food. In drinking, it laps with the tongue. It never perspires, but the nose is naked and moist, and, when hot, the tongue hangs out of the mouth, and a considerable quantity of water drops from it. The female goes with young sixty-three days, and usually has about six or eight at a litter, though sometimes more. The young are blind at birth, and do not acquire their sight until the tenth day. The dog attains its full growth at the expiration of the second year, it is old at fifteen years, and seldom lives beyond twenty years.

Eagle. A genus of birds belonging to the order *Accipitres*, and to the same family as the falcons and the hawks. They are found in all parts of the globe. The size varies according to the species, but all attain imposing dimensions. The Golden Eagle measures about three feet nine inches in height, and the spread of its wings is nearly ten feet, while in the Imperial Eagle the spread of the wings is only six feet. The eagle soars at prodigious heights, and its sense of vision is very highly developed. It builds its nests in the clefts of the most inaccessible rocks, and lays generally two or three eggs; the period of incubation is thirty days. If captured young, the eagles are susceptible of a certain amount of education; when taken old they are quite untamable. Besides the Golden Eagle and the Imperial Eagle, there are other species, such as the American Eagle, White-tailed Eagle, Bonelli's Eagle, the Tawny Eagle, and the Booted Eagle; and numerous smaller species are to be met with in tropical regions.

Elephant. A genus of mammals, the only living representatives of the order *Proboscidea*, or animals with a trunk or proboscis. They are exclusively confined to the tropical regions of the old world, in the forests of which they live in herds. Only two existing species are known, the Asiatic elephant and the African elephant. In both species the two upper incisors, or front teeth, are enormously developed, constituting long tusks. The lower incisors are absent, and there are no other teeth in the jaws except the large molars, or grinders, which are usually two in number on each side of each jaw. The molar teeth are of very large size, and are composed of a number of transverse plates of enamel, united together by dentine. In the Indian elephant the transverse ridges of enamel are narrow and undulating, whilst in the African elephant they enclose lozenge-shaped intervals. The nose is prolonged into a cylindrical trunk, movable in every direction, highly sensitive, and terminating in a finger-like, prehensile lobe. The nostrils are placed at the extremity of this proboscis. The feet are furnished with five toes, but these are only indicated externally by the divisions of the hoof; and the sole of the foot is formed of a thick pad of integument. The

Indian elephant is the only species which is now caught and domesticated; and, as it will scarcely ever breed in captivity, the demand for it is supplied entirely by the capture of adult wild individuals, which are taken chiefly by the assistance of those which have been already tamed. The Indian elephant is distinguished by its concave forehead and its small ears; the African elephant, on the other hand, has a strongly convex forehead, and great flapping ears. The African elephant is chiefly hunted for the sake of its ivory, and there is too much reason to believe that the pursuit will ultimately end in the complete extinction of these fine animals. The elephants are all vegetable feeders, living almost entirely on the foliage of shrubs and trees, which they strip off by means of the prehensile trunk. As the tusks prevent the animal from drinking in the ordinary manner, the water is sucked up by the trunk, which is then inserted in the mouth, into which it empties its contents. Many species of fossil elephants are known, the most familiar of which is the Mammoth.

Falcon. A name of various birds of prey, members of the family Falconidæ. The falcons proper, for strength, symmetry, and powers of flight, are the most perfectly developed of the feathered race. They are distinguished by having the beak curved from the base, hooked at the point, the upper mandible with a notch or tooth on its cutting edge on either side, wings long and powerful, the second feather rather the longest, legs short and strong. The largest European falcons are the jerfalcon or gyrfalcon proper, a native of the Scandinavian Peninsula, and the Iceland falcon; to which may be also added the Greenland falcon. Between these three species much confusion at one time prevailed, but they are now distinctly defined and described. In the Greenland falcon the prevailing color at all ages is white, in the Iceland falcon, dark. The latter more nearly resembles the true gyrfalcon of Norway, which, however, is generally darker, rather smaller, but with a longer tail. The average length of any of these falcons is about two feet. The Greenland species used to be the most highly prized by falconers. Its food consists chiefly of ptarmigans, hares, and water-fowl. It is found over a wide range of northern territory. The peregrine falcon is not so large as the jerfalcon, but more elegant in shape. It chiefly inhabits wild districts, and nestles among rocks. It preys on grouse, partridges, ptarmigans, pigeons, rabbits, etc. Its flight is exceedingly swift, said to be as much as 150 miles an hour.

Ferns. A natural order of cryptogamous or flowerless plants, forming the highest group of the acrogens or summit-growers. They are leafy plants, the leaves, or more properly fronds, arising from a rhizome or root-stock, or from a hollow arborescent trunk, and being circinate in veneration, a term descriptive of the manner in which the fronds are rolled up before they are developed in spring, having then the appearance of a bishop's crosier. Ferns have a wide geographical range, but are most abundant in humid, temperate, and tropical regions. In the

tropical forests the tree-ferns rival the palms, rising sometimes to a height of fifty or sixty feet. Ferns are very abundant as fossil plants. The earliest known forms occur in Devonian rocks. Various systems of classification for ferns have been proposed. At present the order is usually divided into six or eight sub-orders or tribes distinguished by differences in the structure of the sporangium. The generic characters are founded on the position and direction of the sori and on the venation. The largest division is that of the Polypodiaceæ, to which belong the polypody, the lady-fern, the bracken, the hard-fern, the spleenwort, the maiden-hair, the hart's-tongue fern, etc. A few of the ferns are used medicinally, mostly as demulcents and astringents. Some yield food.

Fishes. The lowest class of back-boned animals, or that division of the animal kingdom which is known to zoölogists as *Vertebrata*. They are wholly adapted for an aquatic mode of life. The shape of the body is such as to give rise to the least possible friction in swimming, and thus to admit of rapid locomotion in water. To this end also, as well as for purposes of defense, the body is usually covered with a coating of scales. The limbs, when present, are always in the form of fins, but one or both pairs may be wanting; the anterior or fore limbs are known as the pectoral fins, and the posterior or hind limbs as the ventral fins. Besides the fins which represent the limbs, fishes possess other fins placed in the middle line of the body; one or two of these run along the back, and are known as the dorsal fins, one or two lie on the belly, near the vent, known as the anal fins, and a broad fin at the extremity of the spinal column is called the caudal or tail fin. The tail fin is always set vertically in fishes, so as to work from side to side, and is the chief organ of progression; it differs altogether from the horizontal expansion which constitutes the tail of whales, dolphins, dugongs, and manatees — animals which belong to the class of mammals. In the form of the tail, fishes exhibit two very distinct types of structure, termed respectively the *homocercal* and the *heterocercal* type of tail. The homocercal tail is the one which most commonly occurs in existing fishes, and it is characterized by the fact that the two lobes of the tail are equal, and the spinal column stops short at its base; in the heterocercal tail, on the other hand, found in many fossil specimens of the fish class, the spinal column is prolonged into the upper lobe of the tail, so that the tail becomes unequally lobed. All the fins are supported by bony spines, or rays, which are of two kinds, termed respectively spinous rays and soft rays. Further, to aid in supporting themselves at varying depths in the water, most fishes are provided with a sac containing gas, situated above the alimentary tube, and known as the air or swim bladder, by the filling or emptying of which the fish is rendered heavier or lighter in comparison with the surrounding water. The skeleton of most fishes consists entirely of bone, but in some it is partly of bone and partly of cartilage, and in a few it remains permanently cartilaginous.

Flamingo. A genus of web-footed birds which may be regarded as in some respects intermediate between the storks and the ducks, their long legs and necks giving them a resemblance to the former, while their webbed feet connect them with the latter. There are nine species of true flamingoes. Their food appears to be mollusca, spawn, grass, water plants, insects, etc., which they fish up by means of their long neck.

They breed in companies in mud-flats or inundated marshes, raising up the mud into a small hillock, which is concave at the top so as to form a nest. In this hollow the female lays her eggs, and hatches them by sitting on them with her legs doubled up under her.

The young, which never exceed three in number, do not fly till they have nearly attained their full growth, though they can run very swiftly and swim with ease almost immediately after their exclusion from the shell. The common American species is of a deep red color, with black quills. It is peculiar to tropical America, migrating in summer to the Southern, and rarely to the Middle States.

Flax. A fiber obtained from a plant belonging to the order *Linaceæ*. Common flax (*Linum usitatissimum*) is an annual plant, with a slender erect stem, two or three feet high, which is grown in large quantities in Italy, Russia, Saxony, Belgium, Holland, and Northern France, but is not cultivated to any great extent in this country. After being cut, and allowed to dry, the flax undergoes a process called *retting*, in order to remove resinous and glutinous substances, and disintegrate the woody portions of the stem. The flax is steeped in water, and after a time a process of fermentation sets in, by which the resinous and glutinous substances are decomposed. The fibers are then freed from portions of woody matter, and separated one from another by a process known as *scutching*. The seeds of the flax plant are also a valuable article of commerce.

Flea. A name for several insects regarded by entomologists as constituting a distinct order *Aphaniptera*, because the wings are inconspicuous scales. All the species of the genus are very similar to the common flea. It has two eyes and six feet; the feelers are like threads; the oral appendages are modified into piercing stilets and a suctorial proboscis. The flea is remarkable for its agility, leaping to a surprising distance, and its bite is very troublesome.

Flounder. One of the flat-fishes, family *Pleuronectidæ*, genus *Pleuronectes* or *Platessa*, the common flounder being the *Pleuronectes* or *Platessa flesus*. It is one of the most common of the flat-fishes, and is found along the shores of almost all countries. The body is extremely flattened at the sides. Flounders have been successfully transferred to fresh-water ponds. They feed upon crustacea, worms, and small fishes, and are much used as food. The Argus-flounder is the *Pleuronectes argus*, a native of the American seas.

Flower. That part of a plant in which the organs of reproduction (*stamens* and *pistils*) are situated. The parts are arranged in whorls. In a complete flower the outer one consists of the *calyx*, formed of one or more leaves termed *sepals*;

the next is the *corolla*, composed of one or more *petals*; the third whorl is formed by the stamens, and the innermost of the pistils. Sometimes there is only one whorl of floral leaves, and then the flower is said to be *monochlamydeous*; if neither whorl is present, it is termed *achlamydeous*. If both calyx and corolla are present, but so blended together that they are not easily distinguished, the floral envelope is called a *perianth*. *Double* or *semi-double* flowers are those, in which through the effect of cultivation, what should be stamens are changed into petals, as in the rose, camellias, carnations, etc. The colors and odors of flowers are subjects in the investigation of which physiologists have not yet been able to go far. The chemical products on which they immediately depend are partially known; but how the chemical changes are wrought, and what various purposes they all serve as to the plant itself, can scarcely be said to have even begun to be ascertained. Both colors and odors are more or less owing to the action of the sun's rays. They also are sometimes modified by soil; and diversities of color have been obtained in cultivated flowers by changing the soil in which they grow.

Fly. A winged insect of various genera and species, whose distinguishing characteristics are that the wings are transparent and have no cases or covers. By these marks flies are distinguished from beetles, butterflies, grasshoppers, etc. The true flies or *Diptera* have only two wings, viz: the anterior pair. In common language, *fly* is the house-fly, of the genus *Musco*. The house-fly is found wherever man is, and in hot weather causes a good deal of annoyance. It is furnished with a suctorial proboscis, from which, when feeding on dry substances, it exudes a liquid, which, by moistening them, fits them to be sucked. From its feet being beset with hairs, each terminating in a disc which is supposed to act as a sucker, it can walk on smooth surfaces, as a ceiling, even with its back down. The female lays her eggs in dung or refuse; the larvæ are small white worms. They change into pupæ without casting their skins, and in from eight to fourteen days the perfect fly emerges. The very small flies and the very large ones often seen about houses belong to other species.

Flying-fish. A name common to various fishes which have the power of sustaining themselves for a time in the air by means of their large pectoral fins. Generally, however, the name is limited to the species of the genus *Exocætus*, which belongs to the family *Scomberesocidæ* (mackerel-pikes). The pectoral fins, which are very large, are the principal instruments in their flight, serving to sustain the fish temporarily in the air after it has acquired an initial velocity in its rush through the water. It can pass through the air to a considerable distance, sometimes as much as 200 yards, which it does to escape from the attacks of other fishes, especially the dolphin. It is most common between the tropics. The best-known species are *Exocætus volitans*, abundant in the warmer parts of the Atlantic, and *Exocætus exiliens* of the Mediterranean. By some naturalists this genus has been subdivided into several, characterized by the presence or absence of barbels.

Flying-squirrel. A genus of rodent animals, family *Sciuridæ* (squirrels), to which the skin of the flank, extending between the fore and hind legs, imparts the faculty of supporting themselves for a moment in the air, as with a parachute, and of making very great leaps. The European flying-squirrel is a native of the forests in the colder parts of Europe and Asia; the American flying-squirrel lives in troops in the western parts of North America.

Fox. A carnivorous animal, of which there are several species, belonging to the same family as the dog. It is chiefly characterized by its sharp muzzle, and its long bushy tail; as well as by its cunning, which has passed into a proverb. The pupil of the eye is elongated, and not circular as in the dog, and the ears are triangular in shape and pointed. A very powerful scent is emitted from the fox, in consequence of some glands which are placed near the root of the tail, and which furnish the odorous secretion; this odor is so fetid, that even other animals avoid its locality. The common fox is an inhabitant of most parts of Europe and America, and extends also into Northern Asia. Its senses are extremely acute, so as alike to inform it of the neighborhood of its prey and to warn it of the approach of danger. It usually remains concealed during the day in a burrow, which it has either dug for itself or usurped, and ventures abroad chiefly at night, with stealthy movements, in search of food. Birds, rabbits, or hares constitute its usual prey, but, when pressed by necessity, it will have recourse to other food, and it has a predilection for certain kinds of fruit, such as grapes. To domestic poultry it is terribly destructive. Though slightly made, the fox has great muscular vigor, and bites with much severity. Even when taken at a very early age, it is never properly domesticated; and adults, when placed in confinement, show great ferocity, and soon die. It is to its power of endurance and its great speed, as well as to the cunning which dictates various expedients for escape, that the chase of this animal owes its exciting character. Among the most common of its expedients for escape is that of feigning death, which is done also by several other animals. Numerous other species of fox exist in the old and new worlds, of which the most important are the Arctic, or Blue Fox, and the American, or Red Fox. The Arctic Fox abounds in the Arctic regions, and is remarkable for changing its color with the season, being brown or bluish in summer, and white in winter. The soles of its feet are hairy. The Red Fox is found throughout North America; it is very variable in color and marking, and varieties of it are known by different names. The skins of all the species of fox are valuable, and make warm and soft furs, used for muffs, linings, etc.

Frog. The genus is distinguished from its congeners by having the tongue and tympanum distinct, the skin smooth, and the toes without claws; they are, however, pointed, and the hinder feet are united almost to the tips by a membrane. The species are numerous; they are widely distributed over the globe, many inhabiting tropical regions. The common frog is too well known to require description. It is

found at the genial period of the year, burying itself at the approach of winter, in the mud at the bottom of ponds, and reappearing early in spring. In the month of March it lays its eggs, which are enveloped in a gelatinous material, in water, where they float. Each female deposits from 600 to 1,200 eggs a year. By April they have greatly increased in size and are becoming hatched. The immature frogs which come forth are called tadpoles. They have tails, no legs, breathe by gills, and are aquatic. Six or eight weeks later the legs are fully developed, the tail is absorbed, and they quit the water, remaining, however, in its vicinity to the last. The common frog is found in most parts of this country, in Europe, in parts of Asia, and in the north of Africa. The eatable frog is common on the European continent. The bull-frog of North America is also well known. In farriery, a kind of tender horny substance growing in the middle of a horse's foot, dividing into two branches which run like a fork toward the heel.

Gazelle. An animal belonging to the Antelope family; of very graceful shape, and rather smaller in size than the chamois. The color of the gazelle is fawn or dun on the back, which is separated from the white belly by a brown or blackish band. The horns, which are stronger in the male than in the female, are twice bent, in the shape of a lyre, and without sharp edges. The eyes of this animal are beautiful and soft in expression, and its movements are elegant and light. It inhabits the large plains and the Saharian region of Northern Africa, as well as Arabia and Syria, living in numerous herds. When taken young, the gazelle, though naturally wild and timid, is readily domesticated, and becomes quite tame.

Giraffe. See Camelopard.

Geranium. A genus of plants embracing a large number of species unequally distributed throughout the world. The well-known herb, Robert (*Geranium Robertianum*) is a low, spreading weed, a rank-odored plant, common on rocks, where its soft, compound, fern-like leaves, and pink, little flowers are very attractive. The best known geranium is the *Pelargonium*. These plants are prized on account of the colors of the flowers, and the shape and marking of the leaves. Many hybrids have been produced and there is hardly a better known window plant. They are easily propagated by cuttings in light, rich soil and with good drainage. Alum Root, a North American species, with flowers of considerable beauty is the most valuable medicinally. It is very astringent and abounds in tannin, a characteristic of many species of the genus. On the Pacific Coast the geranium is valued as a forage plant and is eaten by all kinds of stock.

Goat. A genus of ruminant quadrupeds so closely allied to the sheep that it is not easy exactly to define the distinction, although the common domestic goat and sheep are of widely different appearance. It is frequently mentioned in the books of Moses, and formed a large portion of the flocks of the patriarchs. The uses of the goat are numerous. The flesh is good; that of the kid, or young goat, is, in most countries, esteemed a delicacy. The milk is very rich and nutritious, more easy of diges-

tion than that of the cow, and is often useful to consumptive patients. Some goats yield as much as four quarts of milk daily, although the average quantity is more nearly two. The skin of the goat was early used for clothing, and is now dressed as leather for many uses, particularly for making gloves and the finer kinds of shoes. The hair, which may be advantageously clipped annually, is used for making ropes which are indestructible in water. The horns are used for making knife-handles, etc., and the fat is said to be superior to that of the ox for candles. Goats are found wild only in mountainous countries; they all exhibit a great aptitude for scrambling among rocks and bushes, are extremely sure-footed on narrow ledges and pinnacles, and display great strength and agility in leaping. The Rocky Mountain goat is an animal of the antelope family. Its size is about that of an ordinary sheep, and its general appearance is not unlike that of a sheep of the Merino breed, its long, straight hair hanging down in an abundant white fleece.

Gold. On account of its beautiful color and since it does not become tarnished or corroded in use, is considered the most precious of metals and is used as the principal basis of value throughout the civilized world. It has been known from time immemorial, and is found in many parts of the world. It is usually found in the metallic or native state in the form of nuggets or smaller particles, in sand or gravel, or distributed through rocks or veins. Nuggets weighing as much as 1,000 ounces have been found. Native gold always contains some silver. The metal is also found in combination with tellurium as "telluride ore," and it frequently accompanies copper ores and iron pyrites. The extraction of gold from sands or gravels, called alluvial or placer mining, is accomplished by washing with water in various ways. The heavy gold sinks to the bottom when the material is stirred up with water, and mercury (quicksilver) is usually used to amalgamate the gold and hold it. Solid ores have to be powdered by stamp mills or other devices before the gold can be extracted, and sometimes they must be heated to redness (roasted) to drive off tellurium or other things. One of the modern methods of extracting gold from ores consists in dissolving out the metal with water containing potassium cyanide. This is known as the "cyanide process." Gold is the heaviest of all the familiar metals except platinum. It is more than nineteen times as heavy as water. In malleability it stands first among the metals, being capable of being beaten to a thickness of $\frac{1}{250000}$ of an inch and ductile enough to be drawn into a wire 500 feet long and weighing only one grain. It may be alloyed with other metals to change the color for designs. The best known alloy of gold is that with copper, which is used for gold coins. The chief gold discoveries have been in California, 1848; Australia, 1851; British Columbia, 1858; New Zealand and Nova Scotia, 1861; South Africa, 1868; West Australia, 1870; South Australia, 1886; Alaska and Klondike.

Goose. A genus of web-footed birds, having the bill not longer than the head,

more high than broad at the base, the upper mandible slightly hooked at the tip; the legs placed farther forward than in ducks, and so better adapted for walking; the neck of moderate length, with sixteen vertebræ, a character which widely distinguishes them from swans. In general, geese spend more of their time on land than any other of the *Anatidæ*, feeding on grass and other herbage, berries, seeds, and other vegetable food. Although large birds, and of bulky form, they have great powers of flight. They strike with their wings in fighting, and there is a hard callous knob or tubercle at the bend of the wing, which in some species becomes a spur. The domestic goose is regarded as deriving its origin from the Gray Lag goose or common wild goose, but all the species seem very capable of domestication, and several of them have been to some extent domesticated. The Gray Lag goose is almost three feet in length from the tip of the bill to the extremity of the short tail. Its extent of wing is about five feet. The wings do not reach to the extremity of the tail. The weight of the largest birds is about ten pounds. The color of the plumage is gray, varying in some parts to grayish-brown; the rump and belly white, the tail grayish-brown and white; the bill is orange, the nail at the tip of the upper mandible white. The young are darker than the adults.

Guinea Pig or Cavy. A small animal belonging to the family of rodents. It is indigenous to South America, and has been introduced into many parts of Europe, where it is domesticated as a pet. It possesses a very low degree of intelligence; in its natural home it is gregarious, and is usually found living on dry lands covered with low brushwood. The color of the guinea pig is variegated, and its tail is quite rudimentary. It is an extremely prolific animal, and begins to breed at the age of ten months, producing many broods in a year; each litter usually consists of about eight. The origin of the popular name of this animal is quite unknown; it appears to be very inappropriate, for the animal does not come from Guinea, nor yet is it a pig.

Hippopotamus. A genus of animals nearly allied to the pigs, hogs, and peccaries, and belonging to the class *Ungulata*. The group is represented by only one (well-established) living species, the *Hippopotamus amphibius*, or River horse, of Africa. It is enormously bulky and unwieldy, attaining a height of five feet, and a length of as much as twelve feet. The feet are massive, and are terminated by four hoofed toes; the skin is very thick and strong. Between the skin and the flesh there is a layer of fat, which is salted and eaten by the Dutch settlers of South Africa. The hippopotamus feeds entirely upon vegetable substances, such as grasses and shrubs; it dives and swims with great facility.

Horse. An ungulate or hoofed mammal. The horse proper is characterized by the tail being furnished with long hairs from its base; by the long and flowing mane; by the possession of a bare callosity on the inner surface of the hind as well as of the fore legs; and by the head and ears being smaller and the limbs

longer than in the ass and other species related to the horse. The native country of the horse seems to have been Central Asia. It became early domesticated in Egypt. It is mentioned throughout the Bible. The people of Thessaly were excellent equestrians, and probably first among the Greeks who broke horses in for service in war; whence probably arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B. C. The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the Ninth Century, horses were only shod in time of frost. Shoeing was introduced into England by William I., in 1066. It is believed that the original breed of horses is extinct, and that the half-wild herds existing in many places have descended from animals once in captivity. Thus, when the horse was first introduced by the Spaniards in 1537, at Buenos Ayres, there were no wild horses in America. But individuals escaping ran wild, and, by 1580, their descendants had spread over the continent as far as the Straits of Magellan. Their favorite abode is on the Pampas, where they now exist in untold numbers. But there was found in La Plata a now extinct species of horse, and more Equidæ have been found in the New than in the Old World. The horse may have descended from a striped ancestor, stripes still sometimes remaining, especially in duns and mouse-duns. His present colors are brown, gray, or black, sometimes with roundish pale spots. His age is ascertained by examining first which teeth are developed, and then to what extent they have been worn away by use. They are best tamed by kindness. Like other domestic animals the horse has run into various breeds. The most celebrated is the Arab horse. Great attention is given in America to the breeding of horses, and American horses have won races both in England and on the Continent. The fear that the horse would go out of fashion on account of bicycles and automobiles seems unfounded. A similar fear was expressed when the railway took the place of the stage-coach.

Hyena. A genus of carnivorous animals, containing three species. Two of these, the Spotted Hyena and the Brown Hyena, are entirely confined to the African continent; while the third species, the Striped Hyena, is found in Northern Africa, and ranges over all the open country of India to the foot of the Himalayas, and through Persia and Asia Minor. These animals have a villainous appearance, and are covered with coarse bristly hair, short over the greater portion of the body, but produced into a mane along the ridge of the neck. The hind legs are shorter than the fore, giving the body a slope from the withers to the haunches. In size they are somewhat larger than a shepherd's dog. The cheek-muscles are greatly developed, and the large grinding teeth have great conical crowns, giving to them the power of smashing the thigh-bones of animals the size of a horse, and enabling them to procure their favorite morsel, the marrow. As carrion-feeders they are useful scavengers. All the species are nocturnal in their habits.

Insects. A class of invertebrate animals, in which the body is divided into a variable number of segments, which usually become modified to form three distinct regions, known as the head, the thorax, and the abdomen. The total number of segments never exceeds twenty. Of these, five, and probably six, become completely united to form the head, which carries four pairs of appendages, viz: a pair of antennæ, a pair of mandibles, and two pairs of maxillæ, the second pair of which together constitute the labium. There is generally a pair of compound eyes on the sides of the head, and sometimes simple eyes, or *ocelli*, also. The thorax always consists of three segments, which are termed respectively the prothorax, the meso-thorax, and the meta-thorax. Each of these carries a pair of jointed legs, and the possession of these six legs is characteristic of the whole class of insects; when wings are present they are attached to the second or third thoracic segments, or to both. The remaining segments constitute the abdomen; they have no appendages. The organs of the mouth in insects are of two principal types, viz: *masticatory* (beetles, dragon-flies, ants, etc.), and *suctorial* (butterflies, moths, fleas, gnats, etc.). The digestive apparatus, or alimentary canal, usually consists of an æsophagus, a crop, a gizzard, a stomach, a small intestine, a large intestine, and a rectum, together with organs playing the part of liver and kidneys. There is no definite and regular course of circulation in insects. The heart is represented by a contractile tube, situated on the back, and termed the *dorsal vessel*. Respiration is effected by means of branching air tubes, or *tracheæ*, which ramify through the entire body, and open on the exterior by lateral apertures, known as *stigmata*, or *spiracles*. The nervous system consists of a chain of ganglia placed on the ventral surface, and connected by a series of double cords. The sexes of insects are in different individuals, and most are oviparous. Most insects in the course of their lives pass through a series of changes, which constitute the *metamorphoses*, before attaining maturity.

Jaguar. A carnivorous mammal, belonging to the cat family. In size it is rather larger than the leopard, but is more elegant in form and in the beauty of its skin, the ground color of which is pale brownish-yellow, variegated on the upper parts with streaks and irregular oblong spots of black. The top of the back is marked with long uninterrupted stripes, and the sides with rows of regular open marks; on the thighs and the legs are full black spots; the breast and the belly are whitish; the tail is not so long as the body, and is spotted irregularly with black. This animal is one of the most formidable beasts of prey found in America, being of an extremely fierce nature. It inhabits North and South America, extending from the southern regions of the United States, through Mexico, Central America, and Brazil, as far south as Paraguay. Wooded banks of rivers are its favorite haunts, and it is said to frequent the reedy margins of lakes, seeming to have a great predilection for water. It preys chiefly upon the water-hog, and is said

to catch fish; but occasionally it kills horses and cattle, and even men. The jaguar is a noisy animal, roaring much at night, especially on the approach of bad weather.

Kangaroo. A family of pouch-bearing animals. They are the most highly developed members of the order, and are peculiarly suited for the conditions of life in Australia, over all parts of which they range, supplying the place of deer and cattle. The family comprises no fewer than fifty-six species, and of these the Great Kangaroo may be taken as a type. This species was formerly plentiful, and roamed over all the plains, but it is now fast retiring before the colonist. The fore-limbs are small; the hind-limbs very large and thick; the head small, with rather long ears, and a long, dusky-brown muzzle; the body long, with the fur shortish but thick, and of a grey-brown tint. In height it is as tall or taller than a man. The female carries her young in a pouch on the underside of the belly. When moving quickly the hind-limbs alone are brought into action, and by means of these the animal bounds along in great leaps of from ten to fifteen feet, the body being carried in a nearly horizontal position, and the tail extended to balance it. The fore-limbs are chiefly used in handling, and with these the females lift their young, and place them in the pouch. The kangaroos are vegetable feeders, delighting in grasses, leaves, and herbs.

Lark. The common name of birds comprising the genus *Alauda* and *Sturnella*. The Sky-lark, or Laverock, of Europe, the most harmonious of this musical tribe, commences its song early in the spring, continues it during the whole summer, and is one of those few birds that chant while on the wing. When it first rises from the earth, its notes are feeble and interrupted; as it ascends, however, they gradually swell to their full tone, and long after it is lost to the sight it still continues to charm the ear with its melody. It mounts almost perpendicularly, but descends in an oblique direction, unless threatened with danger, when it drops like a stone. The Meadow-lark of North America, about ten inches long, somewhat resembles the Sky-lark in its habits, but its song is not so sweet and harmonious.

Leopard. The *Felis Leopardus* differs from the panther only by having small spots thickly set, while the panther's spots are large and open. The species is a native both of Africa and Asia. The body of this fierce and rapacious animal is about four feet long. From the great flexibility of the limbs and spine, it can take surprising leaps, swim, crawl, and ascend trees.

Lemon. A plant of the genus *Citrus*, belonging to the order *Aurantiaceæ*, which also includes the orange, lime, citron, etc. The lemon is a native of Northern India, and is extensively cultivated for its fruit, the pulp of which abounds in citric acid, and is much used in the manufacture of cooling and effervescing drinks. The peel, or rind, is covered with glands containing oil, which is used as an aromatic: when dried and preserved, it forms an article of commerce, and is used for flavor-

ing. The produce of the lemon groves of the Mediterranean is chiefly imported to the north.

Lilac. A genus of plants belonging to the natural order *Oleaceæ* (which includes the ash, jessamine, olive, etc.). The lilacs are natives of the east; they are shrubs or small trees; and the flowers are characterized by a four-cleft corolla, by two stamens, and by a two-valved fruit. Several species are cultivated for ornamental purposes, the common lilac being one of the most extensively cultivated shrubs in Europe. Lilac bark is used as a febrifuge in some parts of France.

Lily. A popular name applied to plants of several genera belonging to the order *Liliaceæ*, but especially to the individuals constituting the genus *Lilium*. They are herbaceous, with scaly bulbous roots and conspicuous flowers, on account of which they are great favorites with the horticulturist, and are extensively cultivated. The tiger lily, with its showy yellow flowers, is a native of warm climates, and is peculiar in producing bulbs in the axils of the leaves and capable of independent growth. The white lily and the orange lily are also familiar under cultivation. The bulbs are rich in starch, and in some districts those of certain species are used as food.

Lion. The largest and most majestic of carnivorous quadrupeds. It is, when mature, of a nearly uniform tawny or yellowish color, paler on the under parts, the young alone exhibiting markings like those common in the *Felidæ*; the male has, usually, a great shaggy and flowing mane, and the tail, which is pretty long, terminates in a tuft of hair. The whole frame is extremely muscular, and the foreparts, in particular, are remarkably powerful, giving, with the large head, bright, flashing eye, and copious mane, a noble appearance to the animal, which, with its strength, has led to its being called the "king of beasts." A lion of the largest size measures about eight feet from the nose to the tail, and the tail about four feet. The lioness is smaller, has no mane, and is of a lighter color on the under parts. The strength of the lion is such that he can carry off a heifer as a cat carries a rat. The lion is chiefly an inhabitant of Africa, although it is found also in some of the wilds of Asia, particularly in certain parts of Arabia, Persia, and India. It was anciently much more common in Asia, and was found in some parts of Europe, particularly in Macedonia and Thrace, according to Herodotus and other authors. The lion is not, in general, an inhabitant of deep forests, but rather of open plains in which the shelter of occasional bushes and thickets may be found. The lion is easily tamed, at least when taken young and when abundantly supplied with food. Lions were made to contribute to the barbarous sports of the ancient Romans; a combat of lions was an attractive spectacle, and vast numbers were imported into Rome, chiefly from Africa, for the supply of the amphitheater. Pompey exhibited 600 at once. The mane of the lion and the tuft at the end of the tail are not fully developed till he is six or seven years old. The tail terminates in a small prickle, the existence of which was known to the

ancients, and which was supposed by them to be a kind of goad to the animal when lashing himself with his tail in rage. There are several varieties of the lion, slightly differing from each other in form and color, but particularly in the development of the mane. The largest lions of the south of Africa are remarkable for the size of the head and the great black mane.

Llama. The popular name of the genus *Auchenia*, family *Camelidæ*. The llama proper, and the Alpaca or Peruvian sheep, which is entirely confined to Peru, are, according to Cuvier, only domesticated forms of the Guanaco, while Humboldt considers them as distinct species. The Vicuna, which belongs to the same genus, is a more beautiful animal than any of its congeners. In size, it is intermediate between the llama and the alpaca. Its neck is longer and more slender than theirs; its wool is also finer, short, and curled. It is of a rich brown color, with patches of white across the shoulders, and the inner side of the legs. The Vicuna inhabits the most desolate parts of the Cordillera, at great elevations; like the wild goat and the antelope, it is a very active animal.

Lobster. A familiar invertebrate animal, belonging to the order *Crustacea*, and inhabiting the sea. Lobsters are found in great numbers about many European shores, and the greater part of those taken to English markets are supplied from Norway; they are also quite numerous on the coasts of North America. The body of the lobster is composed of two principal divisions, popularly termed head and tail; the former, however, which is technically called the *cephalo-thorax*, is constituted (as the name implies) by both head and thorax; the tail is the abdomen. The body carries twenty pairs of appendages, consisting of feelers, jaws, claws, legs, etc. The nervous system consists of a chain of ganglia placed along the under surface. The stomach and the intestines form a long and straight canal. Lobsters are extremely combative, and fight furiously, the vanquished party usually leaving one of its limbs in its opponent's grasp.

Macaw. A genus of beautiful birds of the parrot tribe. The macaws are magnificent birds, distinguished by having their cheeks destitute of feathers, and their tail-feathers long (hence their generic name). They are all natives of the tropical regions of South America. The largest and most splendid in regard to color is the great scarlet or red and blue macaw. The great green macaw and the blue-and-yellow macaw are somewhat smaller.

Magnolia. A genus of trees and shrubs, named from Pierre Magnol, a French botanist of the Seventeenth Century. The species, which chiefly inhabit North America, Northern India, Chian, Japan, and other parts of Asia, are trees much admired on account of the elegance of their flowers and foliage, and are in great request in gardens. In their native countries some of them attain great height, and have flowers ten inches across. The bark of the root of the beaver-tree is an important tonic. The umbrella-tree has also tonic properties. The cones of some species yield a spirituous liquor, employed in Virginia in rheumatic affections.

Big-laurel and the yulan or Chinese magnolia, grow well in the south of England, and are splendid ornamental trees. The yulan is remarkable in that it flowers in spring before the leaves expand.

Magpie. A bird belonging to the crow family. There are several species, two of which belong to America. The common European magpie is about eighteen inches in length; the plumage is black and white, the black glossed with green and purple; the bill is stout, and the tail is very long. The magpies continue in pairs throughout the year, and prey on a variety of food, chiefly animal. They are determined robbers of other birds' nests, destroying the eggs and young birds. In captivity they are celebrated for their crafty instincts, their power of imitating words, and their propensity to purloin and secrete glittering articles.

Mahogany. This tree is a native of the West Indies and of Tropical America. It is a tree of considerable magnitude, with compound leaves of several pairs of leaflets, and yellowish white flowers. Mahogany is applied to many uses. It is a fine wood, of close texture, of a reddish color shaded with brown, and is capable of taking a fine polish. It varies much in value according to the color and markings. The mahogany tree is found most commonly on the coasts of Honduras and Campeachy, and also in the islands of Cuba and Hayti. It was formerly plentiful in Jamaica. The wood obtained from Honduras and Campeachy is often termed bay-wood; that from Cuba and Hayti (which is of finer quality) is known in the market as Spanish mahogany. There are one or two other varieties of mahogany, produced by trees belonging to the same natural order, and natives of the East Indies.

Man. The only species composing the order of *Mammals Bimana*. He possesses two prehensile hands, with fingers protected by flat nails; two feet with single soles, a single stomach, and three kinds of teeth: *incisive*, *canine*, and *molar*. His position is upright; his food both vegetable and animal; his body without natural covering. Blumenbach divides mankind into five varieties: (1) The first occupies the central parts of the old continent, namely, Western Asia, Eastern and Northern Africa, Hindostan, and Europe. Its characters are, the color of the skin, more or less white or brown; the cheeks tinged with red; long hair, either brown or fair; the head almost spherical; the face oval and narrow; the features moderately marked; the nose slightly arched; the mouth small; the front teeth placed perpendicularly in the jaws; the chin full and round. This is called the *Caucasian*, from its supposed origin in the Caucasus. (2) The second variety has been termed the *Eastern*. The color in this race is yellow; the hair black, stiff, straight, and rather thin; the head almost square; the face large, flat, and depressed; the features indistinctly marked; the nose small and flat; the cheeks round and prominent; the chin pointed; the eyes small. This variety comprises all the Asiatics to the east of the Ganges and of Mount Beloor, except the Malays; it also includes the Turks, Egyptians, Persians, Hindoos, Tartars.

Chinese, etc. (3) The *American* variety. (4) The fourth variety is called by Blumenbach the *Malay*, and described as of a tawny color; the hair black, soft, thick, and curled; the forehead a little projecting. This variety comprehends the islanders of the Pacific Ocean. (5) The remaining variety is the *Negro*. Its characters are: color, black; hair, black and woolly; head, narrow; forehead convex and arched; cheek-bones projecting; nose large, and almost confounded with the upper jaw; the upper front teeth obliquely placed; the lips thick; the chin drawn in; the legs crooked. This race is found in Western and Southern Africa, and the great islands of the Pacific, generally in the interior. There are very great differences in the tribes included in this variety; as witness, the Negro, with the complexion of jet, and woolly hair; the Kaffre, with a copper complexion and long hair; the sooty Papuan, or New Guinea-man; the native of Van Diemen's Land; and the Hottentot. The structure of man is essentially the same in kind as that of other mammals, differing only or mainly in degree; yet the degrees of difference separate him widely from all other animals, and place him in an order by himself, and far above all other organized beings. He is the only animal to which the erect posture is natural; his whole organization is adapted to that attitude. His brain is the largest in the

animal kingdom, excepting that only of the elephant and of the whale, and in its organization is far superior to that of any other animal. His face is a model of beauty, and endowed with a wonderful power of expression. The hand of man is superior in its structure and in its functions to the corresponding member of any other animal. Man alone truly speaks a language. Even physically considered, he is the highest possible expression of a vertebrate. But man is the highest representative of the animal kingdom, not only on account of his superior form and higher physical organization, but, above all, on account of those high mental and spiritual endowments which belong to him alone, and which enable him to understand and appreciate the wonderful and sublime harmonies of the material and moral world, and his own relations to the Author of nature and of revelation. While each species of the lower animals is limited to a given region or country, and in many cases cannot survive a removal, man's home is the whole earth—he alone is truly cosmopolite. It is not possible to fix the date of man's appearance upon the surface of the globe, or even to approximate to it, but the researches of modern geologists show that there is apparent evidence of his existence far beyond that which is assigned by our popular chronology.

RACES OF MANKIND

Arranged by Ethnologist Fignier and others.

WHITE RACE		
European Branch.	Teutonic Family,	Scandinavians, Germans, English.
	Latin Family,	French, Spaniards, Italians, Moldo-Wallachians.
	Slavonian Family,	Russians, Finns, Bulgarians, Servians, Magyars, Croats, Czechs, Poles, Lithuanians.
Aramean Branch.	Greek Family,	Greeks, Albanians.
	Libyan Family,	Egyptians, Berbers.
	Semitic Family,	Arabs, Jews, Syrians.
	Persian Family,	Persians, Afghans, Kurds, Armenians, Ossetes.
	Georgian Family,	Georgians.
	Circassian Family,	Circassians, Mingrelians.
YELLOW RACE		
Hyperborean Branch.	Lapp Family,	Samoyed, Kamtschadale, Esquimau, Tenissian, Jukaghirite, and Koriak Families.
Mongolian Branch.	Mongol Family,	Mongols, Kalmucks, Buriats.
	Tunguse Family,	Tunguses, Manchus.
	Turk Family,	Turcomans, Kirghis, Nogays, Osmanlis.
Sinaic Branch.	Yakut Family,	Yakuts.
	Chinese Family,	Chinese.
	Japanese Family,	Japanese.
	Indo-Chinese Family,	Burmese, Siamese.
BROWN RACE		
Hindo Branch.	Hindo Family,	Sikhs, Jats, Rajpoots, Mahrattas, Bengalese, Cingalese.
Ethopian Branch.	Malabar Family,	Malabars, Tamils, Telingas.
	Abyssinian Family,	Abyssinians, Berabras, Gallas.
Malay Branch.	Fellan Family,	Fellans.
	Malay Family,	Malays, Javanese, Battas, Bougis, Maccassars, Dyaks, Togals.
	Polynesian Family,	Maoris, Tongas, Tahitians, Pomotouans, Marquesans, Sandwichians.
	Micronesian Family,	Ladrone, Caroline, and Mulgrave Islanders.
RED RACE		
Southern Branch.	Andian Family,	Quichuas (or Incas), Antis, Andians, Araucanians.
	Pampean Family,	Patagonians, Puelches, Charruas, Tobas, Moxas, Abipous, etc.
	Guarani Family,	Guaranis, Bocotudos.
Northern Branch.	Southern Family,	Aztecs, Mayas, Lencas, Othomis, Tarascas, etc.
	Northeastern Family,	Cherokees, Hurons, Iroquois, Sioux, Apaches, Comanches, Creeks, etc.
	Northwestern Family,	Chinooks, Digger Indians, Nootkans, etc.
BLACK RACE		
Western Branch.	Kaffre Family,	
	Hottentot Family,	
	Negro Family,	
Eastern Branch.	Papuan Family,	Fijians, New Caledonians, etc.
	Andaman Family,	Andamans, Australians.

Manatee. The sea-cow or lamantin, a gregarious aquatic mammal of the genus *Manātus*, order *Sirenia*, found on the coasts of South America, Africa, and Australia. They generally frequent the mouths of rivers and estuaries, and feed on algæ and such littoral land vegetations as they can reach at high tide. Their anterior limbs or swimming paws are furnished with nails by means of which they drag themselves along the shore. They are large awkward animals, attaining a length of eight to ten feet as a rule, but sometimes growing to twenty feet. The skin is of a grayish color, sparsely covered with hairs. Their flesh is excellent, and they furnish a soft, clear oil which does not become rancid. There are several species, the principal being the American manatee, which inhabits the shallow waters of the east coasts of South and North America, and the African manatee.

Mandrill. A species of baboon which is distinguished by the short or rudimentary tail, by the elongated, dog-like muzzle, and by the presence of buttock callosities which are generally brightly colored. The mandrill inhabits Western Africa, where they associate in large troops. Full-grown males measure about five feet; they are exceedingly strong and muscular, and fierce in disposition. It has cheek protuberances colored with stripes of brilliant red and blue.

Mangrove. A genus of plants consisting of trees or shrubs which grow in tropical countries along the muddy beaches of low coasts, where they form impenetrable barriers for long distances. They throw out numerous roots from the lower part of the stem, and also send down long, slender roots from the branches, like the Indian banyan-tree. The seeds germinate in the seed-vessel, the root growing downward till it fixes itself in the mud. The wood is dark-red, hard, and durable, and the bark is used for tanning.

Manna. The sweet, concrete juice which is obtained by incisions made in the stem of a species of ash, *Fraxinus Ornus*, a native of Sicily, Calabria, and other parts of the south of Europe. The manna of commerce is collected in Sicily, where the manna-ash is cultivated for the purpose in regular plantations. The best manna is in oblong pieces or flakes of a whitish or pale-yellow color, light, friable, and somewhat transparent. It has a slight peculiar odor, and a sweetish taste mixed with a slight degree of bitterness, and is employed as a gentle laxative for children or persons of weak habit. It is, however, generally used as an adjunct to other more active medicines. Other sweetish secretions exuded by some other plants growing in warm and dry climates, as the *Eucalyptus mannifera* of Australia, the *Tamarix mannifera* or *gallica* of Arabia and Syria, are considered to be kinds of manna. Small quantities of manna, known under the name of *Briançon manna*, are obtained from the common larch. In Scripture we are told that a substance called manna was miraculously furnished as food for the Israelites in their journey through the wilderness of Arabia. Some persons identify it with the saccharine substance yielded by the *Tamarix mannifera*.

Maple. A name for trees of the genus *Acer*, natural order *Aceraceæ* or *Sapindaceæ*, peculiar to the northern and temperate parts of the globe. About fifty species are known, distributed through Europe, North America, and different parts of Asia. They are small or large trees, with a sweetish, rarely milky, sap, usually lobed leaves, and small greenish flowers.

Mistletoe. An American and European plant growing parasitically on various trees, and celebrated on account of the religious purposes to which it was consecrated by the ancient Celtic nations of Europe, being held in great veneration by the Druids, particularly when it was found growing on the oak. It is a small shrub, with sessile, oblong, entire, somewhat leathery leaves, and small, yellowish-green flowers, the whole forming a pendent bush, covered in winter with small white berries, which contain a glutinous substance. It is common enough on certain species of trees, such as apple and pear trees, hawthorn, maple, lime and other similar trees, but is very seldom found on the oak. Its roots penetrate into the substance of the tree on which it grows, and latterly it kills the branch supporting it. Traces of the old superstitious regard for the mistletoe still remain in Germany and England, as kissing under it at Christmas.

Mocking Bird. A genus of the family *Turdidæ*, or Thrushes, exclusively American in its distribution, but ranging widely over the northern and southern portions of that continent. These birds are remarkable for their power of song. The best known species is *Mimus polyglottus*, which has marvelous power of voice, and is able to imitate almost any species of animal, as well as noises produced artificially. Its own song is loud, full, and exceedingly varied. In plumage it is decidedly somber, being of a general ashy-gray hue, paler beneath; but, though the mocking bird cannot vie with other American birds in brilliancy of plumage, its sweet and varied notes, and its faculty of imitation, render it a prime favorite.

Monkey. The popular name of a large group of animals, belonging to the order *Primates*, or the Cuvierian order *Quadrumana*, and to the class *Mammalia*. The name is frequently used to comprehend the members of the following families and sub-families of the order, viz: the *Simiidæ* (Anthropoid Apes and Gibbons), the *Semnopithecinaæ* (Old World Monkeys), the *Cynopithecinaæ* (Baboons and Macaques), the *Cebidæ* (American Monkeys), and the *Hapalidæ* (Marmosets). In a restricted sense, however, it is only applicable to certain members of some of the above families and sub-families, and cannot be correctly applied to the apes and gibbons (*Simiidæ*), or to the baboons. The characteristics of the different species of monkeys are so very varied, that it is impossible to frame a general definition of them that would be applicable to all, and the limits of space preclude us from entering into a description of each species. The *Semnopithecinaæ* comprise the long-tailed monkeys without cheek-pouches, which have rather long, rounded faces and more prominent muzzles; they are widely distributed over Africa and Asia. The *Cynopithecinaæ* contain all the

monkeys with cheek-pouches; they have affinities with the baboons, and are generally distributed over Africa, Asia, and the Malay Islands, one species, the Gibraltar monkey, being the only monkey inhabiting Europe. The family *Cebidæ* comprise all the larger American monkeys, which differ from those of the old world in having an additional molar tooth, or grinder, in each jaw, and the nostrils widely separated; while they have neither cheek-pouches nor callosities, and their thumbs are never completely opposable; some have a prehensile tail, which is as useful to them as an additional limb in their arboreal haunts. The members of this family are strictly confined to the forest regions of tropical America, from Southern Mexico to Northern Chile. The last family, the *Hapalidæ*, comprises the marmosets, which are strictly South American in their distribution. The habitats of all monkeys are chiefly confined to forests, for which their form is especially adapted, enabling them to climb trees with ease, and to leap from branch to branch with extraordinary agility. Here they are masters of the situation, the only foe they dread being the serpent, which alone can reach them in their arboreal retreats. Their food consists chiefly of fruits and other vegetable substances; but, in addition to these, birds and their eggs, and insects, are by no means unacceptable to them.

Mosses. A large group of flowerless plants of diminutive size, which constitute the class *Musci*. Mosses are among the most extensively diffused of all plants, and are both terrestrial and aquatic in habits. They consist of a leafy stem, the leaves being often closely packed or overlapping one another. The fructification of mosses is somewhat complicated, and may be compared to that of ferns in all essential points. A capsule is first produced, and borne at the top of a long foot-stalk which springs from a tuft of leaves. It is covered at first by a hood, termed the *calyptra*, but this afterwards falls off, and the capsule is then seen to be closed by an *operculum* or lid, which eventually bursts away to allow of the escape of the contained spores. The mouth of the capsule, when the *operculum* has fallen off, is seen to be surrounded by a row of minute teeth which constitute the *peristome*. The development of the spore gives rise to a branching filament, on several points of which buds appear, which become leafy stems; and some of these produce true reproductive organs, the male organs being termed *antheridia*, and the female organs *archegonia*; these may be borne by the same plant, or by different plants. Several thousand species of mosses are known, and many of them are extremely beautiful, especially under the microscope.

Moth. The popular name of a numerous and beautiful division of lepidopterous insects, readily distinguished from butterflies by their antennæ tapering to a point instead of terminating in a knob, by their wings being horizontal when resting, and by their being seldom seen on the wing except in the evening or at night (though some moths fly by day); hence the terms crepuscular and nocturnal lepidoptera applied to them. Amongst the more notable of

the moths are the "feather" or "plume-moths," the "death's-head moth," the "clothes-moths," and the "silk-moth."

Mother-of-pearl, or Nacre. The hard silvery, brilliant, internal or nacreous layer of several kinds of shells, particularly of the oyster family, often variegated with changing purple and azure colors. It is destitute of coloring matter, but is composed of a series of minute and slightly imbricated layers or ridges which have the power of decomposing the rays of light, thus producing beautiful iridescent hues. The large oysters of the tropical seas alone secrete this coat of sufficient thickness to render their shells available for the purposes of manufacture. Mother-of-pearl is extensively used in the arts, particularly in inlaid work, and in the manufacture of handles for knives, buttons, toys, snuff-boxes, etc.

Mouse. The name given to certain species of small mammals, belonging to the order *Rodentia*, or gnawing animals. The mice, along with the rats, form the very extensive genus *Mus*, and, with other allies, the family *Muridæ*. The British species of mice are the *Common House Mouse*, which is too familiar to need any description; the *Harvest Mouse*, the smallest and at the same time one of the prettiest of British mammals, which in the summer constructs a curious nest high up in the straws of the standing corn, retiring in the winter into burrows, in which it hibernates; and the *Long-tailed Field Mouse*, which frequents fields and gardens. The *Dormouse* belongs to another family, *Myoxidæ*, of the same order.

Mulberry. A fruit-tree of the genus *Morus* akin to nettles. The black or common mulberry (*Morus nigra*) is the only species worthy of being cultivated as a fruit-tree. The fruit is used at dessert, and also preserved in the form of a syrup. The juice of the berries mixed with that of apples forms a beverage of a deep port-wine color.

Mule. A hybrid animal between the horse and the ass, differing in size, strength, and beauty, according to the predominance of its parental species; those between a male ass and a mare being far superior to the progeny of a she-ass with a horse. In mountainous countries mules are highly serviceable; no beast of burden being either so sure-footed, or so capable of enduring fatigue; but in beauty of form they fall very short of that noble quadruped, the horse; the mule having a large, clumsy head, long erect ears, a short mane, and a thin tail.

Mongoose. A species of ichneumon, otherwise known as the "gray" or "Indian" ichneumon. Being easily domesticated, it is kept in many houses in Hindustan to rid them of reptiles and other vermin, as rats, mice, etc. It has been said that it neutralizes the poison of snakes, which it fearlessly attacks, by eating, during its contests with them, the snake-root; but its immunity is really due to the extreme celerity of its movements. It is of a gray color flecked with black, and about the size of a rat.

Musk-deer. A genus of deer, forming the type of the family *Moschidæ*, which is essentially distinct from the family of the *Cervidæ*, or true deers. Their chief habitat is Asia and the is-

lands of the Eastern Archipelago; though one species is found on the west coast of Africa. The typical species of the family is found chiefly in the elevated tablelands of Central Asia, and particularly of Tibet. These animals attain the size of a young roe-deer, and the upper jaw bears prominent canine teeth. The males alone yield the musk, which is secreted by an abdominal gland of about the size of a hen's egg. The Tibet musk is most in repute, that known as Russian or Siberian being inferior in quality. Besides its familiar use as a scent, musk is employed medicinally as an antispasmodic. There are six or seven other species of *Moschus*, two of which, very diminutive, lack the musk gland.

Musk-ox. An animal intermediate between the ox and sheep. Resembling in general appearance a large goat-like sheep, its body is covered with a coat of tufted hair, brownish in color and of great length. The hair about the neck and shoulders is so thick as to give the animal a "humped" appearance; on the rest of the body it is very long, smooth, and flowing, while interspersed among its fibers is a layer of lighter-colored wool. The musk-ox is active and agile, and climbs mountainous places with ease and dexterity. The horns, broad at the base and covering the forehead and crown, curve downwards between the eye and the ear, and then upwards and slightly backwards. The horns of the female are smaller than those of the male, and their bases do not touch. The ears are short, the head large and broad, the muzzle blunted. The average size of the male is that of a small domestic ox. The food consists of grass, lichens, etc. The musk-ox inhabits the Arctic regions of America north of the sixtieth degree of latitude. The flesh is pleasant to the taste, though it smells strongly of musk, the odor of which is also diffused from the living animal.

Nightingale. A genus of birds belonging to the order *Passeres*, of which there are two species, very similar in plumage, inhabiting Europe, Western Asia, and North Africa. One of these is a summer-visitant to the southern and eastern counties of England, arriving about the middle of April; it occurs very occasionally as far north as Mid-Yorkshire. The plumage of this delightful songster is of a somber hue, being on the upper surface of a reddish brown, redder on the head and rump; the tail a lighter tint; the throat, lower part of the breast, and abdomen, greyish white; the lower neck and sides pale, greyish brown. The favorite haunts of this bird are copses and hedge-rows, and its food consists of insects of various descriptions. The nest is composed of dry leaves, lined with grass, roots, and hair. The eggs are four or five in number, and of a uniform olive-brown, tinged with greyish blue.

Opossum. A family of mammals, belonging to the order of pouch-bearers, which range throughout the wooded districts of America, from the southern boundary of Texas to the La Plata River, where they are most numerous; while one species is found in North America, from Florida to the Hudson River, and west to the Missouri. They are rat-like in form, and the largest species is about the size of the com-

mon cat; they have a long tail, which is almost destitute of hair, and is very useful from its prehensile nature, enabling the animal not only to hang by it, but also to climb and descend trees. They are sly and intelligent, and live chiefly in trees, lying up in the daytime, and at night roaming abroad in search of their food, which consists of insects, small reptiles, birds' eggs, etc. Some species have no marsupium, or pouch, or it is very slightly developed; and in these particular species the young, on leaving the nipples, are carried on their mother's back, retaining their position by entwining their tails around hers. The opossums may be divided into three groups: those whose pouch is well developed, those in which it is a mere fold, and those which have webbed feet, and live in the water like otters.

Orange. The name given to certain plants of the genus *Citrus*. The common or sweet orange is in universal request for its fruit. It is an evergreen tree, with oblong leaves and white flowers. It is extensively cultivated in Southern Europe, and, in fact, in every part of the world where the climate is suitable. There are numerous varieties of the common orange, the most important of which are the Chinese or Mandarin orange, the Maltese and St. Michael's oranges, and the blood orange, which is remarkable for the color of the pulp. The Seville or bitter orange is another species, having a bitter fruit of different shape, but of not less importance than the common orange. Its flowers yield the distilled water (orange-flower water), so much used in medicine, and the volatile oil called *essence of Neroli*, used in the preparation of Eau de Cologne. The rind is much used for making marmalade, and in the young state is one of the principal flavoring ingredients of the liqueur Curaçoa. Orange-trees are extremely fruitful, a single tree sometimes producing as many as 20,000 oranges. The importance of these fruits is due to the free acids contained in the pulp, and the volatile oil secreted by the glands which cover the rind. The orange is especially cultivated in the Azores, America, Spain, Portugal, and the Mediterranean regions.

Orang Outang. In zoölogy the Mias of the Dyaks; also known as the "wild man of the wood." It is a dull, slothful animal, but possessed of great strength. These animals are now confined to the swampy forests of Sumatra and Borneo. Their height has been variously stated, but we have not the least reliable evidence of the existence of orangs in Borneo more than four feet two inches high. The legs are very short, the arms are disproportionately long, reaching to the ankle when the animal is placed in an erect position. The males have a longish beard, and they sometimes develop warty protuberances on each side of the face. The resemblance to man in appearance is greatest in the females and in young animals. The head of a baby orang is not very different from that of an average child; but in the adult the muzzle is as well-marked a feature as in the Carnivora. It never walks erect, unless when using its hands to support itself by branches overhead, or when attacked.

Oriole. A family of birds which inhabit Southern Asia, the Malay Islands, Africa, and Australia, while one species, the Golden Oriole, is a summer visitant to Central Europe, and, during the period of migration, is occasionally observed in England. The male of this species is of great beauty, having a brilliant yellow body and black wings and tail. The female is much plainer, being of a greenish hue, streaked with dusky lines. It is about the size of the common thrush. The name *Oriole* is also applied to several American birds, of which the Baltimore Oriole, a bird ranging from Canada to Mexico, is a well-known example. It has the head, throat, wings, and upper back black; the lower back and all the under parts bright orange, deepening into vermilion on the breast.

Ostrich. A family of birds, belonging to the order *Struthioness*; having a raft-like sternum (breast-bone), and consequently not possessing the power of flight. The ostriches are contained in two genera, which are sometimes considered as distinct families. The genus *Struthio* comprises the true ostriches, which inhabit the desert regions of Northeast and South Africa, and of Arabia and Syria. The other genus, *Rhea*, contains the three species of ostriches (of which the *Nandu* is one), inhabiting South America from Patagonia to Brazil. The ostriches, of which there are two species, are generally found in small companies; they are polygamous, each male accompanying three or four females, all of which deposit their eggs in a single large nest scooped out in the sand; all the hens sit and relieve each other by turns, the male also taking his turn and assisting in the incubation of the eggs. The Rheas are distinguished by possessing three toes, whilst the ostriches have only two; the head and neck are fully feathered, and there is no tail visible. Their habits are similar to those of the African birds, but they do not attain to the stature of the latter, and their feathers are not of such beauty.

Owl. The popular name applied to the species of birds formerly regarded as a division of the falcon tribe. This order is a sharply-defined one. The head is extremely large; the eyes huge and directed forward; the bill short and stout; the apertures of the ears very large; the legs feathered; the toes four in number, the outer one capable of being directed backwards. The plumage is full and remarkably soft, the feathers of the face being so arranged as to form two discs around the eyes. The owls are cosmopolitan in their distribution, ranging over the whole of the globe from the highest northern latitudes, and are even found in the remotest oceanic islands. They feed on small mammals, birds, fishes, and insects, swallowing the hair, bones, feathers, and scales, which they afterwards disgorge in the shape of "pellets." Their flight is buoyant and noiseless. They place their nests on the ground, among rocks, in hollow trees, and in buildings, while some resort to the old nests of other birds. They lay from two to five roundish white eggs.

Oyster. A well-known edible shell-fish. The oyster particularly when eaten raw, is easy of digestion, and remarkably nutritious. The

principal breeding-time of the common oyster is in April or May, when their spawn is usually cast; this appears at first like little spots of grease, which fasten upon rocks, stones, or other hard substances that happen to be near. Very commonly they adhere to adult shells; and thus are formed the large masses termed *oyster-banks*. In about a year and a half they attain a size fit for the table.

Palms. A large and important order of plants, which are chiefly trees, often of great height. They have simple (rarely-branched) trunks, marked with scars, which indicate the attachment of former leaves. The leaves are usually either feather-shaped or fan-shaped, arranged in a crown at the summit of the stem, and often of gigantic size. The flowers are commonly male and female, and small, but, when taken collectively, their bright clusters form a striking object. The palms are mostly natives of the tropics, and form one of the most striking characteristics of tropical vegetation. The only European species is the Fan Palm. The properties of the palms are various. The fruits of some are edible, as the cocoa-nut palm and the date palm, and form an important item of food in the countries where they grow. Many supply oils, wax, starchy matter, and sugar, from which an intoxicating beverage is obtained by fermentation and distillation. The palm of the Bible appears to be the date palm. The cocoa-nut palm is one of the most important of the family. Betel-nut is the produce of a palm of the genus *Areca*; and sago is also obtained from the stem of a palm. The Palmyra palm of the East Indies is chiefly important for its timber, which is very hard, heavy, and of a black color.

Panther. A carnivorous animal measuring about six feet and a half from nose to tail, which is itself about three feet long. It differs from the leopard chiefly by its superior size and deeper color. The manner it seizes its prey, lurking near the sides of woods, etc., and darting forward with a sudden spring, resembles that of the tiger. The puma, or cougar, is sometimes called the American panther.

Parrot. The name applied in a general sense to all the members of the order *Psittaci*, which comprises the parrots proper, the cockatoos, parroquets, macaws, lories, nestors, etc. The true parrots have the upper mandible toothed, and longer than it is high, and have a short and rounded tail. These birds combine with the beauty of their plumage a nature of great docility, and have the faculty of imitating the human voice in a degree not possessed by other birds. They are found chiefly in Africa, from whence we get the Grey Parrot, which is the favorite; South America, which is particularly rich in species, furnishes the well-known Green Parrot; and North America is the home of a single species, the Carolina Parrot. The parrots are forest birds, and are adepts at climbing, using for that purpose both the feet and the bill. Their food consists of seeds and fruits.

Partridge. A well-known bird of the grouse family. The common partridge is the most plentiful of all game-birds in Britain, and occurs in nearly all parts of Europe, in North Africa, and in some parts of Western Asia. The

wings and tail are short, the tarsi as well as the toes naked, and the tarsi not spurred. The greater part of the plumage is ash-grey finely varied with brown and black. They feed on grain and other seeds, insects and their larvæ and pupæ, and are chiefly found in cultivated grounds. Besides this species there are the red-legged, French, or Guernsey partridge, which may now be found in considerable numbers in different parts of England; the Greek partridge, the African partridge, the Arabian partridge, the Indian partridge. The name partridge is applied in the United States to several North American species of the genus *Ortyx* or quails.

Passion-flower. A large genus of twining plants belonging to the natural order Passifloraceæ. They are all twining plants, often scrambling over trees to a considerable length, and in many cases are most beautiful objects, on account of their large, rich, or gaily-colored flowers, which are often succeeded by orange-colored edible fruits, for which indeed they are chiefly valued in the countries where they grow wild. *Passiflora laurifolia* produces the water lemon of the West Indies, and *passiflora maliformis* bears the sweet calabash. The name is applied more especially to *passiflora cærulea*, which is commonly cultivated in England out of doors, and is the one to which the genus owes its name.

Peacock. The common name of a genus of beautiful birds, including only the common peacock and the Javanese peacock. The name properly belongs to the male, but it is popularly applied to the species in general; though the female is, for distinction's sake, called a peahen. Like other domesticated birds, the common peacock exhibits several varieties. The ordinary length of this splendid bird, from the tip of the bill to that of the full-grown fan-expanded tail, is about four feet. The female is rather less; and her train is not only very short, but destitute of those brilliant hues and striking beauties which adorn the male; her crest, too, is less developed, and her whole plumage partakes of a cinereous hue. When pleased, the peacock erects his tail, unfolds his feathers, and frequently turns round, as if to catch the sunbeams in every direction, accompanying this movement with a hollow murmuring. At other times his cry is very disagreeable, and often repeated, especially before rain. Every year he sheds his plumes, and courts the most obscure retreats till the returning spring renews his luster. The Javanese peacock resembles the common kind, but has a larger crest.

Peach. A stone fruit native to China. It has been cultivated from the earliest times, reaching Europe by way of Persia, hence its name, *Prunus Persica*. The tree is small and much-branched, about fifteen to twenty feet high. It is nearly as hardy as the apple, but owing to its early blooming habit, its successful commercial culture is limited to comparatively few localities, as, in America, the eastern and southern shores of the Great Lakes, New Jersey, Delaware, and Maryland, northern Georgia and Alabama, parts of Illinois, Missouri, Kansas, and eastern Texas, and all of California. Peaches are propagated from the seed, the trees bearing about the third year. Under the most favorable

conditions the tree seldom reaches thirty years, commercial orchards usually lasting about ten. The fruit is usually classified as cling-stone and free-stone. The fruit is a drupe, varying much in size and color of flesh and downy skin. It is used as a dessert, for canning, and in the manufacture of peach brandy.

Pear. An orchard fruit grown widely throughout all temperate regions. The countries of largest production are France and the United States, where the pear ranks fourth in importance among orchard fruits. The best districts in the United States are the north-eastern States from New England to the Great Lakes, and in California and parts of Washington and Oregon. Left to themselves the trees sometimes reach a height of sixty feet. The size and quality of the fruit is increased, however, by dwarfing, which is done by grafting on quince stock. The Chinese pear, of little importance itself, has given two hybrids, the LeConte and Kieffer, which have proved successful in the South. Pear trees thrive best on heavy clay loams, bearing in five to seven years. They are grown from the seed. The leading commercial variety is called the Bartlett pear. The Seckle is a prominent eastern variety of exceptionally good quality.

Pelican. The popular name applied to a species of a genus of birds, characterized by possessing a long, straight, broad, and much-depressed bill, the upper mandible flat and terminating in a very strong hook, and the lower mandible formed by two long branches, flexible and united at the tip. From these branches is suspended a pouch of naked skin, of considerable elasticity, and capable of holding a large number of fish. In this pouch these birds stow away the results of their fishing excursions, after having satisfied the immediate cravings of their stomachs. The pelicans are large, ungainly-looking birds, about six feet long, with an expanse of wing of about thirteen feet, and having webbed feet. In their habits they are gregarious, and frequent the banks of rivers and lakes or the sea-coast.

Peony. A genus of plants very generally cultivated in gardens for the sake of their large showy flowers. The species are mostly herbaceous, having perennial tuberous roots and large deeply-lobed leaves. The flowers are solitary, and of a variety of colors, crimson, purplish, pink, yellow, and white. The flowers, however, have no smell, or not an agreeable one, except in the case of a shrubby species, a native of China, of which several varieties, with beautiful whitish flowers stained with pink, are cultivated in gardens. The roots and seeds of all the species are emetic and cathartic in moderate doses. The common peony of cottage gardens was formerly in great repute as a medicine.

Pepper. A name applied to various plants having pungent, acrid, and aromatic properties. The most important is the black pepper, a native of the East Indies, and now extensively cultivated in the tropics for the fruit, which is used for various purposes, but chiefly as a spice and a condiment. It is a climbing shrub, with opposite leathery leaves, and spikes of hermaphrodite flowers. The fruit, which is about

the size of a pea, is gathered in an unripe state and dried, constituting the "black pepper" of commerce. The term "white pepper" is applied to the ripe fruit of the same plant after it is deprived of the outer fleshy portion. The dried fruiting spikes of a species of *Chavica* constitute "long pepper," used for culinary purposes and for pickling. Most of these plants owe their active properties to the presence of an acrid resin, and of a crystalline principle called piperine. Cayenne-pepper is the produce of *Capsicum*. Jamaica pepper is obtained from a species of eugenia belonging to the myrtle family.

Petroleum. A combustible fluid which exudes from the earth in various parts of the world, generally in or near the coal-formations, and is formed during the conversion of vegetable remains into coal, or derived from animal remains, as it is now maintained by some scientists. Petroleum varies greatly in color and consistence, being sometimes thin and pale, at others thick and dark-colored. The substances which mineralogists have distinguished by the names asphaltum, maltha, petroleum, and naphtha, are thought by some naturalists to be mere varieties of one species. Abundant supplies of petroleum are obtained from wells and springs in Pennsylvania, New York, Texas, California, and Canada, and the demand for it to serve as an illuminating agent, and for the lubrication of machinery, has created an important branch of commerce, innumerable quantities of rock-oil being sold under the names of petroleum, kerosene, sanoline, leucaline, etc.

Pheasant. A family of birds comprising peafowl, true pheasants, jungle fowl, turkeys, and Guinea fowl. The true pheasants, of which there are about fifteen species, whose home is Western Asia, are among the most gorgeous of the feathered tribe. No pheasant is indigenous to Europe, the British species being an introduction from Asia Minor, and supposed to have been imported into England by the Romans. At the present day, however, very few of this original breed exist in that country, for it has been crossed with the Chinese Ringnecked Pheasant to such a degree that pure-bred birds are rare. The pheasant chiefly frequents woods for the purpose of roosting, being in the daytime found in hedge-bottoms and thickets searching for its food, which consists of grain, seeds, green shoots, and insects. It is polygamous, and very tenacious of its own territory, not permitting intrusion from the males of its race. The female deposits her eggs, from six to ten in number, in a slight hollow, scantily lined with dry leaves; but, being a very timid bird, and easily made to desert her post, the eggs are in most cases removed from the nest, and the young hatched out under domestic fowls; and it is questionable, if this were not done, if the pheasant would not gradually become extinct in that country. Among the most beautiful of the pheasant family are the Golden Pheasant, the Reeves Pheasant, and the Impeyan Pheasant, all inhabitants of Central Asia.

Pigeon. The common name of a group of birds, forming in some systems a section of the order of rasorial or gallinaceous birds, in others a distinct order. The pigeons or doves as a

group have the upper mandible arched towards its apex, and of horny consistence; a second curve exists at its base, where there is a cartilaginous plate or piece through which the nostrils pass. The crop is of large size. The pigeons are generally strong on the wing. They are mostly arboreal in habits, perching upon trees, and building their nests in elevated situations. Both sexes incubate; and these birds generally pair for life; the loss or death of a mate being in many cases apparently mourned and grieved over, and the survivor frequently refusing to be consoled by another mate. The song consists of the well-known plaintive cooing. The pigeons are distributed in every quarter of the globe, but attain the greatest luxuriance of plumage in warm and tropical regions. The pigeon family is divided into various groups. The true pigeons are represented by the stock-dove, the common wild pigeon, from which, it was once supposed, most of the beautiful varieties of the Columbidae, which in a state of domestication are dependent upon man, derived their origin; but it is now believed the rock-dove is the parent stock. The passenger-pigeon is very abundant in North America. The numbers that sometimes move together are enormous. Numerous flocks of these pigeons associate together in a single roost. The house-pigeons, tumblers, fantails, pouters, carriers, and jacobins are the chief varieties of the rock-pigeon, and have been employed by Darwin to illustrate many of the points involved in his theory of "descent by natural selection." Other species of pigeons are the fruit-pigeons of India, the Eastern Archipelago, and Australia; and the ground-pigeons, the largest of the group, including the crowned pigeon of the Eastern Archipelago.

Pine. The popular name of trees of the genus *Pinus*, divided into the fir tribe and the cypress tribe. The pines belong to the former section, and are distinguished from the spruce, larch, fir, cedar, etc., chiefly by having persistent leaves in clusters of two to five in the axils of membranous scales. Most of the European species have only two leaves in a sheath; most of the Asiatic, Mexican, and Californian kinds have three, four, or five leaves, and those of the United States and Canada have generally three. The cones also afford an important ready means of distinction and classification. The Scotch pine or fir is a tall, straight, hardy tree, from sixty to 100 feet high; a native of most parts of Europe, flowering in May and June, and having many varieties. The leaves are rigid, in pairs, somewhat waved and twisted; the lower branches are somewhat pendent; the bark is of a reddish tinge, sometimes rough and furrowed. The leaves are distinguishable from those of all other pines in which they occur in pairs by their glaucous hue, especially when young. The Scotch pine almost always occurs in masses; it is considered full grown and fit to be cut down for timber in fifty or sixty years; but in the north of Scotland, where pine forests grew to perfection in former times, the tree continued to increase in bulk for three or four centuries. The tree is most abundant in the north of Europe. There are extensive forests of it in Russia, Poland, Sweden, Norway,

Germany, the Alps, the Pyrenees, and the Vosges. In Scotland it grows at the height of 2,700 feet on the Grampians. The Corsican pine grows to a height of from eighty to 100 feet, and in the island of Corsica it is said to reach an altitude of 140 to 150 feet. The pinaster, or cluster pine is indigenous to the south of Europe, to the west of Asia, the Himalayas, and, it seems, even to China. It is a large, handsome, pyramidal tree, varying from forty to sixty feet in height. Its cones point upwards, in star-like clusters, whence the name of pinaster or star pine. In France, especially between Bayonne and Bordeaux, it covers immense tracts of barren sand, in which it has been planted to prevent the sand from drifting. The stone pine is a lofty tree in the south of Europe, where it is a native; its spreading head forms a kind of parasol; the trunk is fifty or sixty feet high, and clear of branches. In Britain the stone pine seldom exceeds the size of a large bush, although specimens have reached a height of thirty and forty feet. Sabine's pine was discovered in California in 1826. The leaves are in threes, rarely in fours, from eleven to fourteen inches long; the trees are of a tapering form, straight, and from forty to 120 feet high, with trunks from three to twelve feet in diameter. The Cembran pine is a native of Switzerland and Siberia. The red Canadian pine or yellow pine, inhabits the whole of Canada from the Atlantic to the Pacific, and is also found in the northern and eastern parts of the United States. The trunk rises to the height of seventy or eighty feet by about two in diameter at the base, and is chiefly remarkable for its uniform size for two-thirds of its length. The wood is yellowish, compact, fine-grained, resinous, and durable. The true yellow pine rises to the height of fifty or sixty feet, by fifteen or eighteen inches in diameter at base. The cones are small, oval, and armed with fine spines. The timber is largely used in shipbuilding and for house timber. The other American pines are the Jersey pine, the trunk of which is too small to be of any utility in the arts; the pitch pine, which is most abundant along the Atlantic coast, and the wood of which, when the tree grows in a dry, gravelly soil, is compact, heavy, and contains a large proportion of resin; the loblolly pine, the timber of which decays speedily on being exposed to the air; the long-leaved pine, which abounds in the lower part of the Carolinas, Georgia, and Florida, furnishing resin, tar, pitch, and turpentine, and timber which is hardly inferior to the white oak in naval architecture; the Weymouth pine, the timber of which, though not without essential defects, is consumed in much greater quantities, and for a far greater variety of purposes, than almost any other; and Lambert's pine, which grows between the fortieth and forty-third parallels of latitude, and about 100 miles from the Pacific. It is of gigantic size, the trunk rising from 150 to upwards of 200 feet, and being from seven to nearly twenty feet in diameter.

Pineapple. A tropical and sub-tropical plant of increasing commercial importance, which grows a single fragrant and palatable fruit usually from four to six inches in diameter and

six to ten inches high. The plant is regularly from two to four feet in height. It is extensively cultivated in the West Indies and Florida, and propagated by slips from the parent plant. Plants are set in rows three feet apart and about two feet distant in the row. In Florida they are usually grown under lath sheds to protect them from frost.

Pink. A genus of plants of which more than 100 species are known, all, with perhaps one or two exceptions, natives of the northern and temperate parts of the European continent. Their roots are annual or perennial; the stems herbaceous and jointed; the leaves opposite and entire, and the flowers terminal, aggregate, or solitary, and always beautiful. The clove pink or carnation, and the garden pink, of which there are many varieties, are familiar species.

Plum. A stone fruit, widely grown in all temperate climates, and ranking third in importance among orchard products in the United States. The three principal types of plums are the European plums, Japanese, and native plums. The European plums thrive in the regions about the Great Lakes and northern States, and on the Pacific slope where the prune industry has reached its greatest development. The Japanese variety was introduced about 1870, and flourishes much farther south than the European plum. The native plum is inferior to either, though more hardy. The fruit is distinguished from the peach, its near relative, by its smooth skin and unwrinkled stone. Firm, sweet-fleshed varieties of plums that can be successfully cured are called prunes. They are extensively grown on the Pacific coast where very favorable conditions exist for drying them. California produces about eighty-five million pounds of prunes yearly.

Polecat. A name common to several species of the weasel family. The common polecat is found in most parts of Europe and America. Its body is about seventeen inches long, and the tail six inches. The color is dark brown. It is a nocturnal animal, sleeping during the day and searching for its prey at night. It is especially destructive to poultry, rabbits, and game, as pheasants, so that in Britain it is being rapidly exterminated by gamekeepers, farmers, and others. Frogs, toads, newts, and fish are often stored as food by this voracious animal. It has glands secreting a fetid liquor, somewhat like that of the American skunk, which it ejects when irritated or alarmed. The name of "Foumart" is also applied to the polecat; and its fur, which is imported in large quantities from Northern Europe, is known as that of the "Fitch." Its hairs form a superior kind of artists' brushes.

Poppy. The common name for plants of the genus *Papaver*. The species of poppy are herbaceous plants, all bearing large, brilliant, but fugacious flowers. The white poppy yields the well-known opium of commerce. Most of the species are natives of Europe, and four are truly natives of Britain. They often occur as weeds in fields and waste places, and are frequently also cultivated in gardens for ornament. The seeds of the white poppy yield a fixed harmless oil employed for culinary purposes; and the

oil-cake is used for feeding cattle. The roots of the poppy are annual or perennial; the calyx is composed of two leaves, and the corolla of four petals; the stamens are numerous, and the capsule is one-celled, with several longitudinal partitions, and contains a multitude of seeds.

Porcupine. A name of certain rodent quadrupeds, the best-known species of which belong to the genus *Hystrix*. The body is covered, especially on the back, with the so-called quills, or dense solid spine-like structures, intermixed with bristles and stiff hairs. There are two incisors and eight molar teeth in each jaw, which continue to grow throughout life from permanent pulps. The muzzle is generally short and pointed, the ears short and rounded. The anterior feet possess four, and the hinder feet five toes, all provided with strong thick nails. The common or crested porcupine, *hystrix cristata*, found in Southern Europe and in Northern Africa, is the best-known species. When fully grown it measures nearly two feet in length, and some of its spines exceed one foot. Its general color is a grizzled dusky black. The spines in their usual position lie nearly flat, with their points directed backwards; but when the animal is excited they are capable of being raised. The quills are loosely inserted in the skin, and may, on being violently shaken, become detached.

Porgy. A fish of the family *Sparidae*, with an oblong body, scaly cheeks, and one dorsal fin, found off the coasts of the United States. It is one of the most important food fishes, and attains a length of eighteen inches and a weight of four pounds.

Porpoise. A species of marine fish-like mammals, belonging to the same family as the Dolphin, and to the order *Cetacea*. It is an inhabitant of northern seas, and is familiar on our own shores. It is usually from four to five feet in length, though frequently more. In color it varies, but is mostly of a bluish-black tint on the upper surface, merging into pink, mottled grey, or white beneath. The porpoise is compelled continually to seek the surface of the water for breathing purposes; and it is then observed rolling over, as it were, and is heard discharging air from the crescent-shaped blowhole on the crown of the head, at the same time taking in a fresh supply at the mouth. Porpoises are frequently observed in great numbers in pursuit of shoals of herring, mackerel, and other small fish, among which, being of an exceedingly voracious nature, they commit sad havoc.

Prairie Dog. The name given to two species of small rodent animals of the squirrel family, found in America, on the plains east of the Rocky Mountains from the Upper Missouri to the Red River and Rio Grande. They much resemble their allies, the marmots, in appearance, and have well-developed claws on all the toes of the fore-feet; shallow cheek-pouches; and two rows of grinding teeth converging towards the back of the mouth. The best known species is about one foot in length, and has a tail of about four inches. On the upper surface it is reddish-brown variegated with grey. These animals live together in great so-

cieties on those portions of the prairies where their favorite food, the buffalo grass, grows luxuriantly. Here they excavate burrows in the ground in contiguity to each other, and, when the little creatures are out, quite a busy scene is presented. The name *Prairie Dog* is given to the animal on account of a resemblance which is supposed to exist between its cry and the bark of a small dog.

Precious Stones are those which, because of their beauty, hardness, and rarity, are prized for use in ornamentation, especially in jewelry. The diamond, ruby, sapphire, and emerald are the only stones which are, strictly speaking, entitled to be called "precious" in this sense; but the opal, on account of its beauty, is often classed with the precious stones; as is also the pearl, which is really not a stone, but a secretion of a shell fish.

Agate. A semipellucid, uncrystallized variety of quartz, presenting various tints in the same specimen. Its colors are delicately arranged in stripes or bands, or blended in clouds.

Alexandrite. A variety of chrysoberyl found in the mica slate of the Ural Mountains. It is of a rich garnet color by artificial light; by daylight of a dark moss green. It is the only stone that so changes. The finest specimens of alexandrite are nearly as valuable as diamonds.

Almandine. A common maroon-red variety of garnet.

Amethyst. A variety of crystallized quartz, of a purple or bluish violet color, of different shades. It is much used as a jeweler's stone. The lighter colored ones come from Brazil; the deep purple ones come from Siberia. In value they are about the same as the garnet.

Aquamarine. A transparent, sea-green variety of beryl, used as a gem.

Aventurine. A variety of translucent quartz spangled throughout with scales of yellow mica.

Beryl. A very hard mineral of much beauty when transparent. It occurs in hexagonal prisms, commonly of a green or bluish green color, but also yellow, pink, and white. It is a silicate of aluminum and glucinum. Beryls are very rich in colors. Their value is about four dollars per carat.

Cameo. A figure cut in stone or shell that is composed of different colored layers. The value depends on the artistic merit of the engraved figure.

Bloodstone. A green siliceous stone sprinkled with red jasper, whence the name.

Carbuncle. A beautiful gem of a deep red color (with a mixture of scarlet), found in the East Indies. When held up to the sun, it loses its deep tinge, and becomes of the color of a burning coal. The carbuncle of the ancients is believed to have been a garnet. The name is now given also to the ruby sapphire and the red spinel. The ordinary carbuncle is a garnet cut *en cabochon*, and is worth about one dollar a carat.

Carnelian. A variety of chalcedony, of a clear, deep red, flesh-red, or reddish white color. It is moderately hard, capable of a good polish, and often used for seals. It is now used but little.

Cat's-eye. A variety of quartz or chalcedony exhibiting opalescent reflections from within, like the eye of a cat. The name is given to other gems affording like effects, especially the chrysoberyl. A fine specimen about three-eighths of an inch across would be worth from two to three hundred dollars.

Chalcedony. A cryptocrystalline, translucent variety of quartz, having usually a whitish color, and a luster nearly like wax.

Chrysolite. A mineral, composed of silica, magnesia, and iron, of a yellow to green color. It is little used.

Chrysoprase. An apple-green variety of chalcedony. Its color is due to nickel contained in its composition.

Dendrite. A stone or mineral in which are branching figures, resembling shrubs or trees, produced by a foreign mineral, usually by an oxide of manganese; as in the moss agate.

Diamond. A precious stone or gem excelling in brilliancy and beautiful play of prismatic colors, and remarkable for extreme hardness. It is found in many hues — green, rose, straw, yellow, etc.; but the straw-colored ones are the most common. The diamond is a native carbon occurring in isometric crystals, often octahedrons, with rounded edges. It is the hardest substance

known. Diamonds are said to be of the *first* water when very transparent, and of the *second* and *third* water as the transparency decreases.

Diopside. A crystallized variety of pyroxene (a silicate of lime and magnesia), of a clear, grayish green color; also called *mussite*.

Emerald. A precious stone of a rich green color; it is the most valuable variety of beryl. See **BERYL**.

Epidote. A mineral, commonly of a yellowish green color, occurring granular, massive, columnar, and in crystals. It is a silicate of alumina, lime, and oxide of iron, or manganese.

Essonite. Cinnamon stone. A variety of garnet. It is not much used.

Fire Opal. See **OPAL**.

Fluorite. Calcium fluoride, a mineral of many different colors, white, yellow, purple, red, etc., often very beautiful. When crystallized it is commonly in cubes with perfect octahedral cleavage. Some varieties are used for ornamental vessels. Also called *fluorspar*, or simply *fluor*. The colored varieties are often called *false ruby*, *false emerald*, *false topaz*, *false sapphire*, and *false amethyst*. For jewelry purposes the chief value of the stone is the expense of cutting and mounting.

Flint. A massive, somewhat impure variety of quartz, in color usually of a gray to brown or nearly black, breaking with a conchoidal fracture and a sharp edge.

Fluorspar. Same as **FLUORITE**.

Garnet. A mineral having many varieties differing in color and in their constituents, but with the same general chemical formula. The commonest color is red; the luster is vitreous, or glassy; and the hardness is greater than that of quartz, about half as hard as the diamond.

The common crystal forms are the dodecahedron and trapezohedron. Besides the red varieties there are also white, green, yellow, brown, and black ones.

The garnet is a silicate with various bases such as alumina-lime (grossularite essonite or cinnamonstone), alumina-magnesia (pyrope), alumina-manganese (spessartite), and chromium-lime (ouvarovite, color emerald green). The transparent red varieties are used as gems. The garnet was the carbuncle of the ancients. Garnet is a very common mineral in gneiss and mica slate.

The finest specimens of red garnets come from Arizona and a single carat stone is worth about two dollars. A green variety that comes from Russia is worth about half as much as the diamond.

Golden Beryl. See **BERYL**.

Heliotrope or *Bloodstone*. A green siliceous stone sprinkled with jasper, as if with blood, whence the name.

Hematite. An important ore of iron, the sesquioxide, so called because of its red color when in the form of powder. It occurs in splendid rhombohedral crystals, and in massive and earthy forms, the last being called red ochre. It is now seldom used in jewelry.

Hyacinth. A red variety of zircon, sometimes used as a gem. It resembles closely a dark Spanish topaz, and is worth a little more than the garnet.

Idiocrase. A mineral occurring in tetragonal crystals and also massive, of a brown to green color, rarely sulphur yellow or blue. It is a silicate of alumina and lime, with some iron and magnesia. It is common at Mt. Vesuvius. It is little used.

Indicolite. A variety of tourmaline of an indigo-blue color.

Iolite. A silicate of alumina, iron, and magnesia, having a bright blue color and a vitreous or glassy luster. It is remarkable for its dichroism, and is also called *dichroite*.

Jacinth. Same as **HYACINTH**.

Jade. A stone commonly of a pale to dark green color, but sometimes whitish. It is hard and very tough, capable of a fine polish, and is used for ornamental purposes and for implements, especially in Eastern countries and among many primitive peoples.

Jasper. An opaque, impure variety of quartz, of red, yellow, and other dull colors, breaking with a smooth surface.

Kyanite. A mineral occurring in thin-bladed crystals and crystalline aggregates, of a sky-blue color. It is a silicate of aluminum. It is little used for jewelry.

Labradorite. A kind of felspar, commonly showing a beautiful play of bluish-gray colors, and, hence, much used for ornamental purposes. The finest specimens come from Labrador.

Lapis-lazuli or *Lazuli*. A mineral of a fine azure-blue color, usually occurring in small rounded masses. It is essentially a silicate of alumina, lime, and soda, with some sodium sulphide. It is often marked by yellow spots or veins of sulphide of iron, and is much valued for ornamental work.

Moonstone. A nearly pellucid variety of felspar, showing pearly or opaline reflections from within. The best specimens come from Ceylon. Their value is not much more than the expense of cutting.

Nephrite. A hard, compact mineral, of a dark green color, formerly worn as remedy for diseases of the kidneys, whence its name *kidneystone*.

Obsidian. A kind of glass produced by volcanoes. It is usually of a black color and opaque, except in thin splinters.

Olivine. A common name of the yellowish green mineral chrysolite, especially of the variety occurring in eruptive rocks. See **CHRYSOLEITE**.

Onyx. Chalcedony in parallel layers of different shades of color. It is used for making cameos, the figure being cut in one layer with the next layer as a background (see **CAMEO**). It is stained black and used to make mourning jewelry.

Opal. A mineral consisting, like quartz, of silica, but inferior to quartz in hardness and specific gravity. The precious opal shows a peculiar play of colors of delicate tints and it is highly esteemed as a gem. One kind, with a varied play of color in a reddish ground, is called *harlequin opal*. The *fire opal* (which comes from Mexico) has colors like the red and yellow of flame. This is not the cheap variety commonly called "Mexican opal." A spherical opal about three-eighths of an inch in diameter, or an oval flat opal about half an inch long, would be worth about sixty dollars. A "Mexican opal" of the same size would be worth about fifteen dollars.

Pearl. A shelly concretion, usually rounded, having a brilliant luster, with varying tints, formed in the mantle, or between the mantle and shell, of certain bivalve mollusks (especially in the pearl oysters and river mussels) and sometimes in certain univalves. Its substance is the same as nacre, or mother-of-pearl. Pearls which are round, or nearly round, and of fine luster, are highly prized as jewels. They are sold by carat grains, instead of carats.

Pyrope. A variety of garnet of a poppy-red or blood-red color, frequently with a tint of orange. It is used as a gem.

Rhodonite. Manganese spar, or silicate of manganese, a mineral occurring crystallized and in rose-red masses. It is almost entirely used for ornamental purposes, in slabs, blocks, etc.

Rock Crystal or *Mountain Crystal*. Any transparent crystal of quartz, particularly of limpid or colorless quartz. A sphere of rock crystal of absolutely perfect clearness, about five inches in diameter, is worth at least twenty thousand dollars.

Rose Quartz. A variety of quartz which is pinkish red.

Rubellite. A variety of tourmaline varying in color from a pale rose red, to a deep ruby, and containing lithium. It is a little more valuable than the garnet.

Ruby. A precious stone of a carmine-red color, sometimes verging to violet, or intermediate between carmine and hyacinth red. It is a crystallized variety of corundum. The ruby from Siam is of a dark color and is called ox-blood ruby. It has about the same value as the diamond. The ruby from Burmah, called the pigeon-blood ruby, is of a lighter color and several times more valuable than the ox-blood ruby. A fine pigeon-blood ruby of two carats would be worth upwards of six thousand dollars.

Rutile. A mineral, usually of a reddish-brown color and brilliant, metallic, adamantine luster, occurring in tetragonal crystals.

Sapphire. A variety of native corundum or aluminum sesquioxide. As the name of a gem the term is restricted to the transparent varieties of blue, pink, yellow, and other colors. The best specimens of the blue variety are nearly as valuable as the diamond. The sapphire is next to the diamond in hardness.

Sard. A variety of carnelian, of a reddish-yellow or brownish color.

Sardonyx. A variety of onyx consisting of sard and white chalcedony in alternate layers. See **ONYX**.

Spinel. A mineral occurring in octahedrons of great hardness and various colors, as red, green, blue, brown, and black, the red variety being the gem *spinel ruby*. It consists essentially of aluminum magnesium, but commonly contains iron and sometimes also chromium. The fine specimens of spinel ruby are worth rather more than half as much as the diamond.

Sunstone. Aventurine felspar; aventurine.

Topaz. A mineral occurring in rhombic prisms, generally yellowish and pellucid, also colorless, and of greenish, bluish, or brownish shades. It sometimes occurs massive and opaque. It is fluosilicate of aluminum, and is used as a gem. It is but little more valuable than the garnet, except occasionally unusual fine specimens.

Tourmaline. A mineral occurring in three-sided prisms. Black tourmaline is the most common variety, but there are also other varieties, as the blue (*indicolite*), red (*rubellite*); also green, brown, and white. The red and green varieties, when transparent, are valued as jewels. The finest ones come from Maine, and are worth four or five times as much as garnets.

Turquoise. A hydrous phosphate of alumina containing a little copper. It has a blue, or bluish-green color, and usually occurs in kidney-shaped masses with a nodular surface, like that of a bunch of grapes. The fine specimens are worth nearly half as much as diamonds.

Unio-pearl. A single large pearl.

Uralian Emerald. A precious stone of a rich green color, a variety of beryl.

Verd' antique (*ân-têk'*). A mottled-green, serpentine marble. Also a green porphyry, which is called *Oriental verd antique*.

Zircon. A mineral occurring in tetragonal crystals, usually of a brown or gray color. It consists of silicon and zirconium, and is harder than the garnet. The transparent varieties are used as gems. The red variety is called *Hyacinth*; a colorless, pale yellow, or smoky-brown variety from Ceylon is called *jargon*.

Prickly Pear, otherwise called Indian fig, is a fleshy and succulent plant, destitute of leaves, covered with clusters of spines, and consisting of flattened joints inserted upon each other. The fruit is purplish in color, covered with fine prickles, and edible. The flower is large and yellow. It is a native of the tropical parts of America, whence it has been introduced into Europe, Mauritius, Arabia, Syria, and China. It is easily propagated, and in some countries is used as a hedge-plant. It attains a height of seven or eight feet.

Primrose. A genus of beautiful low Alpine plants. Some are among the earliest flowers in spring, as the common primrose, the oxlip, and cowslip; and several Japanese and other varieties are cultivated in gardens as ornamental plants. Their roots are perennial; the leaves almost always radical; and the flowers supported on a naked stem, and usually disposed in a sort of umbel. The varieties of the common primrose which have arisen from cultivation are very numerous.

Puma or Cougar. A carnivorous animal peculiar to America, where it ranks next to the jaguar in importance as a destructive or dangerous creature. It is known as the American lion, probably from its resemblance in build and color to the lioness; but it is considerably less in size, and lacks a mane. Its length is about forty inches, exclusive of a tail of twenty-six inches; its height is about two feet. The geographical range of the puma is very extensive, though it is less abundant in North than in South America, where it haunts a variety of situations, seeming to be equally at home in the dense forests, the open plains, and the elevations of the Andes to at least 10,000 feet. It is of a cowardly nature, and is not regarded with fear by man. Unlike most of the larger members of the cat family, it is remarkably silent.

Python. A genus and family of serpents allied to the family of boas. They are not venomous, but kill their prey by compression. The pythons belong exclusively to the Old World, and are of enormous size, sometimes attaining a length of thirty feet. They are found in India and in the islands of the Eastern Archipelago, in Africa and in Australia. A rudimentary pelvis and traces of hinder limbs exist in the pythons, these structures terminating externally

in a kind of hooked claw. The head exceeds the neck in thickness, and the mouth is extremely large. Aided by their prehensile tails and rudimentary hinder limbs, the pythons suspend themselves from the branches of trees and lie in wait near water for animals which come to drink. The genus python contains various species, the best known of which is the West African python, common in menageries.

Quail. The Virginia quail is common throughout North America, and extends as far south as Honduras. It is larger than the European quail, and is better eating. The California crested quail is another American species. The quail, genus *Coturnix*, is widely distributed over the Eastern Hemisphere, visiting Europe in early summer and returning south in the autumn, when immense numbers are caught and fattened for the market. Length about seven inches, general color reddish-brown, with buff streaks on the upper surface; throat rufous; head, dark brown above, striped with ochreous white; sides, reddish-brown, lower parts pale buff, fading into white on belly. Color less bright in the hen bird, and the rufous tinge absent from the throat. They nest on the ground, laying from nine to fifteen pyriform, yellowish-white eggs, blotched with dark-brown. The males are polygamous and extremely pugnacious.

Raccoon. A small family of plantigrade carnivorous mammals, bear-like in appearance and of small size. The raccoons are peculiar to America, where they range from British Columbia and Canada to Paraguay. The common raccoon is a pretty animal, about the size of a cat, but much stouter; it has a long brown or grizzled coat, a ringed and bushy tail, and a turned-up nose. Its legs are short, and are armed with strong claws, useful for digging or climbing. In its attitudes it is somewhat monkey-like, and usually sits upon its haunches when feeding, holding its food in its fore-paws. It has a curious habit, too, of washing articles given to it, and of soaking any food of a dry nature in water before eating it. Its skin is highly valued as a fur, and is consequently much sought after in North America, where the animal is widely distributed.

Redbreast. A bird of the family *Sylviadæ*, familiarly known in the United States and the British Islands and throughout most parts of Europe. It is generally designated as the "robin redbreast," or more briefly "a robin," and has similar appellations in continental Europe significant of the kindly regard entertained for it. Its utmost length is about five and three-fourths inches, but it is of a rounder and fuller form than many of the *Sylviadæ*, the slenderness of its legs rather strikingly contrasting with the form of the body. The wings are rather short, the fifth quill the longest. The tail is scarcely forked. The bill is rather broad and depressed at the base, narrower and slightly compressed at the point, the upper mandible bent down and notched. The general color is olive-brown, and the reddish orange-breast is a conspicuous characteristic, particularly of the male. The name robin is improperly given in the United States to a species of thrush.

Redwood. The name of various sorts of wood of a red color, as the wood of the redwood of Jamaica; of Andaman wood; of the redwood of the Bahamas; and of a coniferous tree of California, the redwood of the timber trade. Redwood of California is found only in that State, and in but a comparatively contracted area even there. The available redwood is now confined to about 318 miles of coast. The annual product in this region is about 320,000,000 feet, and it is estimated, at the present rate of consumption, that enough standing timber exists to last for 150 years. The lumber is becoming more in demand for decorative purposes. Its color, a light salmon when first cut, afterwards turns to a deep red. When thoroughly dried there is no shrinkage and it readily yields to the chisel of the carver. Piano cases made from the wood are said to give increased resonance to the instrument. Large quantities are consumed for interior finishing with gratifying effects. In addition to other fine qualities the wood takes on a beautiful polish and even the stumpage, till recently considered worthless, is found to possess valuable qualities. The roots and woody excrescences at the base of the tree give fine effects in wavy outlines, and when polished the material is much valued for decorative purposes.

Reptiles. A class of vertebrate animals, which comprises the tortoises, crocodiles, snakes, lizards, etc. Reptiles are more closely related to birds than any other group of animals; and in some recent classifications birds and reptiles together are made to constitute the great division *Sauropsida* of the sub-kingdom *vertebrata*. Reptiles agree with birds and differ from all other vertebrates in the following characters: The skull articulates with the spinal column by a single condyle; the lower jaw articulates with the skull by the intervention of a peculiar bone, termed the *os quadratum*, or quadrate bone, and each half of the lower jaw consists of several pieces; at no period of their existence are branchial or water-breathing respiratory organs developed. The heart in reptiles consists of three chambers — two auricles and a ventricle, the latter being divided into two portions only by a partition which is generally incomplete, and allows the arterial and venous blood to mix, so that the blood is never so perfectly aerated as in the higher animals. The blood is consequently much colder than that of birds and all the more highly organized animals, where the oxygen obtains a freer access to its particles. In the crocodiles the heart has a complete septum, but there is an intermixture of the venous and arterial blood outside the heart. In consequence of this organization of the circulatory system, the whole character of reptiles differs from that of the higher animals. The cavity of the thorax, or chest, in reptiles is not shut off from the abdomen by a complete muscular partition or diaphragm, though traces of it are found in crocodiles. The lungs are usually less cellular than in birds and mammals; but are often of large size, extending into the abdominal cavity. In snakes there is usually only one active lung, the other being rudimentary or completely atrophied. The rectum opens in a

common cavity, or *cloaca*, which receives both excrementitious matters and the products of the generative organs. Reptiles are often provided with an exo-skeleton, or hardened skin, consisting of horny plates or scales. The strong and conspicuous outer shell of the body of tortoises and turtles is formed by this exo-skeleton uniting with the true endo-skeleton. Ribs are always present, but differ much in form. Teeth are generally present, but are not sunk in distinct sockets, except in crocodiles. In tortoises and turtles the jaws are sheathed in horn like the beak of a bird. The young of reptiles are produced from eggs, mostly hatched after being laid, but in some cases the eggs are hatched within the body.

Rhinoceros. The name of a family of mammals, represented by nine living species, characteristic of Africa to the south of the Sahara, India, Borneo, and Java. They have large unwieldy bodies; short thick legs, terminating in large pads, with hoof-bearing toes; large elongated heads, with a long horn or horns springing from the snout in existing forms; small eyes and ears; and short tails. Their hide is extremely thick, but is not bullet-proof, as is popularly supposed. The Asiatic species differ from the African in some dental characters, but resemble the latter in other respects. Five species belong to Africa, all possessing two horns. Of these, the white rhinoceros is the largest, attaining to a length of over twelve feet and a height of nearly six feet; but the black or common rhinoceros is the best known species. The Asiatic species are four in number, distinguished by the possession of incisors, or front teeth, which are entirely absent in the African ones, and the hide has much the appearance of armor-plates. They are also smaller in size, and two of the species possess double horns, and two a single one. The Indian rhinoceros, a one-horned species, is the one usually seen in menageries in this country. It leads a tranquil, indolent life, wallowing on the marshy borders of lakes and rivers. Owing to the keenness of its smell and hearing, the rhinoceros cannot be easily attacked; but, when brought to bay, it charges with great fury and impetuosity.

Rose. A large genus of plants found chiefly in north temperate regions. They are usually erect thorny shrubs, with compound leaves, and flowers of all shades of white, pink, or yellow. The calyx consists of five sepals, united in the lower part to form a fleshy tube, which encloses the fruits. There are normally five petals, but under cultivation the number is often much increased at the expense of the stamens, which are indefinite in number. Numerous species of rose are indigenous to Great Britain, the most familiar one being the Dog Rose, which is common almost everywhere. The fruit is pulpy, astringent, and antiseptic; the young leaves are infused as tea; and the root was formerly in repute as a specific against hydrophobia, whence the name "Dog Rose." The stems frequently present mossy galls termed *Robin Pincushion*, caused by the punctures of an insect. Innumerable varieties of the different species of rose are produced under cultivation — the tea rose, musk rose, moss rose, and cabbage rose,

being well-known examples. The rose of Provence yields honey of roses and conserve of roses. Rose water is obtained by distilling the petals of a number of species with water.

Sable. A carnivorous mammal, nearly allied to the common marten and pine marten, found chiefly in Siberia and Kamtchatka, and hunted for its fur. Its length, exclusive of the tail, is about eighteen inches. Its fur, which is extremely lustrous, and hence of the very highest value, is generally brown, grayish-yellow on the throat, and with small grayish-yellow spots scattered on the sides of the neck. It is densest during winter, and owing to the mode of attachment of the hairs to the skin it may be pressed or smoothed in any direction. Two other species of sable are enumerated, the Japanese sable and a North American species. The Tartar sable is the name given to a species of the weasel genus found in Northern Russia and Siberia, and the pekan of North America is sometimes known as the Hudson's Bay sable. The skins of all these varieties are frequently dyed and otherwise manipulated to imitate the true Russian sable. Sable hair is also used in the manufacture of artist's pencils. Sable fur has been of great value from very early times.

Sago. A starchy product obtained from the trunk of several species of a genus of palms. The one from which the finest sago is prepared, forms immense forests on nearly all the Moluccas, each stem yielding from 100 to 800 pounds of sago. The tree is about thirty feet high, and from eighteen to twenty-two inches in diameter. It is cut down at maturity, the medullary part extracted and reduced to powder like sawdust. The filaments are next separated by washing, and the meal laid to dry. For exportation the finest sago meal is mixed with water, and then rubbed into small grains of the size and form of coriander seeds. The Malays have a process for refining sago, and giving it a fine pearly luster, the method of which is not known to Europeans; but there are strong reasons to believe that heat is employed, because the starch is partially transformed into gum. The sago so cured is in the highest estimation in all the European markets. Sago forms a light, wholesome, nutritious food, and may be used to advantage in all cases where a farinaceous diet is required. It is also largely used in the manufacture of soluble cocoas, and for adulterating the common sorts of arrowroot.

Salmon. A well-known fish, forming the type of the family Salmonidæ. The salmon inhabits both salt and fresh waters, and ranks prominent among the food-fishes of the United States and other countries. It generally attains a length of from three to four feet, and an average weight of from twelve to thirty pounds, but these limits of size and weight are frequently exceeded. The typical color of the adult fish is a steel-blue on the back and head, becoming lighter on the sides and belly. It usually continues in the shallows of its native stream for two years after hatching, and during this period it attains a length of eight inches. When the season of its migration arrives, generally between March and June, the fins have become darker and the fish has assumed a silvery hue. It is now known as a *smolt* or *salmon fry*. The

smolts now congregate into shoals and proceed leisurely seaward. On reaching the estuary they remain in its brackish water for a short time and then make for the open sea. Leaving its native river as a fish, weighing it may be not more than two ounces, the smolt, after three months' absence, may return to fresh water as a *grilse*, weighing four or five pounds. In the grilse stage or *salmon peel*, as it is sometimes called, the fish is capable of depositing eggs. After spawning in the fresh water the grilse again seeks the sea in the autumn, and when its second stay in the ocean is over it returns after a few months' absence as the adult salmon, weighing from eight to ten pounds. The salmon returns as a rule to the river in which it passed its earlier existence. The fertility of the fish is enormous. Salmon are caught by the rod, and by means of nets. For purposes of commercial supply they are taken in nets of special construction and of various forms, the fishings being regulated by law not only as to their seasons and times, but also as to the forms and dispositions of the machines for the capture of the fishes. There are important fisheries in some European and North American rivers. In Europe the fish is found between the latitudes of 45° and 75°, in North America in corresponding latitudes. The flesh of the salmon when fresh is of a bright orange color, and is of highest flavor when taken from the sea-feeding fish. In the waters of Northwestern America are several salmon belonging to a distinct genus, including the quinnat or king-salmon, blue-back salmon or red-fish, silver salmon, dog salmon, and humpback salmon. The quinnat has an average weight of twenty-two pounds, but sometimes reaches 100 pounds. Both it and the blue-back salmon are caught in immense numbers in the Columbia, Sacramento, and Frazer (especially in spring), and are preserved by canning.

Salt, Common. A substance in common use as a seasoner and preserver of food from the earliest ages. It exists in immense quantities dissolved in sea-water, and also in the waters of salt springs, and in solid deposits, sometimes on the surface, sometimes at greater or less depths, in almost every geological series. Rock-salt, that is salt in the crystalline or solid form, is found in great abundance in England. It is also found in abundance in nearly every country of Europe. The supply in other continents is equally great. The basin of the Indus and other parts of India possess extensive salt plains. In China deep salt wells abound. The Sahara and Central and Southern Africa afford inexhaustible supplies. Most of the South American Republics, the West Indies, and the United States also have large natural supplies. Salt manufactured from sea-water is produced extensively along the Mediterranean and Atlantic sea-boards of Europe as well as in America. It is chiefly made by natural drying in shallow reservoirs, but also by boiling. Sun-dried salt is the purest. Salt from sea-water is usually known as *bay-salt*. Most salt, however, is produced from rock-salt or from brine springs, the latter being due to the melting of rock-salt by water. The salt-mines of Wielicza in Galicia were worked in the Twelfth Century, and are the

most celebrated in the world. The chief manufacturing centers in England are in Cheshire and Worcestershire; Yorkshire has recently begun the manufacture. Cheshire yields the greater bulk, the chief supply being found in the basin of the Weaver; Norwich is the central point. The salt deposits of the United States extend widely through the geological strata. The most important salt yielding States are Michigan and New York, whose deposits are of remarkable richness. The wells, which are in the vicinity of Saginaw Bay, seem inexhaustible in supply. Some are over 1,900 feet in depth. In the valley of the Mississippi salt springs and wells are numerous. In Louisiana, on an island near New Iberia, is an immense deposit of rock salt of unusual purity. On Virgin River, Nevada, there is a bed of rock salt, extending as a bluff along the river, for over twenty-five miles; more than sixty per cent. of the cliff is salt of great purity. California has abundant salt springs and saline marshes.

Scorpion. Scorpions have an elongated body, suddenly terminated by a long slender tail formed of six joints, the last of which terminates in an arcuated and very acute sting, which effuses a venomous liquid. This sting gives rise to excruciating pain, but is usually unattended either with redness or swelling, except in the glands of the arm-pit or groin. It is very seldom, if ever, fatal to man. The animal has four pairs of limbs borne by the thorax or chest-segments, and the maxillary palpi (organs of touch belonging to the maxillæ or lesser jaws) are largely developed, and constitute a formidable pair of nipping claws. With these claws they seize their insect prey, which is afterwards killed by the sting. The eyes, which are of the simple kind, number six, eight, or twelve. The female scorpions are said to exhibit great care for their young, and carry them on their backs for several days after being hatched, whilst they tend them carefully for about a month, when they are able to shift for themselves. Scorpions generally live in dark places, and under stones. They are found in the South of Europe, in Africa, in the East Indies, and in South America. The rock scorpion of Africa, is one of the most familiar species.

Seal. The name given to the species of the family *Phocidæ*. The true seals are earless; and this, in addition to the fact that the construction of their limbs does not permit of their using those organs on land, at once distinguishes them from the allied family of Eared Seals, or Sea Lions. The fore limbs are short, and are so attached as to leave little free but the hand; in the hind limbs the thigh bones are very short, the leg bones relatively long and directed backwards in a line with the spine, and closely attached by membrane to the inconspicuous tail as far as the heel, a construction which prevents the leg being thrown forwards. The head is very round, and the eyes are large and expressive. In swimming they seldom use their fore feet, while the Eared Seals use them as powerful sweeps. In their distribution the twenty-one species are pretty equally divided between the Northern and the Southern Hemispheres, inhabiting temperate and cold regions. The

Alaskan seal fisheries are among the most prominent in the world. The members of this family are of considerable commercial importance on account of the oil they yield, for the sake of which great numbers are slaughtered. To the inhabitants of the polar regions they afford food, clothing, and fire.

Sea-wolf. A genus of fishes known as blennies and also by the names "sea-cat" and "swine-fish." The mouth is armed with sharp strong teeth of large size, and when captured it is said to bite the nets and even attack the fishermen. It is the largest of the blennies. Around the coast of Britain it attains a length of six or seven feet, but in more southern seas it is said to grow to a still larger size. The flesh is palatable, and is largely eaten in Iceland, whilst the skin is durable, and is manufactured into a kind of *shagreen*, used for making pouches and like articles.

Sequoia. A genus of conifers, otherwise called *Wellingtonia* or *Washingtonia*, consisting of two species only — the redwood of the timber trade, and the *Wellingtonia* of British gardens and shrubberies, the big or mammoth tree of the Americans. They are both natives of Western America, the latter having been discovered in the Sierra Nevada, in 1852. One specimen in Calaveras County, Cal., has a height of 325 feet, and a girth six feet from the ground or forty-five feet. The Mariposa Grove, sixteen miles south of the Yosemite Valley, contains upwards of 100 trees over forty feet in circumference, and one over ninety-three feet at the ground, and sixty-four feet at eleven feet higher. This grove is government property. This tree has been successfully introduced into England, where some of them have already attained a good height. Some of these trees indicate an age of over 2,000 years.

Shad, a name of several fishes, of the family *Clupeidæ* or herrings, and including two species, the common or allice shad, and the twaite shad. The common shad inhabits the sea near the mouths of large rivers, and in the spring ascends them for the purpose of depositing its spawn. The form of the shad is the same as that of the other herrings, but it is of larger size, and in some places receives the name of "herring king." Its color is a dark blue above, with brown and greenish lusters, the under parts being white. The twaite shad is about a half less than the common species, and weighs on an average about two pounds. An American species of shad varying in weight from four to twelve pounds, is highly esteemed for food, and is consumed in great quantities in the fresh state. They are found all along the coast from New England to the Gulf of Mexico, and have been successfully introduced on the Pacific coast.

Shark, the general name for a group of fishes, celebrated for the size and voracity of many of the species. The form of the body is elongated, and the tail thick and fleshy. The mouth is large, and armed with several rows of compressed, sharp-edged, and sometimes serrated teeth. The skin is usually very rough, covered with a multitude of little osseous tubercles or placoid scales. They are the most formidable and voracious of all fishes, pursue

other marine animals, and seem to care little whether their prey be living or dead. They often follow vessels for the sake of picking up any offal which may be thrown overboard, and man himself often becomes a victim to their rapacity. The sharks are now divided into several families, as the *Carcharidæ*, or white sharks; *Lamindæ*, or basking sharks; *Scymnidæ*, including the Greenland shark; *Scyllidæ*, or dog-fishes; etc. The basking shark is by far the largest species, sometimes attaining the length of forty feet, but it has none of the ferocity of the others. The white shark is one of the most formidable and voracious of the species. It is rare on the British coasts, but common in many of the warmer seas, reaching a length of over thirty feet. The hammer-headed sharks which are chiefly found in tropical seas, are very voracious, and often attack man. They are noteworthy for the remarkable shape of their head, which resembles somewhat a double-headed hammer, the eyes being at the extremities. Other forms are the porbeagle, blue shark, fox shark, sea-fox, sea-ape, or thresher, and Greenland or northern shark.

Sheep, the common name of the genus *Ovis*, belonging to the hollow-horned ruminant family. Naturalists are by no means agreed as to what was the original breed of this invaluable animal, which is in modern farming almost equally important for furnishing the farm with a dressing of manure, and the community at large with mutton, clothing and other necessities of life. The leading fact in the geographical history of this genus is that it occurs both in the New and the Old World, whereas the goat tribe are naturally unknown in America. It is usually regarded by naturalists as being not only specifically, but generically, distinguished from the goat tribe; but some authorities, on the other hand, are inclined to believe that the generic separation is founded chiefly on characters which have arisen from the influential power of man. In a state of nature, the sheep is scarcely less active or energetic than the goat; its dimensions are greater, its muscular strength at least equal both in force and duration. It is also an Alpine animal, and among its native fastnesses bounds from rock to rock with almost inconceivable swiftness and agility. The four unsubdued races of sheep are as follows: The Musmon, the bearded sheep of Africa; the Argali, or wild sheep of Asia; and the Rocky Mountain sheep of the United States. The latter is larger than the largest varieties of domestic breeds. The horns of the male are of great dimensions, arising a short way above the eyes, and occupying almost the entire space between the ears, but without touching each other at their bases. The hair in this species resembles that of a deer, and is short, dry, and flexible in its autumn growth; but becomes coarse, dry, and brittle as the winter advances. The most important breed of sheep as regards the texture of the wool is the Merino, in modern times brought to the greatest perfection in Spain, through their originals probably formed the flocks of the patriarchs thousands of years ago, and have been the stock of all the fine-wooled sheep. They readily form cross breeds, called demi-merinos, which

have been brought to great perfection in France, whence, as well as from Spain, they have been imported into the United States.

Silkworm, a term applied to the larvæ, or caterpillars, of numerous species of moths. The common silkworm moth is the most important of the silk-producing moths, and is a native of China, where it has been cultivated from a remote period. The caterpillar (*silkworm*) is of yellowish-grey color, and when full-grown is about three inches in length, with a horn-like projection on the last joint of the body. It feeds upon the white mulberry, and will also eat the black mulberry and lettuce, but the silk produced by larvæ fed on the latter is of an inferior quality. The *silk* is produced in a pair of specially-constructed vessels which contain a gelatinous substance, and become much enlarged at the time when the animal is about to spin. These silk-organs unite at the mouth to form a common duct termed the *spinneret*; and through this tube the semi-fluid substance is ejected, and on coming in contact with the air hardens into the soft fiber which is so largely used in commerce. The caterpillar employs the silk in constructing a cocoon in which it assumes the pupa state. The pupa is usually killed by plunging the cocoon into hot water, because the natural exit of the moth is injurious to the silk. The color of the silk varies from a bright orange to almost white. In Europe some moths produce one generation, others two generations annually; but the caterpillars from the former class produce the best silk. In India some forms produce eggs monthly while three or four generations annually are not uncommon in that country. A valued variety is the Novi race of Italy, which spins a large white oval cocoon. The Japanese race produces a cocoon having a divided appearance in the center. The Japanese oak-feeding silk-moth, produces a green cocoon, the silk of which is much used for embroidery. Another species inhabits Northern China and is also an oak-feeder. Its cocoon is large and grayish-brown in color. The *B. Cynthia* of China and North Asia manufactures a gray cocoon, from which the Chinese manufacture a silk recognized by its soft texture. From the cocoon of the Indian or "*tussur* moth," the natives manufacture the Tussur silk fabric. *Bombyx textor* of Bengal makes a pure white silk used by the natives. There are several other varieties of silk-producing moths, but they are less notable and commercially unimportant.

Silver, a brilliant white metal which was known to the ancients. It crystallizes in cubes. It melts at a heat estimated at about 1,000°. When melted, it absorbs oxygen, and just before solidifying it evolves it with effervescence, causing spitting and projection of the metal. It is the best known conductor of electricity and heat; is extremely malleable and ductile, and has great tenacity; it is not oxidized at the ordinary temperature, and is unaffected by any atmospheric agent, except sulphur compounds which are sometimes present. It is found either in the native state or as sulphide or chloride. It also occurs in small quantities in galena, gray copper ore, pyrites, and other minerals, and frequently in sufficient quantity to pay for

extraction. It is usually produced on the large scale by fusing its ore with a lead compound, and then cupelling, or by amalgamation with mercury. Silver is found in different parts of the earth; but it is in the center of the Andes, in situations which, though exposed to the perpendicular rays of the sun, are constantly covered with snow, that nature has most abundantly distributed this metal. The silver-mines of Mexico, Peru, and the United States, far exceed in value the whole of the European and Asiatic mines.

Snail, a term popularly applied to the molluscous animals of the family *Helicidæ*, belonging to the class *Gasteropoda*. The snails have a well-developed, spirally-conical shell, into which the animal retires at the approach of winter, closing the aperture by an *epiphragm* (which is a hardened layer of mucus). The body is spiral, and distinct from the *foot*, with a short retractile head bearing four retractile tentacles, on the upper pair of which the eyes are carried. The mouth is armed with strong horny crescent-shaped lips, and is occupied by a well-developed *odontophore* — that is, a tongue-like organ, covered with an immense number of minute teeth, forming a sort of rasp. Snails lay round semi-transparent eggs, which are either deposited on the surface of the ground or buried beneath it. The large Garden Snail is abundant in England. This species, together with some of the smaller species, has been naturalized in the most remote colonies. *Helix pomatia* is the well-known Edible Snail, or Roman Snail. It was considered a great luxury by the ancient Romans, and in the Mediterranean region is still valued as an article of food, being fed in some parts in large numbers in places specially constructed for the purpose.

Sparrow, a well-known bird of the finch family which inhabits the British Islands and other parts of Europe, and has been introduced into North America and Australia. Their amazing fecundity, their strong attachment to their young, their familiarity, not to say impudence, and their voracity, are familiar to all. They often do great injury in cornfields and gardens, but they also do great service in destroying grubs, caterpillars, etc. The tree sparrow is also very widely distributed. It very closely resembles the common sparrow, but is of smaller size. Certain members of buntings are called "sparrows" in America.

Sparrow-hawk, the common name of several hawks, one of which is well-known in Britain, about twelve inches in length. The male is colored dark brown on the top of the head, and on the upper aspect of the body and wings. The under parts are of a reddish-brown color, marked with narrow bands of darker tint. The female bird is of a duller brown hue on the back and head; and her plumage is diversified by numerous white spots. It is a bold, active bird, very destructive to pigeons and small birds. The sparrow-hawk of Australia is marked by a collar of numerous bars of white. Its habits are very similar to those of the European sparrow-hawk. The American sparrow-hawk is similar in size to the European sparrow-hawk, but rather allied to the kestrel. It often preys on the chickens in poultry-yards.

Spider, the common name of insect-like animals, constituting a section of the class *Arachnida*. The head and chest are united to form one segment known as a cephalothorax; no wings are developed, and breathing is effected by means of pulmonary or lung sacs. The abdomen is furnished with from four to six cylindrical or conical mammillæ or processes, with fleshy extremities, which are perforated with numberless small orifices for the passage of silky filaments of extreme tenuity, with which they form webs, and which proceed from internal reservoirs. The spider's web is usually intended to entangle their prey (chiefly flies), but spiders also spin webs to make their abodes, and for other purposes. The legs number four pairs, and no antennæ are developed. Their mandibles are terminated by a movable hook, flexed inferiorly, underneath which, and near its extremity, is a little opening that allows a passage to a venomous fluid contained in a gland of the preceding joint. After wounding their prey with their hooked mandibles they inject this poison into the wound, which suddenly destroys the victim. The common garden or cross spider, with its geometrical web, is a very familiar species. The great crab spider and the Surinam spider, alleged to feed on small birds, are notable forms. To this family also belong the trap-door spiders, which excavate a nest in the ground, and fit to the aperture a curious little door or lid. The tarantula is regarded in Italy as capable of producing a kind of dancing madness by its bite. The English hunting or zebra spider is a pretty little arachnid. The *Clotho durandii*, inhabiting Spain and North Africa, is remarkable as constructing a kind of little tent, in the interior of which the eggs, inclosed in little pouches, are contained. The interesting water-spiders, denizens of fresh-water pools, lead a subaqueous life, and construct their nests somewhat in the form of diving-bells with the mouth opening downwards, together with thin webs in which their prey is captured.

Sponge. A term properly applied to the organisms which constitute the order *Spongida*, of the sub-kingdom *Protozoa*, but popularly applied to the dead skeleton only which is sold under that name. The true nature of sponges has long been a matter of doubt, but they are now almost universally regarded as animals. They are compound bodies, and the living part of the sponge appears to the naked eye as a soft and gelatinous substance, which, however, is seen by microscopic investigation to consist of an aggregation of extremely simple animals like *amæbæ*, some of which are furnished with long cilia. This living portion is supported on a skeleton, which, in ordinary sponges, is composed of horny elastic fibers which interlace in every direction, and pierced by numerous apertures, constituting the "sponge" of commerce. The horny skeleton is composed of a substance called *keratode*, and is usually strengthened by spiculæ of lime or flint. Of the apertures which penetrate the sponge in every direction, some are large (the *exhalent* apertures), whilst others are much smaller and more numerous (the *pores*, or *inhalent* apertures). In the living sponge a constant current of water circulates through the

canals with which these apertures communicate. Sponges are of almost universal occurrence and are almost exclusively marine, being generally found attached to the under-side of projecting rocks, or clinging to the roofs of submarine caverns. The sponges of commerce are mostly obtained from the Grecian Archipelago and the Bahamas.

Spruce. The name given to several species of trees of the genus *Abies*. The Norway spruce-fir is *Abies excelsa*, which yields the valuable timber known under the name of white or Christiania deal. It is a native of great part of Northern Europe and is a noble tree of conical habit of growth, reaching sometimes the height of 150 feet. The white spruce is *Abies alba*, the black spruce-fir is *Abies nigra*, both natives of North America. The latter attains the height of seventy or eighty feet, with a diameter of from fifteen to twenty inches. Its timber is of great value on account of its strength, lightness, and elasticity, and is often employed for the yards of ships and the sides of ladders. From the young shoots is extracted the *essence of spruce*, a decoction used in making spruce beer. The hemlock spruce-fir is the *Abies Canadensis*, a noble species, rising to the height of seventy or eighty feet, and measuring from two to three feet in diameter. It grows abundantly over great part of Canada and part of the United States. The wood is employed for laths, fences, coarse indoor work, etc. The bark is exceedingly valuable for tanning. Douglas's spruce or fir, the *Abies Douglasii* of Northwestern America, reaches a height of 100 to 180 feet in its native forests, and has been introduced into Britain as an ornamental tree.

Squirrel. A small rodent mammal of the family *Sciuridæ*, the type of which is the genus *Sciurus*, or true squirrels. This family comprehends three groups—the true squirrels (*Sciurus*), the ground-squirrels (*Tamias*), and the flying-squirrels (*Pteromys* and *Sciuropterus*). The true squirrels are distinguished by their strongly compressed inferior incisors and by their long bushy tail. They have four toes before and five behind. The thumb of the fore-foot is sometimes marked by a tubercle. They have in all four grinders, variously tuberculated, and a very small additional one above in front, which very soon falls. In color they are usually of a rich ruddy brown on the upper parts, merging into reddish or grayish-white on the under parts of the body, but the fur varies with the season and climate so that in winter it may be of a gray appearance. The head is large, and the eyes projecting and lively. Several species are enumerated, as the common squirrel, which inhabits Europe and the north of Asia; while the cat-squirrel, gray-squirrel, black squirrel, red squirrel, and the great-tailed squirrel are American species. The common British squirrel, and several other species are remarkably nimble, running up trees and leaping from branch to branch with surprising agility. They subsist on nuts, acorns, seeds, etc., of which they lay up a store for winter, some of them in hollow trees, others in the earth. Their nest, which consists of woody fiber, leaves, and moss, is usually situated in a fork of a tree, and the young, of which

there are three or four, are born in June. When engaged in eating they sit on their haunches with their tail thrown upwards on the back, grasp the eatables with their fore-paws and gnaw with their powerful teeth. The fur of some of the American species is an article of commerce.

Star-fishes. A term in its widest application embracing all the echinoderms comprised in the orders *Ophiuroidea* and *Asteroidea*, but more commonly restricted to the members of the latter order, of which the common genus *Asterias* may be taken as the type. The star-fishes proper are covered with a tough leathery skin beset with prickles, and have the form of a star, with five or more rays radiating from a central disc. In the middle of the under surface of the disc is situated the mouth, opening into a digestive system which sends prolongations into each ray. If the prickly skin be removed it will be seen to be supported by a series of plates beautifully jointed together. On the under surface of each ray the plates exhibit a series of perforations, through which, in the living state, the ambulacra or tubular feet can be protruded so as to effect locomotion. Star-fishes are found in almost all tropical, European and American seas, and some species are found as far north as Greenland.

Stork. A family of birds, whose members are chiefly confined to the old world. The true storks are contained in the genus *Ciconia*, and number six species, ranging over Europe, Asia, and Africa, and found also in South America. In form they resemble the herons, but are more robust, and have larger bills, shorter toes, with a non-serrated claw on the middle toe. They inhabit the vicinity of marshes and rivers, where they find an abundant supply of food, consisting of frogs, lizards, fishes, and even young birds. They are migratory birds, arriving from the south at their breeding haunts in the early spring, and departing again in the autumn. The *White Stork*, which is common in many countries of Europe, constructs a large nest, most frequently on the chimney of a cottage; it is a casual visitor to Britain during the period of migration. In plumage it is white, with black wings.

Sugar-cane, a plant from which great part of the sugar of commerce is obtained. It is nowhere found in a wild state, but is probably a native of tropical Asia. It grows to the height of seven or eight feet or more, and has broad ribbed leaves, and smooth shining stems. It is now cultivated in all the warm parts of the globe, such as the West Indies, Brazil, Java, Louisiana, etc., but varies in growth according to the situation, the season, or the weather. The sugar-cane flowers only after the lapse of an entire year, and a plantation lasts from six to ten years. The juice of the cane is very palatable and nutritive.

Swallow, any one of the numerous passerine birds. In the United States the best known species are the barn swallow; the cliff, eaves, or chimney swallow; the white bellied or tree swallow, and the bank swallow. The species usually described by naturalists as the type of the family is *Hirundo rustica*, a well-known European visitor, whose arrival from Africa (usually about

the middle of April) is eagerly looked for as a sign of approaching summer. Swallows usually arrive in pairs—a male and a female—though several pairs often form a small flight; but if a single bird is seen to arrive, there is a strong presumption that it has lost its mate. They return with unfailing regularity to their old haunts, and in May commence building their nests, which are in shape somewhat like a flattened cup, divided perpendicularly; they are made of clay, mud, and straw, lined with horse-hair or feathers, and the eggs, which are from four to six in number, are white, spotted with a purply-red.

Swan, a genus of swimming birds, distinguished as a group by the bill being of equal length with the head, and broad throughout its length; by the *cere* being soft; by the front toes being strongly webbed, whilst the hinder toe is not webbed, and has no lobe or underskin. The species which inhabit or visit Britain are the mute or tame swan, the whooper, whistling, or wild swan, and Bewick's swan. The mute or tame swan, so named from having little or no voice, is the only species which is permanently resident in Britain. The nest is constructed of reeds and grasses, and is generally situated near the edge of the water on some islet. The young ("cygnets") when hatched are of a light bluish-gray color. The food consists of vegetable matters, smaller fishes, worms, etc., and fish-spawn. The wild swan and Bewick's swan pass the winter in Great Britain, flying northward in the spring. The first is a native of Iceland, eastern Lapland, and northern Russia; the second has its home farther east. They have their representatives in North America in the trumpeter swan. South America produces one very distinct species, the beautiful black-necked swan. The black swan of Australia, like the white swan, is frequently kept as an ornament in parks or pleasure grounds.

Tea. A small tree, reaching the height sometimes of thirty feet, whose leaves when properly handled become the tea of commerce. To increase the leaf production, the tree is pruned to the form of a much branching shrub from two to four feet high. It is propagated from seed sown in the fall in shaded seed beds, and after a year is transferred to the field. The full crop is established about five years after planting and the yield continues for a lifetime. Japan, including Formosa, produces the most tea; China ranks second in production, and India and Ceylon third. Some tea is now successfully grown in South Carolina. The difference between green and black tea is due to a difference in the process of manufacture. Certain oxidizing elements are allowed to ferment before the leaves are subjected to a firing process in the manufacture of black tea. In making green tea these elements are roasted out of the leaves as soon as gathered. The tea is an ever-green tree. Formerly nearly all the work of manufacturing tea was done by hand but in more recent times the use of machinery has greatly increased, avoiding personal contact and reducing expense.

Thrush. A genus of birds having a bill of moderate size, straight, the upper mandible

convex, its point compressed, notched, and slightly curved downward, the gape furnished with a few hairs; the nostrils near the base of the bill oval, partly closed by a naked membrane; the first feather of the wing very short, the third and fourth longest; the tarsus longer than the middle toe, the outer toe connected with the middle toe at the base. The common species are the blackbird, fieldfare, redwing, ouzel, song thrush, and missel thrush. The song thrush or throistle, the mavis of the Scotch, is smaller than the blackbird, its whole length being not quite nine inches. Its plumage is brown, of various finely mingled shades; the throat, sides of the neck, breast, and flanks yellowish, spotted with dark brown, the belly nearly white, with a few spots of dark brown; a dark brown streak, with a lighter brown streak over it, passing from the bill to the eye. The latter is found in all parts of Europe, but deserts some of the northern parts in winter, being thus partially a bird of passage.

Tiger. The largest and most dangerous of the Felidæ; exceeding the lion slightly in size, and far surpassing him in destructiveness. It is purely Asiatic in its habitat, but is not by any means confined to the hot plains of India, though there it reaches its highest development, both of size and coloration. According to Fayrer, the full-grown male Indian tiger is from nine to twelve, and the tigress from eight to ten feet from the nose to the tip of the tail, and from thirty-six to forty-two inches high at the shoulder. The ground color of the skin is rufous or tawny yellow, shaded with white on the ventral surface. This is varied with vertical black stripes or elongated ovals and brindlings. On the face and posterior surface of the ears the white markings are peculiarly well developed. The depth of the ground color and the intensity of the black markings vary, according to the age and condition of the animal. In old tigers the ground becomes more tawny, of a lighter shade, and the black markings better defined. The ground coloring is more dusky in young animals. Though possessed of immense strength and ferocity, the tiger rarely attacks armed men, unless provoked, though often carrying off women and children. When pressed by hunger or enfeebled by age and incapable of dealing with larger prey, like buffaloes, the tiger prowls around villages, and, having once tasted human flesh, becomes a confirmed man eater. In a government report it is stated that "one tigress caused the desertion of thirteen villages, and 250 square miles of country were thrown out of cultivation." The jaguar is sometimes called the American tiger.

Toad. The popular name of any species of the family Bufonidæ, which is almost universally distributed, but is rare in the Australian region, one species being found in Celebes and one in Australia. Three species are European. The common American species is more active than the European species, moving principally by leaping. The body is swollen and heavy-looking, covered with a warty skin, head large, flat, and toothless, with a rounded, blunt muzzle. There is a swelling above the eyes covered with pores, and the parotids are large,

thick, and prominent, and secrete an acrid fluid; when handled or irritated, these animals can eject a watery fluid from the vent. But neither the secretion from the parotids nor the ejected fluid is harmful to man, and there is little doubt but that its effects on the lower animals have been much exaggerated. The toad has four fingers and five partially webbed toes. Toads are terrestrial, hiding in damp, dark places during the day, and crawling with the head near the ground. They are extremely tenacious of life, and can exist a long time without food.

Tobacco. A plant of the Solanaceae or night-side family, to which belong the potato and tomato. It grows from four to six feet high, with broad leaves and purple blossoms. The meaning of the name is unknown. The generic word nicotine is from Jean Nicot, who introduced it into France. The world's annual production exceeds two billion pounds, the United States leading with over eight hundred million pounds. The central southern States rank first in production, though the yield per acre is greatest in New England, New York, Pennsylvania, and Wisconsin. Cuba produces the best cigar tobacco, though most Havana cigars are made in Florida by Cubans from the raw material imported from the island. The United States annually produces over seven billion cigars, three and a half billion cigarettes, three hundred million pounds of manufactured tobacco, and twenty million pounds of snuff. The duty on tobacco annually equals about one-half of the internal revenue. The use of tobacco is now common in every country on the globe; both sexes smoke in China, Persia, India, and the Philippines.

Tomato. A common garden vegetable, native to South America. It was formerly called the love-apple, and was considered poisonous. It is now widely cultivated in the temperate regions. The plants are usually supported by stakes to keep the fruit off the ground. They are used largely for canning in this country. An acre of tomatoes will yield five to twenty tons of fruit, and a ton of fruit will produce almost four hundred three-pound cans. Over five and a half million cases of twenty-four cans each are packed annually. Maryland and New Jersey produce about one-half of the entire crop. The popular tomatoes are the large, smooth, red kind. The fruit varies in color from dark red to yellow, and in size from a currant to the globular form two to four inches in diameter.

Turtle. The popular name for any species of the Cheloniidæ. They may be distinguished by their long, compressed, fin-shaped, non-retractile feet, with the toes inclosed in a common skin, from which only one or two claws project. The carapace is broad and much depressed, so that when these animals are on shore, and are turned over on their backs, they cannot regain the natural position. Turtles are marine animals; their pinnate feet and light shell render them excellent swimmers. They sometimes live at a great distance from land, to which they periodically return to deposit their soft-shelled eggs (from 100 to 250 in number) in the sand.

They are found in all the inter-tropical seas, and sometimes travel into the temperate zones. The flesh and eggs of all the species are edible, though the Indian turtles are less valuable in this respect than those of the Atlantic. The most highly valued of the family is the green turtle (*Chelonia viridis*), from which turtle soup is made. It attains a large size, sometimes from six to seven feet long, with a weight of from 700 to 800 pounds. The popular name has no reference to the color of the carapace, which is dark olive, passing into dingy white, but the green fat so highly prized by epicures. The edible turtle of the East Indies is also highly prized.

Walrus. A marine carnivorous mammal, closely related to seals and sea lions. It is known by its enormous down-turned tusks, or canine teeth, projecting from the upper jaw. They sometimes reach a length of sixteen inches beyond the sockets. Walruses have a thick clumsy body, deepest at the shoulders, and their feet, which are adapted for swimming, are also furrowed so as to hold on to smooth surfaces. They reach a length of twelve feet or more and a weight of 2,200 pounds. There are two living species, one found in the Atlantic and one in the Pacific. The Atlantic form is still found on the coast of Labrador and Hudson Bay, but formerly extended further south. The Pacific form is more northern, being rarely found on the mainland. They feed largely on clams and other mollusks, which they dig from the sea bottom with their tusks. They visit islands and ice floes, and congregate in considerable numbers during the breeding period. They are hunted for their hides and oil.

Wasp. Any one of a considerable group of insects, forming, with bees and ants, the highest order of insects (Hymenoptera). These well-known insects show some variation in form, sometimes the thorax and abdomen are connected by a slender thread; in other forms these parts of the body merge into one another. The social wasps, like the hornet, or yellow jacket, are the best known. They build nests of paper attached to bushes, trees, roofs, and eaves of buildings. The paper is manufactured from wood fiber obtained from posts and unpainted boards. This is chewed in the jaws and united into sheets, often of considerable extent. The nests are often top-shaped or balloon-shaped, with layers of cells inside resembling honeycomb, all inclosed in a spherical paper envelop with a hole at the bottom for entrance and exit. These nests in tropical countries are sometimes six feet long. Other species of social wasps make nests in the ground, forming a more fragile sort of paper from decayed wood. The colonies include three forms, males, females, and workers. The males and workers die on the arrival of cold weather, but the females live over the winter in sheltered places, and start a new colony in the spring. The workers only have stings. The solitary wasps form another division of these insects which include miners, mud-daubers, and carpenters. The mason wasps, or mud-daubers, are the most familiar, as their mud nests are commonly seen on beams and walls. The carpenters cut tubular nests in wood and divide

them by mud partitions. The miners dig tunnels in the earth. Wasps are endowed with a considerable degree of intelligence.

Water Lily is found in all temperate climates, and attains great size in the tropics. The white water lily is the familiar flower of ponds and placid streams throughout North America, its large and chaste flowers claiming precedence for beauty among the indigenous flora. The lotus has similar flowers, but tinted with pink, and has strongly toothed floating leaves; it is the white lotus of the Nile. The blue lotus has fragrant blue flowers. Several species and numerous varieties are in cultivation as ornamental plants. The *Victoria Regia* is the name given in honor of Queen Victoria to the most magnificent genus of the order. There is only one species recognized by botanists, a native of the Amazonian region of South America, where it was first observed by the unfortunate botanical traveler Hænke, in 1801, and said to have been met with by the French naturalist D'Orbigny, in 1827, but not made known to European horticulturists till after its discovery in British Guiana, ten years later. This noble water lily has floating leaves of a bright green above, and a deep purple or violet on the lower surface, measuring as much as seven and one-half feet in diameter, with a uniformly turned-up margin of about three inches, thus resembling huge shallow trays. The flowers, which are proportionately as large — some measuring fourteen inches in diameter — are of all shades from white to pink, and are delightfully fragrant.

Whale. The popular name of the larger cetaceans, particularly of all those belonging to the families *Balænidæ* and *Physeteridæ* or *Catodontidæ*. In the *Balænidæ* the head is of enormous size, but is entirely destitute of teeth, instead of which the palate is furnished with an apparatus of *baleen*, or whalebone, for the purpose of straining out of the water the small crustaceans, which form the food of these whales. The fibrous structure of baleen, or whalebone, its elasticity, and its heaviness, are well known. The plates of it in the mouth of a whale are very numerous, several hundreds on each side of the mouth, and they are very closely placed together, so that the mouth is filled with them. The head of whales usually occupies from a third to a fourth of the whole length. The lower surface of the true skin extends into a thick layer of blubber, an open net-work of fibers, in which fat is held. The blubber is from one foot to two feet in thickness, the whole mass in a large whale sometimes weighing more than thirty tons. The most important species is that known as the Right whale or Greenland whale. It inhabits the seas of the northern parts of the world, and abounds chiefly in the arctic regions. It commonly attains a size of sixty or seventy feet in length. The main physical characteristics of the whale are its distorted jaws, with upward directed nostrils, its great bulk, and rudimentary limbs. The huge bulk of the creature is driven forward by the flexible caudal fin, and while the body is rigid in front it exhibits great mobility behind. The blow-holes are placed on the top

of the head, and the animal can only respire when these are above water. The larger whales travel at the rate of about four miles an hour, but when pursuing their prey or goaded by pain they rush through the water at a much greater pace. They are aided in this by the broad and powerful tail, which is their chief organ of locomotion. Instead of being vertical, as in the fishes, this is horizontal, and the larger species can command immense driving power. The tail is also used as an offensive and defensive weapon. The smooth, shining skin is immediately underlaid by a thick coating of blubber, the great object of the whalers. This is at once dense and elastic, and while it preserves the animal heat it also serves to reduce the mighty bulk of the whale and to bring it nearer to the specific gravity of the element in which it spends its existence. It might be thought that the whale, with its vast bulk, would need sea creatures of a high organization to nourish it; but this is not so. Its chief food consists of minute mollusks, and with these its immense pasture-grounds in the north seas abound.

Whip-poor-will. A bird widely known on account of its oft-repeated cry of *whip-poor-will*. It is not often seen, although it is abundant in damp woods of the eastern United States. It usually rests on the ground during the day and is active at twilight and early nightfall, sending forth its cry, and also coursing low over the grass in search of insects. It is about ten inches long and of plain colors, being grayish; much variegated with black and buff. Its bill is very broad, its mouth large and provided with a tuft of long bristles. It builds no nest, but deposits its eggs on leaves or a slight depression in the ground. To the same family belong the chuck-will's-widow and the night-hawk.

Willow. A class of trees of the same family as the poplar. Willows vary in size from those of the Alps, which are an inch or two high, to trees of from fifty to eighty feet. They are found in most countries, with the exception of Australia, and they grow rapidly. They have many and large roots, which grow a long distance through moist soil, and bind it with a network of fibers, thus preventing the banks of streams from being worn away. The bark is tough and bitter; it is used in making fish nets, ropes, etc.; for tan-bark, and sometimes in Norway and Sweden for mixing with oatmeal. The wood is used in houses, vessels, farm tools, casks, etc.; as fuel and for charcoal. The twigs and young shoots are used in making baskets and light furniture. There are some sixty North American willows, ten of which are not found elsewhere. The most important of all kinds is the white willow, common throughout Asia, Europe, and America. It sometimes reaches the height of eighty feet. It is very useful on the prairies, as it is a fast grower, and also protects other trees from the wind. Other kinds are the golden, blue, brittle, varnished, and green willows. The weeping willow, a native of Asia and North Africa, has been introduced into America. It is a large tree, and one of the first to leaf out in the spring.

Wistaria. A genus of plants having pinnate leaves and flowers, in terminal racemes, the pod leathery. The species were formerly included in the genus *Glycine*. Some of them are among the most magnificent ornamental climbers. *Wistaria frutescens*, a native of Virginia, Illinois, and other parts of North America of similar climate, found chiefly in marshy grounds, attains the length of thirty feet, and has beautiful racemes of fragrant bluish-purple flowers.

Wolf. The name applied to several species of carnivorous animals, belonging to the Dog family. The common wolf is about five feet in length including the tail, which is twenty inches, and about thirty-two inches in height at the shoulders. The muzzle much resembles that of a sheep-dog; the ears are upright and pointed, and the eyes are set obliquely. The coat is subject to variation in tint, depending much upon the country the animal inhabits. Perhaps the most usual tint is a yellowish-grey; but it is sometimes almost black. In Europe the animal is still found in Lapland, Norway, Sweden, Russia, Poland, Hungary, some districts of Germany, France, Italy, Spain, and Greece. In Britain, the last wolf was slain in 1680, but in Ireland the species lingered until 1710. The wolf of India is considered a distinct species, and has a dingy reddish-white fur. The North American wolf has a wide range, extending from Greenland to Mexico, and is closely similar to the European race.

Woodcock. A famous game bird belonging to the snipe family, and found in northern parts of both the Old and New Worlds. The American woodcock is about eleven inches long, variegated in black, brown, gray, and rusty colors. The bill is very long and flexible at the end. It is thrust into the soft ground, in search of earthworms, and the presence of woodcocks can often be detected by a cluster of these holes. The European bird is larger. It is a winter resident in England, breeding in summer in North Scotland.

Woodpecker is the popular name of the old Linnæan genus *Picus*, now greatly divided. Woodpeckers have a slender body, powerful beak, and protrusile tongue, which is sharp, barbed, and pointed, and covered with a glutinous secretion derived from glands in the throat, this coating being renewed every time the tongue is drawn within the bill. The tail is stiff and serves as a support when the birds are clinging to the branches or stems of trees. Woodpeckers are very widely distributed, but abound chiefly in warm climates. They are solitary in habit, and live in the depths of forests. Fruits, seeds, and insects constitute their food, and in pursuit of the latter they

exhibit wonderful dexterity, climbing with astonishing quickness on the trunks and branches of trees, and when, by tapping with their bills, a rotten place has been discovered, they dig vigorously in search of the grubs or larvæ beneath the bark.

Wren. A genus of birds having a slender, slightly curved, and pointed bill; the wings very short and rounded; the tail short, and carried erect; the legs slender, and rather long. Their plumage is generally dull. They live on or near the ground, seeking for insects and worms among low brushes, and in other similar situations. The common or European wren is found in all parts of Europe, and in Morocco and Algeria, and in Asia Minor and Northern Persia. The common wren is more abundant in the north than in the central and southern parts of Europe. It frequents gardens, hedges, and thickets. Its flight is not long sustained; it merely flits from bush to bush, or from one stone to another, with very rapid motion of the wings. It sometimes ascends trees, nearly in the manner of creepers. The North American species of wren are numerous; but many of them are ranked under different genera. The house wren is larger than the European wren, being about five inches long. It is abundant in the eastern parts of the United States. It is less shy than the European wren, and often builds its nest near houses, and in boxes prepared for it. The nests are made to fill the boxes; and to effect this a large mass of heterogeneous materials is sometimes collected. The song of the house wren is very sweet. The male is a very bold, pugnacious bird, readily attacking birds far larger than itself, as the bluebird and swallows, and taking possession of the boxes which they have appropriated for their nests. It even attacks cats when they approach its nest.

Zebra. A name sometimes given to all the striped *Equidæ*, all of which are natives of South Africa; but also, in a more restricted use, designating a single species, *Equus* or *Asinus Zebra*, a native of the mountainous districts of South Africa. In the whole group the characters more resemble those of the ass than the horse. The zebra is about twelve hands high at the shoulder. It is of a light, graceful form, with slender limbs and narrow hoofs; the head light, the ears rather long and open; the ground color white or slightly tinged with yellow; the head, neck, body, and legs striped with black; the neck and body transversely, but not regularly; the head with bands in various directions, the legs with irregular cross stripes. The zebra lives in small herds, inhabiting the most secluded spots.

	<i>Nightingale.</i> Forlornness.	<i>Wolf.</i> Cruelty.

April Fool's Day. The modern custom of sending one upon a bootless errand on the first day of April is of uncertain origin. It is possible, however, that it may be a relic of some old heathen festival. The custom, whatever its origin, of playing little tricks on this day, whereby ridicule may be fixed upon unguarded individuals, appears to be general throughout Europe, and of almost universal scope. In France, one thus imposed upon is called *un poisson d'Avril*, "an April fish." In England and the United States such a person is called an "April fool"; in Scotland, a "gowk." The favorite jest is to send one upon an errand for something grossly nonsensical, or to make appointments which are not to be kept, or to call to a passer-by that his latchet is unloosed, or that there is a spot of mud upon his face. It is curious that the Hindus practise precisely similar tricks during the Holi Festival which takes place about the time of the vernal equinox.

Arms and Armor. The former term is applied to weapons of offense, the latter to the various articles of defensive covering used in war and military exercises, especially before the introduction of gunpowder. Weapons of offense are divisible into two distinct sections — firearms, and arms used without gunpowder or other explosive substance. The first arms of offense would probably be wooden clubs, then would follow wooden weapons made more deadly by means of stone or bone, stone axes, slings, bows and arrows with heads of flint or bone, and afterwards various weapons of bronze. Subsequently a variety of arms of iron and steel were introduced, which comprised the sword, javelin,

pike, spear, or lance, dagger, axe, mace, chariot scythe, etc., with a rude artillery consisting of catapults, ballistæ, and battering-rams. From the descriptions of Homer we know that almost all the Grecian armor, defensive and offensive, in his time was of bronze; though iron was sometimes used. The lance, spear, and javelin were the principal weapons of this age among the Greeks. The bow is not often mentioned. Among ancient nations the Egyptians seem to have been most accustomed to the use of the bow, which was the principal weapon of the Egyptian infantry. Peculiar to the Egyptians was a defensive weapon intended to catch and break the sword of the enemy. With the Assyrians the bow was a favorite weapon; but with them lances, spears, and javelins were in more common use than with the Egyptians. Most of the large engines of war, chariots with scythes projecting at each side from the axle, catapults, and ballistæ, seem to have been of Assyrian origin. During the historical age of Greece the characteristic weapon was a heavy spear from twenty-one to twenty-four feet in length. The sword used by the Greeks was short, and was worn on the right side. The Roman sword was from twenty-two to twenty-four inches in length, straight, two-edged, and obtusely pointed, and, as by the Greeks, was worn on the right side. It was used principally as a stabbing weapon. It was originally of bronze. The most characteristic weapon of the Roman legionary soldier, however, was the *pilum*, which was a kind of pike or javelin, some six feet or more in length. The *pilum* was sometimes used at close-quarters, but more commonly it was

thrown. The favorite weapons of the ancient Germanic races were the battle-axe, the lance or dart, and the sword. The weapons of the Anglo-Saxons were spears, axes, swords, knives, and maces or clubs. The Normans had similar weapons, and were well furnished with archers and cavalry. The cross-bow was a comparatively late invention introduced by the Normans. Gunpowder was not used in Europe to discharge projectiles till the beginning of the Fourteenth Century. Cannon are first mentioned in England in 1338, and there seems to be no doubt that they were used by the English at the siege of Cambrai, in 1339. The projectiles first used for cannon were of stone. Hand firearms date from the Fifteenth Century. At first they required two men to serve them, and it was necessary to rest the muzzle on a stand in aiming and firing. The first improvement was the invention of the match-lock, about 1476; this was followed by the wheel-lock, and about the middle of the Seventeenth Century by the flint-lock, which was in universal use until it was superseded by the percussion-lock, the invention of a Scotch clergyman early in the Nineteenth Century. The needle-gun dates from 1827. The only important weapon not a firearm that has been invented since the introduction of gunpowder is the bayonet, which is believed to have been invented about 1650. Some kind of defensive covering was probably of almost as early invention as weapons of offense. The principal pieces of defensive armor used by the ancients were shields, helmets, cuirasses, and greaves. In the earliest ages of Greece the shield is described as of immense size, but in the time of the Peloponnesian War (about B. C. 420) it was much smaller. The Romans had two sorts of shields; the *scutum*, a large oblong rectangular highly convex shield, carried by the legionaries; and the *parma*, a small round or oval flat shield, carried by the light-armed troops and the cavalry. In the declining days of Rome the shields became larger and more varied in form. The helmet was a characteristic piece of armor among the Assyrians, Greeks, Etruscans, and Romans. Like all other body armor it was usually made of bronze. The helmet of the historical age of Greece was distinguished by its lofty crest. The Roman helmet in the time of the early emperors fitted close to the head, and had a neck-guard and hinged cheek-pieces fastened under the chin, and a small bar across the face for a visor. Both Greeks and Romans wore cuirasses, at one time of bronze, but latterly of flexible materials. Greaves for the legs were worn by both, but among the Romans usually on one leg. The ancient Germans had large shields of plaited osier covered with leather, afterwards their shields were small, bound with iron, and studded with bosses. The Anglo-Saxons had round or oval shields of wood, covered with leather, and having a boss in the center; and they also had corselets, or coats of mail, strengthened with iron rings. The Normans were well protected by mail; their shields were somewhat triangular in shape, their helmets conical. Great variety is found in the pattern of the armor, and in some cases small pieces of metal were used instead of rings, forming what is called *scale-armor*. A

suit of armor consisting of larger pieces of metal, called *plate-armor*, was now introduced, and the whole body came to be incased in a heavy metal covering. The various forms of ring or scale armor were gradually superseded by the plate-armor, which continued to be worn until long after the introduction of firearms and field-artillery. A complete suit of armor was an elaborate and costly equipment, consisting of a number of different pieces, each with its distinctive name. In modern European armies the metal cuirass is still to some extent in use, the *cuirassiers* being heavy cavalry; and it is said that this piece of armor proves a useful defense against rifle bullets. During all the time that the use of heavy armor prevailed, the horsemen, who alone were fully armed, formed the principal strength of armies; and infantry were generally regarded as of hardly any account. England was, however, an exception, as the English archers were almost at all times, before the invention of gunpowder, an important and sometimes the chief force in the army. The bow (*long-bow*) of the English archers was from five to six feet in length, and the arrow discharged from it was itself a yard long. The long-bow continued in general use in England till the end of the reign of Elizabeth, and even as late as 1627 there was a body of English archers in the pay of Richelieu at the siege of La Rochelle.

Barber's Pole. Anciently the functions of barber and surgeon were united in one person. The barber-surgeon was formerly known by his

pole at the door. The pole was used by the barber-surgeon for the patient to grasp in blood-letting, a fillet or bandage being used for tying his arm. When the pole was not in use, the tape was tied to it and twisted round it, and thus both were hung up as a sign. At length, instead of the hanging of the actual pole used in the operation, a pole was painted with stripes around it, in imitation of the real pole and its bandages; hence the *barber's pole*.

Black Friday. (1) December 6, 1745, the day on which the news arrived in England that the Pretender had landed. (2) May 11, 1866, the culmination of the commercial panic in London, when Overend, Gurney & Co. stopped payment. (3) Particularly September 24, 1869, in Wall Street, New York, when a group of speculators forced the price of gold to 162½, creating a serious crisis. (4) A similar panic occurred September 18, 1873.

Black Hole. An appellation familiarly given to a dungeon or dark cell in a prison, and which is associated in the public mind with a horrible catastrophe in the history of British India; viz, the cruel confinement of a party of English in an apartment called the "Black Hole of Calcutta," on the night of the 18th of June, 1756. The garrison of the fort connected with the English factory at Calcutta having been captured by the Nabob Suraja Dowlah, he caused the prisoners, one hundred and forty-six in number, to be confined in an apartment twenty feet square. This cell had only two small windows, obstructed by a veranda, and after a night of excruciating agony from pressure, heat, thirst, and want of air, there were in the morning only twenty-three survivors.

Black Maria. Everybody knows that the Black Maria is the vehicle used to convey prisoners and disorderly persons to a police station or prison. Probably few are aware how its name originated. During the old colonial days, Maria Lee, a negress, kept a sailors' boarding house in Boston. She was a woman of gigantic stature and prodigious strength, and was of great assistance to the authorities in keeping the peace, as the entire lawless element of that locality stood in awe of her. Whenever an unusually troublesome person was to be taken to the station house, the services of Black Maria were likely to be required. It is said that she took at one time, and without assistance, three riotous sailors to the lock-up. So frequently was her help required that the expression, "Send for Black Maria," came to mean "take the disorderly person to jail."

Blarney Stone. This relic of the ancient castle of Blarney, in Ireland, is a triangular stone suspended from the north angle of the castle about twenty feet from the top, and bearing the inscription: "Cormack MacCarthy fortis me fieri fecit, A. D., 1446" (Built in 1446 A. D., by Cormack MacCarthy). According to a tradition of the country the castle was besieged by the English under Carew, Earl of Totness, who, having concluded an armistice with the commander of the castle on condition of its surrender, waited long for the fulfillment of the terms, but was put off from day to day, with soft speeches instead, until he became the jest of Elizabeth's ministers and the dupe of the Lord of Blarney. From that day "kissing the Blarney Stone" has been synonymous with flattery and smooth, deceitful words.

Bloody Shirt. The origin of this phrase was given by Roscoe Conkling, in a speech made in New York, September 17, 1880. Referring to the "bloody shirt," he said: "It is a relief to remember that this phrase, with the thing it means, is no invention of our politics. It dates back to Scotland, three centuries ago. After a massacre in Glenfruin, not so savage as that which has stained our annals, two hundred and twenty widows rode on white palfreys to Stirling Tower, bearing each on a spear her husband's bloody shirt. The appeal waked Scotland's slumbering sword, and outlawry and the block made the name of Glenfruin terrible to victorious Clan Alpine, even to the third and fourth generation."

Blue Stocking means, figuratively, a female pedant. In 1400, a society of ladies and gentlemen was formed at Venice, distinguished by the color of their stockings, and addicted to literary pursuits. Similar societies sprang up throughout Europe generally. In England, they did not become extinct till 1840, when the Countess of Cork, who, as Miss Moncton, was the last of the clique, died.

Bohemian. A term of mild reproach bestowed on persons of unconventional habits. But a "Bohemian," in the real sense of the word, is a person, man or woman, who does not go into "society;" who is happy-go-lucky, unconventional, now "flush," now "short" of money; who, having money, spends it freely, enjoying it, and having none, hopes for it in the future; who makes the best of everything, and takes life as it comes. Your true Bohemian is a philosopher, and in spite of his unconventionality he is at least as apt to be respectable as a leader in conventional society.

Boycott. The word "boycott" originated in this way: Lord Erne, an Irish land-owner, had for his agent, Captain Boycott, Lough Mask, Connemara, who treated the tenants with such severity that they petitioned for his removal. As Lord Erne ignored their complaints, they and their sympathizers retaliated in the autumn of 1880, by refusing to work for Boycott and preventing any one else from doing so. The agent would have been ruined had not certain Ulster men, protected by an armed force, come to his relief and husbanded the crops. Boycott, meaning "a combination that refuses to hold any relations, either public or private, business

or social, with any person or persons, on account of political or other differences," was first used by the Irish Land Leaguers, and the word thence passed into popular use.

Bridges. The earliest bridges were no doubt trunks of trees. The arch seems to have been unknown amongst most of the nations of antiquity. Even the Greeks had not sufficient acquaintance with it to apply it to bridge building. The Romans were the first to employ the principle of the arch in this direction, and after the construction of such a work as the great arched sewer at Rome, the *Cloaca Maxima*, a bridge over the Tiber would be of comparatively easy execution. One of the finest examples of the Roman bridge was the bridge built by Augustus over the Nera at Narni, the vestiges of which still remain. It consisted of four arches, the longest of 142 feet span. The most celebrated bridges of ancient Rome were not generally, however, distinguished by the extraordinary size of their arches, nor by the lightness of their piers, but by their excellence and durability. The span of their arches seldom exceeded seventy or eighty feet, and they were mostly semicircular, or nearly so. The Romans built bridges wherever their conquests extended, and in Britain there are still a number of bridges dating from Roman times. One of the most ancient post-Roman bridges in England is the Gothic triangular bridge at Croyland, in Lincolnshire, said to have been built in 860, having three archways meeting in a common center at their apex, and three roadways. The longest old bridge in England was that over the Trent at Burton, in Staffordshire, built in the Twelfth Century, of squared freestone, and recently pulled down. It consisted of thirty-six arches, and was 1,545 feet long. Old London bridge was commenced in 1176, and finished in 1209. It had houses on each side like a regular street till 1756-58. In 1831, it was altogether removed, the new bridge, which had been begun in 1824, having then been finished. The art of bridge-building made no progress after the destruction of the Roman Empire till the Eighteenth Century, when the French architects began to introduce improvements, and the constructions of Perronet (Nogent-sur-Seine; Neuilly; Louis XVI. bridge at Paris) are masterpieces. Within the last half century or so the use of steam and iron, the immense developments of all mechanical contrivances, and the great demand for railway bridges and viaducts have given a great stimulus to invention in this department. Stone bridges consist of an arch or series of arches, and in building them the properties of the arch, the nature of the materials, and many other matters have to be carefully considered. It has been found that in the construction of an arch the slipping of the stones upon one another is prevented by their mutual pressure and the friction of their surfaces; the use of cement is thus subordinate to the principle of construction in contributing to the strength and maintenance of the fabric. The masonry or rock which receives the lateral thrust of an arch is called the *abutment*, the perpendicular supports are the *piers*. The width of an arch is its *span*; the greatest span in any stone bridge is about 250 feet. A one-

span bridge has, of course, no piers. In constructing a bridge across a deep stream it is desirable to have the smallest possible number of points of support. Piers in the waterway are not only expensive to form, but obstruct the navigation of the river, and by the very extent of resisting surface they expose the structure to shocks and the wearing action of the water. In building an arch, a timber framework is used called the *center*, or *centering*. The *centering* has to keep the stones or *voussoirs* in position till they are keyed in, that is, all fixed in their places by the insertion of the keystone. The first iron bridges were erected from about 1777 to 1790. The same general principles apply to the construction of iron as of stone bridges, but the greater cohesion and adaptability of the material give more liberty to the architect, and much greater width of span is possible. At first, iron bridges were erected in the form of arches, and the material employed was cast iron; but the arch has now been generally superseded by the beam or *girder*, with its numerous modifications; and wrought iron or steel is likewise found to be much better adapted for resisting a great tensile strain than cast metal. Numerous modifications exist of the beam or girder, as the *lattice-girder*, *bow-string-girder*, etc.; but of these none is more interesting than the *tubular* or hollow girder, first rendered famous from its employment by Robert Stephenson in the construction of the railway bridge across the Menai Strait, and connecting Anglesey with the mainland of North Wales. This is known as the Britannia Tubular Bridge. The tubes are of a rectangular form, and constructed of riveted plates of wrought iron, with rows of rectangular tubes or cells for the floor and roof respectively. The bridge consists of two of these enormous tubes or hollow beams laid side by side, one for the up and the other for the down traffic of the railway, and extending each to about a quarter of a mile in length. Other tubular bridges of importance are the Conway Bridge, over the River Conway, an erection identical in principle with the Britannia Bridge, but on a smaller scale; the Brotherton Bridge over the river Aire; the tubular railway bridge across the Damietta branch of the Nile, which has this peculiarity, that the roadway is carried *above* instead of *through* the tubes; and the Victoria Bridge over the St. Lawrence, Canada. In many respects this structure was even more remarkable than the Britannia Bridge, being supported by twenty-four piers, and nearly two miles in length, or about five and a half times that of the bridge across the Menai Strait. The bridge over the Firth of Forth, at Queensferry, a notable structure, has two chief spans of 1,710 feet, two others of 680 feet, fifteen of 168 feet, and seven small arches, and will give a clear headway for navigation purposes of 150 feet above high-water of spring-tides. The great spans consist of a cantilever at either end, 680 feet long, and a central girder of 350 feet. A girder railway bridge across the Firth of Tay at Dundee was opened in 1887, being the second built at the same place, after the first had given way in a great storm. It is two miles seventy-three yards long, has eighty-five spans, is seventy-seven feet high and carries two lines of rails.

Both bridges were built to carry the lines of the North British Railway. The Crumlin Railway Viaduct, South Wales, having lattice-girders supported on open-work piers is more remarkable for height than length, being 200 feet high. Suspension bridges, being entirely independent of central supports, do not interfere with the river, and may be erected where it is impracticable to build bridges of any other kind. The entire weight of a suspension bridge rests upon the piers at either end from which it is suspended, all the weight being below the points of support. Such bridges always swing a little, giving a vibratory movement which imparts a peculiar sensation to the passenger. The modes of constructing these bridges are various. The roadway is suspended either from chains or from wire-ropes, the ends of which require to be *anchored*, that is attached to the solid rock or masses of masonry or iron. One of the earlier of the great suspension bridges is that constructed by Telford over the Menai Strait near the Britannia Tubular Bridge, finished in 1825; the opening between the points of suspension is 580 feet. The Hammer-smith Chain-bridge, the Union Suspension bridge near Berwick, and the suspension bridge over the Avon at Clifton are other British examples. On the European Continent, the Fribourg Suspension bridge in Switzerland, span 870 feet, erected 1834, is a celebrated work; as is that over the Danube connecting Buda with Pesth. In America the lower suspension bridge over the Niagara, two miles below the falls, now replaced by a steel arch bridge, was 821 feet long; it had two roadways connected together but fifteen feet apart, the lower serving for ordinary traffic, the upper carrying three lines of rails, 245 feet above the river. Another bridge, close to the falls, has a span of 1,268 feet. The Cincinnati bridge over the Ohio has a length of 2,720 feet. A suspension bridge of great magnitude, connecting the city of New York with Brooklyn, was opened in 1883. The central or main span is $1,595\frac{1}{2}$ feet from tower to tower, and the land spans between the towers and the anchorages 930 feet each; the approach on the New York side is 2,492 feet long, and that on the Brooklyn side, 1,901 feet; total length of bridge 5,989 feet. The height of the platform at the center is 135 feet above high water, and at the ends 119 feet. The roadway is eighty-five feet broad, and is divided into five sections, the two outside for vehicles, the two inner for trolleys, the middle one, twelve feet above the rest, for foot-passengers. Cost over \$15,000,000. Though the oldest bridges on record were built of wood, like the Sublician Bridge at Rome, or that thrown by Cæsar across the Rhine, it is only in certain places and for certain purposes that wood is much used at present. In modern times Germany has been the school for wooden bridges. Perhaps the most celebrated of all wooden bridges was that which spanned the Rhine at Schaffhausen in Switzerland. This was 364 feet in length and eighteen feet broad. It was designed and executed by Ulric Grubenman, a village

carpenter, in 1758, and was destroyed by the French, in 1799. In the United States, where timber is still in common use, we have some fine examples, the Trenton Bridge over the Delaware, erected in 1804; the bridge over the Susquehanna, etc.

Some of the most notable developments in the art of bridge construction are to be found in North America, where an enormous railway system, traversing a country of great rivers and ravines, has given an exceptional stimulus to the art. The main characteristics of American bridges are simplicity and boldness of design, the reduction of the number of members to a minimum by the use of open trusses composed of simple systems rather than the plate, tubular, or closely-latticed girders of European engineers, thus offering less resistance to wind pressure.

NOTABLE BRIDGES

- Albany** (over the Hudson). Iron; length of draw, 400 feet.
- Arcueil Aqueduct.** Stone; length, 1,279 feet; semi-circular arch.
- Barentin Viaduct.** Stone; length, 1,545 feet; semi-circular arch.
- Biscari Aqueduct.** Stone; length, 1,222 feet; ogival.
- Bombay (Madras).** Length, 3,730 feet.
- Boyne.** Wrought iron; length, 1,760 feet; lattice.
- Brighton Viaduct.** Brick; length, 960 feet; semi-circular arch.
- Britannia.** Wrought iron; length, 1,488 feet; tubular.
- Brooklyn (East River).** Length, 5,989 feet; suspension.
- Carpentras Aqueduct.** Stone; length, 1,687 feet; semi-circular arch.
- Chaumont Viaduct.** Length, 1,968 feet; semi-circular arch.
- Cincinnati and Covington** (over the Ohio). Built, 1867; reconstructed, 1897; length, 2,720 feet; suspension.
- Cleveland Viaduct.** Length, 3,211 feet; width, 64 feet; contains a drawbridge 332 feet in length, 46 feet wide, and 68 feet above the ordinary water mark.
- Clifton,** now known as the Upper Arch (over Niagara River). Length, 1,268 feet.
- Congleton Viaduct.** Stone; length, 2,870 feet; arch, segment.
- Crumlin Viaduct.** Iron; length, 1,050 feet; truss-gird.
- Danube** (near Stadlan, Austria). Iron; length, 2,520 feet.
- Dee Viaduct.** Stone; length, 1,388 feet; semi-circular arch.
- Dinting Vale Viaduct.** Timber; length, 1,452 feet; arch, segment.
- Dubuque** (over the Mississippi). Iron; length, 1,758 feet.
- Florence** (over the Arno). Built 1569; marble; length, 322 feet; elliptical arch.
- Forth Bridge.** Over the Firth of Forth, Scotland; cantilever; iron and steel; length, nearly two miles, including approaches. Opened March 4, 1890.
- Franzdorf Viaduct.** Stone; length, 1,916 feet; semi-circular arch.
- Godavery Irrigation Aqueduct.** Stone; length, 2,356 feet; arch, segment.
- Goeltzschthal Viaduct.** Stone; length, 1,900 feet; elliptical arch.
- Harlem River Aqueduct** (High Bridge). Stone; length, 1,450 feet; semi-circular arch.
- Indre Viaduct.** Stone; length, 2,463 feet; semi-circular arch.
- Kinzua Viaduct** (R. R.). On Bradford branch of New York, Lake Erie, and Western R. R., near Bradford, Pa., iron; height, 301 feet; length, 2,052 feet.
- Lisbon Aqueduct.** Stone; length, 3,805 feet; ogival.
- London Bridge.** The present stone bridge is 920 feet long, 56 feet wide and 55 feet high, with a central span of 150 feet.
- Louisville, Ky.** (over the Ohio). Length, 5,310 feet.
- Maintenon Aqueduct.** Stone; length, 16,367 feet; semi-circular arch.
- Minneapolis Suspension Bridge.** Completed, 1876; length, with approaches, one mile.
- Montpellier Aqueduct.** Stone; length, 3,214 feet; semi-circular arch.

New Tay Bridge. Across the Firth of Tay near Dundee, Scotland, is a steel truss bridge, 10,780 feet long.

Niagara Cantilever. Steel bridge over the Niagara River; length, 910 feet.

Niagara Suspension. (Now replaced by steel and known as the Lower Arch.) Total length, about 2,220 feet; width of span, 821 feet; height above river, 245 feet.

Nogent-sur-Marne Viaduct. Stone; length, 2,722 feet; semi-circular arch.

Omaha (over the Missouri). Length, 2,800 feet.

Pavia. Stone; length, 620 feet; ogival.

Poughkeepsie. Iron; cantilever; length, 6,767 feet.

Quincy (over the Mississippi). Iron; length, 3,200 feet.

Rochester (new). Cast iron; length, 498 feet; arch, segment.

Rockville Bridge. Near Harrisburg, Pa., is the largest four-track stone railway bridge in the world. Length, 3,810 feet. It contains forty-eight 70-foot stone arches, and cost \$1,000,000.

Royal Border Bridge (Berwick). Stone; length, 2,160 feet; semi-circular arch.

Schuylkill. Timber; length, 1,000 feet; frame truss.

St. Anne's. Wrought iron; length, 1,350 feet; tubular.

St. Charles (Mo.). Iron; length, 6,536 feet.

St. Louis (across the Mississippi). Minnesota and North Western R. R.; iron; 1,825 feet long, draw span 412 feet long, the latter being one of the largest and heaviest in the world.

Trenton (Delaware). Timber; length, 960 feet; frame truss.

Victoria (St. Lawrence). Wrought iron; length, 9,437 feet; tubular.

Washington Bridge (across Harlem River valley, N. Y.); two steel arches of 510 feet span; roadway, 80 feet wide; length, 2,375 feet; height above the Harlem River, 133 feet.

Williamsburg. Across East River, connecting Manhattan and Brooklyn. Total length, 7,275 feet; main span, 1,600 feet; width, 118 feet; height above mean high water, 135 feet; cost \$12,000,000, exclusive of real estate.

British Lion. This term symbolizes the spirit of pugnacity of the British nation, as opposed to "John Bull," which symbolizes the substantiality, obstinacy, and solidity of the British nation, with all its prejudices and national peculiarities. To rouse John Bull is to tread on his corns; to rouse the British Lion is to blow the war-trumpet in his ears.

Brother Jonathan is a collective personification of the people of the United States. When General Washington, after being appointed commander of the army of the Revolutionary War, came to Massachusetts to organize it and make preparations for the defense of the country, he found a great want of ammunition and other means necessary to meet the powerful foe he had to contend with, and great difficulty to obtain them. If attacked in such condition, the cause at once might be hopeless. On one occasion, at that anxious period, a consultation of the officers and others was had, when it seemed no way could be devised to make such preparation as was necessary. His Excellency, Jonathan Trumbull, the elder, was then governor of the State of Connecticut, on whose judgment and aid the General placed the greatest reliance, and remarked: "We must consult 'Brother Jonathan' on the subject." He did so, and the governor was successful in supplying many of the wants of the army. When difficulties afterwards arose, and the army was spread over the country, it became a byword, "We must consult Brother Jonathan."

Burial is applied to the prevalent method among civilized nations of disposing of the dead by hiding them in the earth. The general tendency of mankind has been to bury the dead out of sight of the living; and various

as the methods of accomplishing this end have been, they have resolved themselves into three great classifications: (1) The simple closing up of the body in wood or stone. (2) The burning of the body and the entombing of the ashes. (3) The embalming of the body. The first of these seems to be the earliest form of which we have any record, and it is the form most amply sanctioned by the existing practice of the civilized world. It is the method referred to in the earliest Scriptures; and all are familiar with the touching scene in which Abraham buries Sarah in the cave in the land of Canaan which belonged to Ephron, but was, after a solemn and courteous negotiation, secured to Abraham for a possession in which to bury his dead. There is frequent allusion in the later Scriptures, and especially in the New Testament, to the embalming of the body in antiseptics and fragrant substances. The Israelites may have learned the practice of embalming from the Egyptians, among whom it was an art so greatly cultivated and extensively practiced that Egyptian corpses, as inoffensive as any article of wood or stone, are scattered over Europe in museums, and are even to be found as curiosities in private houses. The soil and climate of Upper Egypt seem to have afforded facilities for embalming unmatched in any other part of the world; and in other places the vestiges of the practice are comparatively rare, though it is usual even yet to embalm royal corpses, and in some places to preserve a series of mummies, as in the vault of the monastery of Kreuzberg, at Bonn, where the monks have been successively preserved in their costume for centuries. The practice of incineration, of the burning of the body and the entombing of the ashes, deserves more inquiry than it has yet obtained. In Greece, in Etruria — both before and after it came under the Romans — and in the North of Europe, the simple burial of the body, and its prior reduction to ashes, were both practiced, and sometimes contemporaneously. The tombs of Etruria are rich in art, much of it going to the adornment of the urns of baked clay in which the ashes of the dead are kept. Vessels of terra cotta, or cooked earth, containing human remains, have been found, often so large that they appear to have served as coffins for containing the whole body. When human remains are connected with barrows, cromlechs, or the large, shapeless pillars commonly called Druidical, it is often very questionable whether the monument was made to receive such remains. It is certainly ascertained to have been a practice in ancient times to bury bodies in tombs which were themselves ancient when they received their inmates. Some of the grandest buildings in the world have been tombs; such are the pyramids, the castle of St. Angelo, the tomb of Cecilia Metella, and many temples scattered over Hindustan. Thus, the respect paid by the living to the dead has preserved for the world many magnificent fruits of architectural genius and labor. A notion that the dead may require the things they have been fond of in life has also preserved to the existing world many relics of the customs of past ages. The tombs of Egypt have supplied an immense quantity of

them, which have taught the present age more of the manners of ancient nations than all the learned books that have been written. It is an awful remembrance, at the same time, that inanimate things were not all that the dead were expected to take with them. Herodotus tells us of favorite horses and slaves sacrificed at the holocaust of the dead chief. The same thing has been done in our own day in Ashantee. In many countries the wives had the doom, or privilege, as it was thought, of departing with their husbands; and down to the present generation the practice has lived in full vigor in the Hindu suttee. Among the Jews, the Greeks, the Romans, and many ancient nations the dead were buried beyond the towns. In Christian countries, if the remains of the saint to whom a church was dedicated could be obtained — or anything passing for the remains — they were buried near the altar in the choir. It became a prevalent desire to be buried near these saints, and the bodies of men eminent for their piety, or high in rank, came thus to be buried in churches.

Candlemas, in its ecclesiastical meaning, is the feast of the Purification of the Virgin Mary, and is observed on the 2d of February. This festival is very strictly kept by the Roman Catholic Church, there being a procession with many lighted candles, and those required for the service of the ensuing year being also on that occasion consecrated; hence the name Candlemas Day. In Scotland, this day became one of four term-days appointed for periodical annual payments of money, interest, taxes, etc., and of entry to the premises.

An old document, of the time of Henry VIII., preserved in the archives of the Society of Antiquaries, London, concerning the rites and ceremonies in the English Church, speaks thus of the custom of carrying candles: "On Candlemas Daye it shall be declared that the bearyinge of candels is done in memorie of Christe, the spirituall lyghte whom Simeon dyd prophecye ['a light to lighten the Gentiles'], as it is redde in the churche that daye." But an older and heathen origin is ascribed to the practice. The Romans were in the habit of burning candles on this day to the goddess Februa, the mother of Mars. There is a tradition in most parts of Europe, which extends also to the United States, to the effect that a fine Candlemas portends a severe winter. In Scotland, the prognostication is expressed in the following distich:

"If Candlemas is fair and clear,
There'll be twa winters in the year."

Carpet-baggers. Corrupt and often ignorant politicians — mostly from the North — who flocked to the South during the era of Reconstruction. They were uniformly "on the make," and were responsible for much of the venality and rascality that disgraced that period of the history of the South.

Castle Garden. Popularly referred to as the landing place for European emigrants. It is a circular building situated on the Battery, New York, and from 1855 to 1891 served the above named purpose. It is now used as an aquarium. It was built in 1805, as a fort, was granted to the State in 1822, and was for some years used as an opera house and for civic receptions.

Catacombs. Subterraneous chambers and passages formed generally in a rock, which is soft and easily excavated, such as *tufa*. Catacombs are to be found in almost every country where such rocks exist, and, in most cases, probably originated in mere quarries, which afterward came to be used either as places of sepulture for the dead or as hiding-places for the living. The most celebrated catacombs in existence, and those which are generally understood when catacombs are spoken of, are those on the Via Appia, at a short distance from Rome. To these dreary crypts it is believed that the early Christians were in the habit of retiring, in order to celebrate their new worship in times of persecution, and in them were buried many of the saints and martyrs of the primitive Church. They consist of long, narrow galleries, usually about eight feet high and five feet wide, which twist and turn in all directions, very much resembling mines. The graves were constructed by hollowing out a portion of the rock, at the side of the gallery, large enough to contain the body. The entrance was then built up with stones, on which usually the letters D. M. (Deo Maximo), or XP, the first two letters of the Greek name of Christ, were inscribed. Other inscriptions and marks, such as the cross, are also found. Though latterly devoted to purposes of Christian interment exclusively, it is believed that the catacombs were at one time used as burying-places by pagans also. At irregular intervals these galleries expand into wide and lofty vaulted chambers, in which the service of the Church was no doubt celebrated, and which still have the appearance of churches. The original extent of the catacombs is uncertain, the guides maintaining that they have a length of twenty miles, whereas about six only can now be ascertained to exist, and of these many portions have either fallen in or become dangerous. When Rome was besieged by the Lombards in the Eighth Century, many of the catacombs were destroyed, and the popes afterward caused the remains of many of the saints and martyrs to be removed and buried in the churches. Art found its way into the catacombs at an early period, and many remains of frescoes are still found in them. Belzoni, in 1815 and 1818, explored many Egyptian catacombs built 3,000 years ago, and brought to England the Sarcophagus of Psammetichus, formed of Oriental alabaster exquisitely sculptured. In the Parisian catacombs, formerly stone quarries, human remains from the Cemetery of the Innocents were deposited in 1785, and many of the victims of the Revolution of 1792-94 are interred in them.

Catching a Tartar means to be outdone or outwitted. An Irish soldier in a battle against the Turks shouted to his commanding officer that he had caught a "Tartar." "Bring him along, then," said the general. "But he won't come." "Then come along yourself." "Bedad, and so I would, but he won't let me," answered Pat.

Center of Area and Population of the U. S. The center of area of the United States, excluding Alaska and Hawaii and other recent accessions, is in northern Kansas, in

approximate latitude 39° 55', and approximate longitude 98° 50'. The center of population, indicated below, is, therefore, about three-fourths of a degree south and more than thirteen degrees east of the center of area.

DATE	CENTER OF POPULATION, APPROXIMATE LOCATION BY IMPORTANT TOWNS	WESTWARD MOVEMENT DURING PRECEDING DECADE, Miles
1790	23 miles east of Baltimore, Md., . . .	41
1800	18 miles west of Baltimore, Md., . . .	36
1810	40 miles northwest by west of Wash- ington, D. C., . . .	50

Chemical Substances, Common Names of.

COMMON NAMES	CHEMICAL NAMES
Alum,	Sulphate of aluminum and potas- sium.
Aqua fortis,	Nitric acid.
Aqua regia,	Nitro-hydrochloric acid.
Calomel,	Mercurous chloride.
Carbolic acid,	Phenol.
Caustic potash,	Potassium hydrate.
Caustic soda,	Sodium hydrate.
Chalk,	Calcium carbonate.
Copperas,	Sulphate of iron.
Corrosive sublimate,	Mercuric chloride.
Cream of tartar,	Bitartrate of potassium.
Epsom salts,	Magnesium sulphate.
Fire damp,	Light carbureted hydrogen, me- thane.
Glauber's salt,	Sodium sulphate.
Goulard water,	Basic acetate of lead.
Grape sugar,	Glucose.
Iron pyrites,	Sulphide of iron.
Jewelers' putty,	Oxide of tin.
Laughing gas,	Nitrous oxide.
Lime,	Calcium oxide.
Lunar caustic,	Silver nitrate.
Mosaic gold,	Bisulphide of tin.
Muriatic acid,	Hydrochloric acid.
Plaster of Paris,	Calcium sulphate.
Realgar,	Sulphide of arsenic.
Red lead,	Oxide of lead.
Rochelle salts,	Sodium potassium tartrate.
Sal ammoniac,	Ammonium chloride.
Salt, common,	Sodium chloride.
Salt of tartar (potash),	Potassium carbonate.
Saltpetre,	Potassium nitrate.
Salts of lemon,	Oxalic acid.
Slaked lime,	Calcium hydrate.
Soda,	Sodium carbonate.
Soda, baking,	Sodium bicarbonate.
Soda, washing,	Sodium carbonate.
Spirits of hartshorn,	Ammonia, solution of.
Spirits of salts,	Hydrochloric acid.
Sugar of lead,	Lead acetate.
Tartar emetic,	Potassium antimony tartrate.
Verdigris,	Basic acetate of copper.
Vermilion,	Sulphide of mercury.
Vinegar,	Dilute acetic acid.
Vitriol, blue,	Copper sulphate.
Vitriol, green,	Ferrous sulphate.
Vitriol, oil of,	Sulphuric acid.
Vitriol, white,	Zinc sulphate.
Volatile alkali,	Ammonia.

Chivalry, a term which indicates strictly the organization of knighthood as it existed in the Middle Ages, and in a general sense the

spirit and aims which distinguished the knights of those times. The chief characteristics of the chivalric ages were a warlike spirit, a lofty devotion to the female sex, a love of adventure, and an undefinable thirst for glory. The Crusades gave for a time a religious turn to the spirit of chivalry, and various religious orders of knighthood arose, such as the Knights of St. John, the Templars, the Teutonic Knights, etc. The education of a knight in the days of chivalry was as follows: In his twelfth year he was sent to the court of some baron or noble knight, where he spent his time chiefly in attending on the ladies, and acquiring skill in the use of arms, in riding, etc. When advancing age and experience in the use of arms had qualified the page for war, he became an *esquire*, or *squire*. This word is from Latin *scutum*, a shield, it being among other offices the squire's business to carry the shield of the knight whom he served. The third and highest rank of chivalry was that of knighthood, which was not conferred before the twenty-first year, except in the case of distinguished birth or great achievements. The individual prepared himself by confessing, fasting, etc.; religious rites were performed; and then, after promising to be faithful, to protect ladies and orphans, never to lie nor utter slander, to live in harmony with his equals, etc., he received the *accolade*, a slight blow on the neck with the flat of the sword from the person who dubbed him a knight. This was often done on the eve of battle, to stimulate the new knight to deeds of valor; or after the combat, to reward signal bravery. Though chivalry had its defects, chief amongst which, perhaps, we may note a tendency to certain affectations and exaggerations of sentiment and profession, yet it is to be regarded as tempering in a very beneficial manner the natural rudeness of feudal society. It taught the best ideals which the times could understand.

Christmas Tree. The Christmas Tree, which has become an almost universal symbol, and is by most persons supposed to have originated in Germany, had its origin in Egypt at a period long before the Christmas era. The palm-tree is known to put forth a branch every month, and a spray of this tree, with twelve shoots on it, was used in Egypt at the time of the winter solstice, as a symbol of the year completed.

Cigar. The word, of course, is Spanish, and is derived from *cigarra*, the Spanish name for grasshopper. When the Spaniards first introduced tobacco into Spain from the island of Cuba, they cultivated the plant in their gardens, which in Spanish are called *cigarrals*. Each grew his tobacco in his *cigarral*. When one offered a smoke to a friend, he would say: "*Es de mi cigarral*," that is, "it is from my garden." Soon the expression came to be: "*Este cigarro es de mi cigarral*," this *cigar* is from my garden. The grasshopper (*cigarra*) was very common in Spain, and *cigarral* meant the place where the *cigarra* sings.

Cities, Popular Names of.

- Aberdeen. Granite City.
- Athens. City of the Violet Crown.

Bagdad. City of Peace.
Baltimore. Monumental City, from the number of monuments it contains.
Birmingham. The Midland Capital.
Boston. City of Notions, from the amount of "Yankee notions," so called, manufactured there; Hub of the Universe, so called by Dr. Oliver Wendell Holmes; Tri-Mountain City, from the three hills on which it was originally built.
Brighton. Queen of Watering Places, "London-super-Mare."
Brooklyn. City of Churches, from the number of churches it contains.
Buffalo. Queen City of the Lakes.
Chicago. Garden City, from the number and beauty of its private gardens; Windy City, from the constant winds blowing from the lakes.
Cincinnati. Queen City, so called when it was the commercial metropolis of the Middle West.
Cleveland. Forest City, from the number of trees on its streets.
Columbus, Ohio. The Arch City.
Constantinople. City of the Golden Horn.
Detroit. City of the Straits, from its location on the strait connecting Lake St. Clair and Lake Erie.
Edinburgh. Modern Athens.
Hannibal, Mo. Bluff City, from its location on the bluffs of the Missouri River.
Indianapolis. Railroad City, from its being a great railroad center.
Jerusalem. Holy City; City of David; City of Peace.
Keokuk, Ia. Gate City, from its situation at the foot of the Mississippi Rapids.
Liverpool. The Modern Tyre.
Louisville, Ky. Falls City, from the falls of the Ohio River, here located.
Lowell, Mass. City of Spindles, from its large manufacturing interests.
Manchester. Cottonopolis.
Minneapolis. Flour City.
Nashville, Tenn. City of Rocks, from its natural surroundings.
New Haven. City of Elms, from the great number of these trees it contains.
New Orleans. Crescent City, from its position on a curve of the Mississippi.
New York. Empire City, from its being the chief city of the United States.
Paris. City of the Lily, or City of Louis.
Philadelphia. City of Brotherly Love, from the meaning of the name.
Pittsburg, Pa. Iron City, from the extent of its iron manufactures; and Smoky City, from the smoke which overhangs it.
Portland, Me. Forest City, from the number of trees in its streets.
Rochester, N. Y. Flower City, from the profusion of flowers and extensive nurseries there.
Rome. City of the Seven Hills.
St. Louis. Mound City, from the artificial mounds found there.
San Francisco. City of the Golden Gate.
Springfield, Mass. City of Homes, from the many people who own their own homes.
Springfield, O. Flower City, from the beauty of its surroundings.
Venice. City of St. Mark, City of the Seventy Isles.
Washington. City of Magnificent Distances, from its being laid out on a large and regular scale.
Worcester, Mass. The Faithful City, so called from its motto: *Floreat Semper Civitas Fidelis.*

Columns, Spires, and Towers, Height of.

	Feet
Eiffel Tower, Paris,	984
Washington Monument, Washington, D. C.,	555
Ulm Cathedral,	529
Cologne Cathedral,	512
Strasburg,	468
St. Stephen's, Vienna,	465
Pyramid of Cheops,	451
St. Peter's, Rome,	448
Cathedral, Salisbury,	406
Cathedral, Antwerp,	400
Cathedral, Cremona,	397
Cathedral, Florence,	387
St. Paul's, London,	364
Milan Cathedral,	355
Hôtel des Invalides, Paris,	344
Bunker Hill Monument, Charlestown, Mass.,	221
Leaning Tower of Pisa,	179
Alexander Column, St. Petersburg,	155

Confidence Man. One who by plausible stories and falsehoods or by assurance obtains the confidence of kind-hearted people. This well-known phrase is said to have originated thus: A few years ago, a man in New York, well dressed and of exceedingly genteel manners, went about saying, in a very winning manner, to almost every gentleman he met, "Have you confidence enough in me, an entire stranger, to lend me five dollars for an hour or two?" In this way he got a good deal of money, and came to be generally known in the courts and elsewhere as "the confidence man."

Copperheads. A popular nickname which originated during the Civil War in the United States, and was applied to a faction in the North which was very generally considered to be in secret sympathy with the Rebellion, giving it aid and comfort by attempting to thwart the measures of the Government. The name is derived from a poisonous serpent called the copperhead, whose bite is considered as deadly as that of the rattlesnake. The copperhead, unlike the rattlesnake, gives no warning of its attack, and is, therefore, the type of a concealed foe.

Crystal Palace. The name "Crystal Palace" was applied by Douglas Jerrold, in "Punch," to the building in Hyde Park, London, in which the Great Exhibition of 1851, was held. After its close, the materials of which it was composed were sold to a company, for £70,000, and removed to the present site at Sydenham. It was designed by Sir Joseph Paxton, and is used for popular concerts and other entertainments, as well as for a permanent exhibition of the art and culture of various nations.

Dangerous Trades. The expression "dangerous trades" is especially applied to those trades in which some form of poison or disease is incidental to the trade itself as at present carried on. It is not generally used with reference to those trades in which sudden injury and death are caused by dangerous machinery or unguarded perils, but rather refers to those slower acting causes which, while not so sensational in their horrors, are even more frightful in their results.

American legislation has been much more unresponsive in safe-guarding workers in these trades than that of England and Europe generally. The following is a classified list of those trades which have been considered dangerous in acts of the British Parliament.

1. Trades in which lead is a poisonous element:—The manufacture of earthenware and china, file cutting, the manufacture of white lead, lead smelting, the use of lead in print or dye works, the manufacture of red, orange, or yellow lead, glass polishing, enameling of iron plates, enameling and tinning of hollow metal ware and cooking utensils, processes in which yellow chromate of lead is made, or in which goods dyed with it undergo the process of building, winding, weaving, etc.

2. Trades which produce other chemical poisons:—Manufacture of paint and colors, extraction of arsenic, dry cleaning, paper staining, coloring and enameling, hatters' and furriers' work, the manufacture of matches, chemical

works, bronzing and metallochrome powder in lithographic works, India rubber works, dying with certain dyes, mixing and casting of brass, gun metal, bell metal, white metal, phosphor-bronze and manila mixture.

3. Trades in which anthrax or lockjaw is an incident:—Wool sorting, the handling of hides and skins, hair factories, brush-making, bone factories, fellmongers' works, furriers' works, tanneries, wool combing, blanket stoving and tenting, warp dressing, carbonizing and grinding of rags, flock making, feather cleaning.

4. Trades in which the danger arises from injurious particles in the air or from dust:—Basic slag works, manufacture of silicate of cotton, file cutting, flour mills, trades which use grindstones or emery wheels, china scouring, silk combing, flax scutching.

5. Trades in which sudden accidents are so frequent as to demand special legislation:—Metal works which use converters, electrical generating works, bottling and bottle testing, quarries, manufacture of salt.

6. Processes which require a sudden change from great heat to cold and *vice versa*, such as lacquering and japanning, galvanizing of iron and the work carried on in furnaces and foundries.

7. Processes that require artificial humidity:—Cotton spinning, weaving, etc., flax spinning, weaving, etc., wool spinning, silk spinning.

This list shows a wide prevalence of trades in which special dangers exist, and calls for the utmost remedial precaution on the part of both the public and all workers immediately concerned.

Dark Horse. A frequent phrase in sporting and political parlance, and indicating one who, up to a certain time kept in the background, suddenly comes to the front, and snatches victory from the hands of others. The phrase was used by Thackeray in his "Adventures of Philip." Said Philip, referring to some talk about a candidate for parliament: "Well, bless my soul, he can't mean me. Who is the dark horse he has in his stable?"

Days of Grace. In the reign of Henry II., the day first mentioned in each term of court was called "essoign day," because the court then took the essoigns or excuses of those who did not appear according to the summons of the writs. But as — by a custom traced by Blackstone to the Germans of the days of Tacitus — three days of grace were allowed to every defendant within which to appear, the courts did not sit for the despatch of business until the fourth day after that time. On the other hand, they continued to sit till the fourth day after the last return. The rule allowing days of grace in the United States was adopted from the English law.

Dead Letter Office, in the United States postal department, is the place where unclaimed letters are sent. After remaining a month in the office to which they are directed, the unclaimed or "dead" letters are sent to Washington, and opened in the dead letter office. If the writer's address can be found, the letter is returned to him; if not, it is destroyed. In one year nearly 7,000,000

pieces of mail matter were received — many had no state on the address, 3,000 had no address at all; \$92,000 in cash and more than \$3,000,000 in drafts were found in the letters. Thousands of magazines, illustrated papers, picture cards, and valentines were sent to hospitals.

Death Warrant of Jesus Christ.

In 1810, some workmen, while excavating in the ancient city of Amiternum (now Aquila), in the kingdom of Naples, found an antique marble vase in which lay concealed a copper plate, bearing on the obverse side a long inscription in the Hebrew tongue. This, when translated, proved to be the death-warrant of Jesus Christ. On the reverse side of the plate were found the words: "A similar plate is sent to each tribe." After its excavation, it was enclosed in an ebony box, and preserved in the sacristy of the Carthusians. This relic, if genuine, is to Christians the most impressive and interesting legal document in existence. It has been faithfully transcribed, and reads as follows:

Sentence rendered by Pontius Pilate, acting Governor of Lower Galilee, stating that Jesus of Nazareth shall suffer death on the cross.

In the year seventeen of the Emperor Tiberius Cæsar, and the 27th day of March, the city of the holy Jerusalem — Annas and Caiaphas being priests, sacrificators of the people of God, — Pontius Pilate, Governor of Lower Galilee, sitting in the presidential chair of the prætorium, condemns Jesus of Nazareth to die on the cross between two thieves, the great and notorious evidence of the people saying:

1. Jesus is a seducer.
2. He is seditious.
3. He is the enemy of the law.
4. He calls himself falsely the Son of God.
5. He calls himself falsely the King of Israel.
6. He entered into the temple, followed by a multitude bearing palm-branches in their hands.

Orders the first centurion, Quilius Cornelius, to lead him to the place of execution. Forbids any person, whomsoever, either poor or rich, to oppose the death of Jesus Christ.

The witnesses who signed the condemnation of Jesus are:

1. Daniel Robani, a Pharisee.
2. Joannus Robani.
3. Raphael Robani.
4. Capet, a citizen.

Jesus shall go out of the city of Jerusalem by the gate of Struenus.

Decoration Day, or Memorial Day, is a day designated as a legal holiday in all the States, except Idaho and Texas, for the purpose of commemorating the soldiers who fell in the Civil War, and decorating their graves. The day thus set apart is May 30th, in all the Northern and Western States and in Virginia. In the latter State, as in all the Southern States, the name adopted is "Confederate Memorial Day." Alabama, Georgia, Mississippi, and Florida observe April 26th; North Carolina and South Carolina, May 10th; Tennessee, the second Friday in May; and Louisiana, June 3d — Jefferson Davis's birthday, which is also observed in a number of other Southern States.

Dixie. Popularly applied to the States south of Mason and Dixon's line, the former boundary of slavery. Also, in folklore, a fabulous realm of peace, plenty, and indolence, whose charms form the burden of many a negro melody. Brewer says that a Mr. Dixie was a slaveholder of Manhattan Island, compelled by public opinion to remove his human chattels to the South. In their new abode they had to toil ceaselessly, and often sighed for their old home at the North, which lapse of time and distance invested with a halo of paradisaic pleasures. This "Dixie Land" became to the entire colored race in the South a species of Utopia, similar to the Scottish "Land o' the Leal" or the Fortunate Islands of the ancients.

Dollar Mark, \$. Writers are not agreed as to the derivation of this sign to represent dollars. Some say it comes from the letters U. S., which after the adoption of the Federal Constitution, were prefixed to the federal currency, and which afterwards, in the hurry of writing, were run into one another, the U being made first and the S over it. The more probable explanation is that it is a modification of the figure 8, and denotes a piece of eight reals, or, the dollar which was formerly divided into eight parts. It was then designated by the figures $\frac{8}{8}$.

Duel. A premeditated and prearranged combat between two persons, with deadly weapons, for the purpose of deciding some private difference or quarrel. The combat generally takes place in the presence of witnesses called seconds, who make arrangements as to the mode of fighting, place the weapons in the hands of the combatants, and see that the laws they have laid down are carried out. The origin

of the practice of duelling is referred to the trial by "wager of battle," which obtained in early ages. This form of duel arose among the Germanic peoples, and a judicial combat of the kind was authorized by Gundebald, King of the Burgundians, as early as 501 A. D. When the judicial combat declined the modern duel arose, being probably to some extent an independent outcome of the spirit and institutions of chivalry. France was the country in which it arose, the Sixteenth Century being the time at which it first became common. Upon every insult or injury which seemed to touch his honor, a gentleman thought himself entitled to draw his sword, and to call on his adversary to give him satisfaction, and it is calculated that 6,000 persons fell in duels during ten years of the reign of Henry IV. His minister, Sully, remonstrated against the practice; but the King connived at it, supposing that it tended to maintain a military spirit among his people. In 1602, however, he issued a decree against it, and declared it to be punishable with death. Many subsequent prohibitions were issued, but they were all powerless to stop the practice. During the minority of Louis XIV. more than 4,000 nobles are said to have lost their lives in duels. The practice of duelling was introduced into England from France in the reign of James I.; but it was never so common as in the latter country. Cromwell was an enemy of the duel, and during the protectorate there was a cessation of the practice. It came again into vogue, however, after the Restoration, thanks chiefly to the French ideas that then inundated the court. As society became more polished duels became more frequent, and they were never more numerous than in the reign of George III. Among the principals in the fatal duels of this period were Charles James Fox, Sheridan, Pitt, Canning, Castlereagh, the Duke of York, the Duke of Richmond, and Lord Camelford. The last-mentioned was the most notorious duellist of his time, and was himself killed in a duel in 1804. A duel was fought between the Duke of Wellington and Lord Winchelsea in 1829, but the practice was dying out. It lasted longest in the

army. By English law fatal duelling is considered murder, no matter how fair the combat may have been, and the seconds are liable to the same penalty as the principals. In 1813, the principal and seconds in a fatal duel were sentenced to death, though afterwards pardoned. An officer in the army having anything to do with a duel renders himself liable to be cashiered. In France duelling still prevails to a certain extent; but the combats are usually very bloodless and ridiculous affairs. In the German army it is common, and is recognized by law. The duels of German students, so often spoken of, seldom cause serious bloodshed. In the United States duels are now uncommon. In some of the States the killing of a man in a duel is punishable by death or by forfeiture of political rights, and in a large number the sending of a challenge is a felony. In the army and navy it is forbidden. During the Revolution there were a number of duels: Charles Lee was wounded by John Laurens; Gwinnett, a signer of the Declaration, was killed by Gen. McIntosh; Alexander Hamilton was slain by Aaron Burr. Decatur was killed and Barron wounded fighting a duel. Andrew Jackson killed Dickinson, and fought several other duels. Col. Benton killed Lucas, and had other encounters. Henry Clay and John Randolph fought in 1826. De Witt Clinton was a duellist.

Dun. The word "dun" is by some supposed to be derived from the French *donnez*. The "British Apollo" of 1780, says, however, that the word owes its origin to a Joe Dun, a famous bailiff of Lincoln, in the time of Henry VII. He is said to have been so very successful in the collection of debts that his name became proverbial, and whenever it seemed almost impossible to make a man pay, people would say, "Why don't you Dun him?"

Dwarf. A term applied to any animal or plant greatly below the usual size of its kind, particularly to a human being of small dimensions. Accounts of dwarf tribes have been common from early times, such tribes being located especially in Africa; and it would appear from the accounts of Du Chaillu, Schweinfurth, and other travelers that there are several dwarfish tribes throughout this continent. The Obongo, a race of dwarfs, are described as living in woods near the Okanda River, in wretched huts made of branches. Other races are the Mabongo, and the Akka dwarfs of Central Africa; and a race is said to exist in the Congo State, not as a distinct community, however, but mixed with other tribes. Individual dwarfs occur in all races, and were formerly a fashionable appendage to the courts of princes and the families of nobles. Jeffery Hudson, the favorite dwarf of Charles I., at the age of thirty is said to have been only eighteen inches high, though he afterwards grew to three feet and nine inches. Bébé, the celebrated dwarf of Stanislas of Poland, was thirty-three inches; Wybrand Lolkes, a Dutch dwarf, when sixty years of age was only twenty-seven inches; Charles H. Stratton, "General Tom Thumb," was thirty-one inches high at the age of twenty-five; Francis Flynn, "General Mite," was only twenty-one inches at sixteen.

Dying* Gaul, The. This celebrated antique statue of the Pergamene school, formerly known as "The Dying Gladiator," may be seen in the Capitoline Museum, Rome. The warrior nude, sits on the ground with bowed head, supporting himself with his right arm. The statue is especially fine in the mastery of anatomy displayed, and in its characterization of the racial type.

Earthquakes. A shaking of certain parts of the earth's surface, produced by causes not perceivable by our senses. This motion occurs in very different ways, having sometimes a perpendicular, sometimes a horizontal undulating, and sometimes a whirling motion. It also varies much in degrees of violence, from a shock which is hardly perceptible to one which bursts open chasms and changes the appearance of the ground itself. During these shocks sometimes smoke and flames, but more frequently stones and torrents of water are discharged. There is little doubt that earthquakes and volcanic eruptions are kindred phenomena, the latter differing from the former principally in proceeding from a permanent crater. All observations go to prove that both are due to disruptions produced by internal heat at a great depth beneath the surface of the earth. Of the particular way in which this force works, however, there are various theories. It has been thought by some that the center of earthquakes and volcanic disturbances is always near the sea or other large supplies of water, and that the disturbances are directly caused by the filtration of the water down to igneous matter, and the consequent generation of vast quantities of steam which frees itself by explosion. Others have sought to explain earthquakes as part of the phenomena of a planet cooling at the surface. The parts of the world most frequented by earthquakes are exhibited in the following table:

AREA	EARTH-QUAKES
Scandinavia,	646
British Isles,	1,139
France,	2,793
Spain and Portugal,	2,656
Switzerland,	3,895
Italy,	27,673
Holland and North Germany,	2,326
Sicily,	4,332
Greece,	10,306
Russia,	258
Asia Minor,	4,451
India,	813
Japan,	27,562
Africa,	179
Atlantic Islands,	1,704
United States, Pacific Coast,	4,467
Atlantic Coast,	937
Mexico,	5,586
Central America,	2,739
West Indies,	2,561
South America,	8,081
Java,	2,155
Australia and Tasmania,	83
New Zealand,	1,925

The most remarkable earthquakes of history are the following:

	B. C.
One which made Eubœa an island,	425
Ellice and Bula, in Peloponnesus, swallowed up,	372
One at Rome, when, in obedience to an oracle, M. Curtius, armed and mounted on a stately horse, leaped into the dreadful chasm it occasioned (Livy),	358

B. C.		A. D.	
Duras, in Greece, buried, with all its inhabitants; and twelve cities in Campania also buried, . . .	345	Archindschan wholly destroyed, and 12,000 persons buried in its ruins, . . .	1784
Lysimachia and its inhabitants totally buried, . . .	283	At Borgo di San Sepolcro; many houses and 1,000 persons swallowed up, . . .	1789
Ephesus and other cities overturned, . . .	17	Another fatal one in Sicily, . . .	1791
One accompanied by the eruption of Vesuvius; the cities of Pompeii and Herculaneum buried, . . .	79	In Naples; Vesuvius overwhelmed the city of Torre del Greco, . . .	1794
Four cities in Asia, two in Greece, and two in Galatia overturned, . . .	107	In Turkey, where, in three towns, 10,000 persons lost their lives, . . .	1794
Antioch destroyed, . . .	115	The whole country between Santa Fé and Panama destroyed, including Cusco and Quito; 40,000 people buried in one second, . . .	1797
Nicomedia, Cæsarea, and Nicæa overturned, . . .	126	At Constantinople, which destroyed the royal palace and an immensity of buildings, and extended into Rumania and Wallachia, . . .	1800
In Asia, Pontus, and Macedonia, 150 cities and towns damaged, . . .	357	A violent one felt in Holland, . . .	1804
Nicomedia again demolished, and its inhabitants buried in its ruins, . . .	358	At Frosolone, Naples; 6,000 lives lost, . . .	1805
One felt by nearly the whole world, . . .	543	At the Azores; a village of St. Michael's sunk, and a lake of boiling water appeared in its place, . . .	1810
At Constantinople; its edifices destroyed, and thousands perished, . . .	557	Awful one at Caraccas (<i>which see</i>), . . .	1812
In Africa; many cities overturned, . . .	560	Several throughout India; district of Kutch sunk; 2,000 persons buried, . . .	1819
Awful one in Syria, Palestine, and Asia; more than 500 towns were destroyed, and the loss of life surpassed all calculations, . . .	742	Genoa, Palermo, Rome, and many other towns greatly damaged; thousands perish, . . .	1819
In France, Germany, and Italy, . . .	801	One in Calabria and Sicily, . . .	1826
Constantinople overturned; all Greece shaken, . . .	936	In Spain; Mercia and numerous villages devastated; 6,000 persons perish, . . .	1829
One felt throughout England, . . .	1089	In the Duchy of Parma; no less than forty shocks were experienced at Borgotaro; and at Pontremoli many houses were thrown down, and not a chimney was left standing, . . .	1834
One at Antioch; many towns destroyed, among them Mariseum and Mamistria, . . .	1114	In Calabria, Cosenza and villages destroyed; 1,000 persons buried, . . .	1835
Catania, in Sicily, overturned, and 15,000 persons buried in the ruins, . . .	1137	In Calabria; 1,000 buried at Rossano, etc., . . .	1836
One severely felt at Lincoln, . . .	1142	In many cities of Southern Syria, by which hundreds of houses were thrown down, and thousands of lives lost, . . .	1836
At Calabria; one of its cities and all its inhabitants overwhelmed in the Adriatic Sea, . . .	1186	At Martinique; nearly half of Port Royal destroyed; nearly 700 persons killed, and the whole island damaged, . . .	1839
One again felt throughout England; Glastonbury destroyed, . . .	1274	At Ternate; the island made a waste, and thousands of lives lost, . . .	1840
In England; the greatest known there, . . .	1318	Awful and destructive earthquake at Mount Ararat, in one of the districts of Armenia; 3,137 houses were overthrown, and several hundred persons perished, . . .	1840
At Naples; 40,000 persons perished, . . .	1456	Great earthquake at Zante, where many persons perished, . . .	1840
At Lisbon; 1,500 houses and 30,000 persons buried in the ruins; several neighboring towns ingulfed with their inhabitants, . . .	1531	At Cape Haytien, St. Domingo, which destroyed nearly two-thirds of the town; between 4,000 and 5,000 lives were lost, . . .	1842
One felt in London; part of St. Paul's and the Temple churches fell, . . .	1580	At Point à Pitre, Guadaloupe, which was entirely destroyed, . . .	1843
In Japan; several cities made ruins, and thousands perished, . . .	1596	At Rhodes and Macri, when a mountain fell in at the latter place, crushing a village, and destroying 600 persons, . . .	1851
Awful one at Calabria, . . .	1638	At Valparaiso, where more than 400 houses were destroyed, . . .	1851
One in China, when 300,000 persons were buried in Pekin alone, . . .	1662	In South Italy; Melfi almost laid in ruins; 14,000 lives lost, . . .	1851
One severely felt in Ireland, . . .	1690	At Philippine Isles; Manila nearly destroyed, . . .	1852
One at Jamaica, which totally destroyed Port Royal, whose houses were ingulfed forty fathoms deep, and 300 persons perished, . . .	1692	In Northwest of England, slight, . . .	1852
One in Sicily, which overturned fifty-four cities and towns, and 300 villages. Of Catania and its 18,000 inhabitants not a trace remained; more than 100,000 lives were lost, . . .	1693	Thebes, in Greece, nearly destroyed, . . .	1853
Palermo nearly destroyed; 6,000 lives lost, . . .	1726	St. Salvador, South America, destroyed, . . .	1854
Again in China; and 100,000 people swallowed up at Pekin, . . .	1731	Amasca, in Japan, and Simoda, in Nippon, destroyed; Jeddo much injured, . . .	1854
In Hungary; a mountain turned round, . . .	1736	Broussa, in Turkey, nearly destroyed, . . .	1855
One at Palermo, which swallowed up a convent; but the monks escaped, . . .	1740	Several villages in Central Europe destroyed, . . .	1855
Lima and Callao demolished; 18,000 persons buried in the ruins, . . .	1746	Jeddo nearly destroyed, . . .	1855
In London, a slight shock, February 8th; but severer shock, March 8th, . . .	1750	At the island of Great Sanger, one of the Moluccas, volcanic eruption and earthquake; nearly 3,000 lives lost, . . .	1856
Adrianople nearly overwhelmed, . . .	1752	In the Mediterranean; at Candia, 500 lives lost; Rhodes, 100; and other islands, 150, . . .	1856
At Grand Cairo; half of the houses and 40,000 persons swallowed up, . . .	1754	In Calabria, Montemurro and many other towns destroyed, and about 22,000 lives lost in a few seconds, . . .	1857
Quito destroyed, . . .	1755	Corinth nearly destroyed, . . .	1858
Great earthquake at Lisbon. In about eight minutes most of the houses and upward of 50,000 inhabitants were swallowed up, and whole streets buried. The cities of Coimbra, Oporto, and Braga suffered dreadfully, and St. Ubes was wholly overturned. In Spain, a large part of Malaga became ruins. One-half of Fez, in Morocco, was destroyed, and more than 12,000 Arabs perished there. Above half of the island of Madeira became waste; and 2,000 houses in the island of Mytilene, in the Archipelago, were overthrown. This awful earthquake extended 5,000 miles; even to Scotland, . . .	1755	At Quito; about 5,000 persons killed, and an immense amount of property destroyed, . . .	1859
In Syria, extended over 10,000 square miles; Baalbec destroyed, . . .	1759	At Erzeroum, Asia Minor; above 1,000 persons said to have perished, . . .	1859
At Martinico, 1,600 persons lost their lives, . . .	1767	At San Salvador; many buildings destroyed, no lives lost, . . .	1859
At Guatemala, which, with 8,000 inhabitants, was swallowed up, . . .	1773	In Cornwall, slight, . . .	1859-1860
A destructive one at Smyrna, . . .	1778	At Perugia, Italy; several lives lost, . . .	1861
At Tauris; 15,000 houses thrown down, and multitudes buried, . . .	1780	At Mendoza, South America; about two-thirds of the city and 7,000 lives lost, . . .	1861
Messina and other towns in Italy and Sicily overthrown; 40,000 persons perished, . . .	1783	In Greece; North Morea, Corinth, and other places injured, . . .	1861
		Guatemala; 150 buildings and fourteen churches destroyed, . . .	1862

A. D.

Rhodes; thirteen villages destroyed, about 300 persons perished, and much cattle and property lost, 1863

Manila, Philippine Isles; immense destruction of property; about 10,000 persons perished, 1863

Central, West, and Northwest of England, 1863

At Macchia, Bendinella, etc., Sicily; 200 houses destroyed, sixty-four persons killed, 1865

In San Francisco, California, great damage, 1865

On the Hawaiian (Sandwich) Islands, accompanied by an eruption of Mauno Loa. During a period of fifteen days over two thousand shocks were experienced. The eruption of lava was profuse, causing much destruction of life and property, 1868

Peru, Ecuador, and Chile were largely devastated by a violent earthquake, which destroyed several large cities along the coast. It is reported that between 30,000 and 60,000 people lost their lives, 1868

Island of Ischia, 1884

Charleston, South Carolina, 1886

Mentone and the Riviera of Italy, 1887

Japan, 4,000 killed; 50,000 houses destroyed, 1891

Greece, 200 lives lost and many buildings destroyed, 1894

Constantinople and along the Dardanelles, 1894

Valparaiso, Chile, great loss of life and property, 1906

San Francisco, 1,000 lives lost and \$400,000,000 in property destroyed, 1906

Sicily and Calabria. Greatest earthquake of modern times, if not of all time, resulting in the destruction of Messina, Reggio, and many smaller towns and villages, including upward of 200,000 lives, 1908

East India Company. The name of various mercantile associations formed in different countries in the Seventeenth and Eighteenth Centuries for the purpose of conducting under the auspices of the government a monopoly of the trade of their respective countries with the East Indies. The greatest of these was the British East India Company.

Education, Cost of, in Various Countries. The figures given in the tables of the cost of higher education in various countries are from the report of the Commissioner of Education, and are intended to give an idea of the approximate amounts paid for higher education in the principal countries of the world. Educational systems differ greatly in different countries, and it is possible to make fair comparisons of cost only where it is possible to make fair comparisons of the systems employed. In Germany a great deal of such work as is done in higher educational institutions in this country is carried on in the secondary schools, or gymnasia. In a number of countries which might have place in these tables it was impossible to obtain data, according to the Commissioner's report, and no safe figures can be given. In other cases census figures had to be used, though dating back several years previous to the time of the report. The data for Greece was obtained shortly after the war with Turkey, and are much lower than might be expected.

The cost of higher education in the United States can be approximated only, as the expenses are met by so many different methods. For the same reason only an approximation of the per capita can be given.

Esperanto. This artificial international language, which has recently received considerable impetus, was invented by Dr. Zamenhof, an oculist of Warsaw, in 1887. His brochure was published under the pseudonym, Dr. Esperanto; hence the name. Simple in grammar, and forming its words by the addition of prefixes and suffixes to root words, it is akin to English in syntax, to French in vocabulary, to Spanish or Italian in sound, to German in the abundance of prefixes and suffixes, to Greek in correlative pronouns and the formation of participles and compound tenses, and to the Slavonic languages in the want of the indefinite article.

The grammar, which is absolutely regular and without any exceptions, has been reduced to the utmost extent, having due regard to the necessary qualities of clearness, precision, and flexibility. There are only sixteen rules, and the reading, it is stated, can be learned in one hour. The noun is indicated by the terminal "o," to which "j" is added to indicate the plural. Adjectives terminate in "a," adverbs in "e," and the infinitive in "i."

The principle adopted in the formation of the vocabulary is the selection of those root-words which are common to all the principal European languages, then those which are common to all but one, to all but two, and so forth. For connective words (conjunctions, prepositions) Latin and Greek, too, have been used sometimes. By means of an elaborate system of clearly defined prefixes and suffixes the dictionary is simplified and augmented to an almost unlimited degree: e. g. *mal* is the prefix denoting contrary notion, thus *bona*=good, *malbona*=bad, *fermi*=to close, *malfermi*=to open; *in* is the suffix for the feminine, thus *knabo*=boy, *knabino*=girl; *et* is the suffix for diminutives, thus *knabeto*=little boy, *knabinitino*=little girl; *knabinetinig*i would mean to behave like a little girl, and so forth. The syntax of Esperanto is free, the order of words suffering very little constraint. Its pronunciation is phonetic, every letter having always the same sound and being pronounced where written. Numerous works have been published in Esperanto, including a number of scientific works, to show the adaptability of the tongue to all purposes.

In 1906, the English Chamber of Commerce

put Esperanto on the examination list for applicants for positions. It is an elective branch of study in many schools to-day, especially in France. Recently it has been made an elective in several prominent American universities. In Frankfort, Germany, an International Commercial Esperanto Society was founded in 1906. American officers and magistrates in the Philippines find the language useful. There are yearly international congresses of Esperantists, and the study of the language extends to all parts of the world. There are about thirty journals and papers advocating the cause. The English organ is *The British Esperantist*. The headquarters of the American Esperanto Association is in Boston, Mass.

The following is a specimen of the language, which shows how readily it can be understood by an English-speaking individual: "Esperanto estas helpa lingvo internacia, eksterordinare facila; estas tre bonsona, kaj egale bona por la komerco, la scienco, la literaturo kaj la poezio."

The favorite grammar of Esperanto for English-speaking people is O'Connor's Complete Textbook.

Flag, United States. On June 14, 1777, the United States Congress passed a resolution declaring "that the flag of the thirteen United States be stripes alternate red and white; that the union be thirteen stars, white in a blue field, representing the new constellation." In 1794, Congress decreed that after May 1, 1795, "the flag of the United States be fifteen stripes, alternate red and white, and that the union be fifteen stars, white in a blue field." This change was made to mark the admission of Vermont and Kentucky into the Union. The stars and stripes were then equal and a star and stripe were to be added with the admission of each new State. It was realized, however, that the addi-

tion of a stripe for each new State would soon render the flag too large, and a resolution was accordingly passed by Congress, April 4, 1818, reducing the number of stripes to thirteen — representing the original Union — and making the stars twenty in number. It was, furthermore, enacted that a new star should be added for each new State admitted into the Union. The flag now contains forty-six stars, corresponding to the forty-six States.

According to tradition the first flag, known as the "Stars and Stripes," was made by Mrs. Betsy Ross of Philadelphia, about whom succeeding years have thrown a glamor of patriotic romance.

Fool, Court, or Jester. Among the more celebrated of French court-fools were Triboulet of the court of Francis I.; Chicot, the jester of Charles IX.; and Angely, the cynical buffoon of Louis XIII., and the last of his order in that country. England had also her special representatives in this field of Momus; the court-fool of Henry VIII., with their retinue of giants and Xit, the dwarf, and Archie Armstrong, James I.'s licensed joker, being the most celebrated. Court-fools in all European countries save Russia were discontinued soon after the first quarter of the Seventeenth Century. Peter the Great and the Empress Anne, however, kept up the practice much later.

Freemasonry. The name of a secret brotherhood which claims a very remote origin, and seems to have descended to us directly from the craft guilds of the mediæval period. Modern Masonry arose in England in the early part of the Eighteenth Century, and has no connection with the builder's craft. It was first established in the United States in 1723. There are now in the United States and British America a total of about 1,289,000 members.

DEGREES IN FREEMASONRY

YORK RITE		SCOTTISH RITE	
<i>Lodge</i>	<i>Lodge of Perfection</i>	<i>Councils of Princes of Jerusalem (Continued)</i>	<i>Consistories of Sublime Princes of the Royal Secret (Continued)</i>
1. Entered Apprentice.	4. Secret Master.	16. Prince of Jerusalem.	25. Knight of the Brazen Serpent.
2. Fellow Craftsman.	5. Perfect Master.		26. Prince of Mercy.
3. Master Mason.	6. Intimate Secretary.	<i>Chapters of Rose Croix</i>	27. Commander of the Temple.
<i>Chapter</i>	7. Provost and Judge.	17. Knight of the East and West.	28. Knight of the Sun.
4. Mark Master.	8. Intendant of the Building.	18. Knight of the Rose Croix de H. R. D. M.	29. Knight of St. Andrew.
5. Past Master.	9. Elect of Nine.	<i>Consistories of Sublime Princes of the Royal Secret</i>	30. Grand Elect Knight, K. H., or Knight of the Black and White Eagle.
6. Most Excellent Master.	10. Elect of Fifteen.	19. Grand Pontiff.	31. Grand Inspector Inquisitor Commander.
7. Royal Arch Mason.	11. Sublime Knight Elect.	20. Master Ad Vitam.	32. Sublime Prince of the Royal Secret.
<i>Council</i>	12. Grand Master Architect.	21. Patriarch Noachite.	33. Sovereign Grand Inspector-General of the 33d and Last Degree.
8. Royal Master.	13. Knight of the Ninth Arch.	22. Prince of Libanus.	
9. Select Master.	14. Grand Elect Perfect and Sublime Mason.	23. Chief of the Tabernacle.	
10. Super Excellent Master.	<i>Councils of Princes of Jerusalem</i>	24. Prince of the Tabernacle.	
<i>Commandery.</i>	15. Knight of the East or Sword.		
11. Red Cross Knight.			
12. Knight Templar.			
13. Knight of Malta.			

Gardens of the World. Garden of Eden. First abode of man, supposed to be located near the city of Babylon. Garden of England. Worcestershire and Kent. Both so called. Garden of Erin. Carlow, in Leinster. Garden of Europe. Italy and Belgium. Both so called.

Garden of France. Amboise, in the département of Indre-et-Loire. Garden of Gethsemane. East of Jerusalem, near the Brook Kedron. Garden of Helvetia. Name given to Thurgau, Switzerland. Garden of Hesperides. In the western part of the mythological world.

Garden of India. Oude.

Garden of Italy. Sicily.

Garden of South Wales. The southern division of Glamorganshire.

Garden of Spain. Andalusia.

Garden of the Argentine. Turcuman, a province of Argentina.

Garden of the East. Ceylon and Burmah.

Both so called. Ceylon is also called "The Resplendent"; the "Jewel of the Eastern Sea"; the "Gem of Paradise."

Its climate and productions are quite unrivaled.

Garden of the West. Illinois and Kansas.

Both so called.

Garden of the World. The region of the Mississippi.

Giants. The following are among authentic instances of persons who attained to the stature of giants: The Roman Emperor Maximin, a Thracian, nearly 9 feet high; Queen Elizabeth's Flemish porter, 7 feet 6 inches; C. Munster, a yeoman of the guard in Hanover, who died in 1676, 8 feet 6 inches high; Cajanus, a Swedish giant, about 9 feet high, exhibited in London in 1742; C. Byrne, who died in 1783, attained the height of 8 feet 4 inches; Patrick Cotter O'Brien, who lived about the same time, was 8 feet 7 $\frac{3}{4}$ inches; a Swede in the celebrated grenadier guard of Frederick William I. of Prussia stood 8 $\frac{1}{2}$ feet. In 1844, died Pauline Wedde (called Marian), over 8 feet 2 inches at the age of 18. The following are still or were quite recently exhibiting: Anna Swan, a native of Nova Scotia, above 8 feet high; her husband, Captain Bates, a native of Kentucky, of the same height; Chang-wu-gon, the Chinese giant, 7 feet 9 inches high.

Gypsies. Popularly supposed to be Egyptians. In *Italian* they are known as Zingaro; *Spanish*, Zingaro; *French*, Bohemien; *Danish*, Tater, etc. They are a peculiar vagabond race which appeared in England for the first time about the beginning of the Sixteenth Century, and in eastern Europe at least two centuries earlier, and now found in every country of Europe, as well as in parts of Asia, Africa, and America. The Gypsies are distinguishable from the peoples among whom they rove by their bodily appearance and by their language. Their forms are generally light, lithe, and agile; skin of a tawny color; eyes large, black, and brilliant; hair long, coal black, and often ringleted; mouth well shaped, and teeth very white.

Hall of Fame. A hall erected on University Heights, New York, in 1900, in commemoration of great Americans. It is a semi-circular colonnade connecting two of the buildings of New York University, with a ground floor underneath containing a long hall and six rooms to be used as a museum to contain memorials of those honored. Space is provided within the colonnade for 150 panels, which are to contain bronze tablets bearing the names (with busts or statues of bronze or parapets just above) of such Americans as shall be judged most famous in their respective fields by an electorate of eminent American citizens appointed by the senate of the University.

Only persons who shall have been dead ten or

more years are eligible to be chosen. Fifteen classes of citizens were particularly recommended for consideration, to-wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2,000, when the 150 inscriptions will be completed. In case of failure to fill all the panels allotted, the vacancies are to be filled in a following year.

In February, 1904, the plan was announced of an additional structure in the form of a loggia joining the colonnade on the north, having thirty panels for foreign born Americans, six to be filled in 1905, and beyond this of a Hall of Fame for Women, about 30 by 60 feet, with a museum on the ground floor and a main story above of twenty-eight columns supporting a pedimented roof, with places for sixty tablets, ten to be filled in 1905.

The rules prescribed that the Council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens selected by the Council.

In October, 1900, the University Senate received the ballots of the electors. Of the one hundred judges selected, ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart, Asa Gray.

In October, 1905, under the rules named above, the senate received the ballots of ninety-five Electors out of 101 appointed, of whom only eighty-five undertook to consider the names of women. A majority of fifty-one was demanded, but in the case of the names of women, a majority of only forty-seven. The following persons were found to be duly chosen: John Quincy Adams, fifty-nine; James Russell Lowell, fifty-eight; William Tecumseh Sherman, fifty-eight; James Madison, fifty-six; John Greenleaf Whittier, fifty-three; Alexander Hamilton, eighty-eight; Louis Agassiz, eighty-three; John Paul Jones, fifty-four; Mary Lyon, fifty-eight; Emma Willard, fifty; Maria Mitchell, forty-eight.

Among the names which received less than a majority vote in the 1905 election were those of

Oliver Wendell Holmes, forty-eight; Phillips Brooks, forty-eight; Bryant Parkman and Motley, forty-six each; Poe and Cooper, forty-three each; Bancroft and Greeley, thirty-nine each; Nathaniel Green and Mark Hopkins, thirty-eight each; Joseph Henry, thirty-two; Rufus Choate, thirty-one.

Hall of Fame, Munich. A building at Munich, Bavaria, completed, 1853, consisting of a Greek Doric portico, with projecting wings, raised on a high basement of masonry. The portico contains eighty busts of celebrated Bavarians. The colossal statue of Bavaria, in bronze, by Schwanthaler, which stands beside the Ruhmeshalle, is sixty-two feet high; it represents a woman of robust form holding a wreath in her raised left hand, and with the Bavarian lion sitting by her side.

Hartford Convention. A political assembly which met at Hartford, December 15, 1814, and January 5, 1815. It was composed of twelve delegates from Massachusetts (including its president, George Cabot), seven from Connecticut, and four from Rhode Island (appointed by the legislatures of those States), and two from New Hampshire, and one from Vermont (appointed by counties), all Federalists. It published a report protesting against the war with England and against the action of the United States Government in refusing to pay the expenses of defending Massachusetts and Connecticut because those States refused to place their militias under the control of the Federal Government, and recommended, among other things, the restriction of the powers of Congress pertaining to war and to the laying of embargos. Its proceedings were carried on in secret, and the convention was suspected at the time of treason.

Hobson's Choice. Tobias Hobson was the first man in England that let out hacking horses. When a man came for a horse he was led into the stables where there was a great choice; but he obliged him to take the horse which stood next to the stable door; so that every customer was alike well served according to his chance. Hence, when something which ought to be one's own election is forced upon him, we say he took *Hobson's choice*.

Holidays in the United States.

JANUARY 1st. *New Year's Day:* In all the States (including the District of Columbia, Arizona, and New Mexico), except Massachusetts, Mississippi, and New Hampshire.

JANUARY 8TH. *Anniversary of the Battle of New Orleans:* In Louisiana.

JANUARY 19TH. *Lee's Birthday:* In Florida, Georgia, North Carolina, South Carolina, Virginia, Alabama, and Arkansas.

FEBRUARY. *Mardi-Gras:* In Alabama and the parish of Orleans, Louisiana.

FEBRUARY 12TH. *Lincoln's Birthday:* In Colorado, Connecticut, Delaware, Illinois, Kansas, Massachusetts, Minnesota, Nevada, New Jersey, New York, North Dakota, Pennsylvania, Washington, and Wyoming.

FEBRUARY 22D. *Washington's Birthday:* In all the States, District of Columbia, and Arizona, except Mississippi. It is observed, however, in the public schools of the latter State.

MARCH 2D. *Anniversary of Texan Independence:* In Texas.

APRIL. In Oregon, the forty-fifth day preceding general State Election, primary nominating election held. Every day on which an election is held throughout Oregon is a legal holiday.

Good Friday: In Alabama, Connecticut, Delaware, Florida, Louisiana, Maryland, Minnesota, New Jersey, Pennsylvania, Tennessee.

APRIL 19TH. *Patriots' Day:* In Maine and Massachusetts.

APRIL 21ST. *Anniversary of the Battle of San Jacinto:* In Texas.

APRIL 26TH. *Confederate Memorial Day:* In Alabama, Florida, Georgia, and Mississippi.

MAY 10TH. *Confederate Memorial Day:* In North Carolina and South Carolina.

MAY (Second Friday) *Confederate Day:* In Tennessee.

MAY 20TH. *Anniversary of the Signing of the Mecklenburg Declaration of Independence:* In North Carolina.

MAY (last Friday). *Pioneers' Day:* In Montana, observed in public schools.

MAY 30TH. *Decoration Day:* In all the States and Territories (and District of Columbia), except Alabama, Florida, Georgia, Idaho, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Louisiana. In Virginia, known as "Confederate Memorial Day," as also in certain other Southern States.

JUNE 3D. *Jefferson Davis's Birthday:* In Florida, Georgia, Alabama, Mississippi, Tennessee, Texas, and South Carolina. In Louisiana, known as "Confederate Memorial Day." In Virginia, in public schools.

JUNE (first Monday), even years. General State election in Oregon.

JULY 4TH. *Independence Day:* In all the States, District of Columbia, and Territories.

JULY 24TH. *Pioneers' Day:* In Utah.

AUGUST 16TH. *Bennington Battle Day:* In Vermont.

SEPTEMBER (first Monday). *Labor Day:* In all the States and Territories (and District of Columbia), except North Dakota. In Louisiana, observed in Orleans Parish. In Wyoming, by proclamation of the governor.

SEPTEMBER (first Tuesday). *Primary Election Day:* In Wisconsin.

SEPTEMBER 9TH. *Admission Day:* In California.

SEPTEMBER 12TH. *"Old Defenders' Day":* In Baltimore, Md.

OCTOBER 31ST. *Admission Day:* In Nevada.

NOVEMBER 1ST. *All Saints' Day:* In Louisiana.

NOVEMBER. *General Election Day:* In Arizona, California, Colorado, Delaware, Florida, Idaho, Illinois (in Chicago, Springfield and East St. Louis only), Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio (from 5.30 A. M. to 9 A. M. only), Oklahoma, Oregon (vote for presidential elections only), Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, West Virginia, Wash-

ington, Wisconsin, and Wyoming, in the years when elections are held therein.

NOVEMBER. *Thanksgiving Day* (last Thursday in November): Is observed in all the States, and in the District of Columbia, Arizona, and New Mexico, though in some States it is not a statutory holiday.

DECEMBER 25TH. *Christmas Day*: In all the States, District of Columbia, and Territories.

Sundays and Fast Days are legal holidays in all the States which designate them as such.

There are no statutory holidays in Mississippi, but by common consent the Fourth of July, Thanksgiving, and Christmas are observed. In New Mexico, Washington's Birthday, Decoration Day, Labor Day, Flag-Day (June 14), and Arbor Day are holidays when so designated by the governor. In South Carolina, Thursday of Fair Week is a legal holiday.

Arbor Day is a legal holiday in Arizona, Maine, Maryland, New Mexico, Wisconsin, and Wyoming, the day being set by the governor; in Texas, February 22d; Nebraska, April 22d; Utah, April 15th; Rhode Island, second Friday in May; Montana, second Tuesday in May; Georgia, first Friday in December; Colorado (school holiday only), third Friday in April; in Oklahoma, the Friday following the second Monday in March; in Arkansas, first Saturday in March.

Every Saturday after 12 o'clock noon is a legal holiday in California in public offices, Illinois (in cities of 200,000 or more inhabitants), Maryland, Michigan, New York, New Jersey, Ohio, Pennsylvania, Rhode Island, Virginia, the District of Columbia (for banking purposes), and in New Orleans, La., and Charleston, S. C.; in Louisiana and Missouri in cities of 100,000 or more inhabitants; in Tennessee, for State and county officers, and in Colorado during June, July, and August; in Indiana, first Saturday in June to last Saturday in October, inclusive, for all public offices in counties having a county-seat of 100,000 population or more.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the president designating a day of Thanksgiving only makes it a legal holiday in the District of Columbia and the Territories.

CHURCH DAYS

Ember and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually) are the Wednesday, Friday, and Saturday after the first Sunday in Lent, after the feast of Pentecost (Whit Sunday), after the festival of the Holy Cross, and after the festival of St. Lucia. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days are the three days immediately preceding Holy Thursday or Ascension Day.

Easter, the Christian passover and festival of the resurrection of Christ. The English name is probably derived from that of the Teutonic goddess of spring, Ostera or Eostre, whose festival occurred about the same time as the celebration of Easter. Those of the early Christians who believe the Christian passover to be a commemoration of Christ's death adhered to the custom of holding the Easter festivity on the day prescribed for the Jewish pasch, the 14th day of the first month, that is, the lunar month of which the 14th day either falls on or next follows the day of the vernal equinox. But most of the Christian Churches, attaching greatest importance to the day of Christ's resurrection, held to Easter's being celebrated on the Sunday which

followed the 14th day of the moon of March, the day on which Christ suffered. This question was the cause of a serious difference in the Church as early as the Second Century, and was not finally settled until the Council of Nice in 325. The rule was then adopted which makes Easter day to be always the first Sunday after the full moon which happens upon or next after March 21st; and if the full moon happens on a Sunday, Easter day is the Sunday after. By this arrangement Easter may come as early as March 22d, or as late as April 25th. This sacred festival is celebrated in every part of the Christian world with great solemnity and devotion, and generally also with proper sports and observances. Among the best known of the latter is the custom of making presents of colored eggs, called pasch or pace eggs. This custom originated from the old German legend of a white hare stealing into the house on Easter eve and secreting a number of beautifully colored eggs in odd corners for good little children. In America, where the hare is practically unknown, the custom has been transferred to the rabbit, its near relation. Hence, the colored Easter eggs are popularly referred to as "rabbit's eggs."

OLD ENGLISH HOLIDAYS

These holidays, with their names, had their origin in mediæval England when the state religion was that of the Church of Rome, and they are still observed generally or in some parts of England, Scotland, and Ireland.

JANUARY 6TH. *Twelfth Day*, or *Twelfth-tide*, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2D. *Candlemas*: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14TH. *Old Candlemas*: St. Valentine's Day.

MARCH 25TH. *Lady Day*: Annunciation of the Virgin. April 6th is old Lady Day.

JUNE 24TH. *Midsummer Day*: Feast of the Nativity of John the Baptist. July 7th is old Midsummer Day.

JULY 15TH. *St. Swithin's Day*. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1ST. *Lammas Day*: Originally in England the festival of the wheat harvest. In the Church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13th.

SEPTEMBER 29TH. *Michaelmas*: Feast of St. Michael, the Archangel. Old Michaelmas is October 11th.

NOVEMBER 1ST. *Allhallowmas*: Allhallows or All Saints' Day. The previous evening is Allhalloween, observed by home gatherings and old-time festive rites.

NOVEMBER 2D. *All Souls' Day*: Day of prayer for the souls of the dead.

NOVEMBER 11TH. *Martinmas*: Feast of St. Martin. Old Martinmas is November 23d.

DECEMBER 28TH. *Childermas*: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas, and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day, in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the Church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

Honeymoon. "Honeymoon" is a word left us, while the custom giving it name is a thing of the past. It had its origin among the ancient Germans, whose newly-married couples drank mead mingled with honey for thirty days after the wedding.

Honor, Legion of. An order of merit instituted under the French Republic in 1802, by the First Consul, as a recompense for military and civil services. The order originally comprised three classes — grand officers, commanders, and legionaries. The class of grand officers was, on the coronation of Napoleon I., divided into knights of the grand eagle (the highest class) and grand officers. On the restoration of the Bourbons the legion was retained, but remodeled so as to lose much of its original character. The decoration was a star of five rays, white enamel, surrounded with oak and laurel branches. In the center of the star was the figure of Napoleon Bonaparte. On one side was the legend *Honneur et Patrie*, and the device was an eagle holding thunderbolts. It was suspended to a red-watered ribbon. Remodeled by Napoleon III. (January 22, 1853).

Badge for a *Chevalier*, a bow of red ribbon in the buttonhole of the coat, with medal attached.

Badge for an *Officer*, a rosette of red ribbon in the buttonhole of the coat, with medal attached.

Badge for a *Commander*, a collar-ribbon.

Badge for a *Grand Officer*, a broad ribbon under the waistcoat.

Badge for a *Grand Cross*, a broad ribbon with a star on the breast, and jewel cross pendant.

Horoscope. In astrology, an observation of the aspect of the heavens at the moment of a person's birth, by which the astrologer claimed to foretell the future. A scheme or figure of the 12 houses or 12 signs of the zodiac, in which is marked the disposition of the heavens at a given time, and by which astrologers formerly told the fortunes of persons, according to the position of the stars at the time of their birth. A kind of planisphere invented by John of Padua. A table of the length of the days and nights at all places.

Inauguration Day. The present date of the inauguration of the President of the United States is March 4th. Washington's first inauguration took place on April 30, 1789. March 4th, was chosen for this purpose rather by accident than design. A committee appointed by the Constitutional Convention chose the first Wednesday in March, 1789, as the date for the first Congress under the Constitution to meet. This date happened to be March 4th, which has since then been used as the date of presidential inauguration. Twenty-one presidents have been inaugurated on March 4th, viz: George Washington, in 1793; John Adams, in 1797; Thomas Jefferson, in 1801 and 1805; James Madison, in 1809 and 1813; James Monroe, in 1817; John Quincy Adams, in 1825; Andrew Jackson, in 1829 and 1833; Martin Van Buren, in 1837; William Henry Harrison, in 1841; James K. Polk, in 1845; Franklin Pierce, in 1853; James Buchanan, in 1857; Abraham Lincoln, in 1861 and 1865; Ulysses S. Grant, in 1869 and 1873; Rutherford B. Hayes, in 1877; James A. Garfield, in 1881; Grover Cleveland, in 1885 and 1893; Benjamin Harrison, in 1889; William McKinley, in 1897 and 1901; Theodore Roosevelt, in 1905, and William H. Taft, in 1909. George Washington was inaugurated on April 30, 1789, because the bad weather had prevented Congress from assembling and organizing. James Monroe and Zachary Taylor were inaugurated on March 5, 1821 and 1849, respectively, because March 4th, in those years fell on Sunday. John Tyler was inaugurated April 6, 1841; President Harrison died on April 4th, and Tyler could not reach Washington sooner. Millard Fillmore took the oath on July 9, 1850, the same day that General Taylor died. Andrew Johnson was sworn in on April 15, 1865, a few hours after Lincoln expired. Chester A. Arthur took the oath late on Monday night, September 19, 1881, about an hour after Garfield died, and Theodore Roosevelt took the oath of office in Buffalo, N. Y., on September 14, 1901, shortly after the death of President McKinley.

John Bull. A collective nickname for the English people, first used in Arbuthnot's ludicrous "History of Europe." It is now also applied to characteristic English traits.

Kitchen Cabinet. This name was sportively given in the United States to Francis P. Blair, Amos Kendall and others, by the opponents of President Jackson's administration. Blair was the editor of the "Globe," the organ of the president, and Kendall was one of the principal contributors to the paper. As it was necessary for Jackson to consult frequently with these gentlemen, in order to avoid observation, they were accustomed, when they called upon him, to go in by a back door. The Whig party styled them, in derision, therefore, the "Kitchen Cabinet," alleging that it was by their advice that the president removed so many Whigs from office and put Democrats in their places. During the Roosevelt administration a similar group of the president's intimates was styled the "Tennis Cabinet," because they usually met at the tennis court.

Ku-Klux-Klan. The name of a secret society in the Southern States bitterly op-

posed to the exercise of the electoral franchise by the negroes. Early in 1868, this society issued lists of proscribed persons, who, if they did not quit the country after warning, became liable to assassination. General Grant endeavored to suppress the society. Its repression by the militia in Arkansas was ordered November, 1868, and it became the subject of legislation at Washington, June, 1871, under which many persons were tried and convicted for lawless outrages and murders. The Ku-Klux outrages were generally committed at night, the men being masked and even their horses being disguised. The vigorous prosecution of Ku-Klux offenders speedily destroyed the organization.

Liberty Bell. The famous Liberty Bell, weighing about 2,000 pounds, was made in London in 1752, and was ordered by the Pennsylvania Assembly for the State House, then located in Philadelphia. It was put in place the following year, but on account of a defect in sound, it was recast in Philadelphia, and, in June, 1753, was again placed in the State House belfry.

When the Continental Congress, on July 4, 1776, declared the independence of the American colonies from Great Britain, the old bellman, in his enthusiasm and ecstasy, according to the story, rang the bell for two hours. In 1777, when the British threatened Philadelphia, the bell was taken down, and carried to Allentown, Pa., but a new steeple was built for it, and it was again returned to the State House, in 1778. In 1835, it cracked under a stroke of the hammer, and has remained impaired ever since. It has been transported to a number of expositions, and the utmost caution taken to preserve it as one of our most hallowed national relics. The bell contains the following inscriptions: "By order of the Assembly of the Province of Pennsylvania, for the State House, in the City of Philadelphia, 1752;" beneath is inscribed, "Proclaim liberty throughout all the land unto all the inhabitants thereof — *Levit. XXV., 10.*"

Log. A contrivance used to measure the rate of a ship's velocity through the water. For this purpose there are several inventions, but the one most generally used is the following, called the *common log*. It is a piece of thin board, forming the quadrant of a circle of about six inches radius, and balanced by a small plate of lead nailed on the circular part, so as to swim perpendicularly in the water, with the greater part immersed. One end of a line, called the *log-line*, is fastened to the log, while the other is wound round a reel. When the log is thrown out of the ship while sailing, as soon as it touches the water it ceases to partake of the ship's motion, so that the ship goes on and leaves it behind, while the line is unwound from the reel, so that the length of line unwound in a given time gives the rate of the ship's sailing. This is calculated by knots made on the line at certain distances, while the time is measured by a sandglass running a certain number of seconds. The length between the knots is so proportioned to the time of the glass that the number of knots unwound while the glass runs down shows the number of nautical miles the ship is sailing per hour. Thus, if the glass be a half-minute one,

it will run down 120 times in an hour. Now, since a nautical mile contains about 6,076 feet, the 120th part of this is about 50½ feet; so that if the spaces between the knots be 50½ feet, the number of knots and parts of a knot unwound from the reel in half a minute is the number of miles and parts of a mile the ship runs in one hour.

- Mines, Deepest.** 1. Ashton Moss Colliery, near Manchester, England, 2,850 feet.
 2. Adalbert Silver-lead Mine, at Przibram, Bohemia, 3,432 feet.
 3. Calumet Copper Mine, near Lake Superior, in Michigan, 3,900 feet.

The deepest mine in the world is the rock-salt bore hole at Spesenberg, near Berlin, which is 4,175 feet in depth. It is not, however, quite perpendicular. The deepest British mine is Dunhill Colliery, near Wigan, which is 2,824 feet. The deepest boring in the world is the artesian well at Potsdam, Missouri, which is 5,500 feet, or 220 feet beyond a mile.

Mortality. In an extended sense, the condition of all organized bodies — of being subject to the cessation of life. In the sense in which it is most frequently employed, the *death rate*, i. e., the proportional quantity of individuals who, in a certain population, die in a given time. If we assume the population of the earth to be one thousand millions, and a generation to last thirty-three years; in that space of time, the one thousand millions must all die, and, consequently, the number of deaths will be, by approximation:

Each year, 30,000,000
 Each day, 82,107
 Each hour, 3,421
 Each second, 1 nearly.

One-quarter of the population die at or before the age of 7; the half part of it die at or before the age of 17. One in 100,000 persons reaches the age of 100 years; one in 500 reaches the age of 90; one in 100, the age of 60.

DEATH RATES FROM CERTAIN CAUSES IN THE UNITED STATES

CAUSE	DEATH RATE PER 100,000		INCREASE OR DECREASE IN DEATH RATE, 1890 TO 1900	
	1900	1890	In-crease	De-crease
Pneumonia,	191.9	186.9	5.0
Consumption, ¹	190.5	245.4	54.9
Heart disease, ²	134.0	121.8	12.2
Diarrhœal diseases, ³	85.1	104.1	19.0
Diseases of the kidneys, ⁴	83.7	59.7	24.0
Apoplexy,	66.6	49.0	17.6
Cancer,	60.0	47.9	12.1
Old age,	54.0	44.9	9.1
Bronchitis,	48.3	74.4	26.1
Cholera infantum,	47.8	79.7	31.9
Debility and atrophy,	45.5	88.6	43.1
Inflammation of the brain and meningitis,	41.8	49.1	7.3
Diphtheria,	35.4	70.1	34.7
Typhoid fever,	33.8	46.3	12.5
Influenza,	23.9	6.2	17.7
Diseases of the brain,	18.6	30.9	12.3
Croup,	9.8	27.6	17.8
Malarial fever,	8.8	19.2	10.4

¹ Including general tuberculosis. ² Including pericarditis. ³ Including cholera morbus, colitis diarrhœa, dysentery, and enteritis. ⁴ Including Bright's disease.

DEATH RATE IN VARIOUS OCCUPATIONS

OCCUPATION	BASIS OF ESTIMATE	DEATH RATE	
		1900	1890

Mourning. The colors used as badges of grief or bereavement in different countries. In this country, as in Europe, the ordinary color for mourning is *black*; in China, as with the ancient Spartan and Roman ladies, it is *white*; in Turkey, it is *blue* or *violet*; in Egypt, *yellow*; in Ethiopia, *gray*. Some have attempted to trace the associations which caused the adoption of the various colors to natural causes. Thus black, which is the privation of light, is supposed very appropriately to denote the privation of life; white is an emblem of purity; yellow is the color of leaves when they fall, and represents that death is the end of all human hopes, etc. In the East, to cut the hair was considered a sign of mourning; among the Romans, on the contrary, it was deemed a mark of sorrow to let it grow.

NAMES AND NAME ORIGINS

GEOGRAPHICAL, PERSONAL, CURIOUS, AND OTHERWISE

KEY TO THE VOWEL SOUNDS

ä, as in farm, father; a, as in ask, fast; ă, as in at, fat; ā, as in day, fate; á, as in care, fare; ě, as in met, set; ē, as in me, see; ě, as in her, ermine; ĭ, as in pin, sin; ĭ, as in pine, line; ō, as in not, got; ō, as in note, old; ô, as in for, fought; ô, as in sole, only; ô, as in fog, orange; ô, sound cannot be exactly represented in English. The English sound of u in *burn* and *burnt* is perhaps the nearest equivalent to ô; ōō, as in cook, look; ōō, as in coon, moon; ŭ, as in cup, duck; ŭ, as in use, amuse; ŭ, as in fur, urge; ŭ sound cannot be exactly represented in English. The English sound of u in *luke* and *duke* resembles the original sound of ŭ. The letter n represents the nasal tone of the preceding vowel, as in *encore* (ăN-kôr').

ABBREVIATIONS

Arab., Arabic or Arabian; A. S., Anglo Saxon; Boh., Bohemian; Eng., English; Fr., French; Gael., Gaelic; Ger., German; Gr., Greek; Heb., Hebrew; Hind., Hindustani; Hung., Hungarian; Ind., Indian; It., Italian; Lat., Latin; M. H. G., Middle High German; N. H. G., North High German; Nor., Norwegian; O. E., Old English; O. F. or O. Fr., Old French; O. G., Old German; O. H. G., Old High German; Pers., Persian; Port., Portuguese; Russ., Russian; Sp., Spanish; Sw., Swedish; Teut., Teutonic; Turk., Turkish.

Aachen (ă'-kĕn). See Aix-la-Chapelle.

Aaron (ăr'-ŭn or ă'-rŭn). From the Hebrew 'Aharon, perhaps the same as hārōn, "a mountaineer"; Arabic, Haroon or Harun; Fr., Aaron; Ger., Aaron or Aron; It., Aronne; Lat., Aaron; Port., Aarao; Sp., Aron.

Abel (ă'-bl). From the Hebrew *Hebhel*, which St. Jerome translates "vanity or vapor." Gesenius renders the name "breath," and says the son of Adam was probably so called from the shortness of his life. Arabic, Habeel or Habil; Fr., Abel; Lat., Abel.

Aberdeen (ăb-ēr-dĕn'). The ancient and correct orthography of this name was "Aberdon," from *Aber*, the mouth of a river, and *Don*, the name of the river upon whose banks the city is built.

Abolitionists. A term denoting the Anti-Slavery party in the United States, which appeared soon after the founding of "The Liberator" by William Lloyd Garrison, in 1831; Garrison, Wendell Phillips, John Brown, E. P. Lovejoy, Joshua R. Giddings, John P. Hale, Salmon P. Chase, and Charles Sumner were avowed Abolitionists.

Abraham (ă'-bră-hăm). From the Hebrew *Abraham*, according to some a Hebrew-Arab compound signifying "father of a multitude," from Hebrew *abh*, "father," and Arabian, *raham*. Others translate the name "lofty father of a multitude," or "father who shall see the people." Arabic, Ibraheem or Ibrahim; Danish, Abraham; Dutch, Abraham or Abram; Fr., Abraham; Ger., Abraham; It., Abramo; Lat., Abrahamus; Russ., Avraam, or Abramii; Sp., Abrahan; Sw., Abraham.

Abram. Derived from same root as Abraham.

Absalom (ăb'-să-lom). From the Hebrew *Abshalom*, signifying "father of peace"; from *abh*, "father," and *shalom*. Fr., Absalon.

Abyssinia (ăb-ĭs-sĭn'-ĭ-ă). Named from the rivers Abia and Wabash, or, according to Bruce, from *habish*, "mixed," i. e., "the country of the mixed races"; others derive it from the land of the Abassins, or "mixed races."

Acadia (ă-kă'-dĭ-ă), or Acadie (ă-kă-dĕ'). The name originally given to Nova Scotia, but now only the poetical designation. It was granted by Henry IV., of France, November 8, 1603, to De Monts, a Frenchman, and a company of Jesuits, who were finally expelled from the country by the English governor and colonists of Virginia, who claimed all that coast by virtue of its prior discovery by the Cabots in 1497. In 1621, Sir William Alexander, a Scotchman, applied to and obtained of James I. a grant of the whole peninsula, which he renamed Nova Scotia, in honor of his native land.

Acquia Creek, Va. Indian *equiwi*, "between," or *akki*, "earth"; i. e., "earthy or muddy creek."

Acropolis (ă-krŏp'-ŏ-lĭs). From the Greek *akropolis*, "the upper city." Once a general name

for the citadel of any ancient Greek city, but especially appropriated to that of Athens, famous for the placing on its summit in the Fifth Century, B. C., of the highest achievements of Greek art, the Parthenon and the Erechtheum, with the sculptures which adorned them without and within, and the Propylæa, or monumental gate, inside of the walls at the west end. At first Acropolis was the only name of the city, which was so called from Acrops, the founder. Afterwards, when the city extended over the adjoining plains, the name Acropolis was confined to the citadel and the hilly ground adjoining.

Ada (ă'-dă). According to some, this name has been corrupted from *Adama*, feminine of Adam. Others derive it from the name *Ead*, which is from A. S. *ead*, "happy"; or from the name *Eadith*. Littleton gives "Eada" (Saxon), Auda, Ada, and Idonea, which he translates, "fit, meet, proper"; also "pious, honest, rich."

Adam (ăd'-am). From the Hebrew *Adham*, signifying "man"; literally, "earthy, red earth." Rudolph, however, says the name in Ethiopic means "to be fair, beautiful." Arabic, Adam; Danish, Adam; Dutch, Adam; Fr., Adam; Ger., Adam; It., Adamo; Lat., Adamus; Port., Adão; Sp., Adan.

Adela (ăd'-ĕ-lă). A female name Latinized from Old German *edel*, "noble, noble descent or lineage."

Adelaide (ăd'-ĕ-lăd). From the Old German male name Adalheid (in Middle High German Adalhait, North High German Adelheid), signifying "a noble person"; from *edel*, "noble," and *heit*, "cheer."

Adelaide Island. In honor of the queen of William IV.

Adeline (ăd'-ĕ-lĭn), **Adelina** (ăd'-ĕ-lĭ-nă). Diminutives of Adela. Danish, Adeline; Dutch, Adelina; Fr., Adeline; Ger., Adeline; It., Adelina; Lat., Adelina.

Adirondack. Mountains in New York and village in Warren County, of the same State. Indian word compounded from *doran*, "a people who eat bark," and *dak*, "trees," with the French article *la* prefixed. This section was called by the natives *Coughsarage*, "the dismal wilderness."

Adolphus (ă-dŏl'-fŭs). The same as the Old German name Atalpus, which Wachter renders "helper of happiness," from *od* "happiness," and *hulf*, "help or helper." It is commonly defined as "noble wolf." Danish, Adolf; Dutch, Adolf; Fr., Adolphe; Ger., Adolf or Adolph; It., Adolfo; Lat., Adolphus; Sp., Adolfo; Sw., Adolf.

Adrian (ă'-drĭ-ăn), or Hadrian (hă'-drĭ-ăn). From the German name *Adrias*, so called from the capital of the Prætutii, on the coast of the Adriatic, where the family of the Emperor Adrian, according to his own account, had its rise. Danish, Adrian; Dutch, Adriaan; Fr., Adrien; It., Adriano; Lat., Adrianus; Port., Adriano; Sp., Adrian.

Adriatic (*ā-drē-āt'-ik*, *ād-rē-āt'-ik*) **Sea**. Indicates the Sea of Adrian or Hadrian.

Afghanistan (*äf-gän-īs-tän'*). The country of the Afghans.

Africa (*äf'-rī-kā*). Origin traced to the Phœnician *afer* (pl. *afri*), "a black man," whence Lat. *Africa*, and Gr. *Aphrike*.

Agatha (*äg'-ā-thā*). A female name derived from the Greek *agathos*, "good." *Danish*, Agathe; *Dutch*, Agatha; *Fr.*, Agathe; *Ger.*, Agathe; *Gr.*, Agathe; *It.*, Agata; *Lat.*, Agatha; *Sp.*, Agata; *Sw.*, Agata.

Agnes (*äg'-nēs* or *äg'-nēz*). From the German *agnos*, "chaste." *Danish*, Agnes, or Agnete; *Dutch*, Agnes; *Fr.*, Agnes; *Ger.*, Agnes; *It.*, Agnese; *Lat.*, Agnes.

Agra (*ä'-grā*), or Akberabad. Founded by Akber. *Abad*, a dwelling or town, generally connected with the name of its founder; hence, "town of Akber."

Ailean or **Aileen** (*ā-lēn'*). An Irish female name. Some translate it "light." If so, it may be a form of Helen; but it is more probably from the Erse *ail*, "noble, beautiful"; or from *aille*, "handsome, fair"; or corrupted from *ailgean*, "noble offspring."

Aix-la-Chapelle (*āks-lā-shā-pěl'*), or **Aachen**. Celebrated for its mineral springs, and for the chapel erected over the tomb of Charlemagne. To distinguish it from other places named Aix, it was so called from the domed basilica erected by Charlemagne.

Akron (*āk'-rōn*). City in Summit County, Ohio, which occupies the highest ground in the northern part of the State, and several other places named for the same reason. A Greek word, meaning "the summit or peak."

Alabama (*āl-ā-bā'-mā*). State of the Union and a river of that State, named from an Indian tribe. There are several explanations of the meaning of the word. Gatchet gives "burnt clearing." Others say it means "here we rest." Haines, in his American Indian, gives "thicket clearers."

Alameda (*āl-ā-mā'-dā*). County and city in California, town in Bernalillo County, New Mexico, and post-office in Clarke County, Alabama, named from the cottonwood trees growing in the vicinity. A Spanish word meaning "grove of poplar trees."

Alamo (*ä'-lā-mō*). Post-office in Contra Costa County, California, and many other places named from the old fort in Texas, which was so called from a grove of cottonwood trees. A Spanish word meaning "poplar or cottonwood."

Alan (*āl'-an*). Some derive this name from Old French *alan*, *allan*, "a hunting dog," originally from the country of the *Alani* or *Alauni*, a warlike people of European Sarmanatia.

Alaric (*āl'-ār-ik*). From the Gothic *Alareiks*, "noble ruler"; *Danish*, Alarick; *Fr.*, Alaric; *Ger.*, Alarich; *It.*, Alarico; *Lat.*, Alaricus; *Sp.*, Alarico.

Alaska (*ā-lās'-kā*). Territory of the United States. An Indian word meaning "great country," "continent," or "great land." It was encountered by Russian explorers as *Al-ay-es-ka*, the name having since changed through *Aliaska*, *Alaksa*, *Alashka*, to its present form. When purchased by the United States, the names of Walrussia, American Siberia, Zero Islands, and Polario were suggested, but Alaska was adopted in accordance with a proposition of Charles Sumner.

Albany (*ōl'-bā-nī*). County and city in New York, named in honor of the Duke of York (from his second title, Albany), afterwards James II., of England; *Albany*, derived from his Scotch title, originally the same as *Albyn*, the Celtic name of Scotland.

Albemarle (*āl'-bē-mārl*) **Sound, N. C.** After the Duke of Albemarle (Captain-General George Monk), one of the original members of the Charter Company.

Albert (*āl'-bērt*). The same with the Old High

German names, *Albrecht*, *Ailbracht*, and the North High German, *Albrecht*; from *all-breht*, "very distinguished." *Danish*, Albrecht; *Dutch*, Albertus, or Albert; *Fr.*, Albert; *Ger.*, Albrecht; *It.*, Alberto; *Lat.*, Albertus; *Sp.*, Alberto; *Sw.*, Albert.

Albino (*āl-bī'-nō*). Albino is a term originally applied to the white negro of the African coast (*albus*, white), by the Portuguese. The characteristics are extreme whiteness of the skin, white or very pale flaxen hair, and pink eyes. The wool of the negro Albino is generally perfectly white. Albinos are also found among white people. It is now known that these characteristics are the result of a peculiar disease, to which some animals, as the domestic rabbit, are also liable.

Albuquerque (*Sp.*, *āl-bō-kār'-kā*), New Mexico. Named by the Spaniards, from Albuquerque, a town in Spain, near the frontier of Portugal, which took its name from Alphonso d'Albuquerque, the "Portuguese Mars."

Alcazar (*āl-kāz'-ār*). From the Arabic, *al gasr*, "the palace." The palace of the Moorish kings and later of Spanish royalty at Seville. A large part of it is of the original Alhambresque architecture, and extremely beautiful, though restored and too highly colored.

Aleutian (*ā-lū'-shī-ān*). Islands in the Pacific Ocean. A derivation of the Russian word *aleaut*, meaning "bald rock," later appearing in the name applied to the river *Olutora* on the coast of Kamchatka, the people near the mouth of the stream being called Olutorsky. The Russians when first viewing the Alaskan natives applied the name Olutorsky. The initial O of the Russian invariably broadens into a sound almost equivalent to *a* in father, accounting for the transition from Olutorsky to Aleutsky, and then to Aleutian.

Alexander. From the Greek name *Alexandros*, "helper of men." *Dutch*, Alexander; *Fr.*, Alexandre; *Ger.*, Alexander; *It.*, Alessandro; *Lat.*, Alexander; *Sp.*, Alejandro, or Alexandro.

Alexandria, an Egyptian city named after Alexander the Great. In reading or speaking in Latin, this name is pronounced Alexan-dri'a, but it is properly Alex-an'dria, the accent being placed on the third syllable.

Alexis (*ā-lēs'-īs*). From the Greek name *Alexis*, "help," defense; *Fr.*, Alexis; *Russ.*, Alexei.

Alfred. This name is usually translated "all peace." Neidinger derives the first syllable of the Anglo-Saxon name Alfred, Aelfred, from the word *alp*, *alf*, *elf*, "strong," "powerful." The name is rather from *alf-rad*, "help in counsel." *Danish*, Alfred; *Dutch*, Alfred; *Fr.*, Alfred; *Ger.*, Alfred; *It.*, Alfredo; *Lat.*, Alfredus; *Sp.*, Alfredo.

Algernon (*āl'-jēr-nūn*). From *als* (aux) *gernons*, was originally given in the Twelfth Century to those who, contrary to the fashion of the time, wore their whiskers. Roquefort renders the Old French, *gernon*, *grenon*, *guernon*, *ghernon*, "poil de la barbe, moustache"; from Med. L. *granus*, *greno*; the latter is no doubt from L. *crinis*, "hair of the head."

Algiers (*āl-jēr'z*). From the Arabic, *Al-jazirah*, "the peninsula."

Alhambra (*āl-hām'-brā*). From the Arabic, *al-hamrā*, "red." A great citadel and palace founded in the Thirteenth Century above the city of Granada, Spain, by the Moorish kings.

Alice (*āl'-īs*). From the Teutonic, meaning "noble" or "noble cheer." *Danish*, Else; *Dutch*, Elsje; *Fr.*, Alice; *Lat.*, Alicia; *Sw.*, Elsa.

Alison (*āl'-i-sōn*). A Scottish female name, which in old parish registers is spelled *Alisone*. It is of French origin, and the same as *Alizon*. Roquefort gives *Alizon*, *Alieite*, *Ailexe*, *Aileye*, *Auly*, as female diminutives of Alexis.

Allée Verte (*āl-lā' vārt*). French, "green walk." A double avenue of limes beginning at the western end of the Boulevard d'Anvers in Brussels and extending along the bank of the Willebroeck Canal.

Alleghany (ăl'-ē-gā-nĭ), or **Allegheny**, also **Alle-gany**. County, city, and river in Pennsylvania, and mountains in eastern United States. An Indian word variously spelled, the origin of which is in dispute. The most generally accepted derivation is from *welhikhanna*, "the best" or "the fairest river."

Allen. According to some, this is the same name as Allan and Alan. Lower shows that it is found written *Allayne*. It is a probable corruption of the name Alwine.

Allentown. City in Lehigh County, Pennsylvania, and borough in Monmouth County, New Jersey, named for William Allen, of Pennsylvania, at one time chief justice of the province.

All Saints' Bay. Because discovered by Vespucci on the Feast of All Saints in the year 1503.

Alma (ăl'-mā). At the time of the war between England and Russia this name was introduced in the west of England, so christened after the Battle of the Alma.

Almack's (ôl'-măks). This well-known place of assembly in King Street, St. James's, London, was built by one MacCall, a tavern-keeper, in 1759. He was originally a poor Highlander, who, having made his way to London, inverted the syllables of his name to disguise his northern origin. As *Almack* he opened the tavern and the celebrated rooms which were known as Almack's for the greater part of a century. They were afterwards called "Willis's Rooms."

Alonzo (ă-lôn'-zō), or **Alonso**. See Alphonso.

Alphonso (ăl-fôn'-sō, ăl-fôn'-zō), or **Alonzo**. From the Teutonic, meaning "battle eager." *Danish*, Alfons; *Fr.*, Alphonse; *It.*, Alfonso; *Lat.*, Alphonsus; *Port.*, Affonso; *Sp.*, Alfonso, or Alonso.

Alps. The word *Alp*, or *Alb*, is Keltic, and signifies "white." Its application to the white tops of the mountains of the Alps is a natural one, and it is singular that the names of nearly all the great mountains of the earth have some reference to their snow-covered summits.

Altai (ăl-tī'). A mountain range in central Asia, rich in the precious metals, is now called in Mongolian *Altai ula*, "mountain of gold," from *ula*, "mountain," and *altai*, genitive of *alta*, "gold." Al-tai (for Altagh) is the Tartaric form of the name. Hence the name Altaie which is applied to languages of the Mongol-Turkic class.

Altoona (ăl-tōō'-nā). City in Blair County, Pennsylvania, so named because of its high situation in the Allegheny Mountains, and town in Polk County, Iowa, situated on the highest point between the Des Moines and Mississippi Rivers. A derivative of the Latin word *altus*, "high."

Alvin (ăl'-vĭn), or **Alwin** (ăl'-wĭn). Means "winning all." *Dutch*, Alewijn; *Fr.*, Aluin; *Ger.*, Alwin; *It.*, Alvino; *Lat.*, Alwinus; *Sp.*, Aluino.

Amadeus (ăm-ă-dē'-ŭs). Translated, a "lover of God." *Fr.*, Amadée; *Ger.*, Amadeus; *It.*, Amedeo, or Amadeo; *Lat.*, Amadeus; *Sp.*, Amadeo.

Amanda (ă-măn'-dā). A female name from the Latin *Amanda*, "to be loved," i. e., "worthy of being loved." It is also found as a male name in the parish registers of Nottingham, England.

Ambrose (ăm'-brōz). From the Latin name Ambrosius; meaning "immortal, divine, godlike." *Danish*, Ambrosius; *Dutch*, Ambrosius; *Fr.*, Ambroise; *Ger.*, Ambrosius, or Ambros; *It.*, Ambrogio; *Sp.*, Ambrosio.

Amelia (ă-mē'-lĭ-ă). From *Aemylia*, name of a noble family in Rome, also the name of a vestal who rekindled the fire of Vesta, which had been extinguished by putting her veil over it. The name means "gentle, engaging, courteous." *Danish*, Amalie; *Fr.*, Amélie; *Ger.*, Amalie; *Sp.*, Amelia.

America. From Amerigo Vespucci, sometimes spelled Vespuccius, who landed on the Western Continent south of the equator in 1497. His name

was given to this country by a German geographer Martin Waldseemuller, who published an account of the four voyages of Vespucci at Frankfort, Germany, in 1507.

Amherst (ăm'-ērst). County in Virginia, and towns in Hillsboro County, New Hampshire, and Hampshire County, Massachusetts, named for Lord Jeffrey Amherst.

Amos (ă'-mōs). From the Hebrew, signifying a "burden." *Fr.*, Amos.

Amy (ă'-mĭ). Some derive this name from the French *aimée*, "beloved"; others from *amie*, "a friend." It is found Latinized both *Amata* and *Amicia*. *Danish*, Amalie; *Fr.*, Aimée; *It.*, Amata.

Anabella. A female name formed from Hannibal, i. e., Annibal, the Carthaginian name. In Phenician it is found written *Chanbaal*, "favor of Baal."

Andalusia (ăn-dă-lōō'-shĭ-ă). Now a captaincy-general in southern Spain, comprising the modern provinces Almeria, Jaen, Granada, Cordova, Malaga, Seville, Cadiz, and Huelva. It was called by the Moors *Belad-al-Andalus*, the "land of the Andalus," Andalus being probably a corruption of the Latin *Valdalos*, "the Vandals."

Andes (ăn'-dēz). Properly "Cordilleras de los Andes," the "chain of the Andes," is a name of uncertain meaning. Garcilasso de la Vega says that it was derived from the Anti tribe near Cuzco. It has also been referred to a Peruvian word *anta*, "copper." Another proposed etymology is from *anta*, a "tapir," of which the Portuguese plural would be *antas*, so that the Cordilleras de los Antas would mean the "mountains of the tapirs."

Andrew. From the Greek *Andreas*, meaning "manly, brave, courageous." *Danish*, Andreas; *Dutch*, Andries; *Fr.*, Andre; *Ger.*, Andreas; *It.*, Andrea; *Lat.*, Andreas; *Port.*, Andre; *Sp.*, Andres.

Androscoggin (ăn-drōs-kōg'-gĭn). River in Maine and New Hampshire, and county in Maine. As a compliment to Sir Edmund Andros, name was changed from the Indian name first given to the river, from the tribe Amasagunticook, that formerly lived on its banks, and variously spelled from pronunciations, Ammoncongan, Ammoscoggin, Amariscoggen. The authorities give the meaning "a fishing place for alewives," or "fish spearing."

Angela (ăn'-jĕ-lă). A female name of Italian origin, derived from *angelo*, "an angel."

Angelica (ăn-jĕl'-ĭ-kă). Translated "angelic." *Fr.*, Angelique; *Ger.*, Angelica; *It.*, Angelica.

Angelo, Sant' (ăn'-jĕ-lō), **Castle of**. The remodeled mausoleum of Hadrian in Rome. It is a huge circular tower about 230 feet in diameter on a basement about 300 feet square, with medieval chambers and casemates excavated in its solid concrete, and three Renaissance stories added on its summit to serve the purposes of a citadel.

Anna or Anne. Same origin as Hannah. *Dan.*, Anna; *Dutch*, Anna; *Fr.*, Anne; *Ger.*, Anne; *It.*, Anna; *Lat.*, Anna.

Anselm (ăn'-sĕlm). From the Teutonic, meaning "divine helmet," hence "a defender." *Dutch*, Anselmus; *Fr.*, Anselme; *Ger.*, Anselm; *It.*, Anselmo; *Lat.*, Anselmus; *Sp.*, Anselmo.

Antarctic Ocean. Denotes the ocean *anti*, "against" or "opposite to" the Arctic Ocean.

Antony (ăn'-tō-nē), **Anthony**. From Latin *Antonius*, meaning "inestimable." According to Litleton, the Antonian family were descended from Antius, son of Hercules. *Danish*, Anton; *Dutch*, Anton, or Antoon, or Antonius; *Fr.*, Antoine; *Ger.*, Anton; *It.*, Antonio; *Port.*, Antonio; *Sp.*, Antonio; *Sw.*, Anton.

Antwerp (ânt'-wĕrp). From *Andoverpum*, "at the wharf"; *werf*, a dam or wharf; literally, "what is thrown up,"—*werven*.

Apennines (ăp'-ĕn-ĭnz). Now used as the name of the central mountain chain of Italy. The Roman term Mons Apenninus originally denoted the Mari-

time Alps near Genoa, the Mons Peninus signifying the Dauphiny Alps, more especially the part near the Great St. Bernard. The Romans explained the Mons Peninus or Pennine chain as the Poenine or Punic Mountains, most likely because Hannibal crossed them when he invaded Italy. But the name Mons Peninus doubtless contains the Celtic word *pen*, "head, summit, mountain," and the Mons Peninus can hardly be separated from the neighboring Mons Apenninus, which is probably the same word with a prefixed article or preposition.

Appalachian (ăp-pă-lăch'-ĭ-ăn, ăp-pă-lă'-chĭ-ăn) **Mountains.** From the Appalachicola River, or the ancient town called *Apalache*, found by DeSoto in Florida.

Appalachicola (ăp-pă-lăch'-ĭ-kō'-lă) **River, Fla.** From an Indian town *Apalatichiokli*, "those on the other side"; another source notes it *Apalatchukla*, "old town," a former Indian settlement on its banks.

Appalachie (ăp-pă-lăch'-ē) **Bay, Fla.** Various spelled *Apahlahche*, *Apeolatei*, *Palaxy*, *Palatcy*; the prefix is supposed to be Spanish, the word in full said to mean "the men." (See *Appalachicola*.)

Appian Way. The Via Appia of ancient Rome, most famous of Roman highways. It ran from Rome to Brundisium (Brindisi) and is probably the first great Roman road which was formally undertaken as a public work. It was begun in 312 B. C., by Appius Claudius Cæcus, the censor, and was ultimately extended to Brundisium when a Roman colony was inaugurated there. At present the Appian Way, for a long distance after it leaves Rome, forms one of the most notable memorials of antiquity in or near the Eternal City, bordered as it is by tombs and the ruins of monumental buildings.

Appomattox (ăp-pō-măt'-ōks). River and county in Virginia. An Indian word, meaning "a tobacco-plant country."

April. From *aperio*, "to open," this being the month in which the buds shoot forth.

Arabella (ăr-ă-bēl'-lă). Corrupted from the old name *Oragel*, *Oragele*, meaning a "fair altar." *Dutch*, *Arabella*; *Fr.*, *Arabelle*; *Ger.*, *Arabelle*; *It.*, *Arabella*; *Lat.*, *Arabella*.

Arabia (ă-ră'-bĭ-ă). The country of the Arabs, "men of the desert."

Arc de Triomphe de l'Etoile (ărk dŭ trē-ōnf' dŭ lă-twăl'). Meaning, "triumphal arch of the star." The largest triumphal arch in existence, at the head of the Champs Elysées, Paris.

Arch of Constantine (kōn'-stăn-tĭn). An arch in Rome built 312 A. D., in honor of Constantine's triumph over Maxentius.

Arch of Septimius Severus. An arch in the Roman Forum, dedicated 203 A. D., in commemoration of victories over the Parthians.

Arch of Titus. An arch in Rome, built in commemoration of the taking of Jerusalem.

Arch of Trajan. Arch over the Appian Way at Benevento, Italy, dedicated A. D. 114, and one of the finest of ancient arches.

Archangel (ărk-ăn'-jēl). City of Russia, named in honor of the archangel, Michael.

Archibald (ăr-'chĭ-bald). From the Old German name *Ercheneals*, *Erchanpald*; from *erchanbald*, "bold in work or activity." *Fr.*, *Archambaud*; *Lat.*, *Archibaldus*.

Arctic. The word "arctic" is derived from the Greek name for the constellation of the Bear, *Arctos*, and means "near Arctos," i. e., "in the extreme north."

Areopagus (ăr-ē-ōp'-ă-gŭs). From the Greek *Areios pagos*, "Martial hill," i. e., "Hill of Mars." A low, rocky hill at Athens continuing westward the line of the Acropolis, from which it is separated by a depression of ground.

Argentina (ăr-jēn-tē'-nă). Now the Argentine Republic, "silver republic," which owes its name to the silvery reflection of its rivers.

Arizona (ăr-ĭ-zō'-nă). Territory of the United States. Generally accepted that the name is derived from the Indian word meaning "arid zone or desert"; but Mowry claims that the name is Aztec, from *Arizuma*, signifying "silver bearing."

Arkansas (ăr'-kăn-sô, or ăr-kăn'-săs). River, State, county, and town in said State, and city in Cowley County, Kansas. Marquette and other French explorers wrote the word *Alkansas* and *Akamisca*, from the Indian tribe. The usual etymology derives the name from the French *arc*, "a bow," and *Kansas*, "smoky water," while another theory makes the prefix a Dakota word meaning "people"; hence, "people of the smoky water." Schoolcraft says there is a species of acacia found in Arkansas from which the Indians made bows. This is thought to have been the origin of the name of the Arc or Bow Indians.

Arles (ărlz. *Fr.*, ărl). A city in the department of Bouches-du-Rhone, France, situated on the left bank of the eastern arm of the Rhone near its mouth. It was anciently known as *Are-late* or *Arelatum*, "by the marsh" or "on the clay."

Arlington House. A mansion on the heights opposite Washington, District of Columbia, in the midst of the national cemetery. It was once the property of General Washington and the home of General Robert E. Lee.

Arnold. Bailey says this name in Saxon, *arnhold*, signifies "faithful to his honor"; Lower says the surname *Arnulfe* is the same as *Arnold*, in medieval records sometimes Latinized *Ernulfus*, which might translate both "help in war" and "helping lord," all doubtless from *ern-walt*, "powerful lord." *Fr.*, *Arnaud*; *Ger.*, *Arnold*; *It.*, *Arnaldo*; *Lat.*, *Arnoldus* or *Arnaldus*.

Aroostook (ă-rōōs'-tōōk. River and county in Maine. An Indian word, meaning "good river," or "clear of obstruction."

Arthabasca (ăr-thă-bās'-kă) **Lake, Me.** Indian word, meaning "swampy."

Arthur. Armstrong derives this name from Gael. *ard*, "an eminent person"; literally, "high, lofty, exalted, noble, eminent, excellent, proud"; others derive it from *arth*, "a bear." *Fr.*, *Arthur*, or *Artus*; *It.*, *Arturo*; *Lat.*, *Arthurus*.

Asakasa (ă-să-kă'-să), **Pagoda.** A picturesque Buddhist tower in Tokio, Japan.

Ascension Island. Was so named because discovered by the Portuguese on Ascension Day, 1501.

Ashley River, S. C. From Sir Anthony Ashley Cooper, afterward Earl of Shaftesbury, named in the original charter. Indian name of the stream, *Kiauah*.

Asia (ă'shĭ-ă). From the Sanskrit *ushas*, signifying "land of the dawn."

Asia Minor. Lesser Asia.

Astoria (ăs-tō'-rĭ-ă). City in Clatsop County, Oregon, named for the founder, John Jacob Astor, who established a fur-trading station there in early days.

Atchafalaya (ăch-ă-fă-lĭ-ă) **River, La.** Choctaw Indian *Achafalaya*, "long river"; i. e., *hucha*, "river," *falaya*, "long."

Athens (ăth'-ēnz). A name of doubtful etymology, cannot be separated from that of *Athene*, the tutelary goddess of the city. Athens is either the city of *Athene*, as the Athenians believed, or *Athene* may be the goddess of Athens, or both names may be independent formations from the same root.

Athol (ăth'-ōl). Town in Worcester County, Massachusetts, said to have been named for James Murray, second Duke of Athol.

Atlanta (ăt-lăn'-tă), **Ga.** Originally, *Marthasville*. Atlanta was suggested by the late Edgar Thomson of Philadelphia, owing to its geographical position, immediately on the dividing ridge, separating the Gulf and *Atlantic* waters.

Atlantic Ocean. Was known to the Greeks by

the name of *Atlantikos pelagos*, from the Isle of Atlantes, which both Plato and Homer imagined to be situated beyond the Straits of Gibraltar.

Aubrey (ó'-brī). A name derived from the Old German name *Amalric*, signifying "powerful without a blot," or "rich in chastity." *Amalaric* has been corrupted to *Alberic*, whence *Aubrey*.

Audrey, or **Audrie** (ó'-drī). A female name corrupted from *Etheldreda*.

August. Named by Augustus Cæsar after himself, because in this month he celebrated three distinct triumphs, reduced Egypt to subjection, and put an end to the civil wars. Before this the month was known in Rome as *sextilis*. In Gallia, however, and in other remote parts of the empire, the ancient name for this month was *Eaust*, or *Aust*, i. e., "harvest."

Augusta (ó-gūs'-tá). The female form of *Augustus*, meaning "venerable." *Danish*, *Auguste*; *Dutch*, *Auguste*; *Fr.*, *Auguste*; *Ger.*, *Auguste* or *Augusta*; *It.*, *Augusta*; *Lat.*, *Augusta*.

Augusta, Maine. Given in 1737, after the name of the English Princess Augusta Charlotte, eldest granddaughter of George II. The Indian name of the locality was *Cushnoc*.

Augustin. See *Augustine*.

Augustine (ó-gūs'-tīn, ó'-gūs-tīn). From the Latin *augustus*, "venerable." *Dutch*, *Augustinus*, or *Augustijn*; *Fr.*, *Augustin*; *It.*, *Augustino*; *Lat.*, *Augustinus*; *Port.*, *Agostinho*; *Sp.*, *Augustin*.

Aurelia (ó-rē'-lī-á). A female name derived from that of *Aurelia*, mother of Cæsar, formed from *Aurelius*, name of a Roman emperor.

Aurora (ó-rō'-rá). A female name from Latin *aurora*, "the dawn."

Austerlitz (ows'-tēr-līts). The east town of the River *Littawa*; *ost*, "the east."

Austin. Corrupted down from *Augustin*.

Austin. County and city in Travis County, Texas, and town in Lonoke County, Arkansas, named for Stephen Fuller Austin, the first man to establish a permanent American colony in Texas (1844).

Australasia (ós-trāl-ā'-shī-á). Meaning, "Southern Asia," derived from the Latin *australis*, "southern."

Australia (ós-trā'-lī-á). Meaning, "the South." The first indication of Australia on any map is in a small map of the world which forms the vignette to a Dutch work, *Journael vande Nassauche Vloot*, under Admiral v'Hermitte, in 1623-4-5-6. The place indicated is to the west of Cape Carpentaria of the present map, and is marked "Land eendracht."

Austria (ós'-trī-á). From the German, *Österreich*, "the Eastern Empire," in contradistinction to the Western Empire founded by Charlemagne.

Aventine (áv'-ēn-tīn) **Hill**. One of the seven hills of ancient Rome, rising on the left bank of the Tiber, south of the Palatine. Below it to the northeast lay the Circus Maximus, and to the east the Baths of Caracalla.

Aztec (áz'-tēk). Village in San Juan County, New Mexico, named for one of the native tribes of Mexico. The word is said to mean "place of the heron." Other interpretations give "white" or "shallow land where vapors arise." Humboldt gives "land of flamingoes." The word *azcatl* means "ant," but Bushmann says that this word has no connection with the name of the tribe.

Baalbec (bāl'-bēk, bāl-bēk'), **Baalbek**, **Baalbak**. An ancient city of Syria, situated on the slope of Anti-Libanus, thirty-four miles northwest of Damascus. It is the Greek Heliopolis "city of the sun," famous for its ruins.

Baffin (báf'-fīn) **Land**. Named for the famous Arctic navigator who discovered it.

Baldwin. From the Teutonic, probably meaning a "bold winner," or "powerful warrior"; by other authorities, "prince friend"; *Danish*, *Balduin*;

Dutch, *Boudewijn*; *Fr.*, *Baudouin*; *Ger.*, *Balduin*; *It.*, *Baldovino*; *Lat.*, *Balduinus*.

Balearic (bāl-ē-ār'-ik) **Islands**. From the Greek *ballein*, "to throw"; so called because their inhabitants were skillful in the use of the sling.

Balkan (ból'-kăn, bāl-kăn'). From Turk., *balkh*, "high ridge," "high town"; also called Mount *Hæmus*, meaning "the snowy mount"; from Sanskrit *hima*, "snow."

Ballston Spa (ból'-stūn spä). Village in Saratoga County, New York. Named for Rev. Eliphalet Ball, an early settler, the "spa" being added in reference to the medicinal springs resembling the celebrated watering place in Belgium.

Balthasar (bāl'-tä-zär). The Greek form of *Belshazzar*, "king protector"; *Fr.*, *Balthazar* or *Balthasar*; *It.*, *Baldassare*; *Lat.*, *Balthasar*; *Sp.*, *Baltasar*.

Baltic Sea. Denotes, in accordance with the Swedish *balt*, a "strait, a sea full of belts, or straits."

Baltimore (ból'-tī-mör). County and city in Maryland, and town in Windsor County, Vermont, named for the proprietor of a large tract of land in Maryland, Cecil Calvert, Lord Baltimore, who settled the province in 1635.

Banbury (băn'-bēr-ī). A town in Oxfordshire, England, situated on the Cherwell twenty-two miles north of Oxford. *O. E.*, *Berenburig*, "Bera's fort."

Bangor (băn'-gór), **Maine**. By Rev. Seth Noble, from a well-known psalm tune of that name. Previously the section was known as *Sunbury*; the Indian name, *Con*, or *Kenduskeag*.

Banks Land. So called in compliment to Sir Joseph Banks, the eminent naturalist and president of the Royal Society of Great Britain.

Baptist. From the Greek, meaning a "baptizer"; *Fr.*, *Baptiste*; *Ger.*, *Baptist*; *It.*, *Battista*; *Lat.*, *Baptista*; *Port.*, *Baptista*; *Sp.*, *Bautista*.

Barbadoes (bär-bā'-dōz). From the Latin *barba*, "a beard," in allusion to the beardlike streamers of moss always hanging from the branches of the trees.

Barbara (bär'-bā-rá). From the Greek, meaning "foreign, stranger"; *Dutch*, *Barbara*; *Fr.*, *Barbe*; *Ger.*, *Barbara*; *It.*, *Barbara*; *Lat.*, *Barbara*.

Barbary (bär'-bā-rī). The land of the Berbers.

Barberini (bär-bā-rē'-nē), **Palace**. A palace in Rome, near the Quirinal, begun by Urban VIII., whose name was Carlo Barberini, and finished in 1640. It is noted for its art treasures.

Barcelona (bär-sē-lō'-ná). Named from Hamilcar Barca, who founded it.

Bar Harbor. A village in Hancock County, Mount Desert Island, Maine, so named from a sandy bar, visible only at low tide.

Baring (bā'-rīng, bār'-īng), **Island**. Discovered by Captain Penny, received the name of Sir Francis Baring, First Lord of the British Admiralty.

Barnabas (bär'-na-bas), or **Barnaby** (bär'-na-bī). From the Hebrew *Bar Nebah*, which some translate "son of exhortation," or "son of consolation." It rather means "son of prophecy," from *bar-nebuah*. *Danish*, *Barnabas*; *Dutch*, *Barnabas*; *Fr.*, *Barnabe*; *Ger.*, *Barnabas*; *It.*, *Barnaba*; *Lat.*, *Barnabas*; *Sp.*, *Bernabe*.

Barrow Island. Discovered by Captain Penny, in 1850, received the name of John Barrow, son of Sir John Barrow, the eminent British statesman.

Barrow's Strait. So called by Captain Penny, in compliment to John Barrow, the son of Sir John Barrow, the traveler and statesman.

Bartholomew (bär-thöl'-ō-mū). From the Hebrew *Bartolomai*, which, according to some, means "son of Ptolemy," but it translates rather "son of Tolmai." *Danish*, *Bartholomæus*; *Dutch*, *Bartholomeus*; *Fr.*, *Barthelemy*; *Ger.*, *Bartholomaus*; *It.*, *Bartolommeo*; *Lat.*, *Bartholomæus*; *Port.*, *Bartholomeu*; *Russ.*, *Varfolomei*; *Sp.*, *Bartolome*; *Sw.*, *Bartholomaus*.

Basil (bā'-sīl). From the Greek, *Basileios*, meaning "kingly." *Danish*, *Basilius*; *Dutch*, *Basilius*;

Fr., Basile; *Ger.*, Basilius; *It.*, Basilio; *Lat.*, Basilius; *Russ.*, Vasilii; *Sw.*, Basilius.

Basque (*bask*) **Provinces**. The provinces of Vizcaya, Guipuzcoa, and Alava, in Spain, united to Castile in the Thirteenth and Fourteenth Centuries. From *bassoco*, "a mountaineer"; or, according to Humboldt, from *basoa*, "a forest."

Bastille (*bás-tél'*), **The**. A celebrated state prison in Paris. Probably from the Latin, *bastile*, "a tower, fortress."

Bath (*báth*), **Maine**. From *Bath* in England, adopted February 17, 1781.

Baths of Caracalla (*kár-á-kál'-á*). Baths in ancient Rome, begun by Severus, 206 A. D. Named for the Emperor "Caracalla," a nickname for Marcus Aurelius Antoninus.

Baton Rouge (*bát'-ún-rōōzh*). City in East Baton Rouge Parish, Louisiana. It is a French name, meaning "red staff" or "stick," given because of a tall cypress tree which stood upon the spot where it was first settled. Some authorities say that the name is derived from the name of an Indian chief, whose name translated into French was "Baton Rouge." Still another theory ascribes the name to the fact that a massacre by the Indians took place upon the spot upon the arrival of the first settlers.

Bavaria. The country of the Boarii, a tribe related to the Boii.

Bayeux (*bä-yō'*). Named from the *Bajoccas*, a Keltic tribe name, meaning "great conquerors."

Bayeux Tapestry. A strip of linen 231 feet long and twenty inches wide, preserved in the Library at Bayeux, France, embroidered with episodes of the Norman conquest of England from the visit of Harold to the Norman court until his death at Senlac, each with its title in Latin. The work is of great archaeological interest from its details of costume and arms. It is believed to have been made by Matilda, queen of William the Conqueror.

Bayreuth (*bī'-rūth*. German, *bī'-roit*), **Baireuth**. A former German burgraviate and principality, now in the northern part of Bavaria.

Bayreuth Festival. A musical festival held at Bayreuth, for the representation of the German composer's Wagner, works. The National Theater, in which it is held, was opened by Wagner in 1876.

Beacon Hill. An eminence in Boston, Mass., which has become famous in history. The old beacon, shown in all the early plans of the town, and which gave the name to Beacon Hill, was erected in 1634-1635, to alarm the country in case of invasion. It stood near the present State House, the exact spot being the southeast corner of the reservoir formerly standing on Temple Street. It was a tall mast, standing on cross timbers placed upon a stone foundation, supported by braces, and was ascended by treenails driven into it; and, sixty-five feet from the base, projected a crane of iron, from which an iron skeleton frame was suspended, to receive a barrel of tar or other combustibles. When fired, this could be seen for a great distance inland. It was newly erected in 1768, having fallen from some cause unknown; and in 1789 it was blown down. The next year a monument of brick, sixty feet high and four in diameter, was erected on its site to the memory of those who fell at Bunker Hill; and in 1811 this was taken down, the mound being leveled.

Beacon Street. A street in Boston, Mass., which extends from Tremont Street along the north side of the Common and Public Gardens westward. It is noted as a street of residence and its name is a synonym for the wealth and culture of the city.

Beatrice (*bē'-á-trīs*. French, *bā-ā-trēs'*), **Beatrix** (*bē'-á-trīks*). Female names formed from Latin *beatus*, "blessed, happy." *Danish*, Beatrix; *Dutch*, Beatrix; *Fr.*, Beatrice; *Ger.*, Beatrix, or Beatrice; *It.*, Beatrice; *Lat.*, Beatrix; *Sp.*, Beatriz; *Sw.*, Beatrix.

Beaufort (*bū'-fūrt*), **S. C.** In honor of Henri, Duke of Beaufort.

Behring (*bā'-rīng*; or *bē'-rīng*) **Strait, Alaska**. Named by Captain Cook, in memory of Ivan Ivanvitch or Vite' Behring (who wrote it Bering or Bereng; *Behring*, a German corruption), a Russian navigator, its discoverer, in 1728. On some "olde mappes" (1566) the waters are noted as "Stret de Aniān."

Belgium (*bēl'-jī-ūm*). Literally, the land of the Belgae.

Belinda. A female name. It may be from Italian *Bella Linda*, or corrupted from *bellino*, a diminutive of *bello*, "beautiful."

Bella. An abbreviation of both Isabella and Arabella.

Belleisle (*bēl-īl'*). French for "beautiful island."

Bellevue (*bēl-vū'*). A noted castle near Cassel in Germany. It contains a fine picture gallery. Among its masterpieces are specimens of Holbein, Rembrandt, Vandyck, Rubens, Teniers, Wouwerman, Titian, Guido Reni, etc.

Beloochistan (*bēl-ōō-chīs-tān'*), or **Baluchistan**. From the Persian, meaning "the country of the Belooches, or Baluches."

Belvedere (*bēl-vē-dēr'*). A portion of the Vatican Palace at Rome. The word is from the Italian, meaning "fair view."

Benedict (*bēn'-ē-dīkt*), or **Bennet** (*bēn'-nēt*). From the Latin *Benedictus*, "blessed"; *Danish*, Benedict; *Dutch*, Benedictus; *Fr.*, Benoit; *Ger.*, Benedict; *It.*, Benedetto; *Sp.*, Benito, or Benedicto; *Sw.*, Bengt.

Benjamin. From the Hebrew, *Binyamiyn*, which, according to the Samaritan Pentateuch, means "son of days"; i. e., "son of old age." Fuerstius translates it "lucky son." The name means, literally, "son of the right hand"; figuratively, "son of good fortune." *Danish*, Benjamin; *Fr.*, Benjamin; *Ger.*, Benjamin; *It.*, Beniamino; *Lat.*, Benjaminus.

Bennet. See Benedict.

Bennett. This occurs frequently as a female name in the registers of Kent, England. It is sometimes varied to Bennetta and Benett.

Bennington. Town in Hillsboro County, New Hampshire, and county, township, and town in Vermont, named for Governor Benning Wentworth, of New Hampshire, who gave grants for the original town, in 1748.

Berenice (*bēr-ē-nī'-sē*), or **Bernice** (*bēr-nī'-sē*). From the Latin, "bringing victory." *Gr.*, Berenike; *It.*, Berenice.

Beriah (*bē-rī'-á*). The Hebrew *B'riyah*, which Simonis translates "in calamitate," i. e., "born in calamity"; Jones, "a calamity in his house"; and Tragelles, "gift."

Berkshire (*bēr-k'-shīr*). This is derived from *barruc*, "a polled or pollard oak," and *scyre*, "a shire"; from the Shirmotes of that county being anciently held in the shade of a large polled oak-tree.

Berkshire. County in Massachusetts, named for Berkshire, England. Several towns in the county are named from the same.

Berlin (*bēr'-līn*. German, *bēr-lēn'*). The capital of Prussia, is a name the meaning of which has been much discussed. The name is probably Wendish, either from *berle*, "uncultivated ground," or, as Krebs thinks, from *barlin*, a "shelter," or "place of refuge"; or, according to Kloden, an "enclosure or field"; while Vilovski suggests *brljina*, "a pool," which conforms to the local conditions.

Bermudas (*bēr-mū'-dās*). Named for the discoverer, Juan Bermudez, in 1522.

Bern (*bērn*. German, *bērn*). A Swiss canton which takes its name from its chief town, which grew up round a castle built in 1192, by Duke Berchtold V. of Zahringen. The name Berne appears in 1224 on a seal of the town. Not im-

probably, Berchtold gave the place the name of Berne in memory of Dietrich of Berne (Verona), a favorite hero of Alamannic poetry. According to the local legend, the town was named from a bear, the first animal killed in a hunting expedition in an oak forest on the site of the town. Hence a bear rampant on a gold field has been taken as the heraldic shield of the city, and a tame bear is always kept in a cave, like the wolf at Rome.

Bernard (*bēr'-nard*). From the Old German Bernhard, from *bern-hart*, "strong or hardy"; *Danish*, Bernhard; *Dutch*, Bernhardus, or Barend; *Fr.*, Bernard; *Ger.*, Bernhard; *It.*, Bernardo; *Lat.*, Bernardus; *Sw.*, Bernhard.

Bernese Oberland (*bēr-nēs'*, or *bēr-nēz' ō'-bēr-lānt*). A mountainous region in the southern part of the canton of Bern, Switzerland, famous for its picturesque scenery.

Bertha (*bēr'-thá*). From the Old German name, *Berta*, "bright or famous"; *Dutch*, Bertha; *Fr.* Berthe; *Ger.*, Bertha; *It.*, Berta; *Lat.*, Bertha; *Sw.*, Bertha.

Bertram (*bēr'-tram*). The Old German name, from *brecht-ram*, "renowned for strength." *Fr.*, Bertrand; *Ger.*, Bertram.

Berwick (*bēr'-īk*). This is a contraction of *Aberwick*, the meaning of which is a town (wick), at the mouth (aber) of a river.

Bessie. Corrupted from Elizabeth.

Bibliothèque Nationale (*bē-blē-ō-tāk' nās-yŌN-nāl*). That is, "National Library," the great French library, the largest in the world.

Big Sandy River, Ky. From its extensive sand bars, the Indian names *Tatteroi*, *Chatteroi*, and *Chatterwha* being from a similar application. Known to the Miamis as *Wepepoconecepewe*, by the Delawares as *Sikeacepe*, "Salt River."

Binnenhof (*bīn'-nēn-hōf*). Originally, the palace of Count William of Holland, at The Hague. It is an irregular agglomeration of buildings, in part medieval, inclosing a court in which stands the Hall of the Knights, a brick, chapel-like, gabled structure with turrets, now used as a depository for archives.

Birmingham (*bēr'-mīng-ūm*). Probably a patronymic from the Bøerings; *ham*, a home or family residence, literally "a place of shelter," from *heiman*, "to cover." Hence, originally, "Bøering's home."

Biscay. Takes its name from the Spanish province of Biscaya or Viscaya, meaning the land of the Basques or Vasks.

Bismarck (*bīz'-mārk*). City in St. François County, Missouri, city in Burleigh County, North Dakota (capital of State), and many other places, named for Prince Otto von Bismarck of Germany.

Black Sea. Probably because it abounds with black rocks. Another explanation is that it is so called from its frequent storms and fogs. The Greeks called it *Euxine*, from *euxinos*, "hospitable," disliking its original name, *Axinos*, "inhospitable."

Blackstone River, R. I. In memory of William Blackstone, an Episcopal minister, the first white settler of Rhode Island. Indian name of stream *Kehetuck*, "great river," changed afterwards to *Pawtucket*, meaning "the forks," from *Pochatuck*, "a branch."

Blaise (*blāz*). In France the name of the saint is found written Blaise, and in Germany Blaes. In Latin it occurs as Blasius and Blavius. It seems to be the same as the Roman name *Blaesus*, which Statius renders "lisper." *Danish*, Blasius; *Dutch*, Blasius; *Fr.*, Blaise; *Ger.*, Blasius; *It.*, Biagio; *Lat.*, Blasius; *Sp.*, Blas; *Sw.*, Blasius.

Blenheim (*blēn'-īm*) **Palace**. A mansion at Woodstock, Oxfordshire, England, built by Vanbrugh at national cost, 1705-16, for the first Duke of Marlborough.

Blue Grotto. A celebrated cavern on the shore of Capri in Italy.

Bodleian (*bōd-lē'-ān*), **Library**. A library of Oxford University, England, which was originally established in 1445, formally opened in 1488, and reestablished by Sir Thomas Bodley in 1597-1602.

Boer (*bōōr*). Applied to Dutch inhabitants of the country districts of the Cape of Good Hope, is the German name for farmers and agriculturists. The English word "boor" originally had the same significance.

Bohemia (*bō-hē'-mī-ā*). The country of the Boii. The inhabitants were called by Tacitus *Bohemi*, or Boemanni.

Bois de Boulogne (*bwä dü bōō-lōn'-yŭ*). A park in Paris reached by the Champs Elysées, the avenue of the Grande Armée, or the avenue of the Bois de Boulogne. It literally means "Boulogne wood."

Bois de Vincennes (*bwä dü vān-sēn'*). A public park in Paris larger than the Bois de Boulogne. It contains a farm for agricultural experiments, a drill-ground, a race-course, etc. Literally, "wood of Vincennes."

Boise (*boi'-zā*), **City, Idaho**. From the river on which it was located, the latter named by the French *Rivière Boisé*, "woody river," its banks being thickly lined with woods.

Bokhara (*bō-kā'-rā*). The treasury of sciences, or "town of learning"; the chief town in a State of the same name.

Bolivia (*bō-liv'-ī-ā*. Spanish, *bō-lē'-vē-ā*). To perpetuate the memory of General Simon Bolivar, "the liberator of Peru."

Bologna (*bō-lōn'-yā*), and **Bologne**. Named from the Boii, originally *Bononia*.

Bombay (*bōm-bā'*). Named after an Indian goddess *Bambā*, but translated by the Portuguese into *Buon-bahia*, "good bay."

Boniface (*bōn'-ē-fās*). From the Latin *Bonifacius*, name of several popes; this, in turn, from *benefacio*, "to do good," hence, a "well-doer." *Danish*, Bonifacius; *Dutch*, Bonifacius; *Fr.*, Boniface; *Ger.*, Bonifaz, or Bonifacius; *It.*, Bonifacio; *Lat.*, Bonifacius; *Sw.*, Bonifacius.

Bordeaux (*bōr-dō'*). Literally means "the dwelling on the water"; *borda*, "a dwelling."

Borghese (*bōr-gā'-zā*) **Palace**. A famous Roman palace, seat of the Borghese family, and noted for its art collections. It was built toward the end of the Sixteenth Century by Martino Lunghi and Flaminio Ponzio.

Borgne (*bōrn'y*) **Lake, La.** French word, meaning "blind of one eye," or "one-eyed," application never been explained; the legendary derivation is that some peculiar modern cyclops was encountered on its shores. The word also bears the translation of "dingy," which no doubt is the cause of the use of the word, given from a local first impression.

Borneo (*bōr'-nē-ō*). Comes from the Malay *Brunei*, once the name of the largest city on the island, and changed by the Portuguese to Borneo.

Bosnia (*bōz'-nī-ā*). The country traversed by the river Borna.

Bosporus (*bōs'-pō-rŭs*). A Greek term composed of *bous*, "an ox," and *poros*, "a ford," alluding to the legend that when Io was transformed into a cow she forded this strait. Hence the popular meaning, "The passage of the ox."

Boston (*bōs'-tōn*, *bōs'-tŭn*). City in Massachusetts. By some authorities the name is said to have been given in honor of John Cotton, vicar of St. Bodolph's church in Boston, Lincolnshire, England, and one of the first clergymen in the American Boston. Others say it was named before the arrival of John Cotton, for three prominent colonists from Boston, England. The tracing for the word Boston elicits that in the Seventh Century a pious monk known as St. Botolph or bot-hopl (boat-help) founded a church in what is now Lincolnshire, in England. A town grew up around it, which was called Botolph's Town. This was con-

tracted into Botolphston, Bot-os-ton, finally Boston. Boston, Mass., owing to its hills, was called by the English *Trimountaine* or *Tremont*, "three hills" (Beacon, Kopp, and Fort Hills); at a court held in Charlestown, September 17 (N. S.), 1630, "It is ordered that Trimountain shall be called Boston." Indian name of locality *Shawmut*, an abbreviation of *Mushancoonmuk*, variously translated as "living fountains," "free lands or unclaimed lands."

Botany Bay. So called by Captain Cook from the great variety of plants which he found growing on its shores when exploring it in the year 1770.

Bramapootra (*brä-mä-pōō'-trā*). River of India, of Sanskrit origin, meaning "the offspring of Brahma," or "Brahma's son."

Brandenburg (*brän'-dēn-bōōrg*). A former margravate and electorate of the German Empire, the nucleus of the kingdom of Prussia. The name means "forest fortress."

Brandywine River, Penn. Called by the first settlers, the Swedes, *Fish-kiln*, "fish creek." Its present name is ascribed by tradition to the loss of a Dutch vessel laden with brandy, or *brand-wijn*. Other authorities derive it from Andrew Braindwine, who owned lands near its mouth, in early days. A third theory is that the slough near Downingtown discharged its muddy waters into the creek, tinging it the color of brandy. A celebrated battle was fought there, which accounts for the name being given to eight places in the country.

Brasenose (*brāz'-nōz*), **College.** The term *brasen-nose* or *brasenose* is a corruption of the word *brasen-house*, or "brewing house."

Brazil (*brā-zil*). Named from the color of its dye-woods, *braza*, "a live coal."

Brazos (*brä'-zōs*) **River, Tex.** As named by the Spaniards *Brazos de Dios*, "arm of God." The Spaniards established a mission on its banks some thirty miles from the mouth of the San Saba, and the guard having been called away, the Indians descended on the mission, completely destroying it. When the soldiery returned their loss was quickly discovered, and searching for a solution they found in the river many of the dead bodies of the depredators, still floating in its eddies; as they could discern no marks of violence they pronounced it a retributive miracle done by the "arm of God." The river then received its name of *Brazos de Dios*.

Brenner (*brēn'-nēr*) **Pass.** The lowest pass over the main chain of the Alps. It is situated in the Tyrol about twenty-five miles south of Innsbruck; has been used since Roman times; is traversed by a railway (since 1867), and is the main line of travel between Italy and Germany. Height, 4,485 feet.

Breton (*brēt'-ūn*) **Cape.** Discovered by mariners from Brittany.

Brian (*brī'-an*) or **Briant.** Names derived from the Irish name Brian, which has been rendered "warrior of great strength" (*bri-an*). According to some it has been Anglicised to Bernard.

Bridget (*brīj'-ēt*). Mr. Arthur derives this female name from Gaelic *brighid*, "fiery dart" or "shining bright," and he says the Gaelic word signifies also a hostage; Armstrong renders *brighide* "a hostage." Danish, Birgitte; Dutch, Brigetta; Fr., Brigitte; Ger., Brigitta; It., Brigida, or Brigita; Lat., Brigida; Sp., Brigida.

Brighton (*brī'-tūn*). Formerly Brighthelmston, from a personal name. A city and watering-place in Sussex, England, situated on the English Channel. It is the leading seaside resort in Great Britain.

Bristol, R. I. From the town of same name in England. Derived from Anglo-Saxon words *bris*, "bright," *stol*, "place."

Britain (*brīt'-ān* or *brīt'-n*). From *brith*, meaning "to paint." The British poets called it *Inis gwyn*, "white island," which answers to the Roman name *Albion*. It is said that it was known to the Phenicians as *Barat-Anac*, or "the land of tin," as far back

as the year 1037 B. C. Some five hundred years afterwards the island was alluded to by the Romans under the name of Britannia, which subsequently became shortened into Britain.

British Columbia. The only portion of North America that retains the name of the discoverer of the New World, with the exception of the District of Columbia.

British Museum. A celebrated museum at Great Russell Street, Bloomsbury, London, founded in 1753.

Brittany (*brīt'-tā-nī*). In French, *Bretagne*, comprised the land appropriated by the kings of Britain, and was originally called *Armorica*, a Celtic name meaning the land "by the sea."

Broad River, S. C. The Indian name given by the Catawbias was Eswan Huppeday, or "Line River," because it was the established line between the Cherokees and Catawba tribes.

Broadway. The principal business street of New York, extending from Bowling Green northward to Central Park for about six miles.

Brocken (*brōk'-ēn*), or **Blocksberg** (*blōks'-bērg*). The chief summit of the Harz Mountains, and the highest mountain in northern Germany, situated in the province of Saxony, Prussia. It is the Roman *Mons Bructerus*.

Bronxville. Village in Westchester County, New York. Named for Jonas or Jacob Bronck, an early settler.

Brooklyn. City in New York, corruption of the Dutch name Breuckelen, from a village in the province of Utrecht, Holland. The name signifies "broken up land, or marshy land."

Bruges (*brū'-jēz*. French, *brūzh*). In Belgium, "a city with many bridges"; *brücke*, "a bridge."

Brussels (*brūs'-sēlz*), or **Bruxelles.** Meaning, "the seat or site on the marsh"; *broek*, "a marsh," and *seli*, "a house."

Bryan. Same as Brian.

Bucharest (*bū-kā-rēst*). From an Albanian word, *bucurie*, "pleasure, joy," hence, "the city of enjoyment."

Buckingham (*būk'-īng-ūm*). A tribe name, or "the dwelling among beeches"; *buche*, "the beech tree"; *ham*, "a home or family dwelling."

Buckingham Palace. The London residence of the sovereign, situated at the western end of St. James's Park.

Buda (*bōō'-dā*). In Hungary, took its name from Buda, the brother of Attila, as well as Bud-var and Bud-falva, meaning "buda's fort and village," *buda*, "a hut or dwelling."

Buenos Ayres (*bō-nūs ā'-rīz* or *ārz*). Meaning "good breezes," *buen*, "good."

Buffalo. A city in New York, named from the stream "Buffalo Creek, on which it is located, the stream receiving its name from the frequent visits of the American bison to a salt spring which welled up about three miles from its mouth, 'where the buffalo drinks.'" Indian name of the locality *Teosahwa* or *Teshuway*, "the place of the basswood," also *sisilichanne*, "waters sought by the buffaloes." The name has been given to counties in Nebraska, South Dakota, and Wisconsin, numerous creeks, rivers, towns, and villages.

Bulgaria (*bōōl-gā'-rī-ā*). A corruption of *Vol-garia*, meaning the "country peopled by the Volsci." The Greeks called these people *Bulgars*, hence the name.

Burlington House, Old. A house standing between Bond Street and Sackville Street, London, named for Lord Burlington, by whom it was built.

Butte (*būt*). City in Montana, named from a bare butte overlooking the place. The word is French, meaning "small knoll or hill."

Buzzard's Bay, Mass. Waters discovered by Gosnold, May 21, 1602, and by him named "Bay of Hope." Indian name *Manomet*.

Cadillac (*kăd'-ŭ-ăk*. French, *kă-dêl-yăk'*). City in Wexford County, Michigan, named for La Motte (or La Mothe) Cadillac, who established a fort on the Detroit River in 1701.

Cadiz (*kă'-diz*. Spanish, *kă'-thêth*). From *Gadr*, meaning "an enclosure, a city, or fortified place," and *kir*, "a wall."

Cæsar (*sê'-zâr*). Some translate this name "hairy"; Schlegel says from Sanskrit *kesâ*, "adorned with hair." It is more probable, however, of Persian origin, and comes from the Persian *sar*, "head, highest, greatest, chief." *Danish*, Cæsar; *Fr.*, César; *Ger.*, Casar or Cæsar; *It.*, Cesare; *Lat.*, Cæsar; *Sp.*, Cesar.

Cairo (*kî'-rô*), a corruption of the Arabic *Al-kâhirah*, "the victorious," so called because Kâhir (Mars), the planet of victory, was visible on the night when the city was founded.

Cairo (*kă'-rô*), *Ill.* A local fancied adoption from the Egyptian city Cairo, in its being a sister location, namely, at the mouth of a large river.

Calcutta (*kâl-kût'-tâ*). Called *Kalkatta* in early annals. Is supposed to be a corruption of the Indian name *Kali-Kata*, the "dwelling or sacred place of Kali," the wife of Siva. The *Kalikuti* were "the ghauts or passes leading to the temple of the goddess Kali"; *ghât*, "an opening or passage."

Caleb. From the Hebrew *Kalebh*, "a dog."

California. Most authorities derive it from the two Spanish words, *caliente fornalia*, i. e., "hot furnace," given by Cortez in the year 1535 to the peninsula now known as Old or Lower California, of which he was the discoverer, on account of its hot climate. H. H. Bancroft, in his *History of California*, says the name was first given to the Gulf, then to Lower California.

California, Gulf of. Various called *Mar de Cortez* and *Mar Bermejo* by the Spaniards, the former in honor of Hernando Cortez, the latter, meaning "bright reddish color," literally, "Red Sea," through its resemblance in color to the Red Sea. The French applied their translation of *Bermejo*, namely *Vermeille*, from which the English adaptation, Vermillion Sea. (See also California.)

Calton (*kôl'-ton*) **Hill**. A height in the north-eastern part of Edinburgh.

Calumet (*kâl'-ŭ-mêt*). River in Illinois and Indiana, county and village in Wisconsin, and seven other places in the country. A Canadian corruption of the French *Chalemel*, which literally means "little reed," but which, in its corrupted form, refers to the "pipe of peace" used by the Indians to ratify treaties. Haines derives the word from *calamo*, "honey wood."

Cambria (*kăm'-brî-ă*). The original name for Wales, so called on account of the Cmyri, or Kimri, who peopled it.

Cambridge (*kām'-brîj*). City in Middlesex County, Massachusetts, so named for the English university town, after the general court decided to establish a college there. Twenty-two other places bear the name of the English town, two having the suffix "port" and one "springs." The English name is usually supposed to mean "the bridge over the river Cam," the real name of which is the Granta.

Camden, N. J. In honor of the distinguished English statesman, Earl of Camden (Camden).

Camilla (*kă-mîl'-lâ*). The feminine of Camillus. *Fr.*, Camille; *It.*, Camilla; *Lat.*, Camilla.

Camillus (*kă-mîl'-lūs*). Some translate this name "attendant at a sacrifice." The Roman name was probably corrupted from the Arabic, *Kasen-El*, signifying "oracle of God."

Campagna di Roma (*kâm-păn'-yâ dē rō'-mâ*). A large plain in Italy, surrounding Rome, lying between the Mediterranean and the Sabine and Alban mountains.

Campanile (*kâm-pă-nē'-lā*) of Giotto. A famous tower near the Duomo, at Florence, Italy, begun by

the architect, Giotto, in 1334, and after his death, in 1337, continued by Andrea Pisano.

Canaan (*kă'-năn*). The "Land of Canaan" is interpreted to mean "lowland," from Semitic *kana*, "to humble," "subdue," generally denoting in the Old Testament the country west of the Jordan and the Dead Sea extending to the Mediterranean. Originally, it comprised only the strip of land, from ten to fifteen miles in breadth and 150 in length, shut in between the Lebanon and the Mediterranean, and extending from the Bay of Antioch to the promontory of the Cermal, i. e., southern Phenicia. Later, the name was extended to the whole territory west of the Jordan.

Canada (*kăn'-ă-dâ*). Called *La Nouvelle France* by the French settlers, is probably the native word *Kanata*, which means "a collection of huts or wigwams."

Canandaigua (*kăn-ăn-dă'-gwâ*). [Lake town in Ontario County, New York, and village in Lenawee County, Michigan. An Indian word, the derivation of which is in dispute. Morgan defines it as "a place selected for settlement," a "chosen spot"; Haines, "a town set off." Others have thought the word to be derived from *Cahnandahgwah*, "sleeping beauty," while another theory is that it is corrupted from the Seneca Indian, *Genundewah-guah*, "great hill people," so called from a large hill near the lake.

Canaveral (*kă-năv'-êr-ăl*) **Cape, Fla.** Named by the Spaniards; a Spanish word meaning "the land of the rose tree."

Candia (*kăn'-dî-ă*). From the Arabic *Khandae*, "the island of trenches."

Canterbury (*kăn'-têr-bêr-î*). A corruption of the Anglo-Saxon *Cantwarabyrig*, "the forts or strongholds of the Cantwere, or men of Cant" (Kent).

Cape Colony. A British colony in South Africa is so called after the parent settlement at Cape Town, which dates from the year 1826.

Cape Fear River, N. C. Was originally named by the English *Charles River*. Afterward the name of Cape Fair River was adopted from the Atlantic cape of that name, the stream being located by navigators as "coming in back of Cape Fair." Subsequently corrupted to *Fear*.

Cape Horn. The most southern point of South America was called Cape Hoorn by Schonten, who first rounded it in 1616, after Hoorn, his native place in North Holland.

Cape May, Va. Was so named by the Dutch commander, Captain Cornelius Jacobse May.

Cape of Good Hope. Discovered by Bartholomew de Diaz in 1487, was so named (Cabo de Bon Esperance) by John II., King of Portugal, who, finding that Diaz had reached the extremity of Africa, regarded it as a favorable augury for future maritime enterprises.

Capitoline (*kăp'-it-ôl-în*) **Hill, The**. One of the seven hills of ancient Rome, northwest of the Palatine, on the left bank of the Tiber, on which the Capitol was erected. After the construction of the Servian wall it constituted the citadel of the city. On its southwestern summit was the famed Tarpeian Rock; on its northeastern summit rose the temple of Jupiter Capitolinus. The modern capitol stands between the two summits. From the Capitoline the Forum Romanum extends its long, narrow area toward the southeast, skirting the northern foot of the Palatine.

Capitoline Museum. A famous museum of antiquities in Rome. It was founded in 1471 by Sixtus IV., who presented the papal collections to the Roman people, and designated the Capitol as the place where the art-treasures of Rome should be preserved.

Capri (*kă'-prê*). Signifies "the island of goats," being derived from the Latin *caper*, a he-goat.

Caribbean (*kăr-îb-bê'-ăn*) **Sea**. Washes the territory of the Caribbs, whose name means "cruel men."

Carnatic. From Sanskrit, *Karnāta*, S. India tribe.

Carolina (*kār-ō-lī'-nā*). Name given to two States, North and South Carolina. Near the middle of the Sixteenth Century, Jean Ribault visited the region and named it Carolina in honor of his king, Charles IX. of France, but the name never came into general use and soon disappeared. About 1628, this name was applied definitely to that part of the country lying between Virginia and Florida, having been given in honor of Charles I. of England. In an old manuscript, now in London, the following may be found; "1629-30, Feb. 10. The Attorney-General is prayed to grant by Patent 2 Degrees in Carolina," etc. In 1663, the name was definitely applied to the province granted to proprietors by Charles II. of England. This province was named in honor of the reigning king, and thus the old name given in honor of Charles I. was retained.

Caroline (*kār'-ō-līn* or *līn*). From Carolus, from root of Charles. *Danish*, Caroline; *Dutch*, Carolina; *Fr.*, Caroline; *Ger.*, Caroline or Karoline; *It.*, Carolina; *Lat.*, Carolina; *Sw.*, Karolina.

Caroline Islands. Discovered by Lopez de Villalobos in 1543, and named after Charles V., Emperor of Germany and first king of Spain.

Carpathians (*kār-pā'-thī-ān*). The range of mountains north of Hungary, is a name derived from *Krapat* or *Karpa*, the local name of the main chain, which is explained by the Slavonic root *chrp*, signifying a "ridge" or "range of hills."

Carrara (*kā-rā'-rā*). A town in the province of Massa-e-Carrara, Italy. It is famous for the neighboring quarries of marble.

Carrie, Carry. Female names corrupted from Caroline.

Carson City, Nevada. In honor of Christopher Carson; or, as more widely known, "Kit" Carson, the noted frontiersman and hunter.

Carthage. From *Kartha-hadtha*, "the new city," in opposition to Utica, "the old."

Casa d'oro (*kā'-sā dō'-rō*). A noted palace of the Fourteenth Century. It has been marred by restoration. It has three stories, divided vertically into two divisions. The left-hand division has in the lowest story five open arches, the middle one round, and in the two upper ones most rich and graceful foliated arcades set between larger arches. The right-hand division consists of ornamented paneling, also set between decorated arches. Above there is a picturesque cresting in marble. To beauty of form this façade adds great and diversified charm of color in its incrusted and inlaid marbles.

Casco Bay, Me. From an Italian word, meaning "crane." Hence "Crane Bay."

Casper. See Jasper.

Caspian (*kās'-pī-an*). The European name of the great inland sea of Asia, was so called by the Greeks from the Caspii, a tribe who, in the time of Herodotus, dwelt on its western shore, probably in the district of Jasp, which is supposed to preserve their name.

Cassandra (*kās-sān'-drā*). Mr. Arthur translates this name "inflaming one with love." It is feminine of the Greek *Kassandros*. *Fr.*, Cassandre; *It.*, Cassandra; *Lat.*, Cassandra.

Catawba River, N. C. So named from the "Catawbaws," a tribe of Indians.

Catawissa (*kāt-ā-wīs'-sā*) **River, Pa.** From the Delaware Indian word *Gattawissa*, "getting fat."

Catharine (*kāth'-ā-rīn*). The real name of Catharine of Alexandria, the patron saint of girls and virgins, was Dorothea. St. Jerome says she had the name of Catharine from the Syriac *kethar* or *kather*, "a crown," because she wore the triple crown of martyrdom, virginity, and wisdom. The proper derivation of the word is from the Greek *Katharos*, "pure"; and, therefore, the correct spelling of the name is Catharine or Katharine. *Danish*, Catharine; *Dutch*, Catharina; *Fr.*, Catherine; *Ger.*, Katharine; *Gr.*, Katharine; *It.*, Cate-

rina; *Lat.*, Catharina; *Russ.*, Ekaterina, or Yekaterina; *Sp.*, Catalina; *Sw.*, Katarina.

Catskill Mountains, N. Y. Name originally applied to the river (Kill) by the Dutch, and transferred to the mountains, *Katskill*, "panther creek," from the numerous panthers or lynxes (cat-like animals) formerly infesting the hills. The mountains were called *Katsbergs* by the Dutch.

Cattaraugus (*kāt-tā-rō'-gūs*) **River, N. Y.** From an Iroquois Indian word, which may be translated, "bad spelling shore."

Cavaliers. The adherents of Charles I. and Charles II. during the civil war; also called Royalists.

Cayuga (*kā-yōō'-gā*). County, village, and lake in New York. Indian word, the derivation of which is in dispute. The generally accepted theory is that it means "long lake," having been originally applied to the lake, which is thirty-eight miles long and from one to three and one-half miles wide. Morgan derives it from *Gweugweh*, "the mucky land," while others say that it signifies "canoes pulled out of the water." One of the six nations of Indians was so called. Six small places in the country bear this name.

Cazenovia (*kāz-ē-nō'-vī-ā*). Lake and town in Madison County, New York, named by its founder, Col. John Linkhaen, for Theophilus Cazenove, general agent of the Holland Land Company.

Cecil (*sē'-sīl*, *sīs'-īl*, *sēs'-īl*). A male name derived from the Latin *Cecilus* or *Cæcilus*, a diminutive of *cæcus*, "blind," or "dim-sighted." Cecil is also found as a female name. *Dutch*, Cecilius; *Fr.*, Cecile; *Lat.*, Cæcilus.

Cecilia (*sē-sīl'-ī-ā*). A baptismal name derived from *Cæcilia*, feminine of *Cæcilus*. See Cecil. *Dutch*, Cecilia; *Fr.*, Cécile; *It.*, Cecilia; *Lat.*, Cæcilia.

Celestial Empire. Applied to the Chinese Empire, because its legendary rulers were all celestial deities.

Central Park. The principal park in New York, extending from 59th Street to 110th Street, and from Fifth Avenue to Eighth Avenue. It was designed by Olmsted and Vaux, and contains besides numerous drives, the Mall, the Croton Reservoirs, Cleopatra's Needle (the Obelisk), the Metropolitan Art Museum, etc. Length two and one-half miles; area, about 840 acres.

Certosa (*chēr-tō'-sā*). A former Carthusian monastery, at Pavia, Italy, one of the largest and most splendid existing.

Ceylon (*sē-lōn'*). Hindustani *Silan* is derived from Pali *Sihalana* (Sanskrit *Sinhala*), "the land of lions," from *sinha*, "a lion." Its Aryan inhabitants were called *Sinhalas*. The old Sanskrit name of Ceylon is *Lanka*. Marco Polo calls it *Seilan*, whence the Portuguese forms *Cilan* and *Ceilão*, from the last of which comes the English term Ceylon.

Champ de Mars (*shān-dū-mārs'*). In early French institutional history, an annual political and military assembly, held in March. The time of meeting was changed to May in the Eighth Century, and thereafter these assemblies were called "Champs de Mai."

Champlain (*shām-plān'*. French, *shān-plān'*), **Lake, N. Y.** By its discoverer Samuel de Champlain, in 1609. Indian name *Canaderi-Guarante*, "mouth or door of the country." Allusion to the north entrance of the lake. In the Abenaki tongue, called *Petawa-bouque*, "alternate land and water," alluding to its numerous islands. Iroquois name *Andiatora*.

Champs-Élysées (*shān-zā-lē-zā'*). An avenue, and the gardens surrounding it, in Paris, extending from the Place de la Concorde one and one-fourth miles to the Place de l'Etoile, celebrated as a place of public resort. It was acquired by the crown in 1616, and ceded to the city in 1828.

Charing Cross (*chār'-īng krōs*). A cross in

memory of Queen Eleanor, erected by Edward I., one and one-fourth miles west-southwest of St. Paul's, London. It was demolished by the Long Parliament, in 1647, and restored by the South Eastern Railway Company, in 1865.

Charles. From the Teutonic, meaning "manly" or "noble spirited." *Danish*, Carl; *Dutch*, Karel; *Fr.*, Charles; *Ger.*, Karl; *It.*, Carlo; *Lat.*, Carolus; *Sp.*, Carlos; *Sw.*, Karl.

Charles Cape, Va. So named in April, 1607, by Admiral Newport, in honor of "baby" Charles, son of James I., afterward King Charles I., of England.

Charleston, S. C. In honor of Charles II. of England, original settlement being called Charles Fort. The name of Charleston substituted in 1783.

Charleston, W. Va. Originally known as "Clendman's Settlement" and "The Town at the mouth of the Elk." December 19, 1794, the name of *Charlestown* was fixed by the Virginia Legislature, but from some cause unknown, through common consent it was changed to *Charleston*. The name Charlestown was given by George Clendman, its founder, in honor of his father Charles.

Charlotte (shär'-löt). From the Teutonic, meaning "noble-spirited." *Danish*, Charlotte; *Dutch*, Charlotta; *Fr.*, Charlotte; *Ger.*, Charlotte; *It.*, Carlotta; *Lat.*, Caroletta; *Sp.*, Carlota; *Charlotta*.

Charlotte, N. C. A compliment to Princess Charlotte of Mecklenburg.

Charlottenburg (shär-löt'-tën-böörq). A city in the province of Brandenburg, Prussia, named from a palace built for Charlotte, wife of Frederick I. It is situated on the Spree, three miles west of Berlin. It is a municipality, practically a part of Berlin, and contains a royal palace, the tombs of the Hohenzollerns, a magnificent technical school, and royal porcelain factory.

Charlottesville. City in Virginia, named for Charlotte Augusta, Princess of Wales.

Charterhouse. The name of the Charterhouse, a famous school in London, is a corruption of the word *Chartreuse*, that is, "Carthusian." The Charterhouse was originally a Carthusian monastery founded in 1371, but was seized by Henry VIII. The present charity was founded by Thomas Sutton, November 8, 1611, who died December 12th of the same year.

Chartists (chär'-tists). A body of political reformers, chiefly working men, that sprang up in England about the year 1838. They disappeared as a party after 1849.

Chateau de Meillant (shä-tō' dē mā-yōn'). Noted chiefly on account of its architecture, is now the seat of the Duc de Mortemart at St. Amand Montrond, France. It received its present great development in the florid pointed style at the end of the Fifteenth and the beginning of the Sixteenth Century.

Chatsworth (chäts'-wërth). A celebrated mansion of the Duke of Devonshire in Derbyshire, England. The interior is lavishly adorned with painting and sculpture, and contains a splendid collection of drawings by the old masters, some fine old and modern paintings, a Venus by Thorwaldsen, and Canova's Napoleon, Madame Letitia, and Endymion. The formal gardens are famous. They contain elaborate fountains and fine conservatories.

Chattahoochee (chät-tä-hōō'-chē) River. Translated "figured or painted stone," from the Indian *Chatehoche*, *chateo*, "stone," *hoche*, "marked or figured."

Chattanooga (chät-tä-nōō'-gä). City in Hamilton County, Tennessee, and creek in Georgia. From the Cherokee Indian word, meaning "crow's nest" or "eagle's nest."

Chaucer's Inn, the "Tabard." This old London tavern, immortalized by Chaucer as the "Tabard," was burnt down in the great fire of 1676. Upon its restoration the name was changed to the "Talbot," or Dog, which name it retained until about 1873, when it was demolished.

Chautauqua (shä-tō'-kwä). A village and summer resort situated on Chautauqua Lake, in western New York; noted as the seat, since 1874, of the Chautauqua Assembly. An Indian word which has been the subject of much controversy. Webster says it is a corruption of a word which means "foggy place." Another derivation gives the meaning as "bag tied in the middle," referring to the shape of the lake. It is also said to mean "place where a child was washed away." Dr. Peter Wilson, an educated Seneca, says it is literally "where the fish was taken out." Other meanings given are "place of easy death," "place where one was lost."

Cheapside (chēp'-sīd). The central, east-and-west thoroughfare of the city of London, originally a large open common. Formerly the road which skirted the West Cheap, or market place, was distinguished from the East Cheap. The West Cheap was a spacious open area from which there branched streets of booths and shops of the type made familiar by revivals of Old London. *Cheapside*, of course, ran by the side of the market-place.

Cheboygan (shē-boi'-gän). River, county, and city in Michigan. An Indian word, variously interpreted. Haines says it is composed of two words, *che*, "great," and *poygan*, "pipe." Another derivation gives the meaning, "the river that comes out of the ground." The Michigan Historical Society gives *Chabwegan*, "a place of ore."

Chemung (shē-mūng') River. Indian word, signifying "big horn," or "horn-in-the-water"; called by the Delawares *conongue*, a similar signification to the Iroquois.

Chenango (shē-nāng'-gō) River, N. Y. From an Iroquois word, *ochenung*, "bull thistles."

Chepstow (chēp'-stō). A town in Monmouthshire, England, situated on the Wye, thirteen miles northwest of Bristol. It contains the ruins of Chepstow Castle, a fortress of the Thirteenth and Fourteenth Centuries, with high walls and massive cylindrical towers.

Chesapeake (chēs'-ä-pēk). Bay in Maryland which gives name to several places in the country. An Indian name variously explained. Heckewelder says it is corrupted from *Tschischwapeki*, which is compounded of *kitshi*, "highly salted," and *peek*, "a body of standing water, a pond, a bay." Others give *che*, "great," and *sepi*, "waters." Bosman interprets it as "mother of waters." W. W. Tooker says that the early form was *Chesöpiooc*, from *k'che-sepi-ack*, "country on a great river." The waters were called by the English, Bay of St. Mary.

Chester, Caster, Cester. Places whose names terminate with any of these words were sites of castles built by the Romans in Great Britain.

Chesuncook Lake, Me. Indian, meaning "the goose place." *Chesunk*, "a goose," *auke*, "a place." *Chesunk* or *Schunk* being the sound made by a wild goose when flying.

Cheyenne (shē-en'). Counties in Colorado, Kansas, and Nebraska, mountain in Colorado, rivers in Nebraska and South Dakota, city in Laramie County, Wyoming, and several small places named for the Indian tribe. The word is probably a corruption of the French *chien*, "dog," applied by some neighboring tribes to those at present known as Cheyennes. It was the custom for Indians to call themselves by the name which signified "men" and to call neighboring tribes by some opprobrious epithet. The word was doubtless introduced by the early French traders.

Chianti (kē-än'-tē). A group of mountains near Siena, Italy, in Tuscany. It gives name to celebrated wines.

Chicago (shī-kō'-gō). City and river in Illinois. The origin of the word is from the Indian, being a derivation by elision and French annotation from the word *Chickaugong*. Col. Samuel A. Starrow used the name in a letter to Gen. Jacob Brown, in

1816, as follows: "The river Chicago (or in English, 'Wild Onion River')." Schoolcraft in 1820 said: "Its banks produce abundantly the wild species of cepa or leek." Bishop Baraga gives: "From Chicag, or Sikag, 'skunk,' a kind of wild cat." John Turner defines skunk as *she-gahg*; onion, *she-gau-za-winzhe*, "skunk weed." When the word first appeared the country was inhabited by a tribe of Miamis, in whose dialect the word for skunk was "*se-kaw-kwaw*." Father Ferhorst gives the origin as *che-cag-wau*, a "place where skunks abound."

Chickahominy (*chĭk-à-hŏm'-ĭ-nĭ*). River in Virginia, which, according to De Vere, is named from the Indian word, *Checahaminend*, "land of much grain," so called because it flows through fertile lowlands. Heckewelder, however, says that it is corrupted from *Tschikene-mahoni*, "a lick frequented by turkeys."

Chickamauga (*chĭk-à-mŏ'-gà*) **River, Tenn.** From a Cherokee Indian word, meaning "river of death."

Chicopee (*chĭk'-ŏ-pē*), **Mass.** An Indian word, meaning "the birch-bark place," or "the cedar trees."

Chili (*chĭl'-ĭ*) or **Chile** (*chĭl'-ĕ*). A Peruvian name denoting "land of snow."

Chillicothe (*chĭl'-ĭ-kŏth'-ĕ*). Cities in Ohio and Illinois, and towns in Wapello County, Iowa, and Livingston County, Missouri, named from an Indian tribe. The word is said to mean "town" or "city."

Chillon (*shĭl'-ŏn*, French, *shē-yŏn'*). A castle in Vaud, Switzerland, at the eastern end of Lake Geneva. It covers an isolated rock on the edge of the lake, and is a very picturesque combination of semicircular and square towers and machicolated curtains grouped about a higher central tower. It is famous in literature and song, especially as the prison of Bonivard, a defender of Swiss liberties against the Duke of Savoy in the Sixteenth Century.

Chiltern (*chĭl'-tĕrn*) **Hundreds.** The Chiltern Hills are a range of chalk eminences, in England, separating the counties of Bedford and Hertford, and passing through the middle of Bucks, to Henley in Oxfordshire. They comprise the Hundreds of Burnham, Desborough, and Stoke. They were once infested by robbers. To protect the inhabitants from these marauders, an officer of the Crown was appointed, under the name of the "Steward of the Chiltern Hundreds." The duties have long ceased, but the office — a sinecure with a nominal pay — is still retained.

China. Is a Western corruption of Tsina, so called in honor of Tsin, the founder of the great dynasty which commenced in the Third Century B. C., when a knowledge of this country was first conveyed to the Western nations. It was this Tsin who built the great wall of China (or Tsin) to keep out the Barbarians.

Chippewa (*chĭp'-pē-wā*, *chĭp'-pē-wā*). River in Michigan and counties in Michigan, Minnesota, and Wisconsin, named from an Indian tribe. The word *ojibwa*, according to some authorities, means "puckered moccasins." Other explanations are "he overcomes," or "he surmounts obstacles."

Chloe (*klŏ'-ē*). A female name derived from the Greek, signifying a "green bud or germ," hence a "young shoot," "blooming," etc. The name, says Lemprière, is supposed to bear the same signification as Flava, so often applied to the goddess of corn, and from its signification has generally been applied to women possessed of beauty and simplicity. *Fr.*, Chloé; *Gr.*, Chloe; *Lat.*, Chloe.

Christabel (*krĭs'-tā-bĕl*). Not an uncommon female name. It would seem to be derived from Cristobal, the Spanish form of Christopher.

Christian (*krĭs'-chăn*). A male and female name, signifying a member of Christ. The disciples were called *Christians* first at Antioch.

Christiana (*krĭs-chăn'-à* or *krĭs-chĭ-ăn'-à*, *krĭs-tĭ-ăn'-à*). Named after Christian IV. of Sweden.

Christina (*krĭs-tĕ'-nà*). A female name; probably derived from the Spanish name Cristina, from root of Christian. *Dutch*, Christina; *Fr.*, Christine; *Ger.*, Christiana; *It.*, Cristina.

Christmas Island. So named because Captain Cook set foot upon it on Christmas Day, 1777.

Christopher (*krĭs'-tŏ-fēr*). From the Greek name *Christophoros*, signifying Christ's bearer or carrier. As a Christian name, this is usually given to one born on Good Friday. *Danish*, Christoffer; *Dutch*, Christophorus; *Fr.*, Christophe; *Ger.*, Christoph; *Gr.*, Christophoros; *It.*, Cristoforo; *Lat.*, Christophorus; *Port.*, Christovao; *Sp.*, Christoval; *Sw.*, Kristofer.

Cimarron (*sē-mār-rŏn'*) **River, Okla.** Of Spanish derivation, meaning "wild," "unruly."

Cincinnati (*sĭn-sĭn-nā'-tĭ*). City in Ohio, laid out and named by Col. Israel Ludlow, in honor of an organization of officers formed after the Revolutionary War and named in honor of Cincinnati, the Roman patriot. The original settlement was called *Losantiville*, which was a composite name. French, *ville*, "town," Latin *os*, "mouth," *anti*, "before," with L (initial letter of the Licking River), that is, "the town before or opposite the mouth of Licking River."

Cintra (*sĕn'-trā*). A town in the district of Lisbon, Portugal, fifteen miles northwest of Lisbon. It contains the Cork Convent, a Moorish Castle, the Palace of the Pena and the Royal Palace.

Circassia (*sĕr-kāsh'-ĭ-à*). Named from the country of the *Tcherkes*, a Tartar tribe who settled in the neighborhood of the river Terck.

Circleville, Ohio. From its original location within one of the Indian mounds bearing the shape of a circle.

Circus Maximus (*sĕr'-kŭs māk'-sĭ-mŭs*). Anciently occupied the hollow between the Palatine and the Aventine hills. According to tradition, the site was already used for athletic exhibitions and provided with wooden seats under Tarquinius Priscus. Under Cæsar and Augustus it was first largely built of stone, and splendidly adorned. It was rebuilt by Nero, and again by Domitian and Trajan, and in its final form is said to have accommodated 385,000 spectators.

Circus of Romulus or Maxentius. A Roman circus built in 311 A. D., the most perfect ancient circus surviving.

Clara (*klār'-à*). A modern form of Clare. *Danish*, Clara; *Dutch*, Clara; *Fr.*, Clara; *Ger.*, Klara; *It.*, Clara; *Lat.*, Clara; *Sw.*, Klara.

Clare. A name probably derived from St. Clare, a popular saint in England, a friend of St. Francis, and foundress of all the *Poor Clares*. The name occurs in many medieval calendars. It is probably derived from Latin *clarus*, "bright, fair."

Clarissa (*klā-rĭs'-sà*). From the French name Clarisse (*It.*, Clarice), from root of Clare.

Clarksville, Tenn. As an honor to Gen. Geo. Rogers Clark, a distinguished Revolutionary soldier.

Claude (*klŏd*). From the Roman name *Claudius*, another form of Clodius, Latinized from Clodio; from Old German, *laut*, "celebrated, distinguished, illustrious."

Claudia (*klŏ'-dĭ-à*). Feminine of Claudius. *Dutch*, Claudia; *Fr.*, Claudie; *It.*, Claudia; *Lat.*, Claudia; *Sw.*, Klaudia.

Clement (*klĕm'-ĕnt*). Like the classical name Clemens, derived from the Latin *clemens*, "mild, calm, gentle." *Danish*, Clemens; *Fr.*, Clément; *Ger.*, Clemens; *It.*, Clemente; *Lat.*, Clemens; *Sp.*, Clemente.

Clementia (*klĕ-mĕn'-shĭ-à*). A female name formed from Clement.

Cleopatra (*klĕ-ŏ-pā'-trā*). Found as a female name in the parish registers of Nottingham, Eng-

land. So called from Cleopatra, queen of Egypt. It is derived from *kleos*, "glory, renown, fame," and *patra*, "one's native country," hence, "fame of her fatherland."

Cleopatra's Needles. A pair of Egyptian obelisks of pink granite which were transported from Heliopolis to Alexandria in the eighteenth year of Augustus. One of them was taken to London and set up on the Thames Embankment, in 1878, and the other was soon after brought to New York and erected in Central Park.

Cleveland, Ohio. In honor of General Moses Cleaveland of Connecticut, who had charge of the surveying of this region, acting as general agent for the Connecticut Land Company. No authority for present spelling.

Cloaca Maxima (*klō-ā'-kā māk'-sīm-ā*). The chief drain of ancient Rome, built by Tarquinius Priscus about 600 B. C., and still serving its purpose. The outlet on the Tiber is an arch twelve feet high.

Clotilda (*klō-tīl'-dā*). From the Old German *Clothildis*, name of a queen of France, signifying "distinguished and noble," or "illustrious noble" (*laut-hild*).

Cluny (*klū-nē'*), **Hotel de.** A former palace of the abbots of Cluny, situated on the Boulevard St. Michel, Paris.

Cochituate (*kō-chīt'-ū-āt*), **Mass.** Indian word, meaning "land on or near falls," or "rapid streams."

Cod, Cape, Mass. From the fish its name implies, discovered and named by Bartholomew Gosnold, May 15, 1602. This was the first land in the United States trod by an Englishman. *Tamwock*, its Indian name, means "codfish."

Cœur d'Alene (*kēr dā-lān'*). Lake and town in Kootenai County, Idaho; named from a tribe of Indians. French name, meaning "needle hearts" or "awl hearts." Some authorities say that this name was given to these Indians because the expression was used by a chief of the tribe to denote his opinion of the Canadian trappers' meanness. Rev. M. Eells says that the name was given to the tribe by members of the Hudson Bay Company, because of their sharpness in trade.

Cohasset (*kō-hās'-sēt*), **Mass.** Indian word, meaning "place of pines."

Cohoes (*kō-hōz'*), **N. Y.** Corruption of the Iroquois word *gahaoose*, "shipwrecked canoe," having reference to the falls in the Mohawk at this place.

Colin (*kōl'-īn*). From *Nicolin*, a diminutive of Nicol, from Nicolas or Nicholas.

Colorado (*kōl-ō-rā'-dō*). From the river, a Spanish word meaning "ruddy or red," the waters of the stream usually quite limpid and pure, but when swollen by heavy rains, they sweep down immense volumes of red sand, mud, and silicious pebbles. Indian name, *Pashahono*.

Colorado River, Texas. Spanish word, meaning "red," applied through color of its waters; when so named it must have been at high water, as at other times the water is clear; the name more appropriately applied to the *Brazos*, whose waters are always red or muddy.

Colosseum (*kōl-ōs-sē'-ūm*) or **Flavian Amphitheater.** Probably so named from the colossal statue of Nero, which stood near it in the Via Sacra. An amphitheater in Rome, begun by Vespasian (T. Flavius Sabinus) in 72 A. D., and for 400 years the seat of gladiatorial shows.

Colossus of Rhodes. A gigantic statue in commemoration of the successful defense of Rhodes against Demetrius Poliorcetes in 304 B. C. It required twelve years for its completion, and cost \$470,000. It represented the Rhodian sun-god, Helios; was over 105 feet high, and was considered one of the seven wonders of the Old World.

Columbia. So named in honor of Christopher Columbus. Applied through poetical justice to Columbus, and first used by Dr. Timothy Dwight

(1752-1818) in a popular song written by him which began;

"Columbia, Columbia, to glory arise,

The queen of the world and the child of the skies."

Now applied to the District containing the national capital, to counties in Arkansas, Florida, Georgia, New York, Oregon, Pennsylvania, Washington, and Wisconsin, and rivers in Oregon and Washington. The river was named by Captain Gray for the vessel in which he entered its mouth.

Columbus, Ohio. A tribute to Christopher Columbus; the ground when originally selected in 1812 was for the purpose of locating homes for Canadians and Nova Scotian refugees, and the committee, through a sentimental simile selected the name *Columbus*, "as to him we are primarily indebted in being able to offer the refugees a resting place."

Conception (*kōn-sēp'-shūn*) **Cape, Cal.** Named from one of the vessels belonging to Cortez's expedition.

Concord (*kōng'-kūrd*). Town in Middlesex County, Massachusetts, so called either from the Christian concord among the first company, or from the peaceful manner of its acquisition, having been purchased from the Indians.

Concord, N. H. Indian name of the land, *Pennacook*, of the stream *Musketicook*, "dead stream." Early English settlers named it Rumford, after a Benjamin Rumford; changed to Concord to commemorate an expression of unanimity in a land controversy.

Conemaugh (*kōn-ē-mō'*) **River, Penn.** Indian word, meaning "otter creek."

Coney (*kō'-nē*). Island at the extremity of Long Island, New York, which is said by some to have been so named because of the numbers of rabbits there. Another theory ascribes it to the winds having driven the sand into truncated cones. It appears, however, to have been originally called *Congu*, which may suggest another derivation.

Connecticut (*kōn-nēt'-ī-kūt*). River and State. An Indian name derived from *Quonoktacut*, meaning, according to some authorities, "a river whose water is driven in waves by tides or winds." Haines says, "land on the long tidal river." Other interpretations are, "on long river," "long river," and "the long, or without end river." It was called by the Dutch *Versche River*, "Fresh River."

Conrad (*kōn'-rād*). From the Old German name *Cunrad*, which Wachter translates "quick in counsel." Others render the name "gifted in council." *Danish*, Conrad; *Dutch*, Könraad; *Fr.*, Conrad; *Ger.*, Conrad; *It.*, Corrado, or Curado; *Lat.*, Conradus; *Sw.*, Konrad.

Constance (*kōn'-stāns*). From the Latin name *Constantia*, a feminine of Constantius, "constancy, steadfastness." *Dutch*, Constantia; *Fr.*, Constance; *It.*, Costanza; *Lat.*, Constantia; *Sp.*, Constancia.

Constantine (*kōn'-stān-tīn*). From the Latin *Constantinus*, "firm, resolute." *Danish*, Constantin; *Dutch*, Konstantijn; *Fr.*, Constantin; *Gr.*, Konstantinos; *It.*, Constantino.

Constantinople (*kōn-stān-tī-nō'-pl*). The Anglicised form of *Constantinopolis*, "the city of Constantine," the name given by Constantine to Byzantium when he made it the Eastern capital of the Empire. Stamboul, or Istambul, "at the city," is the modern Turkish name.

Cooper River, S. C. In honor of Sir Anthony Ashley Cooper, afterward Earl of Shaftesbury, one of the original charterers. The *Cooper* and *Ashley* uniting form the peninsula on which Charleston is situated.

Cooperstown. Village in Otsego County, New York, named for the father of James Fenimore Cooper, the novelist.

Copenhagen (*kō-pēn-hā'-gēn*). In Danish, *Kjøbenhavn*, the capital of Denmark, is first mentioned in 1027, by the name Hofn, "the haven," and in

1043 it was still a mere fishing village. Owing to its position it became a great resort for merchants, and to distinguish it from other havens was called *Kaupmanna hofn* or *Kjobmannshavn*, names translated by Saxo Grammaticus in the Twelfth Century as *Portus Mercatorum*, the "haven of the merchants."

Cora. From the Greek *Kore*, "a girl, damsel."

Cordelia (*kôr-dē'-lī-à* or *kôr-dēl'-yà*). According to Rev. Edward Davies, from the Keltic, *Creirdyddlydd*, "jewel of the sea." *Fr.*, Cordelie.

Cornelia (*kôr-nē'-lī-à* or *kôr-nēl'-yà*). A female name formed from Cornelius.

Cornelius (*kôr-nē'-lī-ūs* or *kôr-nēl'-yūs*). Latin name, translated by some, "horn." *Danish*, Cornelius; *Dutch*, Kornelis or Cornelis; *Fr.*, Corneille; *It.*, Cornelio; *Lat.*, Cornelius; *Sp.*, Cornelio.

Corniche (*kôr-nēsh'*), **The.** A celebrated coast-road along the Riviera of France and Italy from Nice to Genoa.

Cornwall. The ancient British name of this country was *Cernyw*, a name probably received from the Latin *cornu*, "a horn." The Romans, who traded here for tin, called it *Cornubia*, which name it bore until the Saxons imposed the name of *Weales* upon the British who retreated into the fastnesses west of the Severn and the Dee. The latter portion of the name *Cornubia* was then dropped, and the word *Wales* substituted, forming the name "Corn-Wales," of which the present Cornwall is a corruption.

Corsica (*kôr'-sī-kā*). A Phœnician word denoting "the wooded island."

Corso (*kôr'-sō*). One of the principal streets of Rome. It extends for nearly a mile from the Piazza del Popolo, and is the chief scene of the annual carnival.

Coshocton (*kō-shōk'-tūn*). County and village in Ohio, named from the Indian town of *Goshocking*. The word means, according to some authorities, "habitation of owls." Heckewelder gives "forks of the Muskingum, or union of waters." Others say "finished small harbor."

Cosmo (*kōz'-mō*). A name originating in Italy, where it became famous in Milan and Florence, from being borne by the family of the Medici (*Cosmo di Medici*). From the Greek *Kosmos*, "order," "the world"; so called from its regularity and beauty.

Costa Rica (*kōs'-tā rē'-kā*). Literally, Spanish for "rich coast."

Cotswold (*kōts'-wōld*) **Hills.** So named from the Anglo-Saxon *cote* and *wold*, as meaning a place where there are no growing woods.

Council Bluffs. City in Pottawattamie County, Iowa, so called from a council held near there by Lewis and Clarke with the Indians.

Covent Garden Theater. A theater in Bow Street, Covent Garden, London, built by John Rich, the famous harlequin of Lincoln's Inn Theater, in 1731.

Coventry (*kūv'-ēn-trī*). The name of this city is not derived from "convent," as some suppose, but from *Cune*, or *Coven*, the name of the stream on which it is built.

Cracow (*krā'-kō*). The town of *Krak*, Duke of Poland.

Creole (*krē'-ōl*). A creole is a person born in the West Indies or South America of *European* parents. The name is often erroneously applied to persons of mixed white and black parentage. There are distinct names for each degree of admixture.

Crimea (*krī'-mē-à*). Named from a small town established in the peninsula by the Kimri, or Cymri, and known to the ancient Greeks as *Kimmerikon*.

Cripplegate (*krīp'-l-gāt*) or **Crepelgate.** An old London gate. It was the fourth from the western end of the wall. The original gate was probably built by King Alfred when he restored the walls,

886 A. D. Stow says that in 1010, when the body of Edmund the Martyr, king of the East Angles, was borne through this gate, many lame person who were congregated there to beg rose upright and were cured by its miraculous influence.

Cris Kingle (*krīs' kīng'-l*). Also variously spelled *Kriss Kingle*, and *Kriss Kringle*, has been corrupted from the German word, *Christ-Kindel*, meaning the "little *Christ-child*." Later uses, especially among German peoples, have identified the name with that of Santa Claus and Saint Nicholas.

Crown Point, N. Y. Alleged to be so named because scalping ("crown") parties were sent out from this place by the French and Indians. The proper adaptation is no doubt an allusion to royalty, namely, "land belonging to the crown."

Cuba (*kū'-bā*. Spanish, *kōō'-bā*). The largest island of the West Indies, discovered by Columbus in 1492, on his first voyage. The word *Cuba* seems to have been a general term meaning "district," since we learn from Las Casas that the district was called *Cuba nacan*, the "central province," from *cuba*, a "territory," or "province," and *nacan*, "middle."

Cumberland Mountains and River. Named by the English (1748) in honor of the Duke of Cumberland, at that time prime minister of England, name applied by Dr. Thomas Walker, an explorer. From Anglo-Saxon, *comb*, "a valley or low place," a land of hollows. The North Carolina section of the mountains, known to the Indians as *Wasioto*. The river known as the *Shawanee* and *Gelisipi*.

Currituck Sound, N. C. A tribe of Indians of that name, who lived on its shores.

Cuzco (*kōōz'-kō*). A department of Peru. It is from a native term, meaning the "navel," so called from its central position in the realm of the Incas.

Cynthia (*sīn'-thī-à*). From *Cynthia*, a name of Diana; so called from Mount *Cynthus*, where she was born.

Cyprian (*sīp'-rī-an*). From the Latin *Cyprianus*, "of Cyprus." *Dutch*, Cypriaan; *Fr.*, Cyprien; *Ger.*, Cyprian; *It.*, Cipriano; *Port.*, Cypriano; *Sp.*, Cipriano.

Cyprus (*sī'-prūs*). Perhaps named from the herb *kupros*, with which it abounded; called by the Greeks *Cerastes*, "the horned."

Cyril, Cyrill (*sīr'-īl*). From the Latin name *Cyrillus*, a diminutive of *Cyrus*, meaning "little *Cyrus*." *Danish*, Cyrillus; *Dutch*, Cyrillus; *Fr.*, Crille; *It.*, Cirillo; *Lat.*, Cyrillus.

Cyrus (*sī'-rūs*). From Greek *kūros*, "the supreme power." According to others it has the same signification as *Carshena*, "illustrious." *Fr.*, Cyrus; *Ger.*, Cyrus; *Gr.*, Kuros; *It.*, Ciro; *Lat.*, Cyrus; *Sp.*, Ciro.

Dahlonega (*dā-lō-nē'-gā*), **Ga.** From the Indian, *taulawneca*, "yellow wampum," from the discovery of gold at this place. The Government established a mint here at one time.

Daisy. A female name, derived from the flower, whose name in Anglo-Saxon signifies "day's eye."

Dakota (*dā-kō'-tā*). Two States — North and South Dakota — counties in Nebraska and Minnesota, and several small places, named for the Indian tribe. The name was originally spelled *Dahkota* or *Dacorta*, which means "friend," "ally," "beleagued or united people," or "allied nation," the common name of the confederate Sioux tribes.

Dakota River, Dak. Named originally from the territory. The stream was called by the Dakotas *chaussnsan*, meaning "tumbling."

Dalilah. Another spelling of *Delilah*.

Daniel (*dān'-yēl*). From the Hebrew, *Daniyyel*, which has been variously translated "judge of God," "God's judge," one who delivers judgment in the name of the Lord. *Danish*, Daniel; *Dutch*, Daniel; *Fr.*, Daniel; *Ger.*, Daniel; *It.*, Daniele; *Lat.*, Daniel; *Sp.*, Daniel.

Dantzic (*dänt'-sik*. German, *dänt'-sich*). Usually supposed to be a corruption of *Dansk-vik*, "Dane's town, or "Danish fort."

Danube (*dän'-üb*). The English name of the great river which the Germans call the *Donau* is derived from the Roman name *Danubius* or *Danuvius*.

Dardanelles (*där-dä-nělz'*). The modern name of the Hellespont, is derived from two Turkish forts guarding the passage, called by the Italians, *Dardanelli*, a name derived from the old Greek city of Dardanus in the Troad.

Dauphin (*dō'-fîn*. French, *dō-fän'*). A title formerly borne by the eldest son of the kings of France. In 1349, Humbert, the last of the princes of Dauphine, having no issue, left his dominions to the King of France on condition that the king's eldest son should be styled the Dauphin. After the revolution of 1830 the title was abolished.

David (*dā'-vîd*). From the Hebrew *Daviydh*, signifying "beloved." *Danish*, David; *Dutch*, David; *Fr.*, David; *Ger.*, David; *It.*, Davide, or Davidde; *Lat.*, David.

Death Valley. A desert region in Inyo County, eastern California, near the Nevada frontier, lying about 160 feet below the sea-level.

Deborah (*děb'-ō-rā*). From the Hebrew *D'bhorah*, which Jerome translates "a bee, or eloquence." *Dutch*, Debora; *Fr.*, Débora; *It.*, Debora; *Lat.*, Debora.

December, the twelfth month, from the Latin, *decem*, ten. Tenth month of the Romans.

Delaware (*děł'-ā-wār*) **River and Bay**. The name Delaware, first given to the bay by Capt. Samuel Argall, afterward Deputy Governor of Virginia, who came to this country in company with Lord de la Ware. After landing in Virginia he was sent out of the Chesapeake, June 19, 1610, for provisions, and "cast anchor in a verie greete baaye," August 27th, on which date he christened its waters. The bay being a widened mouth of the stream the name was afterward adopted to its source. It was also called by the English *Charles River*, in honor of the king.

Delft (*děłft*). This name for earthenware is derived from *Delft*, a town in Holland, where extensive potteries existed from A. D. 1300.

Delhi (*děł'-hē*) or **Dehli** (*dā'-lē*). From the Sanskrit, *dahal*, "a quagmire," or from the Hind. word *dil*, an "eminence."

Delilah (*dē-lî'-lā*). From the Hebrew *D'liylah*, signifying "weak, delicate."

Demetrius (*dē-mē'-trî-ūs*). From the Greek, *Demetrios*, "sprung from the earth," or "from Ceres"; *Fr.*, Demetrius; *It.*, Demetrio; *Lat.*, Demetrius; *Russ.*, Dmitri.

Denis (*děn'-is*) or **Dionysius** (*dî-ō-nîsh'-î-ūs*). From the Greek, "belonging to the god of wine." *Danish*, Dionysius; *Dutch*, Dionysius; *Fr.*, Denis or Denys; *Ger.*, Dionys; *Gr.*, Dionysios; *It.*, Dionigio; *Lat.*, Dionysius; *Sp.*, Dionisio.

Denmark (*děn'-mārk*). Called *Dan-mörk* in the Sagas. In old Norse *mörk* means a "forest," and, as forests commonly formed the boundaries of tribes, we obtain such words as *mearc* in Anglo-Saxon and *marca* in Old High German, meaning a "marsh land" or "boundary." But *marca* in Old Saxon means a district, and in Modern Danish *mark* means a "field," "plain," or "open country." Hence, Denmark probably means the "forest of the Danes," a name parallel to that of Holstein, which also was densely wooded.

Denver, Colo. After James W. Denver, ex-Governor of Kansas. The name adopted upon the consolidation in 1860 of the towns of St. Charles and Aurora.

Derrick or Dirck. A name corrupted from Theodoric.

Des Moines (*dē-moin'*). River, county, and city in Iowa. This name is thought to have been de-

rived from the Indian word, *mikonang*, meaning "the road." This name was applied by the Indians to a place in the form of *Moingona*, which the French shortened into *Moin*, calling the river "riviere des Moins." Finally, the name became associated with the Trappist monks, and the river by a spurious etymology was called "la riviere des moines," "the river of the monks."

Detroit (*dē-troit'*), **Mich.** From the river or strait on which the city is built. Derived from two French words, *detroit*, "the narrows."

Deuteronomy (*dū-tēr-ōn'-ō-mî*). From two Greek words meaning *second* and *law*. The fifth book of Moses is so named from its being mainly a repetition or second edition of laws previously enunciated.

Devil. Many philologists declare that the name of God is derived from *Good Spirit*, shortened by long use to "good" or "god." In the Anglo-Saxon the word "god" is used in the sense of "good" as well as to designate the Almighty, and it is only known by the context which is intended. By a similar process, Satan may have been known as *the Evil Spirit*, which shortened by usage would become *the Evil*, or *th'evil*, easily corrupted into *Devil*. In Anglo-Saxon the word *yfel*, "evil," is suggestive of *deóful*, "the devil." The common synonyms of this word, *Old Nick*, *Old Scratch*, and *Old Harry* are all derived from Norse sources. "Old Nick" is from the Finnish *Naeki*, or North-German *Nickel*, both meaning a demon. "Old Scratch" is from *Scrat* or *Schrat*, a Scandinavian wood demon; and "Old Harry" is from *Hari*, or *Herra*, Scandinavian terms identical with *Baal* or *Beel* in *Beelzebub*. The common pictorial representations of the devil are entirely copied or derived from Greek and Roman mythology. The pitchfork is the two-pronged scepter of Pluto, the King of Hades. The blackness is also from Pluto, who was named *Jupiter Niger*, the black Jupiter. The horn, tail, and cloven feet are from the Greek satyrs.

Dewy or Dewey. A Cornish form of David.

Diana (*dî-ān'-ā*) or **Dian** (*dî-ān*). So called after Diana, goddess of hunting. Some derive her name from *dia*, i. e., *dea*, and *Iana*. According to Varro, the same as *Luna*, "the moon." *Danish*, Diana; *Fr.*, Diane; *Ger.*, Diana; *Gr.*, Artemis; *It.*, Diana; *Lat.*, Diana.

Dinah. From the Hebrew *Diynah*, signifying "judged"; i. e., "acquitted, vindicated."

District of Columbia. See *Columbia*.

Dnieper (*nē'-pēr*). From *Don-ieper*, "upper river." Scythian, *Danapris*.

Dniester (*nēs'-tēr*). From *Don-iester*, "lower river *Don*." Originally from the Scythian, *Danaster*, "southern river."

Doge's (*dōj*) **Palace**. Formerly the palace of the doges of Venice, and now one of its most interesting architectural monuments. The present building was begun by Marino Falierno in 1354, but only the south and west façades retain their characteristic pointed architecture.

Dolores (*dō-lō'-rēs*). Derived from the Spanish name, *Dolores*, signifying "sorrows," in allusion to the Seven Sorrows of Mary.

Dominic (*dōm'-î-nîk*). From the Latin, *dominus*, "of or belonging to a lord or master." It might also translate "little lord." *Danish*, Dominicus; *Dutch*, Dominicus; *Fr.*, Dominique; *It.*, Domenico; *Port.*, Domingos; *Sp.*, Domingo; *Sw.*, Dominicus.

Dominica (*dōm-î-nē'-kâ*). "Sunday Island," indicative of its discovery by Columbus, namely Sunday, November 2, 1493.

Donald. An English form of *Donghal*, "brown stranger."

Dora. A female name abbreviated from *Theodora*.

Dorcas. From the Greek name, *dorkas*, signifying "a wild goat, antelope, gazelle."

Dorothy (*dōr'-ō-thî*). From the Greek name

Dorothea, signifying "the gift of God." *Danish*, Dorothea; *Dutch*, Dorothea; *Fr.*, Dorothee; *Ger.*, Dorothea; *It.*, Dorotea; *Lat.*, Dorothea; *Sp.*, Dorotea; *Sw.*, Dorothea.

Dougall. An English form of Dughall.

Douglas (*dūg'-lās*). From Gaelic *dubh-ghlas*, "dark grey."

Dover, Del. From the town in England of that name. The Anglo-Saxon word means "ferry."

Dowager (*dow'-ā-jēr*). Strictly speaking, a dowager is an endowed widow; i. e., one who has a "dower" from her late husband, or who has property brought by her to her husband on marriage ("dowry") and settled on herself after his decease. In practice the name "dowager" is applied to any widowed lady of title, to distinguish her from the wife of the present holder of the title.

Downing Street, London. So named after Sir George Downing, who, according to Wood, was "a sinner with all times and changes, skilled in the common cant, and a preacher occasionally." The street contains the Treasury Building and the Foreign Office, hence the name Downing Street has come to be used for the British Administration.

Drury Lane. A street in London, near the Strand, with which it communicates through Wych Street. It is one of the great arteries of the parish of St. Clement Danes, an aristocratic part of London in the time of the Stuarts. It takes the name from Drury House, built by Sir William Drury, in the time of Henry VIII. Near the entrance of Drury Lane from the Strand, on the left, an old house, now a Mission House, still exists, which stood in the Lane with the old house of the Drurys, before the street was built.

Drury Lane Theater. This famous London theater was originally a cockpit, which was converted into a theater in the time of James I. It was pulled down and rebuilt in 1662, burned in 1672, and a new one built by Wren in 1674. The interior was rebuilt in 1775. In 1791, it was pulled down and rebuilt, being opened in 1794. It was burned down February, 1809, and replaced by a building, which was opened October 10, 1812. The latter was destroyed by fire in the early part of 1908, and replaced by the present structure.

Drusilla (*drōō-sil'-lā*). A female name derived from the Greek name *Drouille*, which Bailey translates "dewy eyes." The word signifies "dew, moisture, pure water"; and, figuratively, what is tender, delicate, young. *Fr.*, Drusille; *Ger.* Drusille; *It.*, Drusilla; *Lat.*, Drusilla.

Dryburgh (*drī'-būr-ō*) **Abbey.** An ancient abbey, now in ruins, four miles southeast of Melrose, Scotland, whose fragments exhibit excellent Norman and Early English architectural details. In the south aisle is the tomb of Sir Walter Scott.

Dublin. In the Irish language this is *Dubh-linn*, the meaning of which is "black pool." The name has reference to the fact that the greater part of the site of the city was formerly a black, slimy expanse of mud, through which the River Liffey flowed sluggishly to the sea.

Dubuque (*dōō-būk'*). County and city in Iowa, named for a French trader, Julien Dubuque.

Dugald. An English form of Dughall.

Duluth, Minn. In honor of the French explorer, Daniel Greysolon du Lhut, who visited this section in 1679.

Duncan. A Scottish surname. Some render it "powerful chieftain"; others derive it from the English form of *Donncha*.

Dunstan. Derived from a locality signifying, "the stone hill," or "the strong fortress" (*dunstan*), but the Saxon compound is no doubt used figuratively.

Duquesne (*dū-kān'*). Borough in Allegheny County, Pennsylvania, named from old Fort Duquesne, which was named for a distinguished French officer, the Marquis Abraham Duquesne.

Easter Island. Named by Jacob Roggevin in consequence of his visit to its fertile shores on Easter Sunday, 1722; the island having been previously discovered by Captain Davis in 1686.

East River. Name applied to the body of water at New York, more properly a strait, connecting Long Island Sound with New York Bay; called a river no doubt from the river-like action of its tides; the name is used to distinguish it from North River, i. e., the Hudson. As the Dutch had the South and North Rivers to designate their territory limits, it was consistent that the stream east of their city of New Amsterdam should be indicated as *Oost Rivier*.

Ebenezer (*ēb-ē-nē'-zēr*). From the Hebrew *Ebenezer*, signifying "stone of help," name of the stone which Samuel set up near Mispah, in witness of the Divine assistance obtained against the Philistines.

Ecuador (*ēk-wā-dōr'*). Spanish, *ā-kwā-dōr'*). Spanish for Equator, so called by virtue of its geographical position.

Edenton, N. C. In honor of Charles Eden, royal governor in 1720.

Edgar. From the Anglo-Saxon name *Eadgar*. *Watcher* derives it from *ead-gar*, "author of happiness."

Edinburgh (*ēd'-in-būr-ō*). Formerly *Edwinesburg*, means ostensibly the fortress of Eadwine, the Northumbrian king, who was converted by Paulinus. He extended the Anglican dominion as far as the Forth, and may probably have erected a frontier fortress on the commanding rock on which Edinburgh Castle stands.

Edith. Formerly Eadith; from Anglo-Saxon *eadig*, "happy, rich."

Edmund (*ēd'-mūnd*). From Anglo-Saxon *eadmund*, "guardian or defender of happiness." *Danish*, Edmund; *Fr.*, Edmond; *Ger.*, Edmund; *It.*, Edmondo; *Lat.*, Edmundus; *Sp.*, Edmondo, or Edmundo.

Edward (*ēd'-ward*). From Anglo-Saxon *eadweard*, "guardian of happiness." *Danish*, Eduard; *Dutch*, Eduard; *Fr.*, Edouard; *Ger.*, Eduard; *It.*, Eduardo, or Edoardo; *Lat.*, Edvardus, or Edoardus; *Port.*, Duarte; *Sp.*, Eduardo; *Sw.*, Eduard.

Edwin (*ēd'-wīn*). From the Anglo-Saxon name Eadwin, from *ead-winn*, "happy conqueror." *Danish*, Edwin; *Lat.*, Edwinus.

Eel River, Ind. From the translation of the Indian name, *shoamague*, "slippery fish" (the eel).

Effie. A Scottish corruption of Euphemia.

Egbert (*ēg'-bērt*). Ferguson translates this name "edge-bright." It rather means, "distinguished in battle," from the Anglo-Saxon, meaning "an edge, sword, war, battle." *Lat.*, Egbertus.

Egypt. Is the Greek and not the native name of the country which on the monuments is called Kem (Ham), "the black," probably from the dark alluvial soil. The meaning of the Greek name *Ægyptos* has been much disputed. It has been explained as the "land" (*aia*) of the "vulture" (*guptos*), or rather of the sacred kite of Horus, which is the most conspicuous animal in the country. Another etymology derives it from the Coptic or from the town of Koptos, the seat of the earliest dynasties, where the caravan route from the Red Sea reaches the Nile, and hence the place that would first become known to strangers from the East. Another derivation is that it expresses the Hebrew for "the land of oppression."

Egyptian Expedition, The. An expedition undertaken by the French against Egypt in 1798-1801, with the ultimate object of attacking the British Empire in India. It was commanded by Napoleon Bonaparte.

Egyptian Hall. The Egyptian Hall in the Mansion House of the City of London was so called because of its exact correspondence with the Egyptian Hall described by Vitruvius.

Elba (ĕl'-bă). An island belonging to the province of Leghorn, Italy, situated in the Mediterranean, east of Corsica, and about five and one-half miles from Tuscany. Napoleon I. lived here in exile from May 4, 1814, to February 26, 1815.

Eldred (ĕl'-drĕd). From the Teutonic, meaning "all dread," hence "terrible." *Lat.*, Eldredus.

Eleanor (ĕl'-ĕ-ă-nôr, ĕl'-ĕn-ôr). Derived from Helen. *Danish*, Eleonore; *Dutch*, Leonora; *Fr.*, Eleonore; *Ger.*, Eleonore; *It.*, Eleonora; *Lat.*, Eleanora; *Sp.*, Leonor.

Electoral Commission, The. In the United States History, a board of commissioners created by Act of Congress, approved January 29, 1877, for the purpose of deciding disputed cases in the presidential election of 1876.

Elephanta (ĕl'-ĕ-făn'-tă). An island six miles from Bombay, is locally called Gharipuri, the "place of caves." The Portuguese name Elephanta is derived from the colossal figure of an elephant carved on the rock, guarding the entrance to a magnificent cave-temple, which dates from the Eighth Century.

Elephantine (ĕl'-ĕ-făn'-tĕ'-nă). The Greek name of the island of Philæ at the first cataract of the Nile, so called because it was the mart to which the Nubians brought their ivory for sale.

Elgin (ĕl'-gĭn) **Marbles.** A collection of Greek sculptures comprising the bulk of the surviving plastic decorations of the Parthenon, and a caryatid and column from the Erechtheum, and recognized as containing the finest existing productions of sculpture.

Elias (ĕ-lĭ'-as). From the Greek form of Elijah, meaning "God the Lord." *Danish*, Elias; *Fr.*, Elie; *Ger.*, Elias; *It.*, Elia; *Lat.*, Elias.

Elihu (ĕ-lĭ'-hū or ĕl'-ĭ-hū). A name derived from Elias.

Eljah. See Elias.

Elisabeth. See Elizabeth.

Elisha (ĕ-lĭ'-shă). From the Hebrew, meaning "the salvation of God." *Fr.*, Elisee; *It.*, Eliseo; *Lat.*, Elisaeus; *Port.*, Eliseu; *Sp.*, Eliseo.

Eliza (ĕ-lĭ'-ză). Corrupted from Elisabeth. *Danish*, Elisa; *Dutch*, Elisa; *Fr.*, Elise; *Ger.*, Elisa; *Lat.*, Eliza, or Elisa.

Elizabeth (ĕ-lĭz'-ă-bĕth). From the Hebrew *Eliyshebha*, which St. Jerome translates "oath of my God"; Simonis, "oath of God"; Tregelles, "to whom God is the oath, who swears by God," i. e., worshipper of God; and Jones, "God of the seventh oath of my God, of God is her oath"; from *El* "God," *shebha*, "seven"; also an oath. *Danish*, Elisabeth; *Dutch*, Elizabeth; *Fr.*, Elisabeth; *Ger.*, Elisabeth; *It.*, Elisabetta; *Lat.*, Elizabetha; *Sp.*, Isabel.

Elizabeth, N. J. Named for Elizabeth Carteret, wife of Sir George Carteret.

Ellen. Some consider this the same as Helen, and, indeed, in Spanish Helen and Ellen are both represented by Elena. A correspondent of "Notes and Queries" says the name Ellen has no possible connection with Helen, which is older by a thousand years at least, and that Ellen is the feminine of Alain, Alan, or Allan. It may, however, be the same as Ailean.

Ellis Island. Various called Oyster, Bucket, and Gibbett Island.

Elma. A female name abbreviated from Guilielma, a feminine formed from Gulielmus, from root of William.

Elmira. City in Chemung County, New York, said to have been named for Elmira Teall, daughter of Nathan Teal, a tavern keeper.

Elmo, Castle of Saint. A castle at Naples and a fort at Malta, said to be so named from Ermo, an Italianized corruption of Erasmus, a Syrian martyr of the Third Century.

Else or Elsa. See Alice.

Elsie. A name corrupted from Elizabeth.

Elvira (ĕl'-vĭ'-ră). There are several suggestions as to the origin of this name, which is also found in the Italian. According to some it has been corrupted from the name Gelayra or Geluira, but there is no suggestion as to the origin of the latter name. Others think it another spelling of the Moorish name Elmira, a name said to be derived from *emir*. Miss Yonge seems to think it of Spanish origin.

Elysée (ă-lĕ-ză'), **Palace of.** The official residence of the President of France, in Paris. It was built in 1718, and, since the reign of Louis XV., has been the property of the state. It was used as a private residence by Napoleon I. and Napoleon III., to escape the publicity of the Tuileries. During the republic of 1848 it became the official residence of the president.

Emerald Isle. The author of this epithet was Dr. William Drennan, of Belfast, who died 1820. It occurs in a poem entitled "Erin," of which the fourth stanza runs thus;

"Arm of Erin! prove strong, but be gentle as brave,
And, uplifting to strike, still be ready to save,
Not one feeling of vengeance presume to defile
The cause, or the men of the Emerald Isle."

Emery (ĕm'-ĕ-rĭ). A name derived from the old name Amalaric, signifying "powerful without a blot," or "rich in chastity." *Danish*, Almerik; *Dutch*, Almerik; *Fr.*, Emeric, or Emeri; *Lat.*, Almericus; *Sw.*, Emmerik.

Emilia (ĕ-mĭl'-ĭ-ă), or **Emily** (ĕm'-ĭ-lĭ). A name corrupted from Amelia. *Fr.*, Emilie; *Ger.*, Emilie, or Emilia; *It.*, Emilia.

Emily. See Emilia.

Emma. Some derive this name from Greek *amme*, "a nurse"; others from the Latin, *Amata*, signifying "loved," name of the wife of King Latinus and mother of Lavinia. *Fr.*, Emma; *It.*, Emma; *Lat.*, Emma.

Emmanuel (ĕm-măn'-ă-ĕl), or **Immanuel.** From the Hebrew, meaning "God with us"; *Fr.*, Emmanuel; *Ger.*, Emanuel, or Immanuel; *It.*, Emanuele; *Lat.*, Emmanuel; *Port.*, Manoel; *Sp.*, Manuel.

Enaid or Enid. A Welsh female name signifying "soul, life."

Encyclopedists, or Eneyelopædists (ĕn-sĭ-klō-pĕ'-dĭsts). The collaborators in the encyclopedia of Diderot and D'Alembert (1751-65). The Encyclopedists as a body were the exponents of the French skepticism of the Eighteenth Century.

Engadine (ĕn-gă-dĕn'). A valley in the canton of Grisons, Switzerland, traversed by the Inn, noted for its health-resorts and high elevation. It is divided into the Upper and Lower Engadine, and is surrounded by mountains.

England (ĭng'-lănd). When Egbert, King of the West-Saxons, in 829, had subjugated the other six Saxon kingdoms, he summoned a general council at Winchester, at which it was declared that henceforth Britain should be called England, its people Englishmen, and himself King of England. Originally the name was *Englaland*, the land of the Engles, or Angles, who came over from Sleswick, a province of Jutland. *Engel* (variously spelled), is an old Teutonic word, meaning "angel."

Enid (ĕ'-nĭd). Another form of Enaid, which see.

Enoch (ĕ'-nôk). Derived from the Hebrew *Hhanokh*, which Simonis renders "initiated, dedicated — i. e., to God"; and St. Jerome, "dedicated," simply. *Fr.*, Enoch or Henoch; *Lat.*, Enochus, or Henochus.

Ephraim (ĕ'-fră-ĭm). From the Hebrew *Ephrayim*, which Trageles translates "double-land, twin-land"; others "two-fold increase, very fruitful"; from *p'riy*, "fruit of the earth," hence "fruitful." *Fr.*, Ephraim; *Lat.*, Ephraimus.

Epsom (ĕp'-sŭm). A market-town in the county of Surrey, fifteen miles southwest of London, chiefly celebrated now as the place near which the Oaks and Derby races are run. The Epsom races

are held on Epsom Downs, in the month of May (once in a while June). The Derby is a sweep-stake for three-year-old entire colts and fillies. On the subsequent day the Oaks, for fillies only, is run.

Erasmus (ē-rāz'-mūs). The Latin name, from Greek *Erasmós*, "desirable, pleasant." *Danish*, Erasmus; *Fr.*, Erasme; *Ger.*, Erasmus; *Gr.*, Erasmós; *It.*, Erasmo; *Lat.*, Erasmus; *Sp.*, Erasmo.

Erastus (ē-rās'-tūs). Means, "beloved." *Fr.*, Eraste; *Gr.*, Erastos; *Lat.*, Erastus.

Erechtheum (ēr-ēk-thē'-ūm). An Ionic temple in Athens dating from the end of the Fifth Century B. C., remarkable for its complex plan and architectural variety, as well as for its technical perfection.

Eric (ēr'-ik, ē'-rik). The same as the old Ericus, name of several Danish kings. Wachter says it should be written Errich, which he translates, "powerful in war."

Erie. The name of one of the Great Lakes, drained by the St. Lawrence, is an Indian word, which, in the form of "Erige" or "Erilke," was the name of a now extinct Indian tribe of the Hurons, exterminated by the Iroquois. The word signifies "cat" or "wild-cat"; another authority gives the meaning as "mad."

Erminia (ēr-mīn'-i-ā). A female name derived from the Roman Herminius. Latinized from Hermann, an Old German compound signifying "war-man, warrior." It seems to have been in use in early times in Italy, and occurs in Tasso.

Ernest (ēr'-nēst). From Old German *ernst*, "ardent and vehement desire for study." *Danish*, Ernst; *Dutch*, Ernestus; *Fr.*, Ernest; *Ger.*, Ernst; *It.*, Ernesto; *Lat.*, Ernestus; *Sw.*, Ernst.

Ernestine. A female name formed from Ernest.

Erzeroom (ēr-z-rōōm'). From *Arz-er-Room*, "the fortress of the Romans."

Esau (ē'-sō). From the Hebrew, signifying "hairy, covered with hair." *Fr.*, Esau; *Lat.*, Esavus.

Escorial (ēs-kō'-rī-āl. Spanish, *ēs-kō-rē-āl'*). A celebrated building in Spain, situated twenty-seven miles northwest of Madrid, containing a monastery, palace, church, and mausoleum of the Spanish sovereign. Derives its name from the neighboring village El Escorial, from the scoria or cinders of some abandoned iron works.

Espiritu Santo (ās-pē'-rē-tōō sän'-tō) **Bay, Texas**. Spanish application, meaning "Bay of the holy Spirit."

Essie (ēs'-sī). A female name derived from Esther or Hester.

Estelle. A French name derived from Spanish *estella*, from Latin *stella*, a "star."

Esther (ēs'-tēr). From the Persian *sitarah*, "star"; also "fortune, felicity." *Dutch*, Hester; *Fr.*, Esther; *Ger.*, Esther; *It.*, Ester; *Lat.*, Esthera; *Sp.*, Ester.

Estremadura (ās-trā-mā-dōō'-rā). From *Esytema-Durii*, the extreme limits of the River Douro.

Ethel (ēth'-ēl). From the Anglo-Saxon, signifying "noble."

Ethelbert (ēth'-ēl-bērt). From the Teutonic, meaning "nobly bright." *Danish*, Adelbert; *Dutch*, Adelbert; *Fr.*, Adalbert, or Adelbert; *Ger.*, Adelbert; *Lat.*, Ethelbertus, or Adalbertus.

Ethiopia, or **Æthiopia** (ē-thī-ō'-pī-ā). The "land of the blacks," according to the two Greek words, *aithēin*, "to burn," and *ops*, "the face."

Etna (ēt'-nā). The chief mountain in Sicily, and the highest volcano in Europe. The Greek name was *Aitna*, "burning mountain."

Eugene (ū-jēn'). A name derived from the Latin, *Eugenius*, "nobly descended." *Dutch*, Eugenius; *Fr.*, Eugène; *Ger.*, Eugen; *Gr.*, Euegnios; *It.*, Eugenio; *Sp.*, Eugenio.

Eugenia (ū-jē'-nī-ā). Feminine of the Latin name *Eugenius*. *Fr.*, Eugénie; *Gr.*, Eugenia.

Eunice (ū'-nīs, ū-nī'-sē). A female name derived from the Greek name, *Eunike*, "happy victory." *Lat.*, Eunice.

Euphemia (ū-fē'-mī-ā). From the Greek, *Euphemia*, "words of good omen, or good report."

Euphrates (ū-frā'-tēz). A name which has a long history. Euphrates is merely a Greek adaptation of the Persian name *Hufrat* or *Ufratu*. The latter Persian form, *Phrat*, or *Frata*, has again been converted by the Arabs into *Farat*, the "sweet water," so as to make the name significant in Arabic. The upper course of the Euphrates is still called the *Frat*.

Eurasian (ū-rā'-shān). This word, which is often met with in Indian newspapers, is applied to persons born of European fathers and native mothers. The word is a contracted combination of the two words, "European" and "Asian."

Europe (ū'-rūp). From the Greek *eurus*, "broad," and *op*, "to see," or *ops*, "the face," in allusion to "the broad face of the earth."

Eusebius (ū-sē'-bī-ūs). From the Greek, *Eusebes*, "pious," or "religious." *Fr.*, Eusebe; *Gr.*, Eusebios; *It.*, Eusebio; *Lat.*, Eusebius; *Sp.*, Eusebio.

Eustace (ūs'-tās). From the Latin name, *Eustathius*, "standing fast, firm, constant." *Dutch*, Eustatius; *Fr.*, Eustache; *It.*, Eustachio; *Lat.*, Eustachius; *Sp.*, Eustaquio.

Euxine (ūks'-in). Greek, meaning "the hospitable"; formerly *axinos*, "the inhospitable sea."

Evan (ēv'-an). A Welsh name. Evan, or rather Evans, is merely another spelling of Jones, which has been corrupted from the Greek original of John.

Eve. From the Hebrew *haovah*, "life, or causing life." *Arabic*, Hawa, or Heva; *Danish*, Eva; *Dutch*, Eva; *Fr.*, Eve; *Ger.*, Eva; *Gr.*, Eua, or Eva; *It.*, Eva; *Lat.*, Eva; *Sp.*, Eva; *Sw.*, Eva.

Evelina (ēv'-ē-lī'-nā), **Eveline** (ēv'-ē-līn). Female names derived from Evelyn. Also considered diminutives of Eve.

Evelyn (ēv'-ē-līn). From the Latin, meaning "hazel nut." Lower says the surname Evelyn is probably an ancient personal name, corresponding with the German Aveling or Abeling, the *ing* being patronymic.

Everard (ēv'-ēr-ard). Same as the German names Eberhard, Eberhardt. From *eberhart*, "strong as a wild boar"; perhaps, figuratively, strong man. *Danish*, Eberhard; *Dutch*, Everard; *Ger.*, Eberhard.

Ezekiel (ē-zē'-kī-ēl). From the Hebrew, meaning "strength of God." *Dutch*, Ezechiel; *Fr.*, Ezechiel.

Ezra (ēz'-rā). From the Hebrew, *Ezra*, meaning "a helper." *Fr.*, Esdras; *Lat.*, Ezra or Ezdras.

Fabian (fā'-bī-an). A name derived from the Roman *Fabius*, which, in turn, is derived from *faba*, a bean. *Danish*, Favian; *Dutch*, Fabiaan; *Fr.*, Fabien; *It.*, Fabiano; *Lat.*, Fabianus.

Fanny. A female name corrupted from Frances.

Farnese (fār-nēz'. Italian, *fār-nā'-zā*) **Palace**. A celebrated palace of the Farnese in Rome, founded in the first part of the reign of Leo X. It was begun by Sangallo the younger, was continued by Michael Angelo, and was completed by Giacomo della Porta. It is adorned with frescoes by Annibale Caracci.

Fear Cape, N. C. Is said to have been named Cape of Fear, owing to its tempestuous coast at the time Raleigh's fleet was trying to find an entrance, June 20, 1585. See Cape Fear River.

February (fēb'-rū-ā-rī). From the Latin word, *febru*, "to purify," because the purification of women took place in this month.

Federalist (*fěd'-ēr-āl-ist*), **The**. A collection of essays in favor and in explanation of the United States Constitution, first issued in serial form, October, 1787,–April, 1788, in the "Independent Journal" of New York, where they were collected in book form with the title "The Federalist." Many editions have since been issued.

Felicia. A female name formed from Felix.

Felix (*fě'-līx*). A Latin name meaning "happy." *Danish*, Felix; *Dutch*, Felix; *Fr.*, Felix; *Ger.*, Felix; *It.*, Felice; *Sp.*, Felix.

Ferdinand (*fēr'-dī-nānd*). One authority derives this name from the North High German name Ferdinand, or *Fert-nand*, translated, figuratively, "one quick of comprehension," or "man of rare abilities." Another translates it "pure peace." *Dutch*, Ferdinand; *Fr.*, Ferdinand; *Ger.*, Ferdinand; *It.*, Ferdinando; *Lat.*, Ferdinandus; *Port.*, Fernando, or Fernao; *Sp.*, Fernando.

Fergus. An English form of Frederick.

Fernandina (*fēr-nān-dē'-nā*), **Fla.** Given by the Spaniards in honor of their King Ferdinand.

Fiesole (*fě-ēs'-ō-lē*). An old Etruscan city in the province of Florence, Italy, four miles northeast of Florence; the ancient Fæsulæ. It was the headquarters of Catiline 63-62 B. C., and was the scene of victory of Stilicho over the Teutonic invaders under Radagais about 406.

Fifth Avenue. The principal residence street of New York, extending from Washington Square to Harlem River, a distance of about six and one-half miles. The lower part of the avenue is now largely devoted to business.

Finland. Properly Fenland, meaning "the land of marches."

Fitchburg. City in Worcester County, Mass., named for John Fitch, one of the committee that procured the act of incorporation.

Fitzedward. A baptismal name, son of Edward. Norman *fitz*, for *filius*.

Fitzwilliam Museum. A museum at Cambridge University, England, founded by Richard, seventh and last Viscount Fitzwilliam, who bequeathed to the university (1816) his collection of books, paintings, illuminated manuscripts, engravings, etc., with the dividends of £100,000 South Sea annuities for the erection of a building, which was begun in 1837. The collection of ancient prints is one of the most valuable in existence.

Flaminian (*flā-mīn'-ī-an*) **Way**. One of the oldest and most famous highways of ancient Rome. It extends in a direct line from Rome to Ariminum (Rimini) and was built by the censor Caius Flaminus in 220 B. C. Its superintendence was held to be so honorable an office that Augustus himself assumed it in 27 B. C., as Julius Cæsar had been curator of the Appian Way. Augustus restored it through its entire extent, in commemoration of which triumphal arches were erected to him over the road at Ariminum and at Rome.

Fleet Street. A London street running from Ludgate Circus to the Strand and the West End. It is named from the Fleet brook. In the early chronicles of London many allusions are made to the deeds of violence done in this street. By the time of Elizabeth the street had become a favorite spot for shows of all descriptions. It is now the chief center of British journalism.

Flint, Mich. From the river on which it is located, the name derived from translation of the Indian name *Pewonigo*, "river of flint." The place first bore the name of *Flint River Settlement*.

Flora (*flō'-rā*). A female name derived from *Flora*, goddess of flowers and gardens, the same as the Chloris of the Greeks. *Dutch*, Flora; *Fr.*, Flore; *It.*, Flora; *Lat.*, Flora.

Florence (*flōr'-ēns*). A female name, said to have been Anglicised from Finin or Fineen, an Irish name used by men, meaning "flourishing." The English version is probably derived from Flora, the

goddess of flowers. It might also mean "white," or "fair." *Danish*, Florenz; *Dutch*, Florentia; *Fr.*, Florence; *Ger.*, Florenz; *It.*, Fiorenza; *Lat.*, Florentia; *Sp.*, Florencia; *Sw.*, Florenz.

Florence, Italy. This is the French form adopted for the city whose Italian name, formerly *Fiorenza*, is now *Firenze*, meaning, as the Romans seem to have thought, "the city of flowers."

Florida. So named by Ponce de Leon, a Spanish navigator, in honor of his discovery of the land on Easter Sunday, March 27, 1513, which is called by Spaniards *Pascua Florida*, "Holy day of Flowers." He chose this name for two reasons: First, because the country presented a pleasant aspect; and, second, because he landed on the festival referred to. The second reason is generally considered to have more weight.

Fond du Lac (*fōn-dū-lāk'*), **Wis.** French adaptation "bottom of the lake"; that is, "lower end, the foot."

Fontainebleau (*fōn-tān-blō'*). Originally a hunting-seat called Fons Bleaudi, but now a town in the department of Seine-et-Marne, France, thirty-seven miles south-southeast of Paris. The palace was from the Middle Ages one of the chief residences of the kings of France.

Formosa (*fōr-mō'-sā*). Portuguese for "beautiful."

Fort Wayne, Ind. Named (1794) in honor of "Mad" Anthony Wayne, a Revolutionary general.

Fountains Abbey. A Cistercian monastery of the Fourteenth Century, near Ripon, England, now the largest and most picturesque of English ecclesiastical ruins.

Fox Islands, Lake Michigan. From translation of the Indian name *Annemosine*, "place of the young fox"; *annemose*, "a young fox"; *ink*, "a place."

Fox River, Ill. Application of its Indian name *Meshdeke Wakpa*, "river of the foxes."

France (*frāns*. French, *frāns*). Country of the Franks, or, as the Germans call it, Frankreich, i. e., "Kingdom of the Franks." All western nations were styled Franks by the Turks and Orientals, and anything brought to them from the west invariably merited a prenominal descriptive of its origin, as, for example, *frankincense*, by which was meant incense brought from the country of the Franks.

Frances. Female name formed from Francis, "free." *Danish*, Francisca; *Dutch*, Francisca; *Fr.*, Francoise; *Ger.*, Francisca; *It.*, Francesca; *Lat.*, Francesca, or Francisca; *Sw.*, Franciska.

Francis (*frān'-sīs*). From the Latin Franciscus, which has been rendered, "one who had visited the Franks"; also, "free." *Danish*, Frants, or Franciscus; *Dutch*, Franciscus; *Fr.*, François; *Ger.*, Franz; *It.*, Francesco; *Port.*, Francisco; *Sp.*, Francisco; *Sw.*, Frans.

Franconia (*frāng-kō'-nī-ā*). German province inhabited by the Franks, so called from the *franca*, a kind of javelin which they carried.

Frank. A baptismal name corrupted from Francis.

Frankfort, Ky. Its county, Franklin, was named in honor of Benjamin Franklin, and when its capital was created, a composite word further commemorating the honor was adopted, Frank, diminutive of Franklin; *fort*, meaning "town"; "town of Franklin."

Frascati (*frās-kā'-tē*). A town in the province of Rome, Italy, twelve miles southeast of Rome, celebrated for its villas. There are remains of a Roman amphitheater, and of a small but very perfect Roman theater, in which much of the stage-structure survives.

Frederick (*frěd'-ēr-īk*). The same as the Old German name *Friderich*, *Fridorich*, *Fridurh*. Junius translates the two latter "rich or powerful in peace." The more probable etymology is from *frid-reich*, "powerful protector." *Danish*, Fred-

erik; *Dutch*, Frederik; *Fr.*, Frederic; *Ger.*, Friedrich; *It.*, Frederico, or Federigo; *Lat.*, Fredericus; *Port.*, Frederico; *Sp.*, Frederico; *Sw.*, Frederick.

Fredericksburg, Va. Name adopted 1727, in honor of Prince Frederick, father of George III.

French Broad. River in North Carolina, so named because the country west of the Blue Ridge was held by the French, according to some authorities. Others hold that the river was named by a party of hunters for their captain, whose name was French. The latter part of the name is used descriptively.

Friday. So named because allotted to Frigga, the wife of Odin, and the goddess of marriage.

Friendly Islands. So named on account of the friendly disposition of the natives.

Fuji-yama (*fōō'-jē-yā'-mā*). An extinct volcano and the highest mountain of Japan, situated seventy miles west-southwest of Tokio, and meaning "great mountain." There has been no eruption since 1707. It is a resort of pilgrims, and figures largely in Japanese art and legend.

Furness (*fēr'-nēs*) **Abbey.** The extensive ruins of Furness Abbey are among the most picturesque of English medieval remains. A large part of the fine church survives almost complete except the vaulting, and there is a beautiful early English chapter-house. The entrance to the ivy-draped cloisters is by three superb deeply recessed Norman arches.

Gabriel (*gā'-brī-ēl*). From the Hebrew, Gabriyel, "man of God," "strength of God," or, according to some, the "hero of God." *Arabic*, Jabrāyil, or Jabrāil; *Fr.*, Gabriel; *Ger.*, Gabriel; *It.*, Gabriele; *Lat.*, Gabriel; *Sw.*, Gabriel.

Galena (*gā'-lē'-nā*), **Ill.** Name inherited from its mines of lead. Latin, *galena*, "lead ore."

Galilee (*gāl'-ī-lē*). In the Roman period, the northernmost division of Palestine. It now belongs to Turkey. The name means the "circuit" or "district of the Gentiles," so called by the Hebrews because largely inhabited by Sidonians.

Galveston (*gāl'-vēs-tūn*). County and city in Texas, named for Don Jose Galvez, Spanish viceroy of Texas, who, in 1779, established a colony on this island, and, in 1797, was proclaimed king by the people of Mexico.

Gamaliel (*gā-mā'-lī-ēl*). From the Hebrew, Gamliyel, "the gift, or benefit of God."

Gambier (*gām'-bēr*). Village in Knox County, Ohio, named for Lord James Gambier, a British admiral, who was a benefactor of Kenyon College, located at this place.

Ganges (*gān'-jēz*). The Greek transformation of the name of the great Indian river. Handed on to the Romans and then to the Portuguese, it has been generally adopted throughout Europe as the equivalent of the Indian name *Ganga*, which signifies a "stream" or "flowing water."

Garden of the Gods. Locality near Pike's Peak, Colorado. Lewis N. Tappan and three others went from Denver to select a site for a town. They stood upon a rocky prominence and exclaimed, "A fit garden for the gods," hence the name.

Gasconade (*gās-kō-nād'*) **River, Mo.** Adopted by settlers as a memento of their Gasconade of France. The word translated means "a boaster."

Gaston. A name of French origin, probably from the French *gaston*, "baton."

Gaul. The name by which France was known to the Romans. It was known to the Greeks as *Galatia*, from which the Romans derived *Gallia*, "the land of the Galli," or Gauls. (*Keltic*, Gael-tachd; *O. Fr.*, Gaule.)

Genoa (*jēn'-ō-ā*). The English form of the Italian *Genova*, probably from the same roots as Geneva, from the Celtic *genava*, "mouth" or "jaw."

Geoffrey (*jēf'-rī*), or **Geffrey.** Sometimes translated "God's peace or joyful peace." The name has been corrupted from Galfrid for Walfrid; from

Old German *walt-frid*, "powerful protector." *Danish*, Galfred; *Dutch*, Godfried; *Fr.*, Geoffroy; *It.*, Gioffreddo; *Lat.*, Galfridus.

George. From the Latin name, *Georgius*, "a tiller of the ground, a husbandman, a vine-dresser." *Danish*, Georg; *Dutch*, Georg; *Fr.*, George or Georges; *Ger.*, Georg; *Gr.*, Georgios; *It.*, Giorgio; *Lat.*, Georgius; *Port.*, Jorge; *Sp.*, Jorge; *Sw.*, Georg.

George, Lake, N. Y. So named in honor of England's king.

Georgeanna, Georgiana, Georgina. Female names derived from George.

Georgetown. Formerly a city, now a part of the District of Columbia, named for George Boone, an Englishman, who purchased several tracts of land in the neighborhood.

Georgia. Named in honor of George II. of England, who here established a colony in 1732.

Gerard (*jēr'-ard*. French, *zhā-rār'*). From the Old German name Gerhard, Gerart; from *gerhart*, "very strong." Sometimes corrupted to Garret and Ger'rit, i. e., "firm spear." *Danish*, Gerhard; *Dutch*, Gerard; *Fr.*, Gerard; *Ger.*, Gerhard; *It.*, Gerardo; *Lat.*, Gerardus; *Sw.*, Gerhard.

German Ocean. Indicative of its geographical position.

Germany. Known in ancient times as *Tronges*, the country of the *Tungri*, a Latin word signifying "speakers"; but the Romans afterward gave it the name of Germanus, meaning "neighbors," originally bestowed by the Gauls.

Gertrude (*gēr'-trūd*). From the Old German name Gertrude; from *gerdraut*, which translates either "very faithful," or "very dear or beloved." Another meaning is given as "true spear." *Dutch*, Geertruida; *Fr.*, Gertrude; *Ger.*, Gertraud, or Gertrud; *It.*, Gertruda; *Lat.*, Gertruda, *Sw.*, Gertrud.

Gibraltar (*jīb-ról'-tār*). Derived from *Gibel el Tarik*, "the mountain of Tarik." Tarik was the leader of the Saracens when they entered Spain in 711, and he first fortified the hill as a base of operations and a ready point of access from the Barbary coast.

Gideon (*gīd'-ē-on*). From the Hebrew *Gidhon*, which Tregelles renders "cutter down," i. e., "brave soldier." *Fr.*, Gedeon; *It.*, Gedeone; *Lat.*, Gideon.

Gila (*hē'-lā*) **River, Ariz.** Corruption of the Spanish word *Guija*, meaning "pebbly or pebble stone," applied by them owing to this local characteristic in its waters.

Gilbert (*gīl'-bērt*). From the Teutonic, *Giselbert*, "bright," or "bright as gold." *Danish*, Gilbert; *Dutch*, Gilbert; *Fr.*, Gilbert; *Ger.*, Gilbert; *Lat.*, Gilbertus; *Sw.*, Gilbertus.

Giles (*jīlz*). Probably derived from *Ægidus*, from Greek, *aigidios*, "a goatskin." *Fr.*, Gilles; *Ger.*, Ægidius; *It.*, Egidio; *Lat.*, Ægidius; *Sp.*, Gil.

Giorgio. See George.

Giovanni. See John.

Giulia. See Julia.

Giuseppe. See Joseph.

Gladys. Most probably a Welsh form of Claudia. It is derived from the Welsh *gwlad*, which now means "of country," but formerly signified "a prince, a sovereign," a meaning which still survives in several of its derivations.

Glasgow (*glās'-gō*). The second city in the British Isles was called *Glas-gu* in 1301. Numerous etymologies have been proposed, such as *clais-dhu*, the "black ravine," *glaise-dhu*, "the black brook," or *glas-coed*, the "gray wood," but the most probable is that given by Professor Rhys, who holds that the name is from one of the Gaelic pet-names of St. Kentigern, or St. "Mungo," around whose cell the place grew up.

Glastonbury (*glās'-tūn-bēr-ī*). A town in Somerset, England, twenty-one miles south of Bristol. Its abbey, founded in Roman times, was refounded under Ine in the Eighth Century. Glastonbury is

associated in legend with Joseph of Arimathea, who is said to have visited it, and, in sign of possession, planted his staff, which took root and became the famous Glastonbury thorn that bursts into leaf on Christmas eve. The Isle of Avalon, where King Arthur was buried, is also here.

Godfrey (*gōd'-fri*). From the Teutonic, meaning "God's peace." *Danish*, Gottfried; *Dutch*, Godfried; *Fr.*, Godefroi; *Ger.*, Gottfried; *It.*, Goffredo; *Lat.*, Godfridus.

Godwin (*gōd'-wīn*). From the Teutonic, meaning "divine friend," or "victorious in God." *Dutch*, Godewijn; *Lat.*, Godwinus.

Golconda (*gōl-kōn'-dā*). A place in India, seven miles northwest of Hyderabad. It is noted for its fort, for the mausoleums of the ancient kings, and for the diamonds which were cut and polished here. It was the capital of a kingdom from 1512 until its overthrow by Aurungzebe in 1687.

Gold Coast. That portion of Guinea on the west coast of Africa where gold is found.

Golden Gate, California. Bay in California, named by Colonel Frémont, before the discovery of gold in the country, because of the brilliant effect of the setting sun on the cliffs and hills.

Golden Gate, Constantinople. A gate in the wall of Theodosius, now walled up because of a Turkish tradition that the conqueror of Constantinople is destined to enter through it. It consists of three arches between two huge towers of white marble. The great central arch was reserved for the passage of the emperor.

Golden House. Palace of the Emperor Nero in ancient Rome, which occupied the valley between the Palatine and the Esquiline, and connected the palaces of the Cæsars with the gardens of Mæcenæ. It was built after the great fire of 64 A. D., and was so large that it contained porticos 2,800 feet long and inclosed a lake where the Colosseum now stands. The forecourt contained a colossus of Nero 120 feet high.

Gotham (*gō'-thām*). At one time the term was applied to a parish of Nottingham, England. The people here were famed for their stupidity and simplicity, which obtained for them the satirical appellation of the "wise men of Gotham." Many nations have designated some particular locality as the paradise of fools; for example, Phrygia was the fools' home in Asia, Abdera of the Thracians, Bæotia of the Greeks, Swabia of the modern Germans, etc. To Americans it is chiefly significant as a colloquial term for the city of New York. Thus applied, it first appeared in "Salmagundi," by Washington Irving and James K. Paulding, and is supposed to hint sarcastically at the worldly wisdom of its inhabitants.

Gothland (*gōth'-land*). Indicated a settlement of the Goths.

Gottlieb. See Theophilus.

Governor's Island. From its former Dutch owner, Governor Van Twiller; previously called *Nutten Island*, Indian name *Paggauck*.

Grace. A feminine form of the Roman *Gratius*; from *gratia*, "grace, favor, good-will, kindness." *Dutch*, Gratia; *Fr.*, Grace; *It.*, Grazia; *Lat.*, Gratia.

Graham (*grā'-ām, grām*). From the Gaelic *gruama*, "surly, stern, morose, dark, gloomy."

Granada (*grā-nā'-dā*). The capital of the province of Granada, Spain, situated on the Jenil, on spurs of the Sierra Nevada. It is famous for the Alhambra (which see). The name is from the Spanish, *Granada*, "pomegranate," because the city is built on four hills divided somewhat like the divisions of a pomegranate.

Grand Canal. The principal canal of Venice. It runs in the form of the letter S through the center of the city, from the railway station to Santa Maria del Salute.

Grand Manan Islands, Me. A compound word

meaning "great island." English, *grand*; Indian, *munnohan*, "the island." Also spelled *Menan*.

Grand Prix (*grän prē'*), **The**. The great horse-race at Longchamps, Paris, established by Napoleon III. (prize 20,000 francs), run by three-year-olds. Longchamps is a very good course situated in the Bois de Boulogne, first used for racing in the reign of Louis XVI. Races have been run here since 1859. The Grand Prix is run on the Sunday of Ascot week.

Grand Prix de Rome (*grän prē' dū rōm*). A prize given by the Academy of Fine Arts in Paris to the most successful competitor in painting, sculpture, engraving, architecture, or music. The examinations are held annually, and the successful candidates become pensioners of the government for four years. They are sent to reside at Rome, where Louis XVI. founded the Academie de France in 1666.

Grasmere. One of the group of English Lakes, meaning "the lake of swine."

Great Barrington. Town in Berkshire, Massachusetts, named for William, Lord Barrington.

Great Bear Lake. So called owing to its northern situation, and on account of the northern constellation of the Great and Little Bear.

Great Mogul. An extinct title borne by the chief of the Moguls of the empire founded in Hindustan by Baber, Fifteenth Century.

Great Salt Lake. Received its name on account of the saline character of its waters.

Great Tom. A bell, weighing about 17,000 pounds, in the tower of the Tom Gate of Christ Church, Oxford. Every night at ten minutes past nine (closing time) it is tolled.

Great Wall of China. A wall begun by the Emperor Tsin Chi-hwangti 214 B. C. and finished 204 B. C. as a defense against northern tribes. It extends from Shanhaikwan along the northern frontiers of Chihli, Shansi, Shensi, and Kansu. Length about 1,500 miles.

Greece. The modern form of the Latin *Græcia*, from the Greek *Graikoi*, a name originally bestowed upon the inhabitants of Hellas.

Greeley. City in Colorado, county and city in Kansas, and county in Nebraska, named for Horace Greeley.

Green Bay, Wis. Located on its shores were a tribe of Indians, whose mode of life was so filthy, when first met by the French, they designated them as the Puans (*puans*, "stinkards"). To the bay they gave the name of Baye de Puans, and transposition through pronunciation carried it to *Grand Bay* and *Grun Bay* to *Green Bay*.

Greenland. The name given by Eric the Red in 983 to the sheltered nook where he founded his colony from Iceland, thinking that "much people will go thither if the land has a pleasant name." The name is not altogether unsuitable, as the place chosen by Eric for the settlement which he named Greenland is the pleasantest spot in the country, a smooth grassy plain at the head of Igaliko fiord, near the modern Julianshaab. The name was afterwards inappropriately extended to the whole ice-clad country.

Green Mountains, Vt. Translation of the adaptation of the French name "*vert-monts*."

Green River, Ky. In honor of General Nathaniel Greene of the Revolution. The letter *e* was originally added to the name of the river.

Greensboro, N. C. Compliment to General Nathaniel Greene, he having had a victorious skirmish at this locality, during his famous retreat in 1781.

Green Sea. Otherwise the Persian Gulf, owing to a peculiar strip of green always discernible along the Arabian shore.

Gregory (*grēg'-ō-rē*). From the Latin name *Gregorius*, from the Greek *Gregorios*, "to watch." The name means "watchful." *Danish*, Gregor;

Dutch, Gregorius; *Fr.*, Gregoire; *Ger.*, Gregor; *Gr.*, Gregorios; *It.*, Gregorio; *Lat.*, Gregorius; *Sp.*, Gregorio; *Sw.*, Gregorius.

Griffith. The English form of the Welsh name *Gryffydd*. *Danish*, Griffith; *Dutch*, Rufinus; *Lat.*, Griffithius; *Sw.*, Rufin.

Grisons (*grē-zōn'*). From the German *Graubünden*, "the gray league," so called from the dress worn by the Unionists in 1424.

Grosvenor (*grōv'-nēr*) **Gallery.** A gallery for the exhibition of paintings of the modern æsthetic school, established by Lord Grosvenor in New Bond Street, in 1876. Pictures were received only by invitation. The exhibitions have been for some time discontinued.

Grosvenor Square. A fashionable square in London, east of Hyde Park. It was laid out before 1716 and has been the residence of many famous men. There is great variety of styles in its architecture, and it is noted for the old ironwork and flambeau extinguishers before many of the doors.

Guatemala (*gō-tē-mā'-lā*. Spanish, *gwā-tā-mā'-lā*). Is a European rendering of the Mexican *quah-temali*, signifying "a decayed log of wood"; so called by the Mexican Indians who accompanied Alvarado into this region, because they found an old worm-eaten tree near the ancient palace of the kings, or *Kachiquel*, which was thought to be the center of the country.

Guglielmo (*gōōl-yēl'-mō*). See William.

Guido (*gwē'-dō*). See Guy.

Guildhall (*gīld'-hōl*). The council hall of the city of London, founded in 1411, and restored after the fire of 1666. The great hall measures 153 by 48 feet, and is 55 feet high; it has a handsome open-framed roof, modern colored glass windows, and the two legendary colossal wooden figures of Gog and Magog. Along the walls are placed statues of famous men. The crypt, with its cloistered columns, is of the original construction and is interesting.

Guillaume (*gē-yōm'*). See William.

Guinea (*gīn'-ē*). A native West African term, meaning "abounding in gold."

Guinea, English. The English *guinea* was first coined in 1673. It derived its name from the fact that the gold of which it was first composed came from *Guinea*.

Gulf of Carpentaria. This gulf preserves the memory of a Dutch captain named Carpenter, who discovered it in 1616.

Gulf of St. Lawrence. Was first explored, and the navigation of the long river of the same name commenced, on the Feast of St. Lawrence, 1500.

Gustavus (*gūs-tā'-vūs*). From the Swedish name *Gustaf*, which some translate "Goth's staff"; others derive it from the Su-Goth *God*, "God" or "good," and *staf*, "staff." *Gustaf* is more probably corrupted from Augustus. *Dutch*, Gustavus; *Fr.*, Gustave; *Ger.*, Gustav; *Lat.*, Gustavus; *Sw.*, Gustaf.

Guy (*gī*). Probably derived from French *gui*, "mistletoe," or from Guillaume (William), whence the diminutives, Guyot and Guion. *Danish*, Guido; *Dutch*, Guido; *Fr.*, Guy; *Ger.*, Veit; *It.*, Guido; *Lat.*, Guido; *Sw.*, Guido.

Gwendolen (*gwēn'-dō-lēn*). A Welsh female name. Sometimes translated "the lady of the bow"; others translate the name "white-browed."

Hackensack, N. J. From the river of same name, which is a corruption of its Indian name *haucquansauk*, "hook mouth," from its shape near the mouth, from its many windings before it empties into Newark Bay.

Hadrian's (*hā'-drī-an*) **Villa.** Now simply an assemblage of ruins, about fifteen miles from Rome, near Tivoli, perhaps the most impressive in Italy. It included the Greek and Latin theaters, so called, an odeum, thermæ, a stadium, a palace, several temples, spacious structures for guards and attend-

ants, and many subsidiary buildings and devices. Of most of these there are extensive remains; and here were found many of the fine statues now in Roman museums.

Hadrian's Wall. One of the most noted Roman antiquities of Great Britain, constructed by Hadrian between the Solway Firth and the mouth of the Tyne, for purposes of defense. The work has been ascribed to Severus and others, "but after a long debate the opinion now prevails that the whole system of defense bears the impress of a single mind, and that the wall and its parallel earth-works, its camps, roads, and stations, were designed and constructed by Hadrian alone."

Hagar (*hā'-gār*). From the Hebrew *Haghar*, which some translate "flight"; others render the name "stranger," from *gur*, "to tarry, to be a sojourner." *Arabic*, Hajar, or Hagar; *Fr.*, Agar; *Lat.*, Hagar.

Haidee (*hī-dē'*). A female name which Stephanus renders "sempiternus," i. e., "perpetual, eternal."

Halifax, Nova Scotia. Named for the Earl of Halifax.

Hamlet. From the Old German *amal-laut*, "distinguished for spotlessness." According to some the name in Hamlet's country was pronounced Amlet, and signified "madman," but no etymology has been suggested for such rendering.

Hampden. County and town in Massachusetts and a town in Penobscot County, Maine, named for the English patriot, John Hampden.

Hampton (*hāmp'-tūn*) **Court.** A royal palace on the Thames twelve miles from Charing Cross, built by Cardinal Wolsey. Hampton Court is most intimately associated with James I. and William III., and was a place of imprisonment of Charles I.

Hampton Roads. A channel connecting the estuary of James River with Chesapeake Bay, situated south of Fort Monroe, Virginia. Here, March 8, 1862, the Confederate ironclad "Virginia" ("Merrimac") destroyed the Federal frigates "Cumberland" and "Congress"; and the following day there was a contest between the "Virginia" and the ironclad "Monitor," the former retiring. This was the first engagement between ironclads in our history.

Hannah (*hān'-nā*). From the Hebrew *Hannah*, which Simonis translates "gratuitous gift," i. e., "grace, mercy." *Danish*, Hanne or Hanna; *Dutch*, Hanna; *Fr.*, Anna; *Lat.*, Hanna; *Sw.*, Hanna.

Hannibal (*hān'-nī-bal*). From the Punic, meaning "grace of Baal," or, more freely, a "gracious lord." *Fr.*, Hannibal; *It.*, Annibale; *Lat.*, Hannibal.

Hanover Island. In honor of the house of Hanover.

Hanover (*hān'-ō-vēr*) **Square.** A square in the West End of London, south of Oxford Street and west of Regent Street. It received its name in the days of the early popularity of George I. St. George's, Hanover Square, is noted as a fashionable church for marriages in London. The square was built about 1731, when the place for executions was removed from Tyburn, lest the inhabitants of the "new square" should be annoyed by them. It contains a bronze statue of William Pitt by Chantrey.

Hans. See John.

Hapsburg (*hāps'-bürg*), or **Habsburg.** In Canton Aargau, the stamm-schloss of the Austrian dynasty, appears in an Eleventh Century document as Habechisbure, "hawk's castle." According to the well-known legend, Radbot, an ancestor of Rudolf of Hapsburg, while hunting in the Aargau lost his favorite hawk, and found it sitting on the ridge of the Wulpelsberg. He was so delighted with the view from the spot that he chose the site for the erection of a castle, which he built about 1020 and called Habichtsburg.

Hapsburg Castle. See Hapsburg.

Harlem or Haarlem. In Holland, called *Hara-lem* in a Ninth Century document, is a name of doubtful meaning. In Old Saxon we have *lemo*, "clay" or "mud," and *hara*, "an estuary," and the dialect-word *har* or *haar* denotes a rising ground or small eminence. Harlem, now a suburb of New York, stands on the Harlem River, a tidal channel. With Brooklyn and Hoboken it is one of the few names surviving from the time of the Dutch occupancy.

Harold (*här'-öld*). The same with the Middle High German names *Ariold*, *Harhold*, etc., which Wachter translates "powerful in battle," "a champion." *Danish*, Harald; *Dutch*, Herold; *Fr.*, Harold; *It.*, Araldo; *Lat.*, Haroldus.

Harper's Ferry, Va. Robert Harper of Oxford, England, an architect, en route to Winchester, saw this pass, bought land here and formed a settlement in 1734. Later he established a ferry at this point, known as "Harper's Ferry."

Harriet (*här'-rĭ-ĕt*). From the German *Henriette*, "head of the house." *Danish*, Henriette; *Dutch*, Henrietta; *Fr.*, Henriette; *It.*, Enrichetta; *Sp.*, Enriqueta; *Sw.*, Henrietta.

Harrisburg, Pa. From its first settler, John Harris of Yorkshire, England, founded in 1785, subsequently changed to Louisbourg; in 1791, changed back to Harrisburg.

Hartford. Name transferred from Hertford, England, to many places in the United States, the capital of Connecticut being one of these.

Harvey. A masculine name, from Old German *her-wig*, "noble," "noble soldier or warrior."

Harz (*härts*) or **Hartz Mountains.** In German *Harzgebirge*, were called in the Eighth Century *Hart* (Old Saxon *hard*, Old High German *hart*, "wood" or "forest"). The present spelling, Harz, is supposed to be due to a folk etymology which has made the name into Harzwald, the "forest of resin" (*harz*). The Hardt, a wooded range of hills near Carlsruhe, is the "wood."

Hatteras, Cape, N. C. Application to the headland made by early English navigators, from a tribe of Indians inhabiting its shores, the *Hatterask* or *ash*.

Havana (*há-văn'-à*). Capital city of Cuba, city in Mason County, Illinois, named for former. The word is Spanish, meaning "harbor."

Havre (*hä'-vēr*). The "haven" at the mouth of the Seine was, before 1515, merely a fishing village with a chapel dedicated to Notre Dame de Grace, whence the official name Le Havre de Grace. The French *havre*, "a harbor," is descended from the Old French *havle*, originally *hable*, which is derived from the Low-Latin *habulum*, a word of Teutonic origin related to the English *haven*.

Hawarden (*här'-dĕn*). A town in Flintshire, North Wales, sixteen miles south of Liverpool. Near it is Hawarden Castle, once the residence of Gladstone, the British statesman.

Hawthornden (*hō'-thörn-den*). A picturesque glen or valley in Edinburghshire, Scotland, eight miles south of Edinburgh. The estate of Hawthornden was the property of the poet William Drummond.

Haymarket, The. A London market, established in 1644 on the site now partly covered by the Criterion restaurant and theater and Lower Regent Street. It was abolished in 1830. The place is called Haymarket Square, or the Haymarket.

Hayti (*hā'-tĭ*. French, *ā-ē-tē'*). A native name, meaning "mountainous country."

Hebe (*hē'-bē*). A female name, derived from Hebe, daughter of Jupiter and Juno, or of Juno only; and who, being fair and always in the bloom of youth, was called "the goddess of youth."

Hebrides (*hĕb'-rĭ-dĕz*). Anciently referred to by Ptolemy as the *Ebudæ*, and by Pliny as the *Hebudes*, denoting the "Western Isles."

Hector (*hĕk'-tōr*). From the Greek name *Hektor*. The name signifies "anchor," literally, "what holds"; also translated a "defender." *Fr.*, Hector; *It.*, Ettore; *Lat.*, Hector.

Heinrich (*hĭn'-rĭch*). See Henry.

Helen (*hĕl'-ĕn*), or **Helena** (*hĕl'-ĕ-nā*). From the Greek *Helene*, signifying "a lamp, a torch," hence "brightness." *Danish*, Helena; *Dutch*, Helena; *Fr.*, Hélène; *Ger.*, Helene; *It.*, Elena; *Lat.*, Helena; *Sp.*, Elena.

Helena (*hĕl'-ĕ-nā*), **Mont.** From the Latinized Greek word Helen. John Sommerville suggested it at a meeting of several hundred miners, in 1864, as a name for the settlement. Opinions differ, however, as to the origin of the name, for by some it is supposed to be named for Helen of Troy. The Helena Historical Directory of 1879 says it was named by John Somerville, of Minnesota, St. Helena, from the resemblance in its location to that of the original St. Helena. It was then voted to drop the prefix Saint, and that was done.

Heligoland (*hĕl'-ĭ-gō-lānd*). Now a German island, expresses the Danish for "holy land settlement."

Helsingfors (*hĕl'-sĭng-fōrs'*), in **Finland.** From the tribal name of the Helsings, and *fors*, "a waterfall." We have cognate names Helsingland and Helsingborg in Sweden, and Helsingor in Denmark.

Helvetia (*hĕl'-vē'-shĭ-ā*). The old Latin name of Switzerland; often used as a poetical appellation in modern literature. The country is often mentioned as the "Helvetian Republic," and that is still the official name.

Henderson, Ky. After the county, which received its name in honor of Col. Richard Henderson.

Henlopen (*hĕn-lō'-pĕn*), **Cape, Del.** From a Dutch expression, *en lofen*, meaning "to run in," as indicating the place of entrance to a bay. Previously named Cornelius by the Dutch commander, Mey, after his Christian name.

Henri (*ān-rē'*). The French form of Henry.

Henrietta (*hĕn-rĭ-ĕt'-tā*). A name formed from Henry.

Henry. Usually rendered "home-ruler," or "chief of the house." The Gothic name is *Heinric*, the Anglo-Saxon *Henric* and *Cynric*, and the North High German, *Heinrich*; but all these names are the same as the old Hunoricus, from *kunreich*, "illustrious for strength." The English name Henry, formerly also Henrie, Henri, Herry, now Harry, is derived from the Old French and French *Henri*. *Danish*, Hendrik; *Dutch*, Hendrik; *Ger.*, Heinrich; *It.*, Enrico, or Errico; *Lat.*, Henricus; *Port.* Henrique; *Sp.*, Enrique; *Sw.*, Henrik.

Henry, Cape, Va. Named by Admiral Newport in April, 1607, in honor of Henry, Prince of Wales, son of James I. of England.

Herat (*hĕr-āt'*). Anciently *Aria-Civitas*, the town on the Arius, now the River Heri.

Herbert (*hĕr'-bĕrt*). A name derived from the Alemannic Heribert, Heribret, Heripreht, Old German *Aribert*, which Wachter derives from *aerbert*, "illustrious lord." *Lat.*, Herbertus; *Sw.*, Herbert.

Herculaneum (*hĕr-kū-lā'-nē-ŭm*). An ancient city of Campania, Italy, near the coast, six miles southeast of Naples, directly at the foot of Mount Vesuvius. The ancient Greek name was *Herakleion*, "city of Hercules."

Hercules (*hĕr'-kū-lēz*). From the Greek *Hera* and *Kleos*, "glory or fame"; hence the "glory of Hera." *Fr.*, Hercule; *Ger.*, Hercules; *Gr.*, Herakles; *It.*, Ercole; *Lat.*, Hercules.

Herman (*hĕr'-man*). From the Teutonic, meaning the "leader of an army." *Danish*, Hermann; *Dutch*, Herman; *Fr.*, Armand or Armant; *Ger.*, Hermann; *Lat.*, Arminius; *It.*, Ermanno; *Sw.*, Herman.

Hermione (*hĕr-mĭ'-ō-nē*). A name derived from *Hermione*, a daughter of Mars and Venus, and who married Cadmus.

Hermitage, The. A palace at St. Petersburg, Russia, founded by Catharine II., originally in the form of a pavilion of moderate size, but rebuilt in the Nineteenth Century in a neo-Greek style of excellent effect, and forming one of the best-designed museums existing. Also the name of the home of President Jackson, near Nashville, Tenn.

Hero. Female name, so called after the celebrated Greek name *Hero*, "one raised or elevated."

Herold. See Harold.

Hester. See Esther.

Hetty, Hetty. Female names derived from Henrietta; perhaps also from Harriet.

Hezekiah (*hēz-ē-kī'-ā*). From the Hebrew *Hizkeyyah*, from *hhezek-Yah*, "the strength of Jehovah," or "cleaving to the Lord." *Dutch*, Hiskia; *Lat.*, Hezekias.

Hieronymus (*hī-ē-rōn'-i-mūs*). See Jerome.

Highlands, The. A district in northern and western Scotland, of vague limits. It includes the Hebrides, the counties of Argyll, Inverness, Ross and Cromarty, Sutherland and Caithness, and parts of Nairn, Elgin, Banff, Aberdeen, Kincardine, Forfar, Perth, Stirling, Dumbarton, and Bute. The inhabitants are mainly of Keltic stock. The Highlands are celebrated for romantic scenery; they contain the highest mountains in Great Britain.

Highlands of the Hudson. A range of hills and low mountains in eastern New York, in Orange, Putnam, Dutchess, and Rockland counties. Prominent points are Fishkill Mountain, Storm King, Crow's Nest, Donderberg, Anthony's Nose, and West Point.

Hilary (*hīl'-ā-rī*). Derived from the Latin name *Hilarius*, signifying "pleasant, cheerful, merry." *Danish*, Hilarius; *Dutch*, Hilarius; *Fr.*, Hilaire; *It.*, Ilario; *Lat.*, Hilarius; *Sw.*, Hilarius.

Hilda. A female name abbreviated from *Everhilda*; or derived from the Lombardian word *hild*, "noble."

Hildebrand (*hīl'-dē-brānd*). The same as Teutonic names *Hildebrand* and *Hiltiprant*. Translated "very fervent," "hero," "leader," etc. *Watcher* claims the name to be the same as *Childebrand*, from *child-brand*, which might be translated either "distinguished youth," or "distinguished warrior."

Himalaya (*hī-mā'-lā-yā*). From the Sanskrit, *hima*, "snow," and *alaya*, "abode, dwelling." Hence, "the abode of snow."

Hindustan (*hīn-dō-stān'*, *hīn-dō-stān'*). A Persian term signifying the country or place of the Hindus or Indians. *Hindu* is the Persian form of the Sanskrit *Sindhu*, "a dweller on the Indus," which means the river.

Hoang-Ho (*hō-āng-hō'*). In China, this is the "yellow river," which borders Ho-Nan, the province "south of the river," and flows into the Hoang-Hai, or "yellow sea," so called because discolored by the yellow mud brought down by the Hoang-Ho.

Hoboken (*hō'-bō-kēn*). In New Jersey, opposite New York, often said to be a native name meaning "the smoked pipe," marking the spot where the first colonists smoked the pipe of peace with the Indian chiefs. It is more likely, however, a reminiscence of the Dutch village of Hoboken, three miles from Antwerp.

Hohenzollern (*hō'-ēn-tsōl-ērn*) **Castle.** A castle situated in the Swabian Alp, near Hechingen, southern Germany, belonging to the present Prussian royal family. It is the ancestral home of Emperor Wilhelm II. of Germany.

Holland. Supposed to be derived from *ollant*, or *holtland*, "marshy ground." Taylor gives the translation of *holtland* as "woodland," that is, the forest around Dordrecht.

Holyoke (*hōl'-yōk*). City in Hampden County, Mass., and mountain in same county, named for Rev. Edward Holyoke, an early president of Harvard College.

Holyrood (*hōl'-i-rōod*) **Palace.** An ancient royal palace of Scotland, situated in Edinburgh. It was originally an abbey, founded in 1128; was several times burned and was the scene of the murder of Rizzio, 1566. It was once the place of residence of Mary, Queen of Scots.

Homer. An English baptismal name at the present time. From the classical name, in Greek, *Hōmeros*, signifying a "pledge, security, hostage."

Honduras (*hōn-dōō'-rās*). Spanish for "deep water."

Hong Kong (*hōng'-kōng'*). The place of fragrant streams.

Honora. An Irish female name derived from the Latin name Honor.

Honorio. A female name derived from the Roman name *Honorio*, the feminine of Honorius; from root of Honor.

Hoosac. River in Massachusetts, New York, and Vermont. Derived from the Mohican Indian *wudjoo*, meaning "a mountain," and *abic*, "a rock." Spelled also *Hoosic* and *Hoosick*.

Hopatcong (*hō-pāt'-kōng*). Lake in New Jersey. An Indian name, meaning "stone over water," because of an artificial causeway of stone which connected an island of the lake with the shore.

Hope. Found frequently as a female name. From the Anglo-Saxon, meaning "expectation."

Horace. From the classical name, *Horatius*, which Littleton translates, "worthy to be looked upon, or becoming in appearance." *Danish*, Horats; *Dutch*, Horatius; *Fr.*, Horace; *Ger.*, Horaz; *It.*, Orazio; *Lat.*, Horatius; *Port.*, Horacio; *Sp.*, Horacio.

Horatio (*hō-rā'-shī-ō*). From the root of Horace.

Horatius (*hō-rā'-shī-ūs*). See Horace.

Horse Latitudes. So called because situated between the trade winds and the westerly winds of higher latitudes, and distinguished for tedious calms. It received this name because it was in this portion of the Atlantic the old navigators often threw overboard the horses which they had undertaken to transport to the West Indies.

Hotel des Invalides (*ō-tēl'-dā zān-vā-lēd'*). Freely translated, "Soldiers' Home." A great establishment founded in 1670 at Paris for disabled and infirm soldiers. The interior possesses halls adorned with interesting military paintings, and contains the Musée d'Artillerie, which includes a remarkable collection of medieval and Renaissance armor. It contains also the tomb of Napoleon I.

Hotel de Ville (*ō-tēl'-dū vēl*), **Paris.** A celebrated building of great size, burned by the French Commune in 1871, but carefully restored and much enlarged. The exterior is richly adorned with sculpture. The rooms of state display splendid sculptures and wall-paintings by the most distinguished contemporary artists.

Hottentot. The early Dutch settlers at the Cape of Good Hope were much struck with the *click* which forms such a distinct feature of the Caffre languages, and which sounded to them like a perpetual repetition of the syllables *hot* and *tot*. From these sounds they gave the natives the name of *Hott-en-tot*; *en* in the Dutch language meaning "and."

Housatonic (*hōō-sā-tōn'-īk*). River of Massachusetts and Connecticut. From the Indian words *wussi*, "beyond," and *adene*, "mountain," meaning "beyond the mountain." According to other authorities from the Indian words *wassa*, "proud," *aton*, "stream," and *ick*, from *azhubic*, meaning "rocks," the whole meaning "proud river flowing through the rocks."

Houston (*hūs'-tōn*), **Texas.** In honor of General Samuel Houston, the first president of the Texan Republic. This name is borne by many places in the United States, generally given in honor of Gen. Houston, among them being counties in Minnesota, Tennessee, and Texas; city in Chickasaw County,

Mississippi, and the city in Texas County, Missouri.

Hubert (*hū'-bērt*). From the German name *Hugobert*, which Wachter derives from *hug-bert*, "distinguished for memory or prudence." *Danish*, Hubertus; *Dutch*, Hubertus; *Fr.*, Hubert; *Lat.*, Hubertus; *Sw.*, Hubertus.

Hudson River, N. Y. Named in honor of Henry Hudson, an English navigator in the Dutch service who ascended the river in 1607. He called it "the Great River," or "Great River of the Mountains," from the extraordinary circumstance of such a body of water flowing through the mountains without a cataract. The Dutch gave the name of *Mauritus River*, in honor of Prince Maurice, to the section above New York Island.

Hudson's Bay and Hudson's Strait. So named after their rediscovery by Captain Henry Hudson, while searching for the northwest passage in 1610. Prior to this date the Bay and the Strait had not been navigated since their original discovery by Cabot in 1512.

Hugh (*hū*). Derived from the Teutonic *hoog*, or *hugr*, "high, tall, elevated"; also translated as "mind," "thought." *Danish*, Hugo; *Dutch*, Hugo; *Fr.*, Hugues; *It.*, Ugo; *Lat.*, Hugo; *Sw.*, Hugo.

Hulda. A female name, from the Hebrew *Huldah*, signifying "a mole or weasel."

Humboldt (*hūm'-bōlt*). German, *hōom'-bōlt* **River, Nev.** Named by General John C. Frémont in honor of Baron von Humboldt, prior to which it was known as "Mary's River," also "Ogden River."

Humphrey (*hūm'-fri*). The same as *Cundfrid*, which Wachter translates "illustrious protector," or "support of peace." *Dutch*, Humfried; *Fr.*, Onfroi; *It.*, Onofredo; *Lat.*, Humphredus or Onuphrius; *Sw.*, Humfrid.

Hungary (*hūng'-gá-rí*). Because originally inhabited by the Huns, who were first heard of in China, in the Third Century B. C., as *Hiong-nu*, "giants."

Huron (*hū'-rōn*). One of the Great Lakes of North America. Opinions differ as to the classification of the name, whether French or Indian, and to its meaning. According to some authorities it is a corruption of the name "Hure," given a tribe of Indians by the French, the word meaning "head of a wild boar," applicable on account of their unkempt appearance; another authority says it is derived from the Indian words *Ohkwe honwe*, "true man"; by others to have been corrupted by the French from the Indian *Irri roron*, "cat-tribe."

Hyde Park. A park in Westminster, London, situated two and one-fourth miles south by west of St. Paul's. This was originally the manor of Hyde, belonging to the Abbey of Westminster. It became Crown property at the dissolution of the monasteries in 1539. It contains about 400 acres.

Iceland. Was called *Snæland*, the "land of snow," by the Viking, Naddodd, who discovered it in 868. On account of the ice-floes which then beset the northern coast, Floki, who followed him, called it *Island*, of which Iceland is the English translation.

Ichabod (*ik'-ā-bōd*). From the Hebrew *Iykhabodh*, which Simonis renders "inglorious."

Idaho. From the Indian words *Edah hoe*, descriptive of the sheen on the mountains, occasioned by the light on the snowy summits, expressed in English "gem of the mountains," or, literally, the first appearance of the sun after sunrise on the mountain tops.

Iddo. Male name from the Hebrew *Iddo*, signifying "love of Him," i. e., of the Lord.

Ignatius (*ig-nā'-shī-ūs*). From the Greek *Ignatios*, "ardent, fiery." *Dutch*, Ignatius; *Fr.*, Ignace; *Ger.*, Ignaz, or Ignatius; *Gr.*, Ignatios; *It.*, Ignacio; *Lat.*, Ignatius; *Sp.*, Ignacio, or Inigo.

Ile de France (*ēl-dū-frāns'*), "Isle of France."

An ancient government of France. It was the portion of the country about Paris that was most completely under the control of the kings, i. e., the royal domain.

Ilium (*il'-ī-ūm*). In ancient geography, a place in Mysia, Asia Minor, identified by the Greeks with the legendary Troy. It was frequently destroyed in prehistoric times; was rebuilt by Greek colonists in the Sixth Century B. C., and continued (as New Ilium) to late Roman times. Its site has been identified by Schliemann at Hissarlik, about 100 miles north by west of Smyrna.

Illinois (*il'-līn-oi'*, *il'-līn-oi-z'*). State of the United States. One authority gives it as a combination of the Indian word *Illini*, meaning "men," and the French suffix *ois*, meaning "tribe," "band of men."

India. Means the country traversed by the Indus, or rather the *Hindu*, which name is a Persianized form of the Sanskrit *Sindhu*, "a great river," rendered *Hindos* in the Greek.

Indiana. From the word Indian, first applied in 1768 to a grant of land north of and near the Ohio River, which was obtained that year by a company of traders from the Indians.

Indianapolis, Ind. Literally, the City of Indiana, from *Indiana* and *polis*, "city." This name was proposed by Judge Jeremiah Sullivan of Jefferson County, Ind., being preferred to *Tecumseh* and *Suwarrow*, which were suggested.

Indian Ocean. Indicative of its geographical position.

Inigo (*in'-i-gō*). Another spelling of Innigo or Enneco, and derived probably from *Ignatius*, or corrupted from *Heinrich*.

Innocent (*in'-nō-sēnt*). From the Latin, meaning "harmless." *Dutch*, Innocentius; *Fr.*, Innocent; *Ger.*, Innocenz, or Innocentius; *It.*, Innocente; *Lat.*, Innocentius; *Sp.*, Inocencio.

Innsbruck (*ins'-prōōk*). Means "at the bridge," on the River Inn.

Inns of Court. Legal societies in London which have the exclusive privilege of calling candidates to the bar, and maintain instruction and examination for that purpose; also the precincts or premises occupied by these societies respectively.

Iowa. A French form of the Indian word *Ayuhba*, signifying "the drowsy or the sleepy ones." Written at first *Aioues*, and applied to a tribe of Indians, would seem to be simply *Ajava*, "across, beyond," as if to say, "the tribe beyond the river."

Ira (*ī'-rá*). A male name, from the Hebrew, *Ira*, "watchful."

Ireland. Was the Roman *Hibernia*, the Greek *Ierne*, and the Keltic *Erin*. The usual explanation of the name is from the Keltic *iar*, "behind," and hence "to the west," or "western isle."

Irene (*ī-rē'-nē*, or *ī-rēn'*). A female name. From the Greek *Eirene*, "goddess of peace," literally, peace. *Fr.*, Irène; *Ger.*, Irene; *It.*, Irene.

Irish Sea. So named from its geographical position.

Irmgard or Ermgard (*irm'-gárd*). Anglicised form of the Teutonic *Ermengarde* or *Irmgarde*, meaning a "public benefactor."

Isaac (*ī'-zák*). From the Hebrew *Yitschhak*, which some translate "laughing"; others "sporting." *Arabic*, Ishak; *Danish*, Isak; *Dutch*, Izaak; *Fr.*, Isaac; *Ger.*, Isaak; *Hungarian*, Izsak; *It.*, Isacco; *Lat.*, Isaacus; *Polish*, Izaak; *Sw.*, Isak.

Isabel (*iz'-ā-bēl*), **Isabella** (*iz'-ā-bēl'-lá*). According to some this name is the same as Jezebel, which Tregelles thinks may mean "without cohabitation," i. e., "chaste," "modest." Another derivation is that it is the same as Elizabeth; but Isabella is rather from Isabel, the Spanish rendering of Elizabeth. *Dutch*, Isabelle; *Fr.*, Isabelle; *Ger.*, Isabelle; *It.*, Isabella; *Lat.*, Isabella; *Sp.*, Isabel; *Sw.*, Isabella.

Isaiah (*ī-zā'-yá*). From the Hebrew *Y'sha-yahu*; from *yeshā-Yahu*, "the salvation of Jehovah."

Danish, Isaias; *Dutch*, Jezajas; *Fr.*, Isaie; *Ger.*, Esaias; *It.*, Isaia; *Lat.*, Esaias; *Port.*, Isaias; *Sp.*, Isaias.

Ischl (ish'l). A famous watering-place in Upper Austria, situated at the junction of the rivers Ischl and Traun, twenty-seven miles east by south of Salzburg. It is the favorite resort of the Austrian royal family and nobility, and contains salt and other baths. It is the central point in the Salzkammergut.

Ishmael (ish'-mā-ēl). Hebrew for "God hath heard." *Arabic*, Ismaeel, or Ismail; *Fr.*, Ismael; *It.*, Ismaele; *Lat.*, Ishmael.

Isidore (iz'-i-dōr). From the Latin, *Isidorus*, which some translate "strong gift." The name signifies "gift of Isis." *Dutch*, Isidorus; *Fr.*, Isidore; *Gr.*, Isodoras; *It.*, Isidoro; *Lat.*, Isidorus.

Island of Desolation. Was so designated by Captain Cook owing to the absence of all signs of life.

Isle of Bourbon (bōōr'-būn. *Fr.* bōōr-bōn'). When settled by the French, it was so named for the Bourbon family.

Isle of Man. Is the modern designation of Mona Island, by which was meant, agreeably to the Keltic *maen*, "a stone," rocky island.

Isle of St. Helena (hēl'-ē-nā). Discovered on the Feast of St. Helena, 1502.

Isle of Wight (wīt). It originally denoted the island of the Wyts, or Jutes.

Israel (iz'-rā-ēl). From the Hebrew, meaning "prevailing with God." *Fr.*, Israel; *Ger.*, Israel; *Lat.*, Israel.

Italy. Was so called after Italus, one of the early kings of the country.

Itasca. County and Lake in Minnesota, into which flows the head waters of the Mississippi, and named on this account, Itasca, from the two Latin words *veritas caput*, "the true head." Schoolcraft notes derivation from *ia*, "to be," and *totosh*, "the female breast," signifying source of the river.

Ithaca (ith'-ā-kā). City in Tompkins County, New York, and village in Gratiot County, Michigan, named for one of the Ionian Islands, supposed to be the one celebrated in the Homeric poems as the Kingdom of Ulysses.

Ivan (ē-vān'). See John.

Jabez. From the Hebrew *Yabets*, which Simonis renders, "he will cause pain," i. e., to his mother.

Jackson, Miss. So named in honor of General Andrew Jackson.

Jacksonville, Fla. In honor of President Andrew Jackson, named in 1822.

Jacob (jā'-kōb). From the Hebrew, *Yaakob*, which Tregelles translates, "taking hold of the heel, supplanter, layer of snares." *Arabic*, Yakoob, or Ya'kūb; *Danish*, Jakob; *Dutch*, Jacob, or Jakob; *Fr.*, Jacob; *Ger.*, Jakob; *Hungarian*, Jakob; *It.*, Giacobbe; *Lat.*, Jacobus, or Jacob; *Polish*, Jakob; *Sw.*, Jakob.

Jaffa (jāf'-fā, yāf'-fā) or **Joppa** (jōp'-pā). From the Semetic, Yapho, "beauty."

Jamaica (jā-mā'-kā). A corruption of Xaymaco, a native West Indian name signifying "the country abounding in springs."

James. A name corrupted from Jacobus. *Danish*, Jakob; *Dutch*, Jacobus; *Fr.*, Jacques; *Ger.*, Jakob; *Hungarian*, Jakab; *It.*, Giacomo; *Lat.*, Jacobus; *Polish*, Jakub; *Port.*, Diogo, or Jacobo; *Russ.*, Yakof; *Sp.*, Jaime; *Sw.*, Jakob. See Jacob.

James' Bay. Named in honor of the memory of James I., in whose reign it was completely explored.

James River, Va. In honor of James I. of England, prior to which it was named the *River of the Holy Ghost*. The Indian name was *pawathanne*, "river of pregnancy." To this stream Captain John Smith gave the spelling of "Powhattan," stating the chief took his name from the stream.

Jamestown. Town in James City County, Virginia, named for King James I., and the first English settlement in America.

Jan (Dutch, yān). An Anglo-Norman form of John.

Jane. From the French name Jeanne, from root of John. *Dutch*, Hanna; *Fr.*, Jeanne; *Ger.*, Johanna; *It.*, Giovanna; *Lat.*, Johanna, or Joannetta; *Sp.*, Juana; *Sw.*, Johanna.

Janesville. Town in Lassen County, California, and city in Rock County, Wisconsin, named for Henry F. Janes.

Janet (jān'-ēt, or jā-nēt'). A diminutive of Jane.

Janiculum (jān-ik'-yū-lūm), or **Mons Janiculus** (monz jā-nik'-u-lus). Highest of the hills of Rome; situated on the right bank of the Tiber, extends south from the Vatican, and is opposite the Capitoline and the Aventine.

January. In honor of Janus, a deity who presided over the beginning of everything.

Japan. A European modification, brought about through the Portuguese *Gepuen*, or Japao, of the native *Nippon*, or *Nippon*, compounded of *ni*, "sun, fire," and *pon*, "land," literally "sun-land," or "land of the rising sun," and signifying "the fountain of light."

Jaqueline (jāk'-we-līn). The feminine of James. *Fr.*, Jacqueline (zhāk-lēn'); *Ger.*, Jakobine; *It.*, Giacomina, or Giacobba.

Jasper (jās'-pēr). A male name derived from the Arabic *yashm*, or Persian *yashb*, the precious stone jasper; hence, "treasure master." *Danish*, Jesper; *Dutch*, Jasper, or Kasper; *Fr.*, Gaspard; *Ger.*, Caspar, or Kaspar; *It.*, Gasparo; *Lat.*, Gaspar; *Port.*, Gaspar; *Sp.*, Gaspar; *Sw.*, Kasper.

Java. A native Malay word signifying "the land of nutmegs."

Jean. A female name derived from the French name *Jeanne*, the feminine form of Jean; from root of John.

Jeanne. See Jane.

Jeannette (jē-nēt'). See Jenet.

Jedidiah (jēd-ē-dī'-ā). The Hebrew *Y'dhiydhyah*, from *yadhaydh*, "beloved of Jehovah."

Jefferson City, Mo. In honor of President Thomas Jefferson.

Jenet (jē-nēt'). The diminutive of Jane. *Fr.*, Jeannette; *It.*, Giovannetta; *Lat.*, Joannetta.

Jephthah (jēf'-thā). From the Hebrew, meaning, a "discoverer." *Fr.*, Jephthé; *Lat.*, Jephtha.

Jeremiah (jēr-ē-mī'-ā), or **Jeremy** (jēr'-ē-mī). From the Hebrew *Yirm-Yah*, which Simonis renders "elevated of the Lord." *Danish*, Jeremias; *Dutch*, Jeremias; *Fr.*, Jérémie; *Ger.*, Jeremias; *It.*, Geremia; *Lat.*, Jeremias; *Sw.*, Jeremias.

Jerome (jēr'-ōm or jē-rōm'). A name corrupted from Hieronymus, "holy law," or "sacred name." *Danish*, Jeronymus; *Dutch*, Hieronymus; *Fr.*, Jerome; *Ger.*, Hieronymus; *It.*, Geronimo, or Girolamo; *Lat.*, Hieronymus; *Port.*, Hieronimo; *Sp.*, Geronimo; *Sw.*, Hieronymus.

Jerry. A male name, corrupted from Jeremiah.

Jersey. Was originally *Czar-ey*, meaning "Cæsar's Island," so called by the Romans in honor of Julius Cæsar.

Jersey City, N. J. Originally incorporated, 1829, and named after the State as the "City of Jersey." In 1851, under a new charter, the name was transposed.

Jerusalem (jē-rū'-sā-lēm). This name means, "foundation of peace." It is derived from the Hebrew, *jarah*, "a foundation," and *shalaim*, or *shalem*, "peace, perfect, whole."

Jesse (jēs'-sē). From the Hebrew *Yishay*, from *yesh*, "wealth." Others render the name "graft." If so, it comes from *yash*, "being, existence."

Jessica. A female name, probably a diminutive of Jessie.

Jessie. A female name. Like the French

masculine name Joan, formerly from root of John.

Job (jōb). From the Hebrew *Iyyobh*, "the persecuted" (man), hence, "sorrowing." *Arabic*, Aiyoob, or Ayyub; *Fr.*, Job; *Ger.*, Hiob; *Gr.*, Iob; *It.*, Giobbe; *Lat.*, Job, or Jobus; *Sw.*, Job.

Joel (jō'-ēl). Means, "acquiescing." *Fr.*, Joel; *Lat.*, Joel.

Johanna. A female name derived from John.

John. From the Hebrew, *Y'hohhanan*, variously translated, "the Lord gave graciously"; "whom Jehovah gave"; "whom Jehovah bestowed." *Danish*, Johann, or Hans; *Dutch*, Jan; *Fr.*, Jean; *Ger.*, Johann (familiarily Hans, a contraction of Johannes); *Gr.*, Ioannes; *Hungarian*, Janos; *It.*, Giovanni; *Lat.*, Joannes, or Johannes; *Pol.*, Jan; *Port.*, João; *Russ.*, Ivan; *Sp.*, Juan; *Sw.*, Johan, or Hans.

Johnstown, Pa. City and borough in Cambria County, Pennsylvania, named for an early settler, Joseph Jahns or Yahns.

Johnstown, N. Y. City in Fulton County, New York, named for its founder, Sir William Johnson.

Joliet (jō'-lē-ēt), *Ill.* Named after the French explorer, Louis Joliet.

Jonah (jō'-nā), or **Jonas** (jō'-nas). From the Hebrew *Yonah*, "a dove"; perhaps given as a term of endearment. *Fr.*, Jonas; *Ger.*, Jonas; *Lat.*, Jonas.

Jonathan (jōn'-ā-than). From the Hebrew *Y'honathan*, "the Lord gave, or given by Jehovah." *Fr.*, Jonathan; *Lat.*, Jonathan.

Jordan. The Hebrew name is *yarden*, which Robinson translates "the flowing," "the river," like the German, Rhein, from *rinnen*.

Joseph (jō'-sēf). From the Hebrew *Yosheph*, signifying "he shall add." *Fr.*, Joseph; *Ger.*, Joseph; *Hungarian*, Jozsef; *It.*, Giuseppe; *Lat.*, Josephus; *Polish*, Jozef; *Port.*, José; *Sp.*, José; *Arabic*, Yūsuf.

Josephine (jō'-zēf-īn). The feminine of Joseph. *Fr.*, Joséphe, or Joséphine; *Ger.*, Josephe, or Josephine; *It.*, Giuseppa, or Giuseppina; *Lat.*, Josepha.

Joshua (jōsh'-ū-ā). From the Hebrew *Y'hoshua*, "whose help or salvation is Jehovah," hence, a "saviour." *Dutch*, Josua; *Fr.*, Josué; *Ger.*, Josua; *It.*, Giosue; *Lat.*, Josua; *Sw.*, Josua.

Josiah (jō-sī'-ā), or **Josias** (jō-sī'-as). From the Hebrew *Y'shiyyahu*, "whom the Lord gives." *Danish*, Josias; *Dutch*, Jozias; *Fr.*, Josias; *It.*, Giosiade; *Lat.*, Josias.

Juan (jū-ān). Spanish, *hōō-ān'*. See John.

Juan de Fuca (jū'-ān dē fū'-kā), **Strait of, Wash.** After Juan de Fuca, an old Greek sailor who navigated its waters in 1592; name applied by Apostulus Valerianos.

Juan Fernandez (jū'-ān fēr-nān'-dēz. Spanish, *hōō-ān'-fēr-nān'-dēth*). Also known as Selkirk's Island, after Alexander Selkirk, its solitary inhabitant from September, 1704, to February, 1707; perpetuates the name of its discoverer in the year 1567.

Judah (jū'-dā), **Judas** (jū'-das), **Jude** (jūd). Hebrew, meaning "confession." *Fr.*, Juda, or Jude; *Ger.*, Judas; *Hungarian*, Juda; *It.*, Giuda; *Lat.*, Judas; *Polish*, Judas; *Sw.*, Judas.

Judith (jū'-dith). From the Hebrew *Y'hudhiyth*, "in the Jewish tongue," also, "praising." *It.*, Giuditta; *Lat.*, Juditha.

Julia (jū'-lī-ā or jūl'-yā). The feminine of Julius. *Dutch*, Julia; *Fr.*, Julie; *Ger.*, Julie; *It.*, Giulia; *Lat.*, Julia; *Sp.*, Julia; *Sw.*, Julia.

Julian (jū'-lī-an or jūl'-yān). A name derived from the Latin Julianus, formed from Julius. Julian is a feminine as well as a masculine name. *Dutch*, Julianus; *Fr.*, Julien; *Ger.*, Julian; *It.*, Giuliano; *Lat.*, Julianus; *Port.*, Julião; *Sp.*, Julian, or Giuliano; *Sw.*, Julian.

Juliana (jū-lī-ān'-ā). A female name derived

from Julian. *Dutch*, Juliana; *Fr.*, Julienne; *Ger.*, Juliane; *It.*, Giuliana; *Lat.*, Juliana; *Port.*, Juliana; *Sp.*, Juliana; *Sw.*, Juliana.

Julien. See Julian.

Julienne. See Julia.

Juliet (jū'-lē-ēt). A diminutive formed from Julia.

Julius (jū'-lī-ūs). The Roman name, said to be derived from Julius or Iulus, "sprung from Iulus." *Dutch*, Julius; *Fr.*, Jules; *Ger.*, Julius; *It.*, Giulio; *Lat.*, Julius; *Port.*, Julio; *Sp.*, Julio.

July. The name given to this month by Marc Antony in honor of Julius Cæsar, who was born in it.

June. From Juno, the queen goddess.

Jungfrau (yōōng'-frow) **Mountain**. A noted Alpine peak, "the maiden, or the fair one," so called from its spotless white.

Juniata (jū-nī-āt'-ā) **River, Penn.** Named from a tribe of Indians inhabiting its banks, extinguished by the Iroquois. The root of the word means "a stone." *Onajutta-haga*, "the Juniata people," is the name found on early maps.

Justin (jūs'-tīn). A masculine name derived from the Roman, Justinus, formed from Justus.

Justina (jūs-tī'-nā). A feminine name formed from Justin.

Jutland. Means the land of the Jutes.

Kaaba, or **Caaba** (kā'-ā-bā). A cube-shaped, flat-roofed building in the center of the Great Mosque at Mecca: the most sacred shrine of the Mohammedans.

Kaffraria (kāf-frā'-rī-ā). Country of the Kaffirs, or "unbelievers."

Kalamazoo (kāl-ā-mā-zōō'). City, river, and county in Michigan. According to one authority, derived from the Indian word *Negikanamazo*, meaning, "otter-tail"; "beautiful water" and "boiling water" are other versions.

Kanawha (kā-nō'-wā) **River, W. Va.** From a tribe of Indians (branch of the Nanticokes), evolving in its spelling through *Conoys*, *Conoise*, *Canawese*, *Cohnawas*, *Canaways*, to *Kanawha*. The stream is called "the Great Conoway or Wood's River" in Wyman's map of the British Empire, 1770.

Kansas. From its principal river, adopted in 1854. The river named from a tribe of Indians, formerly in that locality, known as the *Konsos* or *Kows*, the word meaning "smoky water."

Kansas City, Mo. The name given in the spring of 1839, at a meeting of the "Town Company," an organization for starting towns and locating steamboat landings on the Missouri River; the name for adoption was considered in connection with the Kaws or Kansas tribe of Indians. When first adopted the name was City of Kansas.

Karnak (kār'-nāk). A village in Egypt, on the eastern bank of the Nile, on the site of Thebes, famous for its remains of antiquity.

Katahdin (kā-tā'-dīn). Mountain in Maine. An Indian word, *Ktaadn* or *Katahdn*, meaning, according to different authorities, "highest land," "big mountain," "greatest or chief mountain."

Kathleen (kāth-lēn'). An Irish diminutive of Catharine.

Kearsarge (kēr'-sārj), **Mt.** Corruption of the Indian *keas*, "high," *auke*, "a place," "a high place"; another derivation traces it from the Indian *Koowassadchu*, "pine or peaked mountain."

Kenilworth (kēn'-il-wērth). A town in Warwickshire, England, five miles north of Warwick. The castle is one of the most admired of English feudal monuments, and was long of note as a royal residence. It has been immortalized by Sir Walter Scott.

Kennebec (kēn-ē-bēk') **River, Me.** From the Indian *quinninippiohke*, "long place of water." This was the Indian name of Moosehead Lake.

Kennebunk (kēn-ē-būnk'), **Me.** Similar to Kennebec, an adaptation of another pronunciation.

Kenneth (*kĕn'-nĕth*). The English form of the Gaelic name *Coinneach*; perhaps from *caoin-neach*, a "kind, gentle, or mild man."

Kenosha (*kĕ-nō'-shā*), Wis. Algonquin derivation from *kenose*, "long," meaning "a long fish" (the pike).

Kensington (*kĕn'-sĭng-tŭn*). The town of the Kensings, the old form of which was the proper name *Cynesige*.

Kent. This is probably derived from the ancient British word *chent* or *cant*, "a corner," because, says Camden, "England at this point stretched itself out in a corner to the northeast." The Roman name was *Cantium*.

Kentucky. From its principal river, adopted in 1782. Derived from an Indian word, *Kain-tuk-ee*, "at the head of the river."

Keokuk (*kĕ'-ō-kŭk*). City and county in Iowa, named for an Indian chief, the word meaning "running or watchful fox."

Kew (*kū*). The name of this place has undergone many transitions. In a court roll of the manor of Richmond, in the reign of Henry VII., it is written *Kayhough*, and in subsequent entries it is varied to *Kayhowe*, *Kayhoo*, *Keyhowe*, *Keye*, *Kayo*, and *Kewe*. The name is probably derived from the word *quay*, a landing place.

Keweenaw (*kĕ'-wĕ-nō*) **Point, Mich.** So named from a portage called by the Indians *Kewauenau*, meaning the "place where we cross by land carrying the canoe."

Kew Observatory. The central meteorological observatory of Great Britain. It is at Old Richmond Park, between Kew and Richmond, and was built by George III. for the observation of the transit of Venus in 1769, and called the "King's Observatory." In 1842, it was handed over to the British Association, under the name of "Kew Observatory." In 1871, it became the central station of the British meteorological office.

Key West. City in Monroe County, Florida. A corruption of *Cayo Hueso*, a Spanish word, meaning "a bone reef or island"; the place was so named because of the number of bones found upon the reef.

Keziah (*kĕ-zī'-ā*). A feminine name derived from Kezia, daughter of Job, from the Hebrew, *Kt'siya*, signifying "cassia," a bark similar to cinnamon.

Khedive (*kā-dēv'*). This word, from the Persian *Khidiw*, according to the best authorities, means "Prince."

Kiskiminetas (*kĭs-kĕ-mĭn'-ĕ-tas*) **River, Pa.** From an Indian phrase, *Kithanne*, translated, "place of the largest stream."

Kittatinny (*kĭt'-tā-tĭn-nĭ*) **Mountains, Pa.** The Indian word *Kitadini*, that is, "largest mountain."

Kittery (*kĭt'-tēr-ĭ*) **Point, Me.** From the small hamlet of Kittery, England. Kittery Point was settled in 1623, and it is claimed was the first settled and the oldest town in the State.

Knoxville, Tenn. After Gen. Henry Knox of Massachusetts, secretary of war during Washington's administration. First applied as Fort Knox, subsequently to the settlement.

Kokomo (*kō'-kō-mō*), Ind. An Indian word meaning "a young grandmother."

Konrad. See Conrad.

Kremlin (*krĕm'-lĭn*). A citadel of Moscow, Russia. A highly picturesque and interesting inclosure, about one and one-half miles in circuit, fortified with battlemented walls from which project cylindrical and square towers, many of them terminating in spires behind which rise the multi-form domes and belfries of the churches, brilliant with gold and colors. It was walled in 1492.

Kurdistan, or Koordistan (*kōōr-dĭs-tān'*). Means the country of the Koords.

Kyrle (*kĕrl*). A masculine name derived from Karl or Carl, from root of Charles.

Laban (*lā'-ban*). A masculine name, from the Hebrew *Labhan*, signifying "white."

Labrador (*lāb-rā-dōr'*). Bears a name which is believed to testify to the early maritime enterprise of the Portuguese. Hence the country seems to have acquired the name of *Terra de Lavradores*, the "land of the laborers." According to another explanation, Bradore Bay, formerly called Labrador Bay, acquired that name from the visit of a Basque whaler called the *Labrador*, the name of the bay being subsequently extended to the whole coast.

Labyrinth (*lāb'-ĭ-rĭnth*). From the Greek *labyrinthos*, "a maze of intricate passages"; especially, a subterranean structure having many intricate passages. Several such mazes were famous in antiquity. The greatest was that which lay near Lake Moeris, in the Fayum, Egypt, and was probably built by Amenemhat III., about 2300 B. C. According to Herodotus, it had 3,000 halls and chambers, half of them above ground and half below, and twelve covered courts.

Lackawanna (*lāk-ā-wōn'-nā*) **Creek, Pa.** From the Delaware Indian words *lechau-hanne*, "the stream that forks."

La Crosse (*lā krōs'*). City and county in Wisconsin. A French name given to the town because before its settlement the ground was a favorite place for ball playing with the Indians, the game being called by the French "la crosse."

Ladrone (*lā-drōn'*) **Islands**. So designated from the circumstance that when Magellan touched upon one of the lesser isles of the group, in 1520, the natives stole some of his goods; whereupon he called the islands the *Ladrones*, which is Spanish for "thieves."

Lake District, English. A region in Westmoreland and Cumberland, England, which abounds in lakes inclosed by mountains. The district is a celebrated tourist center, and is associated with the poetry of Wordsworth. The lakes include Windermere, Ullswater, Derwentwater, and Bassenthwaite Water; and Skiddaw, Helvellyn, and Scafell Pike are the principal mountains.

Lake Huron. See Huron.

Lake Michigan. See Michigan.

Lake of the Woods. Lake in Minnesota. Originally named *Lac des Bois* by the French, "lake of the woods," because of the heavily wooded islands in the lake.

Lake Ontario. See Ontario.

Lake Superior. Denotes the uppermost and chief of the Great Lakes.

Lake Winnipeg. See Winnipeg.

Lambert (*lām'-bĕrt*). Corrupted from the Old German name *Lamdbert*, *Lantprecht*; from *land-brecht*, "one distinguished among the people." Dutch, Lambert, or Lambertus; Fr., Lambert; Ger., Lambert; Lat., Lambertus.

Lambeth (*lām'-bĕth*) **Palace**. The London residence of the Archbishop of Canterbury, situated in Lambeth, near the Thames, one and one-half miles southwest of St. Paul's. It was acquired by the archbishops in 1197. The present building was commenced in the Thirteenth Century. It contains a valuable library.

La Moille (*lā moil'*) **River, Vt.** Discovered and named by Champlain as *la mouette*, "the mew or gull," they having been seen in great numbers on its waters. The present spelling, a corruption easily traceable to not crossing the *t*'s and absence of a perfect *e*.

Lancelot (*lān'-sē-lōt*). Sometimes rendered "servant," or "little lance"; if so, the bearer was so called from carrying a lance or pike. The name seems to be a diminutive formed from Latin *lancea*, "a lance, javelin," a word which Varro thinks of Spanish origin. Fr., Lancelot; Lat., Lancelottus.

Languedoc (*lān'-gwē-dōk*. French, *lān'-gŭ-dōk*). An ancient government of southern France. It

was named from the language of the South of France; the *langue d'oc*, or Provençal.

Lansing (*lǎn'-sǐng*), **Mich.** In honor of Abram Jacob Lansing of Rensselaer County, New York, a large landholder of this section. Originally called Michigan.

Laporte (*lâ-pôrt'*). County in Indiana. A French word meaning "door" or "opening" between two stretches of forest connecting two prairies.

Las Vegas (*lās vā'-gās*). City in San Miguel County, New Mexico. A Spanish name meaning "the plains," or the "meadows," and given this city on account of its situation in the midst of a fertile meadow.

Lateran (*lăt'-ēr-ăn*), **The.** Now an ecclesiastical palace in the eastern part of Rome. The present edifice dates from the Sixteenth to Eighteenth Centuries. The palace was originally named from the Roman family, Lateranus, to which, until the time of Nero, it belonged. Nero put the last owner, Plautius Lateranus, to death, and appropriated the palace. It was given by Constantine (who also built a church in its precincts) to the Bishop of Rome.

Latitudinarians. The name applied by contemporaries to a school of theologians within the English Church in the latter half of the Seventeenth Century. It grew out of the earlier movement in favor of a more liberal constitution for the Church.

Launcelot. Another spelling of Lancelot.

Laura (*lô'-râ*). A feminine name derived from Latin *laurus*, "a laurel or baytree," dedicated to Apollo, used in triumphs, and worn by emperors and poets in garlands. Laura corresponds to the Greek name Daphne.

Laurence, Lawrence. From the Latin name *Laurentius*, formed from *laureo*, "to crown with laurel." *Danish*, Lorenz; *Dutch*, Laurens; *Fr.*, Laurent; *Ger.*, Laurenz, Lorenz, and Laurentius; *It.*, Lorenzo.

Lauterbrunnen (*lou'-tër-bröön-nën*). A valley and parish in the Bernese Oberland, Switzerland, thirty-three miles southeast of Bern. It is noted for the Staubbach, Trummelbach, and other falls.

Lavinia (*lā-vīn'-i-â*). Formed as a feminine name from Latinus, mythical Roman King.

Lawrence. See Laurence.

Lazarus (*lăz'-â-rūs*). From the Hebrew *El-azar*, "God aids," i. e., whom God aids. *Fr.*, Lazare; *Gr.*, Lazaros; *It.*, Lazzaro; *Lat.*, Lazarus.

Leadenhall Street, London. Leadenhall is a corruption of Leather Hall, from a large market for leather which formerly existed there. There are still some remains of the leather market.

Leah (*lē'-â*). From the Hebrew *Leah*, signifying "wearied."

Leander (*lē-ăn'-dēr*). From the Greek *Leandros*, translated "man of renown."

Leavenworth, Kan. In 1820, a fort was established at this place by the United States Government under the charge of Col. Henry H. Leavenworth of the 3d U. S. Regiment, and named Fort Leavenworth, about which a town formed and the fort's name was applied.

Leech Lake, Minn. Applied from the meaning of its Indian name *gahsuhgusgwah*, *chemakang*, "the place of leeches."

Lehigh River, Pa. Corruption of the Delaware word *lechaw*, "a fork," a reference to this stream being one of the forks of the Delaware; also traceable as applied to the forked piece of land over which the Indians made a portage when coming down the river.

Lemuel (*lēm'-ū-ēl*). From the Hebrew *L'muel*, from *l'mu-El*, "by God," i. e., created by God.

Leo (*lē'-ō*), or **Leon** (*lē'-ōn*). Latin, "a lion." *Fr.*, Léon; *It.*, Leone; *Lat.*, Leo.

Leonard (*lën'-ard*). From the Old German name *Leonhard*, "as strong as a lion." *Dutch*, Leonard;

Fr., Léonard; *Ger.*, Leonhard; *It.*, Leonardo, or Lionardo; *Lat.*, Leonardus.

Leonora. See Eleanor.

Leopold (*lē'-ō-pōld*). Wachter renders this name "bold as a lion." It is doubtless the same name as the *Old German* Leopold, Leupold, Leodpold, Luitpold. *Fr.*, Leopold; *Ger.*, Leopold; *It.*, Leopoldo; *Lat.*, Leopoldus.

Letitia (*lē-tīsh'-i-â* or *lē-tīsh'-â*), or **Lettice** (*lēt'-tīs*). A feminine name derived from Latin, *lætitia*, "joy, gladness, mirth." *Danish*, Lætitia; *Dutch*, Lætitia; *Old Fr.*, Letice; *Lat.*, Lætitia.

Levant (*lē-vănt'*). Levant means simply "the east," though it is generally confined in its use to the eastern parts of the Mediterranean, as the coasts of Egypt, Syria, and Asia Minor. The word is Italian, and signifies *rising*, alluding to the sun rising in the east.

Lewellin (*le-wel'-lin*). Means "like a lion." *Lat.*, Leolinus.

Lewis or Louis (*lōō'-īs*). Like the French name, *Louis*, corrupted from Ludovicus, from the Old German name *Ludwig*, "illustrious warrior," or the "fortress or defence of the people." *Dutch*, Lodewijk; *Fr.*, Louis; *Ger.*, Ludwig; *It.*, Luigi or Lodovico, or Ludovico; *Lat.*, Ludovicus; *Sp.*, Luis; *Sw.*, Ludwig.

Liberia (*lī-bē'-rī-â*). Means "the country of the free." It was colonized by emancipated slaves.

Licking, Ky. An application of the translation of its Indian name *mahonink*, "the place of the lick," referring to buffalo licks on its banks, now the noted Blue Lick Springs.

Light Brigade, Charge of the. A celebrated charge made by the Light Brigade of 670 men, under Lord Cardigan, the British commander, on a Russian battery at Balaklava, October 25, 1854.

Lillian. A feminine name, from the Latin *lilium*, "a lily."

Lima (*lī'-mâ*. Spanish, *lê'-mâ*). Probably from *Lomnech*, "a barren spot." Taylor says it is a corruption of *Rimac*, the Indian name of the plain on which the city stands.

Limoges (*lē-mōzh'*). From *Lemovicum*, "the dwelling of the Lemovici," or "dwellers among the elms."

Lina. A feminine name derived from some name ending in *lina*, as Carolina, Catalina, Paulina; and perhaps sometimes from the Italian name Madalena, or the Spanish Madelena.

Lincoln, Neb. At the time it was made the capital city it received the name Lincoln as a compliment to President Abraham Lincoln, having been previously named Lancaster.

Lincoln's Inn Fields. The largest square in London. It is near the junction of High Holborn and Chancery Lane, and is surrounded by lawyers' offices, Lincoln's Inn, the Royal College of Surgeons, and the Soane Museum. It was laid out by Inigo Jones, the celebrated architect.

Linda. A feminine name — abbreviated from Belinda.

Lionardo. Same as Leonardo. See Leonard.

Lionel (*lī'-ō-nēl*). A name formed from a word, *leonellus*, a diminutive of the Latin *leo*, "a lion."

Lion of Lucerne (*lōō-sēr'n'*). A famous piece of sculpture, by Thorwaldsen, commemorating the heroism and devotion of nearly 800 Swiss guards who died to save Louis XVI., in the attack on the Tuileries, August 10, 1792. The colossal figure of the crouching lion, transfixed and dying but still faithfully defending the lily shield of France, is carved in the round in a recess in the face of an upright, vine-draped rock, in a little park in Lucerne, Switzerland.

Lisbon (*līz'-būn*). In Portuguese, *Lisboa*, is derived from the old name *Olisipo*, supposed to contain the Phenician word *hippo*, a "fortress," or "walled town."

Little Rock, Ark. A local application from the

town occupying the top of a rocky cliff, which is much more conspicuous than the other cliffs of the river bank; also said to be traceable from an igneous slate rock in the river bed at this point, visible only at low stages of the water.

Livia (lĭv'-ĭ-ă). From the Roman *Livia*. *Fr.*, Livie; *It.*, Livia; *Lat.*, Livia.

Llano Estacado (lä'-nō ās-tä-kä'-dō). An elevated plateau in northwest Texas and New Mexico. Spanish words meaning "staked plain," applied to this plateau on account of the stake-like boles of the yucca plant which grows there.

Llewellyn (lū-ĕl'-lĭn). From the Keltic, meaning "lightning."

Lloyd's (loidz). A London Underwriters' Association for the furtherance of commerce, especially for marine insurance and the publication of shipping news. It originated in meetings at Lloyd's Coffee House about 1688.

Lodovico or Lodovic. See Lewis.

Lombard (lōm'-bärd) **Street.** The name of a street in the city of London, often used figuratively to mean the banking or financial world. It is the quarter wherein the money-lenders from Lombardy settled. The Lombards were an eminently commercial and financial people, and competed with the Jews in the Middle Ages as capitalists and pawnbrokers.

Lombardy (lōm'-bär-dĭ). The country of the *Longobardi*, so called from a kind of weapon which they used.

London. The origin of this name cannot be ascertained with any certainty. Its most probable derivation is from *Llyn-Din*, the "town on the lake." It was the capital of the Saxon kingdom of Essex, and was known in the time of the Heptarchy as *Lundenceaster*.

Long Island, N. Y. Name applied by the Dutch in reference to its long and narrow conformation, "*Lange Eylandt*." During Governor Fletcher's administration, by act of General Assembly of New York, 1693, the name of *Nassau* was decreed as a Dutch compliment to Prince Maurice of Nassau. It was not favorably received by the settlers and by common consent they used Long Island.

Long Island Sound. From Long Island.

Lookout, Cape, N. C. Traceable to coast captains, that when this land was seen, to be on the "look-out" for the stormy Cape Hatteras and its long shoals.

Lora. A form of Laura, which occurs as early as 1208.

Lorenz or Lorenzo. See Laurence.

Loretta. A diminutive of Lora.

Los Angeles (lōs ān'-jĕl-ĕz. Spanish, *lōs āng'-hĕl-ĕs*). Originally called by the Spaniards *Pueblo de la Reina de los Angeles* (The town of the Queen of the Angels), hence Los Angeles, "the angels."

Lotty. A feminine name corrupted from Charlotte.

Louis. See Lewis.

Louisa (lōō-ē'-zä). A comparatively modern name formed from Lewis. *Fr.*, Louise; *Ger.*, Luise; *It.*, Luigia; *Lat.*, Luisa; *Sp.*, Luisa; *Sw.*, Ludovika.

Louise (lōō-ēz'). A French name formed from Louis.

Louisiana (lōō-ē-zē-ä'-nä, lōō-ē-zē-ān'-ä). Named by La Salle in honor of Louis XIV., king of France.

Louisville (lōō'-ĭ-vĭl, lōō'-ĭs-vĭl), **Ky.** Name given by act of the Virginian Legislature in 1780, in honor of Louis XVI. of France, then assisting the American colonies in their revolutionary struggle.

Louvre (lōō'-vrŭ). A castle, in Paris, of the kings of France from or before the Thirteenth Century, and the chief royal palace until Louis XIV. built Versailles. The existing palace was begun by Francis I. in 1541, and has been greatly extended until it now forms one of the most extensive and historically interesting buildings in the world.

A great part of the interior has been occupied since 1793 by the famous museum, and successive governments have employed the best artists at their command for its decoration.

Lowell (lō'-ĕl), **Mass.** From Francis Cabot Lowell of Boston, who was distinguished by his successful efforts in introducing the cotton manufacture into the States. Indian name of locality, *Wamasit*.

Lucerne (lōō-sĕrn'). Named from a lighthouse or beacon, *lucerna*, formerly placed on a tower in the middle of the River Rheus.

Lucian (lū'-shĭ-an or lū'-shan). From the Latin, meaning "light." *Fr.*, Lucien; *It.*, Luciano; *Lat.*, Lucianus.

Lucile (lū-sĕl'). A feminine name formed from Lucilius, name of the celebrated Roman satirist; derived no doubt, from Lucius.

Lucius (lū'-shĭ-ŭs). The Roman name is said to be derived from *lux*, *lucis*, "light." *Fr.*, Luce or Lucius; *Ger.*, Lucious; *It.*, Lucio; *Lat.*, Lucius.

Lucknow (lŭk'-now. Pop., *lŭk'-nō*). From the native name *Laksneanauti*, "the fortunate."

Lucretia (lū-krĕ'-shĭ-ă), or **Lucrece** (lū'-krĕs). A name derived from Lucretia, a celebrated Roman lady, daughter of Lucretius, and wife of Tarquinius Collatinus; a feminine form of Lucretius, derived from *lucrum*, "gain, profit, advantage." *Fr.*, Lucrèce; *Ger.*, Lucretia; *It.*, Lucrezia; *Lat.*, Lucretia; *Sp.*, Lucrecia.

Lucy or Lucie (lū'-sĭ). The feminine of Lucius. *Dutch*, Lucie; *Fr.*, Lucie; *Ger.*, Lucie; *It.*, Lucia; *Lat.*, Lucia; *Sp.*, Lucia.

Ludovico or Ludivicus. See Lewis.

Ludwig. See Lewis.

Luigi. See Lewis.

Luise. See Louisa.

Luke. From the Latin name *Lucas*, meaning a "light." Some maintain that the original name was Lucius. *Danish*, Lucas; *Dutch*, Lucas; *Fr.*, Luc; *Ger.*, Lucas; *Hungarian*, Lucats; *It.*, Luca; *Lat.*, Lucas; *Sw.*, Lucas.

Luxembourg (lŭks'-ĕm-bŭrg; *Dutch*, *lŭks'-ĕm-bŭrg*), **Palace of the.** A palace in Paris, built by Debrosse (1615-20) for Maria de' Medici. Since the Revolution this former royal palace has served as the House of Peers or of the Senate, and has long contained a museum of art.

Luxor (lŭks'-ôr, lōōks'-ôr). From *El-Kasur*, "the palaces." A village in Upper Egypt, situated on the Nile, on part of the site of the ancient Thebes. It is celebrated for its antiquities.

Lycoming (lĭ-kōm'-ĭng) **River, Pa.** Adaptation of the Indian name *legawi-hanne*, i. e., "sandy stream."

Lydia (lĭd'-ĭ-ă). A Latin name mentioned in Horace; so called as coming from Lydia, in Asia Minor. *Danish*, Lydia; *Dutch*, Lydia; *Fr.*, Lydie; *Gr.*, Ludia; *It.*, Lidia; *Lat.*, Lydia.

Lynchburg, Va. From the original patentee, John Lynch, brother of Charles Lynch, the reputed originator of what is known as "Lynch Law."

Lynch Law. The practice of punishing men for crimes or offences by private, unauthorized persons, without a legal trial. The term is said to be derived from a Virginia planter named Lynch, who thus took the law into his own hands.

Lynn, Mass. From an English town of the same name. The Anglo-Saxon meant, originally, "deep pool."

Mabel, Mabell (mā'-bĕl). A feminine name derived from Mabilia, Latinized from Amabel, a corruption of the French *aimable*, "lovely." *Lat.*, Mabilia, or Amabilis.

Macao (mā-kä'-ō, mā-kow'). A Portuguese city in China. Anciently there was a temple here sacred to an idol named Ama. The Portuguese made it *Amagoa*, the bay of Ama, corrupted first to Amacao and then to Macao.

Mackinac. County in Michigan and town in

same county. Derived from the Indian word "*michilimackinac*," meaning "island of the great turtle," or in other dialects, "island of the giant fairies."

Mackinaw Straits, Mich. Derived from the same origin as Mackinac.

Macon (*mā'-kūn*), **Ga.** In honor of Hon. Nathaniel Macon of North Carolina.

Madagascar. Properly *Malagasy*, the Island of the Malagese, because the natives belong to the Malay race.

Madeira (*mā-dē'-rā*. Portuguese, *mā-dā'-ē-rā*). A Portuguese term signifying "timber"; the inference being that this island was formerly covered by an immense forest.

Madeline. A feminine name softened down from Magdalen.

Madge. A feminine baptismal name derived from Margaret.

Madrid (*mā-drīd'*. Spanish, *mā-drēth'*). Capital of Spain since 1560. The name is usually explained from the Arabic *madarat*, a "town." But the early form *Mazerit* or *Magerit*, given in the Chronicle of Sampiro, points to *materita*, a "small wood" or "copse," a diminutive of *materia*, as the true etymology.

Maelstrom (*māl'-strūm*). A celebrated whirlpool or violent current in the Arctic Ocean, near the western coast of Norway, between the islands Moskenaso and Varo, formerly supposed to suck in and destroy anything that approached it at any time, but now known not to be dangerous except under certain conditions. Etymologically it is the "grinding stream," from the Norwegian, *male*, "to grind."

Magdalen (*māg'-dā-lēn*), or **Magdalene.** A name derived from Mary Magdalen, meaning "of Magdala," a place in Palestine. *Dutch*, Magdalena; *Fr.*, Madeleine or Madelène; *Ger.*, Magdalena; *It.*, Maddalena or Madalena; *Lat.*, Magdalena; *Sp.*, Magdalena.

Magna Charta, or Magna Carta (*māg'-nā kār'-tā*. Pop., *chār'-tā*). The great charter of the liberties (Magna Charta Libertatum) of England, granted and sealed by King John in a conference between him and his barons at Runnymede, June 15, 1215.

Mahony (*mā-hō'-nī*), or **Mahoning River, Pa.** Derived from the Delaware Indian word, *Mahonink*, "at the lick."

Maiden Lane. A street in London, between Covent Garden and the Strand. Andrew Marvell, Turner, the landscape painter, and Voltaire lived here at different times. The name is said to have been given from an image of the Virgin which once stood there.

Maine. A State in the Union said to be named for the private estate of Henrietta Maria, in Maine, a province of France; or, according to another authority, so called because the fishermen of the islands along the coast referred to the mainland as the "main," and in some early documents it was spelled "Mayn."

Malakoff (*mā-lā-kōf*). The Malakoff, near Sebastopol, which was so hotly contested in the Crimean War, was so called from the name of an innkeeper who built a liquor shop on the hill, in 1831. His house was "Malakoff's Inn," and the suburb which arose also received the name, which has since become historical.

Malcolm (*māl'-kūm*). Derived from the Gaelic *Maol-Cholum*, "the servant of Columba." *Maol* signifies literally, "the brow of a rock, a bald head"; then "a shorn head, a monk."

Malta (*mōl'-tā*. Italian, *māl'-tā*). Was anciently *Melita*, "the place of refuge."

Malvina (*māl'-vī'-nā*). A feminine name derived from *Malmhūn*, name of the daughter of Toscar; from *maol-mhūn*, "smooth brow."

Mamaroneck (*mā-mār'-ō-nēk*), **N. Y.** From the name of an Indian chief called *Mamaronock*.

Manayunk (*mān'-ā-yūngk'*), **Pa.** From the Delaware Indian *meneiunk*, "place of drinking liquor," which was also the Indian name of the Schuylkill River.

Manchester (*mān'-chēs-tēr*). This name is derived from the Celtic *maen*, "a stone or rock," and the Anglo-Saxon *ceastre* or *chester*, "a castle or fortification." The name signifies "the fortified rock."

Manchester, N. H. From a manufacturing town of the same name in England.

Manchuria (*mān'-chōō'-rī-ā*). The European name of the region inhabited by the Manchua, a Tungusic tribe, who furnished the dynasty which has ruled China for the last three centuries. According to Prof. Douglas, *Manchu* means "pure," a name chosen by the founder as a suitable designation for his family. The Mantzu, a wild race on the Upper Kiang, bear a Chinese name meaning, according to Colonel Yule, "sons of the barbarians."

Mandalay (*mān'-dā-lā*) or **Mandale.** The capital of Upper Burma, founded in 1860. The usual etymology is from the Pali *mandala*, a "flat plain," but, according to Colonel Yule, the name was that of an isolated conical hill, rising high above the alluvial plain of the Irawadi, and crowned by a gilt pagoda. The name of the hill represents, he thinks, that of the sacred mountain called *Mandara*, which in the Hindu mythology served the gods as a churning-staff at the churning of the sea.

Manhattan. An island in New York. An Indian word, said by some authorities to mean "little island"; by others, "the people of the whirlpool," referring to Hell Gate; another authority gives its origin from the word *Manna-ha-ta*, "place of drunkenness," Henry Hudson, as the story goes, in 1609, having taken some chiefs into his cabin and made them drunk.

Manila (*mā-nīl'-ā*. Spanish, *mā-nē'-lā*). The capital of the Philippines, was founded in 1571, by Legaspi, the site of a native village of the same name, which is derived from a shrub called *nila*, Manila thus meaning, "Nila is," or "here is Nila."

Manitoba (*mān'-ī-tō-bā'*, *mān'-ī-tō'-bā*). The central province of the Canadian Dominion, formerly called the Red River Settlement, takes its name from Lake Manitoba, whose islands were believed by the natives to be the habitation of the Manito or great spirit. In the Algonquin language, *manito*, *manitu*, or *Manitou*, means a "spirit, a ghost, or anything supernatural." The last syllable of Manito-ba is a fragment of the Cree word, *waban*, a "strait."

Manitou (*mān'-ī-tōō*). County in Michigan, river in Wisconsin, and town in El Paso County, Colorado. An Indian name given to any object of religious reference. It signifies "spirit." (See Manitoba.)

Mankato (*mān'-kā'-tō*) **River, Minn.** A Sioux Indian word signifying "green earth."

Mansfield. City in Richland County, Ohio, named for Col. Jared Mansfield, at one time surveyor-general of the United States.

Marathon (*mār'-ā-thōn*). A place abounding in fennel, *marathos*.

Marc. See Mark.

Marcellus (*mār'-sēl'-lūs*). From the Latin, meaning "of Mars." *Fr.*, Marcellus; *It.*, Marcello; *Lat.*, Marcellus.

March. Named after Mars, the god of War.

Marcus. See Mark.

Marcy, Mount, N. Y. Compliment to Governor W. L. Marcy of New York. The Indian name is *Tahawas*, "he splits the sky," an allusion to its great height, compared with its neighbors.

Margaret (*mār'-gā-rēt*). From the Greek, meaning "a pearl." *Dutch*, Margaretha; *Fr.*, Marguerite; *Ger.*, Margarethe; *Gr.*, Margarites; *It.*, Margarita; *Lat.*, Margarita.

Margaretta. Formed from Margaret.

Margery. A baptismal name from Margaret.

Maria. A name derived from one of the Greek forms of Miriam. Maria is found as a masculine name as well as a feminine name.

Marian (*mā'-rī-ān*). A diminutive of Mary.

Marianne (*mā-rī-ān'*). Sometimes corrupted from Marian; at other times from Mary Anne.

Marie (*mā-rē'*). The French form of Mary.

Marietta (*mā-rī-ēt'-tā*), **Ohio.** A composite word, from Marie Antoinette, queen of Louis XVI. of France, in whose honor it was named.

Marion (*mār'-ī-ōn*). A masculine form of Mary.

Mark. Derived from Mars, meaning "of Mars." *Danish*, Marcus; *Dutch*, Marcus; *Fr.*, Marc; *Ger.*, Marcus; *Gr.*, Markos; *Hungarian*, Mark; *It.*, Marco; *Lat.*, Marcus; *Sp.*, Marcos; *Sw.*, Markus.

Mark, St., Basilica of. A famous basilica of Venice, founded in 830 to receive the relics of the evangelist brought from Alexandria, rebuilt in 976, and given its definite form in 1052. It is the most famed Byzantine structure of western Europe.

Marmaduke. From Anglo-Saxon *mara-mihtig*, "very mighty or powerful."

Marmora (*mār'-mō-rā*), **Sea of.** Named from an adjacent island celebrated for its marble, *marmor*.

Martha (*mār'-thā*). Littleton derives this name from a Syriac word signifying "lady" (*domina*). *Dutch*, Martha; *Fr.*, Marthe; *Ger.*, Martha; *Gr.*, Martha; *It.*, Marta; *Lat.*, Martha; *Sp.*, Marta; *Sw.*, Martha.

Martha's Vineyard, Mass. Named by Bartholomew Gosnold, on one of his voyages, but for whose particular honor it is not known. The Indian name was *Capawac*.

Martin (*mār'-tīn*). From the Latin name, *Martinus*; from *Martius*; from Mars, "warlike." *Dutch*, Martinus; *Fr.*, Martin; *Ger.*, Martin; *It.*, Martino; *Lat.*, Martinus; *Sp.*, Martin; *Sw.*, Martin.

Martinez (*mār-tē'-nēth*). Spanish, meaning "the son of Martin."

Martinsburg. Town in Berkeley County, West Virginia, named for Col. Tom Martin, a nephew of Lord Fairfax, a wealthy landowner.

Mary. From the *Hebrew*, meaning "bitter." *Danish*, Marie; *Dutch*, Maria; *Fr.*, Marie; *Ger.*, Maria or Marie; *Gr.*, Maria; *Hungarian*, Maria; *It.*, Maria; *Lat.*, Maria; *Polish*, Marya; *Port.*, Maria; *Sp.*, Maria; *Sw.*, Maria.

Maryland. It was intended that the country granted by the charter of Charles I. in his patent to Lord Baltimore, June 30, 1632, should be called "Crescentia," but when presented to the king for signature, in conformity to his wishes, the name of the province was changed to that of Terra Mariæ, "Mary's land," in honor of his queen, Henrietta Maria, daughter of Henry IV. of France.

Massachusetts. Natick Indian word *Masasuset*, contraction of *Massa*, "great," *adchu*, "mountain," *et*, "near," "the place of the great hills" (reference to the Blue Hills). Roger Williams writes "I have learned the *Massachusetts* were so called from the Blue Hills."

Matanzas (*mā-tān'-zas*. Spanish, *mā-tān'-thās*) **Inlet, Fla.** From the Spanish, meaning, "massacre," applied by Menendes to commemorate his destruction of Ribaut and his followers.

Mathilde (*mā-tēld'*). A French form of Matilda.

Matilda (*mā-tīl'-dā*), or **Maud.** From the Old German *magd-hild*, "noble virgin or maid." *Danish*, Mathilde; *Dutch*, Mathilda; *Fr.*, Mathilde; *It.*, Matilda; *Lat.*, Mathilda; *Sp.*, Matilde; *Sw.*, Matilda.

Matterhorn. The most precipitous peak in the Alps, derives its lowly name from the meadow (*matt*) at its base, on which the village of Zermatt, "at the meadow," is situated. The Piedmontese name, Mont Cervin, is due to its resemblance to a stag's horn.

Matthew (*māth'-ū*). From the *Hebrew* *mattah-Yah*, "the gift of Jehovah." *Danish*, Matthaëus;

Dutch, Mattheus; *Fr.*, Mathieu; *Gr.*, Matthaïos; *Hungarian*, Mate; *It.*, Matteo; *Lat.*, Matthaëus; *Polish*, Mateusz; *Sp.*, Mateo; *Sw.*, Matthaüs.

Matthias (*māth-ī'-ās*). Originally the same as Matthew. *Dutch*, Matthijs; *Fr.*, Matthias; *Ger.*, Mathias; *It.*, Mattia; *Lat.*, Matthias; *Sp.*, Matias.

Mauch Chunk (*mók chūngk'*). Borough and river in Carbon County, Pennsylvania. An Indian word, meaning, according to different authorities, "on the mountain," or "bear's cave."

Maud, Maude. Corrupted from Matilda.

Maurice (*mō'-rīs*. French, *mō-rēs'*). Some derive this name from Amalric, others from Maurities, but it is rather the reverse, for the island had its name from Prince Maurice. The name is probably from French *du marais*, "from the marsh." *Danish*, Moritz; *Dutch*, Maurits or Mauritius; *Fr.*, Maurice; *Ger.*, Moritz; *It.*, Maurizio or Maurisio; *Lat.*, Mauritius or Mauricius; *Sp.*, Mauricio; *Sw.*, Moritz.

Mauritius (*mō-rīsh'-ī-ūs*). Named for Maurice, Prince of Orange.

Maximilian (*māks-ī-mīl'-yān*, *māks-ī-mīl'-ī-ān*). A name said to be compounded of *maximus*, "greatest," and the name *Æmilianus*. *Dutch*, Maximilianus; *Fr.*, Maximilien; *Ger.*, Maximilian; *It.*, Massimiliano; *Lat.*, Maximilianus; *Sp.*, Maximiliano; *Sw.*, Maximilian.

Maximus (*māk'-sī-mūs*). Latin, meaning "greatest." *Fr.*, Maxime; *It.*, Massimo; *Lat.*, Maximus; *Sp.*, Maximo.

May. After *Maia*, the mother of Mercury, to whom sacrifices were offered on the first day of this month.

Mayfair (*mā'-fār*). A fashionable locality in London, east of Hyde Park. All streets north of Piccadilly now lead into the district of Mayfair, which takes its name from a fair which used to be held in Shepherd's Market and its surrounding streets.

Medina (*mā-dē'-nā*). A city in Hedjaz, Arabia, the second holy city of the Mohammedans. It is celebrated as the place where Mohammed took refuge at the flight, 622 A. D., and where he died and was buried. The Great Mosque contains Mohammed's tomb.

Mediterranean Sea. Expresses the Latin *medius*, "middle," and *terra*, "earth," for the sea between two continents, viz, Europe and Africa.

Melbourne (*mēl'-būrn*). Named after Lord Melbourne in 1837.

Memphis (*mēm'-fīs*). In ancient geography, the early capital of Egypt. It was on the western bank of the Nile, south of Cairo. It is said to have been built by Menes. From *Ma-m-Phthah*, "the place of the Egyptian god Phthah."

Memphis, Tenn. An adoption from the ancient name of Memphis; not from any local similarity.

Memphremagog (*mēm-frē-mā'-gōg*), **Lake, Vt.** An application of the Algonquin name *mem-plow-bouque*, "a large expanse of water."

Menasha, Wis. An Indian word meaning "a thorn."

Mendocino (*mēn-dō-sē'-nō*), **Cape, Cal.** So named by Cabrillo in 1542 (Cabo Mendocino), in honor of the Viceroy of Spain, who had employed him.

Mendota (*mēn-dō'-tā*), **Minn.** From a tribe of Indians, *mendota*, meaning "the mouth," alluding to their dwelling at the mouth of the Minnesota River.

Menominee (*mē-nōm'-ī-nē*) **River, Wis.** From an Indian tribe, the Malominees or Menominees, their derivative name being Monomonick, "wild rice," or *Monomoniking*, "in the place of wild rice." The early French called the tribe *Folles Avoines*, "wild oats," from the Indian derivative.

Meredith (*mēr'-ē-dīth*). The English form of the Welsh name *Meredydd*.

Merlin (*mēr'-līn*). The English form of the

British name *Merddhin*. Probably derived through the French.

Merrimack (*mēr'-rī-māk*). River, county, and town in Hillsboro County, New Hampshire. From the Indian, meaning "sturgeon," or "swift water."

Merthyr-Tydvil (*mēr'-thēr tīd'-vīl*). Named after the daughter of an ancient British king.

Methuselah (*mē-thū'-sē-lā*). Hebrew, "driving away death." *Fr.*, Mathusalem; *Lat.*, Methusela.

Metz. Named from the *Meomatrici*, a tribe.

Mexico. The modern Spanish spelling is *Mejico*. It took its name from a temple of Mexitl, the Aztec war-god.

Mexico, Gulf of. From the name of the Aztec god of war, Mexitl.

Miami (*mī-ā'-mī*, *mī-ām'-ī*). Counties in Indiana, Kansas, and Ohio, cities in Dade County, Florida, and Saline County, Missouri, town in Ottawa Reservation, Indian Territory, and rivers in Florida and Ohio. The French orthography of the Indian word "*Maumee*," meaning "mother"; or, according to another authority, "pigeon."

Michael (*mī'-kēl*, *mī'-kā-ēl*). From the Hebrew, *Miykhael*, from *miy-k'-El*, "who is like God." *Fr.*, Michel; *Ger.*, Michael; *Hungarian*, Mihaly; *It.*, Michele; *Lat.*, Michael; *Polish*, Michal; *Port.*, Miguel; *Russ.*, Mikhail; *Sp.*, Miguel.

Michigan (*mīsh'-ī-gan*). From the lake on its western border, the Indian word, signifying "a weir of fish," given the lake from its fancied resemblance to a fish-trap. In the Ottawa dialect is the word *Mitchikan*, originally given to Mackinac, and meaning "fences," as if the island were lying fence-like before the upper lake.

Milan (*mīl'-ān*, *mīl-ān'*). The French and English form of the Italian Milano, called *Mailand* in German, is a corruption of the Celto-Roman name *Mediolanum*, the capital of the Insubrian Gauls, which signified the town in the "middle of the plain," *lanum* being the equivalent of the Latin *planum*.

Mildred (*mīl'-drēd*). A female name, from Anglo-Saxon *mild-red*, "mild in counsel." *Lat.*, Mildreda.

Miles. From Milesius, Latinized from the Irish *mile*, *milead*, "a soldier, a champion." Gaelic, *milidh*, "a hero, a renowned person."

Milicent. A feminine name, which in Latin is found written *Melicentia*, *Melissa*, and *Mellitta*. It comes from the Greek, which signifies both a "bee" and "honey."

Milledgeville, Georgia. After Governor Milledge, a soldier of the Revolution.

Milwaukee (*mīl-wō'-kē*), **Wis.** From the river, called by the Algonquins *Minnwaukee*, or *Me-ne-wau-kee*, "good earth, good country, rich or beautiful country." The name is also said to be derived from *Man-a-wau-kee*, the Indian name of the medicinal root *mannoan* growing on the river banks.

Mina. Abbreviated from *Wilhelmina*, or from the English form, *Williamina*.

Mincing Lane. A street in London connecting Fenchurch Street with Great Tower Street; the center of colonial (wholesale) trade. It received its name from the "minchens" (nuns) of St. Helen's, a part of whose domain it once was.

Minerva (*mī-nēr'-vā*). So named from Minerva, goddess of wisdom, war, and all the liberal arts.

Minneapolis, Minn. Dakota Indian words, *Minni*, "water," *ha*, "curling," and the Greek word *polis*, "a city," namely "city of the curling water," alluding to the falls of St. Anthony.

Minnehaha (*mīn-nē-hā'-hā*) **River, Minn.** A Dakota Indian compound word *Minne*, "water," *rara*, "to laugh," *Minnerara*. Hennepin, in 1680, from a false pronunciation, gave the present ending, "haha."

Minnesota (*mīn-nē-sō'-tā*). From the St. Peter's River, the Indian name of which was *Minnisotah*, *minni*, "water," *sotah*, "muddy or slightly turbid."

Minorca (*mī-nōr'-kā*) **Island**. In accordance with the Latin *minor*, the Lesser Island.

Mira. See Myra.

Miriam (*mīr'-ī-am*). From the Hebrew *Miryam*, the etymology of which is doubtful.

Mississippi. State of the Union, counties in Arkansas and Missouri, and river, one of the largest in the United States. An Indian word, meaning "great water," or "gathering in of all the waters," and "an almost endless river spread out."

Missoula (*mī-zōō'-lā*). County, river, and city in Montana. The name is said to mean the same as Missouri, "muddy water."

Missouri (*mīs-sōō'-rī*, *mīz-zōō'-rī*. Pop., *mīz-ōō'-rā*). From river of the same name. *Missouri*, compound word, from two very different languages — *mīs* (Algonquin), "great," *souri* (Dakota, commonly called Sioux), meaning "muddy"; in best English, "big muddy."

Mobile (*mō-bēl'*). A town in Alabama from which Mobile Bay takes its name. When, in 1539, Fernando de Soto landed in Florida, and made his wonderful march to the Mississippi, he had a desperate fight with the Creek Indians at a palisaded village called *Mauvila* or *Maubila* (probably the name of the tribe), at the junction of the Tombigbee and Alabama rivers. From this village the united stream acquired the name which in French became the River Mobile, at whose mouth the town of Mobile was built.

Mohawk. River, township, and village in Herkimer County, New York, said by one authority to have been named for a tribe of Indians, the word meaning "eats what lives," indicating that they were cannibals; but another authority states that it is a corruption of *Maquaas*, "muskrat."

Mohegan (*mō-hē'-gan*) **Lake, N. Y.** From a tribe of Indians whose name was from *maingan*, "a wolf."

Moldavia (*mōl-dā'-vī-ā*). The country traversed by the Moldau.

Molly. A baptismal name derived from Mary.

Monadnock (*mō-nād'-nōk*). A mountain in New Hampshire. An Indian word, meaning "spirit place," or, possibly, "bad," as signifying the difficulty of the ascent. Another authority gives the interpretation "at the silver mountain."

Monday. Means the "day of the moon." It was so called from its Latin name, *dies lunæ*.

Money. The first silver money was coined at Rome, A. U. C. 482. The mint was in the temple of June Moneta, and this circumstance occasioned the origin of our word "money."

Monica (*mōn'-ē-kā*) A feminine name. It may be from Italian *monaca*, "a nun," or a feminine formed from its root, Latin, *monachus*, "a monk."

Monocacy (*mō-nōk'-ā-sī*) **River, Md.** From the Indian name *menagassi*, "creek of many bends."

Monongahela (*mō-nōn-gā-hē'-lā*) **River, Pa.** From the Indian name *menawngihella*, "falling-in bank," "a river without islands."

Montana (*mōn-tā'-nā*). Spanish. *Montana*, "a mountain," literally a hilly country. Name presented to Hon. James M. Ashley in 1864, who was chairman of the Committee on Territories — suggested to the proposer owing to the territory embracing such a large portion of the Rocky Mountains and its spurs.

Montauk (*mōn-tōk'*) **Point, N. Y.** From the Indian *manati-auke*, *manati*, "country," *auke*, "island," "the island country."

Mont Blanc (*mōn blān'*). Means, "white mountain." The highest mountain of the Alps, situated on the frontiers of France and Italy, eternally covered with snow.

Monterey (*mōn-tē-rā'*), **Cal.** An honor by Vizcaino, in 1603, to Monte Rey, viceroy of Spain, who had dispatched the expedition under Vizcaino.

Monte Rosa (*mōn'-tē rō'-sā*). Meaning "rosy mountain." The highest mountain of the Alps, next to Mont Blanc.

Montgomery (*mōnt-gūm'-ēr-ī*), Ala. After General Richard Montgomery, who was killed at Quebec, Canada, 1775.

Montpelier (*mōnt-pē'-lī-ēr*), Vt. From the French, translated a "little or lesser mountain," probably suggested from Montpellier, a town in France.

Montreal (*mōnt-rē-ōl'*). In 1535, Jacques Cartier, on his second voyage, ascended the St. Lawrence as far as Quebec, where he left his ship, and reached an Iroquois village called Hochelaga, perched on an eminence, which from its splendid position he called *Mont Royal*, the "royal mount," now Montreal.

Moosehead Lake, Me. Indian name *Kennebec*, meaning "long lake," also *Seboomook*, meaning "shape of the moose's head."

Moravia (*mō-rā'-vī-ā*). The country traversed by the Morava.

Mordecai (*mōr'-dē-kā*). From the Hebrew, *Mord'-khay*, which Tregelles derived from the Persian, meaning "little man," or from *Merodach*, "worshiper of Mars."

Morgan. Some translate this name "by the sea," or "sea-dweller," or "seaman"; doubtless from Welsh *mor*, "the sea," *gan*, "bringing forth."

Moritz. See Maurice.

Morocco (*mō-rōk'-kō*). More correctly Marocco. The European name of the North African Sultanate called by the natives *Maghrib el Aksa*, "the furthest west," or *El Gharb*, "the west."

Moscow (*mōs'-kō*). Derived from Muscovea or Muscovy, an old name for Russia, now called in Russian *Moskva*, from the small River *Moskva* on which it stands. The name of the river is probably Finnic, signifying a "place for washing."

Moses (*mō'-zēz*). From the Greek *Mosheh*, "out-drawer, deliverer." Salmasius derives the name from the Coptic *moousi*, *moou*, "water," *si*, "from," or "to take or draw." Hones translates the name from the Egyptian *moo*, "water," and *ouie*, "taken or saved out of." Arabic, *Moosa* or *Musa*; Dutch, *Moses*; Fr., *Moïse*; Gr., *Moses*; Hungarian, *Mozes*; It., *Moisè*; Lat., *Moses*; Polish, *Moyzesz*; Sp., *Moyses*; Sw., *Moses*.

Mosquito (*mōs-kē'-tō*) Coast, Nicaragua. Owes its name to the troublesome insects (Spanish *mosca*), from the Latin *musca*, "a fly," which infest this neighborhood.

Mount Desert (*mōunt dē-zērt'*) Island, Me. Named by Champlain *Isle de Monts Deserts*, owing to barrenness of its craggy heights. The Indians called it *Pemetig*, "head, or the place which is at the head."

Mount Vernon. Residence of Gen. George Washington, and city in Lawrence County, Missouri, named for the foregoing, which was originally built by Lawrence Washington for Admiral Vernon, for whom it was named.

Mount Zion (*zī'-ōn*), or **Sion** (*sī'-ōn*). A hill on which was situated the old city of Jerusalem; the "city of David." The name has been applied to Jerusalem as a whole, and symbolically to the Christian church and heaven.

Muncy, Pa. From the creek on which it is located, the water taking the name from the *Minsi* Indians. *Minsink*, "dwelling place of the Minsi."

Munich (*mū'-nīk*). The English name of the capital of Bavaria, which is called *München* in German. Both forms have been independently obtained from the old name *Munichen*, found in 1058, which is from Old High German *munich*, "a monk," the town having been built on lands belonging to the monks of the convent of Schaftlarn.

Murfreesboro (*mūr'-frēz-būr-ō*). City in Rutherford County, Tennessee, and town in Hertford County, North Carolina, named for Col. Hardy Murfree, an officer of the Revolution.

Muriel, Meriel. From the Greek *Myron*, "myrrh."

Muskegon (*mūs-kē'-gūn*) River, Mich. From the Indian name, meaning "plenty of fish."

Muskingum (*mūs-kīng'-gūm*). River and county in Ohio. An Indian word meaning "moose-eye river," so called because of the number of moose and elk which inhabited the country.

Myles. Another spelling of Miles.

Myra (*mī'-rā*). A feminine name. The termination of some other Christian name; or from the Greek, *Myron*, "myrrh."

Nahant (*nā-hānt'*, *nā-hānt*). Town and watering-place in Essex County, Massachusetts. According to different authorities an Indian word meaning "at the point," or "two things united," the latter meaning given because the town is formed of two islands connected by a beach.

Nancy (*nān'-sī*. French, *nān-sē'*). Name formed from Nan for Ann.

Nantucket. Island and county in Massachusetts. This name appeared upon the maps in 1630, as *Natocko*, and some authorities state that it is derived from an Indian word meaning "far away"; others that its present form is a direct derivation of the Indian *Nantuck*, which means that the sandy, sterile soil tempted no one.

Naomi (*nā-ō'-mī*, *nā-ō-mī*). From the Hebrew *Naomi*, signifying "my pleasantness."

Naples (*nā'-plz*). A French corruption of the Italian *Napoli*, which preserves, with little change, the old Greek name *Neapolis*, "the new city," which in spite of its name is one of the oldest cities in Italy, having been founded by colonists from the still older settlement at Cumæ.

Napoleon (*nā-pō'-lē-ōn*. French, *nā-pō-lā-ōn'*). From the French name *Napoleone*, which has been translated "of the new city."

Narcissus (*nār-sīs'-ūs*). From the Greek, meaning a "daffodil." Fr., *Narcisse*; It., *Narcisso*; Lat., *Narcissus*.

Narragansett (*nār-rā-gān'-sēt*). Summer resort in Washington County, Rhode Island. An anglicization of the Indian name of a tribe, *Naiagansett*, which in their language means "people of the point."

Nashua (*nāsh'-ū-ā*), N. H. From the river, its Indian name meaning "between."

Nashville, Tenn. First named, as a settlement, *Nashborough*, in honor of Francis Nash of North Carolina, a brigadier-general in the Continental Army. In June, 1784, changed to *Nashville*.

Natal (*nā-tāl'*). Received its name from Vasco da Gama, because he discovered it on the Feast of the Nativity.

Natchez (*nāch'-ēz*). City in Adams County, Mississippi, named for the Indian tribe, the word meaning "hurrying men," or "one running to war."

Nathan (*nā'-than*). From the Hebrew *Nathan*, signifying "given." Fr., *Nathan*; Ger., *Nathan*; Lat., *Nathan*; Sp., *Natan*.

Nathanael or **Nathaniel** (*nā-thān'-ā-ēl* or *nā-thān'-ī-ēl*). From the Hebrew, meaning the "gift of God." Dutch, *Nathaniel*; Fr., *Nathaniel*; Ger., *Nathaniel*; Lat., *Nathanael*; Sp., *Natanael*.

Naugatuck (*nō'-gā-tūk*), Conn. Indian word expressive of "form of the rivers," "point between two rivers." Another source gives the word as *neguttugk*, meaning "one tree."

Nauvoo (*nō'-vōō*). City in Hancock County, Illinois, named in obedience to a "revelation" made to Joseph Smith, one of its Mormon founders.

Nebraska. State and river in the United States. An Indian word meaning "shallow, or broad water."

Nehemiah (*nē-hē-mī'-ā*). From the Hebrew *N'hemyah*, from *n'hhem-yah*, "whom Jehovah comforts" — that is, "aids." Danish, *Nehemias*; It., *Neemia*; Lat., *Nehemias*; Sp., *Nehemias*.

Nellie, Nelly. Names derived from Ellen, and sometimes from Helen.

Netherlands. Which means "low lands," is the English name of the Dutch Kingdom at the mouth of the Rhine which the French call *Les Pays Bas*.

Koninkrijk der Nederlanden is the official Dutch name of the kingdom as constituted after the war of 1830, when the Belgians acquired their independence.

Nevada (*nē-vā'-dā*). State of the Union, counties in Arkansas and California. From the mountain range running through the division, the Sierra Nevada. Spanish words *Serrado*, "serrated or saw-toothed," *Nevada*, "snowy," i. e., "snowy mountains," the application to the mountains taken from the Sierra Nevada Mountains of Granada.

Neversink Highlands, N. J. So called by the sailors of outgoing craft, from the circumstance of their being the highest seashore elevations. They remain above the horizon of their vision a long time after the other shores have disappeared, hence the query, "Will it *never sink*?" and the consequent application.

Neversink River, N. Y. From the Indian *Ne-wa-sink*, "mad river," also stated to be a local application, because the stream is less affected by drought than others.

Nevskii Prospekt (*něf'-skī-ī prōs-pěkt'*). The finest and most important street in St. Petersburg, noted for its fine buildings. Length, about three and one-half miles.

Newark (*nū'-ērk*), **N. J.** Suggested by the settlement's first minister, Rev. Abraham Pierson, from Newark-on-Trent, England, where he was "Episcopally ordained." Previously called *Milford*, this being given in 1666, by a band of Puritans from Milford, Connecticut.

New Bedford. City in Bristol County, Massachusetts. The name of the owner of the town site being Russell, the family name of the Duke of Bedford.

New Berne, or Newbern, N. C. From Berne, Switzerland, the native place of Christopher, Baron de Graafewidt, who in 1720 emigrated to and settled near this place.

New Brunswick (*brūnz'-wīk*). Received its name in compliment to the House of Brunswick.

New England. "That part of America in the ocean sea opposite Nova Albion in the South Sea, discovered by the ever-memorable Sir Francis Drake in his voyage about the world, in regard whereof this is styled New England, being in the same latitude."

Newfoundland (*nū'-fünd-länd*). The earliest of the colonial possessions of Great Britain. The name originally applied to the regions discovered by the two Cabots, and included a great portion of the North American coast. The island to which the name is now restricted is believed to have been the Island of St. John, so called because discovered by John Cabot on St. John's Day, June 24, 1497.

New Hampshire. Name given to the State, in 1629, by John Mason, in compliment to his native county in England.

New Harmony. Town in Posey County, Indiana, settled by the "Harmonists," and named for their sect.

New Haven. County and town in same county, in Connecticut, settled by parties from Boston, who called it a "new haven." Originally *Quinnippac*, from the Indian name of the river *Quinnepyoghq*, "long water place." The present name substituted "by the court," September 5, 1640.

New Holland. The name given to Australia previous to its settlement by the British.

New Jersey. In compliment to Cartaret, who had defended the Isle of Jersey (Cæsarea, one of the Channel Islands,) against the long parliament. Originally called *New Sweden* (when a Dutch possession).

New London. City and county in Connecticut, and town in Stanly County, North Carolina, named for the city in England.

New Mexico. A distinguishing name from "old"

Mexico, it having been a former possession of Mexico; Mexico from the Aztec god, "Mexitli." The territory was called *Nova Mexicana* by Antonio de Espejo at the time of the settlement of Santa Fé.

New Orleans (*nū ór'-lē-ānz*), **La.** Translation of the French name *Nouvelle Orleans*, given by them in honor of the Duc d'Orleans, then Regent of France.

Newport, R. I. In honor of the English admiral Christopher Newport (under James I.).

News. This word is made up of the first letter of each point of the compass: North, East, West, South. This, therefore, is usually given as the origin of the term *news*, which comes from all points of the compass.

New York (State). Denominated in honor of James, Duke of York, afterwards James II.

New York City. Named from the State. The island on which the city is mainly located, known as Manhattan Island. (See Manhattan.)

New Zealand (*zē'-land*). Name given by Dutch navigators, the word *Zeeland* denoting "sea-land," being significant of the low countries.

Niagara (*nī-āg'-ā-rā*). From the Indian word *Neagara*, meaning "across the neck," an allusion to a strip of land between lakes Erie and Ontario. The name has passed through many changes in spelling in the last two hundred years. Another derivation given is from *Oniawgarah*, "the thunder of waters."

Nice (*nēs*). A town on the Riviera, is the French form of the Italian Nizza.

Nicholas (*nīk'-ō-las*). From the Latin name, *Nicolaus*, signifying "conqueror of the people." *Dutch*, Nicolaas (more frequently Klaas); *Fr.*, Nicolas; *Ger.*, Nicolaus; *Gr.*, Nikolaos; *Hun.*, Miklos; *It.*, Niccolo or Nicolo; *Lat.*, Nicolaus; *Port.*, Nicolao; *Russ.*, Nikolai or Nikolas; *Sp.*, Nicolas; *Sw.*, Nils.

Nicodemus (*nīk-ō-dē'-mūs*). From the Greek, meaning, "victory of the people," or the "conqueror of the people." *Fr.*, Nicodème; *Gr.*, Nikodemos; *Lat.*, Nicodemus.

Niel (*nēl*). An Anglo-Saxon form of Nigel.

Nigel (*nī'-gēl*). A name derived from the Latin *nigellus*, "somewhat black"; a diminutive of *niger*, "black."

Nile. Called in Old Egyptian either *Hapi* or *P-iero*, "the river," of which *Nehar Misraim*, "the river of Egypt," or simply *Nahal*, "the valley" or "stream," were Semitic translations. The Greek name *Nilus* was probably a corruption of the Phenician name *Nahal*. The Arabs now call it *Bahr*, "the sea," the two Niles being distinguished as *Bahr-el-Azrak*, "the turbid" or Blue Nile, and *Bahr-el-Abyad*, the "clear" or White Nile. The Nile was also called *Sihor*, the "blue" or "dark" river, of which *Nilus* might conceivably be an Aryan translation, like the *Nilab* or "blue water" in the Punjab.

Niobrara (*nī-ō-brā'-rā*) **River, Neb.** From the Indian *nī*, "water," *abrara*, "wide," "the broad water."

Nita (*nē'-tā*). A feminine name derived from Annita, a diminutive of Ann.

Noah (*nō'-ā*). From the Hebrew, *Noah*, signifying "rest." *Arabic*, Nooh or Nuh; *Dutch*, Noach or Noak; *Fr.*, Noé; *Ger.*, Noah; *Gr.*, Noe; *Sw.*, Noa.

Noel (*nō'-ēl*). From the French name, *Noel*, so named from Noel, "Christmas," from being born on the day of that festival. *Fr.*, Noël; *Lat.*, Natalis or Noelius.

Nora, Norah (*nō'-rā*). Irish feminine names corrupted from *Onora*, from the English name Honora. As an English name Nora may sometimes be an abbreviation of Leonora.

Norfolk, Va. From the county in England of that name. (Anglo-Saxon, *north* "fork.")

Norman (*nōr'-man*). Means "born in Nor-

mandy," or "of Norman extraction." *Lat.*, *Nor-*
mannus.

Normandy (*nôr'-măn-dî*). Called *Normandie* in French. The province was occupied early in the Tenth Century by the Northmen, whose name on French soil gradually changed to Normans. A former government of France.

North Carolina (*kăr'-ô-lî'-nâ*). North and South Carolina were originally *Carolina*. The name was given in 1564, at the time of the first colonization by the Huguenots in the reign of Charles IX. of France. The English later preserved the name in honor of Charles II. of England.

North Sea. Indicative of its position geographically.

Norwalk, Conn. From the Indian *nayaug*, "the middle land," "a tract between two rivers."

Nova Scotia (*nô'-vâ skô'-shî-â*) or "New Scotland," was the pedantic name given by James I. to the French colony of Acadia, when he granted it by patent to Sir William Alexander, a Scotchman, on the pretext of its having been discovered by Cabot in the reign of Henry VII.

Nova Zembla (*nô'-vâ zêm'-blâ*). A mixture of the Latin and Slavonic, literally "new land."

November. The ninth month in the Roman calendar. From the Latin *novem*, nine.

Obadiah (*ô-bâ-dî'-â*). From the Hebrew *Obhadyah*, "servant or worshiper of Jehovah."

Oberlin (*ô'-bēr-lîn*). Village in Lorain County, Ohio, named for Jean Frederick Oberlin, a philanthropist.

Ocklawaha (*ôk-lâ-wâ'-hâ*) **River, Fla.** The Seminole Indian name, meaning "muddy place."

Ocklockonee (*ôk-lôk'-ô-nē*) **River, Fla.** From the Indian (Seminole), meaning "yellow water."

Ocmulgee (*ôk-mûl'-gē*) **River, Ga.** From the Creek Indian name, *Oko-mulgi*, "the turbulent stream."

Oconee (*ô-kô'-nē*) **River, Ga.** From the Seminole Indian word *eknoni*, "a water course," "a small river."

Octave. See *Octavius*.

Octavia (*ôk-tâ'-vî-â*). Feminine of *Octavius*. *Fr.*, *Octavie*; *It.*, *Octavia*; *Lat.*, *Octavia*.

Octavius (*ôk-tâ'-vî-ûs*). Latin name, signifying "the eighth," i. e., the eighth son in order of birth. *Fr.*, *Octave*; *It.*, *Octavio*; *Lat.*, *Octavius*; *Sp.*, *Octavio*.

October. Means "the eighth month." From the Latin *octo*, eight.

Odd Fellows. A fanciful name assumed by the original founders of the society.

Ogdensburg, N. Y. Named from Samuel Ogden, the first proprietor.

Ohio. State in the Union, river and counties in Indiana, Kentucky, and West Virginia. An Indian word meaning "the beautiful river."

Okeechobee (*ô-kē-chô'-bē*) **Lake, Fla.** Seminole Indian word meaning "grassy lake," also spelled *Okitchobi*.

Okefinokee (*ô-kē-fîn'-ô'-kē*) **Swamp, Ga.** A Choctaw word, *okefinocau* "quivering water."

Oklahoma (*ôk-lâ-hô'-mâ*). A Choctaw word signifying "red people," *okla*, "people," *homa*, "red." Another word is given meaning "home for all Indians."

Old Bailey, The. The principal criminal court of England, situated on the street named Old Bailey, which runs from Newgate to Ludgate Hill, not far from St. Paul's, London. It was the site of the Roman *vallum*, forming part of the city's fortifications external to the Wall, hence *Ballium* and *Bailey*. A *vallum* was a rampart of palisades, so called from *vallus*, a stake, and was planted on the top of the *agger*, or mound, thrown up for the purposes of defense.

Old Dominion (*dô-mŭn'-yŭn*). A name popularly given to the State of Virginia. Its origin is variously explained. Perhaps the best account is that

Captain John Smith called Virginia "Old Virginia" to distinguish it from "New Virginia," as the New England colony was called. The colony of Virginia was alluded to in documents as "the colony and dominion of Virginia"; hence the phrase, "the Old Dominion."

Old Jewry. One of the localities allotted in olden times as a residence for the Jews. The terminal *ry* is the Old English *ru* or *ra*, having a collective signification, as in rookery, eyry (eggery), poultry, etc.

Old Point Comfort. Town in Elizabeth County, Virginia, so named by Capt. Christopher Newport, because he found it a safe haven after a severe storm; the "Old" added to distinguish it from New Point Comfort a few miles away.

Olive. Derived, perhaps, through the French, from the Latin *olivia*, the "olive tree," an emblem of peace.

Oliver (*ôl'-î-vēr*). From French *olivier*, an olive-tree, from the Latin *olivia*. *Dutch*, *Olivier*; *Fr.*, *Olivier*; *It.*, *Oliviero* or *Uliviero*; *Lat.*, *Olivarus* or *Olivarius*; *Sp.*, *Oliverio*; *Sw.*, *Olivier*.

Olivia (*ô-lîv'-î-â*). The feminine of *Oliver*. *Danish*, *Olivia*; *Dutch*, *Olivia*; *Fr.*, *Olivie*; *Ger.*, *Olivia*; *Sw.*, *Olivia*.

Olympia (*ô-lîm'-pî-â*). In ancient geography, a valley in Elis, Peloponnesus, Greece, situated on the Alpheus. It is famous as the seat of a celebrated sanctuary of Zeus and the Olympic Games, the most important of the great public games of classical antiquity.

Olympia (*ô-lîm'-pî-â*), or **Olympias** (*ô-lîm'-pî-as*). From the Greek, meaning "belonging to Olympus," "divine." *Fr.*, *Olympe*; *Gr.*, *Olympias*; *Lat.*, *Olympias* or *Olympia*.

Omaha (*ô'-mâ-hô*). City in Douglas County, Nebraska. An Indian word, meaning "up-stream," also the name of a tribe designated as "upstream people."

Oneida (*ô-nî'-dâ*) **Lake, N. Y.** The name of an Indian tribe, the word signifying "the people of the beacon stone," so named from a tradition concerning a certain stone which followed them in their wanderings, finally resting on the summit of one of their highest hills, from which their beacon fires could be seen the greatest distance, and upon which they afterwards assembled to hold council or prepare for war.

Onondaga (*ôn-ôn-dô'-gâ*) **Lake, N. Y.** From a tribe of Indians, the *On-ti-ah-an-taque*, the word meaning "the place of the hills," also translated as "the marsh at the foot of the hill."

Ontario (*ôn-tâ'-rî-ô*). One of the Great Lakes, county in New York, and a village in Vernon County, Wisconsin. An Indian word, said by one authority to mean "beautiful lake"; by another, "beautiful prospect of rocks, hills, and water." Still another derives the word from the native *Onontac*, "the village on the mountain," and chief seat of the Onandagas.

Opelika (*ôp-ē-lî'-kâ*), **Ala.** Taken from the swamp's name, the Seminole name of which was *opîlualaikata*, "a large swamp."

Ophelia (*ô-fē'-lî-â*, *ô-fēl'-yâ*). From the Greek, meaning "help," "usefulness." *Fr.*, *Ophélie*; *Gr.*, *Ophelia*; *Lat.*, *Ophelia*.

Orange Free State. So called because the original settlers were emigrants from the principality of Orange, in Holland. Now called Orange River Colony.

Orangemen (*ôr'-ěj-mĕn*). Irish Protestants. The name was given about the end of the Seventeenth Century by Roman Catholics to the Protestants of Ireland, on account of their support of the cause of William III. of England, prince of Orange.

Oregon (*ôr'-ē-gŏn*). State of the Union, and a county in Missouri. The name said to have been derived from *Origanum*, a species of wild sage found along the coast in the State, but another

authority states that it is derived from the Spanish *Oregones*, which name was given the Indian tribes inhabiting that region, by a Jesuit priest, the word meaning "big-eared men."

Origen (ör'-i-jěn). Meaning, "descended from Horus," an Egyptian deity. *Fr.*, Origene; *Gr.*, Origenes; *Lat.*, Origenes.

Orkney (örk'-nē) **Isles**. Expresses the Gaelic for the "isles of whales, or porpoises."

Orlando (ör-lăn'-dō). A form of Roland. *It.*, Orlando; *Lat.*, Orlandus.

Orleans (ör'-lē-ănz. French, ör-lā-ăn'). Means "Aurelian's city," from Aurelianus, named after the Emperor Aurelian.

Orson. A masculine name, derived, like the Italian Orso, from the Latin *ursus*, "a bear."

Osage (ō-sāj', ō'-sāj) **River, Mo.** From the Indian, translated "the strong."

Osawattomie (ōs-ā-wōt'-ō-mē), **Kan.** A composite word, *Osa* and *Wottomie*, formed from the names of the rivers Osage and Pottawottomie.

Oscar. From the Old German name *Oskar*, "very renowned."

Oskaloosa (ōs-kā-lōō'-sā) **Kan.** A compound word, *Oska*, name of an Indian chief, *Loosa*, his wife.

Osmund. Some translate this name "house-peace." Wachter renders it "excellent, gallant, brave man."

Oswald (ōz'wald). From Old German *os-walt*, "illustrious magistrate, prefect or administrator."

Oswego (ōs-wē'-gō), **N. Y.** From the river, the Iroquois name being *oswageh*, "flowing out."

Otho (ō'-thō), or **Otto** (ōt'-tō). Some translate Otho "happy," and Otto "rich," but they would seem to be the same name. It comes from Old German *od*, "excelling, happy, fortunate." *Dutch*, Otto; *Fr.*, Othon; *Ger.*, Otto; *It.*, Ottone; *Lat.*, Otho; *Sp.*, Otonio; *Sw.*, Otto.

Ottawa (ōt'-ā-wā). The capital of the Dominion of Canada, stands on the River Ottawa, which preserves the name of the *Ottawa* or *Otauia* tribe, an Algonquin term meaning "traders," literally, "he trades."

Ottoman (ōt'-tō-man) **Empire**. The official title of the realm subject to the Sultan, takes its name from Othman, the Emir under whom the Turks first advanced into Europe. Othman is the Tartar word *ataman*, which we have in the title of the Hetman of the Don Cossacks, and means a "commander of horse," *at*, "a horse."

Ovid (ōv'-id). From the Latin, meaning "goat," or "sheep," or both. *Dutch*, Ovidius; *Fr.*, Ovide; *Ger.*, Ovidius; *It.*, Ovidio; *Lat.*, Ovidius.

Owego (ō-wē'-gō), **N. Y.** Delaware Indian word, *ahwaga*, "where the valley widens."

Owen. Probably from the Irish name *Eogan*, signifying "youth."

Oxford. Anglo-Saxon *Oxnaford*, the "ford of the oxen," is a name of the same class as Shefford, the "sheep ford," Hertford and Swinford in England, or Ochsenfurt and Schweinfurt in Germany.

Ozark (ō-zärk'). County and city in Christian County, Missouri, and village in Dale County, Alabama. A corruption of the French name *auxarcs*, meaning "with bows," a term descriptive of the Indians who inhabited the country. It is also claimed, especially for the mountains, that the name is a provincial composite of the river Osage and Arkansas, lying between the *Oz* and *Ark*, i. e., *osark*.

Pacific Ocean. Is the English translation of *Mar Pacifico*, or *Oceano Pacifico*, the somewhat inappropriate name bestowed by Magellan, in 1521, on the great ocean which he was the first to traverse.

Paducah (pā-dū'-kā), **Ky.** From the name of an Indian chief, "Paducah."

Palestine (pāl'-ēs-tīn). From the Greek *Palæstina*, a name indicating that the Greek mariners

first knew Canaan as the land of the Philistines inhabiting the coast. The latter arrived, probably from Cyprus, after the Hebrew conquest and before the time of Rameses III., on whose monuments they appear as *Pulista*.

Palisades (pāl'-i-sādz'), **The**. A basaltic bluff extending along the western shore of the Hudson in the States of New Jersey and New York. It commences opposite the northern part of New York City, and continues northward about eighteen miles. Height, 200-500 feet.

Pall Mall (pēl-mēl'). A fine street in London, leading from Trafalgar Square to the Green Park. Its name is a modern spelling of *paille maille*, the title of a French game of ball somewhat similar to croquet, first played in this London thoroughfare about 1621.

Palo Alto (pā'-lō āl'-tō). Town in Santa Clara County, California. A Spanish phrase meaning "high stick."

Pamlico (pām'-lik-ō) **Sound, N. C.** From a tribe of Indians called the Pamlicoos.

Pamphlet. This word is derived from the name of a Greek authoress, Pamphylia, who compiled a history of the world in thirty-five little books.

Panama (pān-ā-mā'. Spanish, pā-nā-mā'). Was the native name of a village on the Pacific Coast of the Gulf and Isthmus of Panama. Here, in 1518, Davila founded the oldest existing city in America. Panama is believed to be a Guarani word meaning a "butterfly," and also, according to Wullerstorff, signifying a "mudfish," perhaps because the flaps of the mudfish resemble the wings of a butterfly. From the town of Panama the name was extended to the Isthmus and Gulf.

Panama Bay. The bay of "mudfish."

Paolo. See Paul.

Papua (pā'-pōō-ā). A Portuguese term for "frizzled," in alluding to the enormous frizzled heads of hair worn by the natives.

Paraguay (pār'-ā-gwā). River and republic of South America, meaning "the river of waters," referring to its numerous tributaries.

Paris (pār'-is. French, pā-rē'). From the name of the Keltic tribe *Parisii*. It was called by the Romans *Lutetia Parisiorum*, the "bright city of the Parisii," from the white stone used in building.

Parkersburg. City in Wood County, West Virginia, named for Alexander Parker of Pennsylvania.

Parnell (pār'-nēl). A feminine name corrupted from Petronilla.

Parry Islands. Named for the famous Arctic navigator, Sir W. E. Parry, to whom their discovery was due.

Pasadena (pās-ā-dē'-nā). City in Los Angeles County, California. An Indian word meaning "crown of the valley."

Paschal (pās'-kāl. French, pās-kāl'). Means "belonging to Easter," or "born at Easter." *Gr.*, Pascal; *It.*, Pasquale; *Lat.*, Paschalis; *Sw.*, Pascual.

Passaic (pās-sā'-ik). County, city, and river in New Jersey; derived either from the Indian word *Passaic* or *Passajeeek*, "a valley," or from the Indian equivalent of "peace."

Passamaquoddy (pās-sā-mā-kwōd'-dī). Bay on coast of Maine. An Indian word meaning "pollock ground," or "pollock-plenty space."

Passumpsic (pās-sūmp'-sik) **River, Vt.** Indian word meaning "much clear river."

Patagonia (pāt-ā-gō'-nī-ā). So styled by Magellan in accordance with the Spanish word *patagon*, meaning a "large, clumsy foot." It was from the fact of seeing the impressions of the large shoes of the aborigines that he at once concluded the country must be inhabited by giants.

Patapsco (pā-tāps'-kō) **River, Md.** From the Indian name *patapsqui*, "black water."

Paternoster Row (*pā'-tēr nōs'-tēr rō*). A street in London, north of St. Paul's, long famous as a center of book publishing. It is said to be so named from the prayer books or rosaries sold in it.

Paterson. City in Passaic County, New Jersey, named for William Patterson, an early governor.

Patience. Found as a masculine as well as a feminine name. The name explains itself.

Patrick (*pāt'-rik*). From the Latin *Patricius*, meaning "patrician," "noble." *Dutch*, Patricius; *Fr.*, Patrice; *It.*, Patrizio; *Lat.*, Patricius; *Sp.*, Patricio.

Paul (*pól*. French, *pól*. German, *powl*). A name derived from the Hebrew, signifying "small in stature." *Danish*, Paul or Paulus; *Dutch*, Paulus; *Fr.*, Paul; *Ger.*, Paul; *Gr.*, Paulos; *Hungarian*, Pal; *It.*, Paolo; *Lat.*, Paulus; *Polish*, Pawel; *Port.*, Paulo; *Russ.*, Pavel; *Sp.*, Pablo; *Sw.*, Paul.

Paulina (*pó-lē'-ná*, *pó-lī'-ná*). The feminine of Paul. *Fr.*, Pauline; *Ger.*, Pauline; *It.*, Paolina; *Lat.*, Paulina.

Pauline (*pó-lēn'*. French, *pō-lēn'*). A French name derived from the Roman name Paulina.

Payette (*pā-ēt'*) **River, Idaho.** Named by a French trapper, Jose Payette.

Peabody Institute. An institute at Baltimore, founded by George Peabody, and containing a library, conservatory of music, art gallery, etc.

Pearl River, Miss. The Indian name was *Tallahatchie*, signifying "river of pearls," of river stones, obtained from a peculiar shell taken from the bottom of the canoes; supposed to be a kind of oyster.

Pecos (*pā'-kōs*) **River, Tex.** Named by the Spaniards, from *pecoso*, "freckled," a local suggestion in the appearance of its waters.

Pedro. See Peter.

Peekskill. Village in Westchester County, New York, named for Jan Peek, a Dutch mariner of the Seventeenth Century.

Pekin (*pē-kīn'*), or **Peking** (*pē-kīng'*), Chinese, *Peh-king*. The "north court" or "northern capital," has been so called since 1421, when the third Ming Emperor transferred hither the residence of the court from Nanking, the "southern court."

Pembina (*pēm'-bē-ná*), **Dak.** Contraction of Ojibway Indian word *anepeminan*, a red berry growing in that vicinity, which Michaux regards as a variety of the cranberry of the East.

Pend Oreille (*pēnd-ō-rēl'*) **Lake, Idaho.** From the French, meaning "ear-ring," suggested by its shape.

Penelope (*pē-nēl'-ō-pē*). The Greek name which some render "female weaver"; others define it "a web," and "a garment," because the wife of Ulysses was the best weaveress. *Fr.*, Pénélope; *Gr.*, Penelope; *Lat.*, Penelope.

Pennsylvania. William Penn originally designed calling the territory "New Wales," but afterward suggested the word *Sylvania*, as suitable for a land covered with forests. The King of England, in 1681, prefixed the word "Penn" in honor of William Penn; literal translation, "Penn's woods."

Pennsylvania Ave. The principal avenue of Washington, D. C. Its most important section lies between the capitol and the treasury.

Penobscot (*pē-nōb'-skōt*). Derived from the Indian word *penobskeag*, meaning "rocky place," or "river of rocks." Also said to be the name of an Indian tribe.

Pensacola (*pēn-sá-kō'-lá*). Bay and city in Escambia County, Florida. Said to be derived from the Indian word *Pan-sha-okla*, meaning "hair people." The French gave to the bay the name of *Port-de-Aucloss*, also *Bai de St. Mariette*.

Peoria (*pē-ō'-rī-á*). County and city in Illinois and nation in Indian Territory. An Indian word meaning "place where there are fat beasts."

Percival (*pēr'-sī-val*). An old masculine baptismal name, derived from a local name in Normandy. It probably means "companion of the chalice."

Percy. A name derived from Perci, a parish and canton near St. Lo, in Normandy.

Peregrine (*pēr'-ē-grīn*). From the Latin, meaning "foreign," "pilgrim," "traveler." *Danish*, Peregrinus; *Dutch*, Peregrinus; *It.*, Peregrino; *Lat.*, Peregrinus; *Sw.*, Peregrinus.

Père-la-Chaise or **Père Lachaise** (*pâr lâ-shāz'*). The Persian cemetery so named is the site of a great monastery founded by Louis XIV., of which Pere la Chaise, a favorite confessor of that luxurious monarch, was the first superior. He died in 1709. After the Revolution, the grounds were laid out for a cemetery.

Pernambuco (*pēr-nām-bōō'-kō*). An important city of Brazil. Means "the mouth of hell," in allusion to the violent surf always distinguished at the mouth of its chief river, the Amazon.

Persepolis (*pēr-sēp'-ō-līs*). In ancient geography, one of the capitals of the Persian Empire, situated not far from the Kur, about thirty-five miles north-east of the modern Shiraz.

Persia (*pēr'-shī-á*, *pēr'-shá*, *pēr'-zhá*). Name given by the Greeks to the region, the capital of which was Persepolis, originally overrun by a wild branch of the Ayrian race called the *Parsa*, meaning in the native tongue "the tigers." The Persian name for the country is Iran.

Perth Amboy, N. J. One of its landed proprietors was James Drummond, the Earl of Perth, who named the original settlement *Towne of Perth*; the point of land at the mouth of the Raritan was known as Ambo Point, and early attachment or consolidation gave its present name.

Peru (*pē-rōō'*). Received its name from its principal river, the Rio Paro, upon which stands the ancient city of Paruru. The Brazilian term *Para*, however modified, is at all times suggestive of a river.

Peter (*pē'-tēr*). From the Greek, signifying a "rock," properly, a "stone." *Danish*, Peder; *Dutch*, Pieter; *Fr.*, Pierre; *Ger.*, Peter; *Gr.*, Petros; *Hungarian*, Peter; *It.*, Pietro; *Lat.*, Petrus; *Polish*, Piotr; *Port.*, Pedro; *Russ.*, Piotr; *Sp.*, Pedro; *Sw.*, Peter.

Petersburg or **St. Petersburg.** Properly Peterburg or St. Peterburg, the capital of Russia, was founded by Peter the Great, who, having in 1702 taken the Swedish forts on the Neva, in the following year laid the foundations of a fort which he called Peterburg (Fort Peter), on an island in the Neva, the nucleus and now the most densely populated portion of the city.

Petersburg, Va. Originally named Peter's Point, after the trader Peter Jones, who opened a depot here.

Pharaoh (*fā'-rō*, *fā'-rā-ō*). A title given to the Egyptian kings. From the Hebrew *Paroh*, which has been variously translated "son of the sun," "mouth of the sun," "voice of God," and "sun" only. The proper meaning of the word is "the king" or "great house."

Phebe. See Phœbe.

Philadelphia (*fīl-á-dēl'-fī-á*), **Pa.** From two Greek words meaning "loved or friendly," and "brother," applied as "brotherly love." The Indian name of the locality was *Coaquannok*, "grove of tall pine trees."

Philemon (*fī-lē'-mōn*). Means "saluting." *Fr.*, Philémon; *Gr.*, Philemon; *It.*, Filemone; *Lat.*, Philemon.

Philetus (*fī-lē'-tūs*). From the Greek, meaning "beloved." *Gr.*, Philetos; *It.*, Fileto; *Lat.*, Philetus.

Philibert (*fīl'-ē-bērt*), or **Philebert.** From the Teutonic, signifying "famously bright." *Danish*,

Philibert; *Fr.*, Philibert; *It.*, Filiberto; *Lat.*, Philebertus.

Philip (*fīl'-īp*). From the Greek name signifying, "fond of horses." *Dutch*, Philippus; *Fr.*, Philippe; *Ger.*, Philipp; *Gr.*, Philippos; *Hungarian*, Filep; *It.*, Filippo; *Lat.*, Philippus; *Polish*, Filip; *Port.*, Felipe; *Russ.*, Philipp or Filip; *Sp.*, Felipe; *Sw.*, Filip.

Philippa (*fīl'-līp'-pā*). A feminine name formed from Philip. *Dutch*, Philippa; *Ger.*, Philippine; *Gr.*, Philippa; *It.*, Filippa; *Lat.*, Philippa; *Sp.*, Felipa; *Sw.*, Filippina.

Philippi (*fīl'-īp'-ī*). Named after Philip of Macedon.

Philippines (*fīl'-īp'-īnz*). Were discovered by Magellan on the Feast of St. Lazarus, 1521, and hence called by him *Archipelago de San Lazaro*, a name changed in 1542 to *Islas Filipinas* in honor of Philip II., in whose reign the Spanish colonization of the islands was begun.

Phillis. Derived from the Greek *Phyllis*, name of a country woman introduced in Virgil's *Eclogues*, and of a nurse of Lyncurgus, King of Thrace, and of a nurse of the Emperor Domitian. It means "a green branch covered with leaves, a leaf, foliage, a heap of leaves."

Phineas (*fīn'-ē-as*). From the Hebrew *Piynhhas*, "mouth of brass." *Fr.*, Phinéas; *It.*, Fineo; *Lat.*, Phineas; *Sp.*, Phinees.

Phoebe (*fē'-bē*). From the Greek name, meaning "clear, pure, bright." *Fr.*, Phébé; *Gr.*, Phoibe; *It.*, Febe; *Lat.*, Phoebe.

Phyllis. See Phillis.

Piccadilly (*pīk'-kā-dīl-lī*). The great thoroughfare in London between Hyde Park Corner and the Haymarket. The street was named from a house of entertainment (Piccadilly House) which stood in the Haymarket in the time of Charles I. The name originally comes from the picardils or small stiff collars once worn by English gallants.

Pierre. See Peter.

Pieter. See Peter.

Pietermaritzburg (*pē-tēr-mār'-īts-būrg*). Named after two Boer leaders.

Pietro. See Peter.

Pike's Peak. One of the highest summits of the Rocky Mountains, situated in Colorado, seventy miles south by west of Denver. It was discovered and ascended in 1806, by Lieutenant (afterwards General) Zebulon Montgomery Pike, a surveying officer of the United States, for whom it was named.

Pillars of Hercules. In ancient geography, the two opposite promontories Calpe (Gibraltar) in Europe and Abyla in Africa, situated at the eastern extremity of the Strait of Gibraltar, sentinels, as it were, at the outlet from the Mediterranean into the unknown Atlantic.

Pincian (*pīn'-chān*) **Hill**. A hill in the northern part of Rome, extending in a long ridge east from the Tiber. One of the famous "Seven Hills."

Pin Money. Catharine Howard, wife of Henry VIII., introduced pins into England from France. As they were expensive at first, a separate sum for this luxury was granted to the ladies by their husbands. Hence the expression "pin-money."

Piscataqua (*pīs-kāt'-ā-kwā*) **River, N. H.** From the Indian *Piscataquanke*, "a great deer place."

Pittsburg. In Pennsylvania, was originally called Fort Du Quesne, after a French Governor of Canada, and afterward, in 1758, when the French had been driven out by Washington, it was renamed Fort Pitt, after William Pitt, Earl of Chatham, the name Pittsburg being adopted in 1769.

Pius. From the Latin, meaning "pious." *Fr.*, Pie; *Ger.*, Pius; *It.*, Pio; *Lat.*, Pius.

Plantagenet (*plān-tāj'-ē-nēt*), **House of**. A line of English kings (1154-1399) founded by Henry II., son of Geoffrey, count of Anjou, and Matilda, daughter of Henry I. of England. It is said to have been assumed by the first count of that name

from his having caused himself to be scourged with branches of broom (*planta genesta*) as penance for some crime he had committed.

Plata, Rio de la (*rē'-ō dā lā plā'-tä*). Literally, "river of the silver," was named by Sebastian Cabot, in 1526, by reason of a few gold and silver ornaments, the earnest of the wealth of Peru, which he obtained by barter from the natives, and which he hoped were an indication of an El Dorado in the interior.

Platte (*plāt*). River in Nebraska, Colorado, and Wyoming. A French word meaning "dull, flat, shallow," singularly applicable to this stream.

Pliny (*plīn'-ī*). From the Roman naturalist Caius Plinius. *Fr.*, Pline; *Ger.*, Plinius; *It.*, Plinio; *Lat.*, Plinius.

Plymouth (*plīm'-ūth*). Town in Plymouth County, Massachusetts, the landing place of the Pilgrims, which was named for the town in England where they were most hospitably entertained before sailing for America. The English town was so called because built at the mouth of the River Plym.

Pocomoke (*pō'-kō-mōk*) **River, Md.** From its Indian name *pockhammokik*, "broken by knobs, small hill."

Poets' Corner. A space in the east side of the south transept of Westminster Abbey, containing the tablets, statues, busts, or monuments of Shakespere, Ben Jonson, Chaucer, Milton, Spenser, and other British poets, actors, divines, and great men. Some of them are buried near or under their monuments.

Point Comfort, Va. Given to the locality in 1607 by the first colonists on their voyage of exploration up the James River, called "*Poynt Comfort* on account of the goode channel and safe anchorage it offered."

Point Judith, R. I. From Judith Quincy, wife of John Hull, the coiner of the rare old pine-tree shillings of 1652.

Point Pinos (*pē'-nōs*), **Cal.** Named Pinta de Pinos by Vizcaino, in 1603, from the prevalence of the pine-tree.

Point Reyes (*point rā'-ēs*), **Cal.** From *Tres Reyes*, name of the vessel commanded by Aguilar of Vizcaino's Spanish expedition, 1603.

Poitiers or Poitiers (*poi-tērz'*. French, *pwā-tī-ā'*). Town in France, so named from the *Pictones*, or *Pictavi*, a Keltic people.

Poland. An inversion of Land-Pole, the Slavonic for "men of the plains," who first overran this territory. It is called *Polen* or *Pohlen* in German, *Pologne* in French, and *Polska* in Polish.

Pompey (*pōm'-pī*). From the Latin meaning "of Pompeii," i. e., the city of Pompeii. *Danish*, Pompejus; *Dutch*, Pompejus; *Fr.*, Pompee; *It.*, Pompeo; *Lat.*, Pompeius.

Pompey's Pillar. A Corinthian column of beautifully polished red granite at Alexandria, standing on a pedestal or foundation of masonry.

Pontchartrain (*pōnt-chār-trān'*). Lake in Louisiana, named for a French count who was an early explorer of the Mississippi Valley.

Ponte Vecchio (*pōn'-tē vēk'-kē-ō*). A bridge in Florence, over the Arno; a picturesque structure with three wide arches, rebuilt in 1345. The roadway is bordered on both sides by quaint little shops, except over the middle arch, where there is an opening. Over the south row of shops is carried a gallery, built by Vascari, connecting the Pitti Palace with the Uffizi and the Palazzo Vecchio.

Popocatepetl (*pō-pō-kā-tā-pēt'l*). The loftiest volcano in Mexico, means the "smoking mountain." From the Aztec *popoca*, "he smokes," and *tepetl*, a "mountain."

Porta Maggiore (*pōr'-tā mād-jō'-rē*). The finest and most imposing ancient gate in the walls of Rome.

Portland, Me. In 1786, "an act for erecting that

part of the Town of Falmouth in the County of Cumberland commonly known as the Neck into a town by the name of Portland." The name was recommended from its being the oldest English name in that section, given to a large island in the harbor, the name of the main channel (Portland Sound) and the mainland opposite (Portland Head).

Portland, Oregon. Named in compliment to Portland, Me. F. W. Pettygrove and Gen. A. L. Lovejoy, in 1843, were the purchasers of what was afterward Portland, and of which ground they were the first occupants. As a native of Maine, Pettygrove desired to compliment Maine in naming the locality, and similar motives prompted his partner to call it Boston (his native place). The controversy settled by tossing an old American red cent; the one who threw the most heads in three flips should name the town. The score is recorded; Lovejoy, tails, two, heads, one; Pettygrove, heads, two; and so we have *Portland* instead of Boston, Oregon.

Portland Vase. A famous urn of blue transparent cameo-cut glass, ten inches high. It was discovered about 1630 in a sarcophagus in a tomb in the Monte del Grano, near Rome. It is so called from its possessors, the Portland family.

Porto Rico (*pōr'-tō rē'-kō*). Spanish for "rich port."

Port Royal, S. C. From the bay, called Royale by Ribaut, "because of the fairnesse and largnesse thereof" of its waters.

Portsmouth, N. H. From Portsmouth, England; the governor of which, Captain John Mason, was the original proprietor of its namesake.

Portugal (*pōr'-tū-gal*. Portuguese, *pōr-tōō-gāl'*). The *Portus Galliae* of the Romans, literally, "the gates of Gaul," as approached from the Mediterranean and Atlantic Seas.

Potomac (*pō-tō'-mak*). River forming the boundary line between Maryland, Virginia, and West Virginia. Indian *Patowmek* or *Potowmak*, "they are coming by water"; another translation, "place of the burning pine," allusion to a council fire.

Potsdam (*pōts'-dām*. German, *pōts'-dām*). Prussian city situated at the junction of the Nuthe with the Havel, sixteen miles southwest of Berlin. It is an imperial residence, and contains many palaces. The name is a corruption of the Slavonic *Pod-dubami*, "under the oaks."

Poughkeepsie (*pō-kīp'-sī*). City in Dutchess County, New York. Derived from the Delaware Indian word, *apokeepsink*, meaning "safe and pleasant harbor," or "shallow inlet, safe harbor for small boats."

Prado (*prā'-dō*). The chief fashionable promenade of Madrid.

Prague (*prāg*). The capital of Bohemia, is the English form of the German *Prag*, or *Praha*, which in Czech means the "threshold," referring, it is supposed, to a reef of rocks in the bed of the Moldau. The suburb of Warsaw on the right bank of the Vistula similarly goes by the name of Praga, the "threshold."

Prairie du Chien (*prā'-rē dū shēn*. French, *prā-rē' dū shē-ān'*), **Ia.** French words, translated "dog prairie"; from the local habitations of the prairie dogs.

Prater (*prā'-tēr*). A noted public park in Vienna.

Prescott, Ariz. In compliment to the American historian, William H. Prescott.

Pretoria (*prē-tō'-rē-ā*). The capital of the Transvaal, was named in honor of Andries Pretorius, a Boer leader, whose son became the first President of the Republic.

Prince Edward Island. In the Gulf of St. Lawrence, was formerly called *St. John's Island*. In 1798, the local legislature passed an Act, confirmed in 1799 by the king in council, changing the name to Prince Edward Island, in compliment to Prince Edward, afterward Duke of Kent, and father of

Queen Victoria, who was then commander of the forces in British North America.

Prince of Wales Island. Named after the Prince Regent, afterwards George IV. of England.

Printer's Devil. The youngest apprentice in a printing-office, whose duty it is to do all the dirty jobs. The early printers were by many believed to practise the black art; Aldus Manutius had a negro boy for a body servant, and the superstitious townsfolk nicknamed this boy "the devil."

Priscilla (*prīs-sīl'-lā*). A diminutive of the Latin *priscus*, "old, ancient." *Dutch*, Priscilla; *Fr.*, Priscille; *It.*, Priscilla; *Lat.*, Priscilla.

Protestant. The second Diet of Spires, in 1529, decided that the religious differences could only be decided by an ecclesiastical council, thus disallowing the right of private judgment. A solemn protest was made against this decision by the Lutheran princes of Germany, April 19, 1529, in consequence of which the members of the Reformed Churches have since been known as Protestants. The protest was drawn up by Luther and Melancthon.

Provence (*prō-vāns'*). An ancient government of southeastern France. The *Provincia* of Cæsar, a name reminding us that it was the first province acquired by Rome beyond the Alps.

Providence, R. I. Given by Roger Williams in recognition of "God's merciful providence to me in my distress." The Indian name of the locality was *Mooshansick*.

Prudence. A feminine name given by Puritans. From the Latin *prudentia*, "wisdom, prudence, discretion, knowledge."

Prussia. Is the Latinized form of the German name *Preussen*, itself a corruption of an older Lithuanian name. Old Prussia was the Duchy formed in the eastern corner of the modern kingdom out of the possessions of the Teutonic knights, whose inhabitants in the Tenth Century were called Prutheni or Pruzzi, which, according to Zeuss, is a Lettish name meaning "neighbors."

Ptolemy (*tōl'-ē-mī*). From the Greek, meaning "war-like," or "mighty in war." *Dutch*, Ptolemeus; *Fr.*, Ptolémée; *Ger.*, Ptolemaus; *Gr.*, Ptolemaios; *It.*, Tolomeo; *Lat.*, Ptolemaeus.

Pueblo (*pwēb'-lō*). County and important manufacturing city, in same county, in Colorado. A Spanish word meaning "a collection of people, a town or village."

Punch and Judy. A contraction for Pontius and Judas. It is a relic of an old miracle play in which the actors were Pontius Pilate and Judas Iscariot.

Punjab or Punjaub (*pūn-jāb'*). This great north-west Indian territory derives its name from two Persian words, signifying "five rivers." The five affluents of the Indus which give rise to the name are the Jhelum, the Chenab, the Ravi, the Beas, and the Sutlej.

Pyrenees (*pīr'-ē-nēz*). The chain separating France from Spain is the *Mons Pyrenæus* of the Greek and Roman geographers. The name first appears in Herodotus, who supposed *Pyrene* was the name of the place where the Danube flowed. The etymology is unknown, being probably pre-Aryan. Many guesses have been made from Basque, Keltic, and Greek sources, explaining the name as the "high," "steep," "pine-clad," or "burnt" mountains. The most probable derivation is from *biren* or *pyren*, a local word, doubtless ultimately Basque or Iberian, which signifies a "summit" or "ridge."

Quakers. This name was originally applied by a Derby, England, magistrate to the members of the Society of Friends, because George Fox, the founder, admonished him and those present to tremble at the name of the Lord.

Quebec (*kwē-bēk'*). The former capital of Canada, arose around a blockhouse built by Champlain in 1608. The name is believed to refer to the "narrowing" of the river at this point

to which Champlain alludes. Another account says it was named after Quebesq in Brittany, "the village on the point"; while a third derives it from an Algonquin term signifying "take care of the rock."

Queen Charlotte Island. Named in compliment to the Queen of George III.

Queensland and Queenstown. Both named after Queen Victoria.

Quentin. See Quintin.

Quinsigamond (*kwîn-sîg'-â-mond*) **Lake, Mass.** Indian word meaning "fishing place for pickerel."

Quintin, Quintyne (*kwîn'-tîn*). From the Latin name Quintinus, formed from the name Quintus.

Quintus (*kwîn'-tûs*). The Roman name signifying "the fifth," i. e., the fifth son in order of birth.

Quirinal (*kwîr'-în-âl* or *kwîr'-î-n-âl*). The farthest north and the highest of the seven hills of ancient Rome, lying northeast of the Capitoline and northwest of the Viminal. It has its name from an old Sabine sanctuary of Quirinus (Mars). On the hill stands the palace of the Quirinal, the former summer palace of the pope.

Quiz. It is said that Daly, the manager of a Dublin play-house, laid a wager that a new word of no meaning should be the common talk and puzzle of the city in twenty-four hours. In consequence of this the letters *q u i z* were chalked by him on all the walls of Dublin, with an effect that won the wager.

Rachel (*râ'-chêl*). From the Hebrew *Rahhel*, usually translated "a ewe." Fuerstius translates the name "mutterschaft," i. e., motherhood, maternity. *Fr.*, Rachel; *Ger.*, Rahel or Rachel; *It.*, Rachele; *Lat.*, Rachel; *Sp.*, Raquel; *Sw.*, Rachel.

Rafael. See Raphael.

Rafaele or Raffaele. See Raphael.

Rahway (*rô'-wâ*), **N. J.** From the river; its name traditionally traced to a Raritan chief named Rahwack, who had his habitation near the river's mouth.

Rainier (*râ'-nêr*). Town in Columbia County, Oregon, and mountain in Washington, named for Rear-Admiral Rainier.

Raleigh (*rô'-lî*), **N. C.** In honor of Sir Walter Raleigh, who located a colony on Roanoke Island, July 23, 1587.

Ralph. From the Teutonic, meaning "warrior-wolf." *Dutch*, Rudolf; *Fr.*, Raoul; *It.*, Raolfo; *Lat.*, Radulphus; *Sp.*, Rodolfo; *Sw.*, Rudolf.

Randolph. Properly Radolph, the same as the German names Radulph, Radolf, Rudolph; from Old German *rad-ulph*, "help or counsel."

Rangeley. Town and plantation in Franklin County, Maine, and one of the Androscoggin lakes in the same State, named for an Englishman, an early settler and large landowner.

Rangoon (*rân-gōon'*). The chief town and port of Burmah is called in Burmese *Ran-kun*, the "end of the war," literally, enmity exhausted. A name given in 1763, by Alompra, the founder of the Burmese dynasty, who, after the destruction of the city of Pegu, established the capital of the kingdom near the famous golden pagoda called Shwé Dagon, with which *Ran-kun* may probably be connected by assonance.

Raoul. See Ralph.

Raphael (*râf'-â-êl*, *râ'-fâ-êl*, *râ'-fâ-êl*). From the Hebrew *R'phael*, "healed of God, or whom God healed." *Fr.*, Raphael; *Ger.*, Raphael; *It.*, Rafaele or Raffaele; *Lat.*, Raphael; *Sp.*, Rafael.

Rapidan (*râp-î-dân'*) **River, N. C.** Corruption of *Rapid Anne*. The suffix being given in honor of Queen Ann of England.

Rappahannock (*râp-pâ-hân'-nûk*) **River, Va.** Indian *lappihanne*, "river of quick, rising water," also noted as *toppehannock*.

Raritan (*râr'-î-tan*) **River, N. J.** From a local tribe of Indians, the Raritans.

Raymond. A name derived from the Teutonic, *ram-mund*, "a strong man." *Fr.*, Raymond; *It.*, Raimondo; *Lat.*, Raymundus; *Sp.*, Raymundo or Ramon.

Rebecca, Rebekah (*rê-bêk'-kâ*). From the Hebrew *Ribhkah*, signifying a "rope with a noose"; from Arabic *rabkat*, which Tregelles says means "one who ensnares men by her beauty." *Fr.*, Rebecca; *It.*, Rebecca; *Lat.*, Rebecca; *Sp.*, Rebecca.

Red-letter Day. A day that is fortunate or auspicious; so called in allusion to the custom of marking holy days, or saints' days, in the old calendars with red letters.

Red River. From the color of its waters it was called by the French *Rivière Rouge*, "Red River"; called by the Spaniards *Rio Roxo de Natchitoches*.

Red Sea. Translates the unexplained classical names *Erythrasan Sea* and *Mare Rubrum*. To the early Portuguese mariners the name *Mar Vermelho* seemed to be appropriate, because of the red streaks of water, due probably to floating infusoria.

Regents (*rê'-jents*) **Park.** One of the largest parks of London, situated in the northwestern part of the city. It is 472 acres in extent, and contains the Zoölogical Gardens.

Regent Street. One of the principal streets of the West End of London, extending from Portland Place to Waterloo Place.

Regina (*rê-jî'-nâ*). A feminine name, probably signifying "queen," from the Latin. Arthur translates it "queenlike."

Reginald (*rêj'-î-nald*). From the Old German name *reginald*, "noble hero."

Reims or Rheims (*rêmz*. French, *râns*). A famous French city, was named for the *Remi*, a tribe.

Reinhold. See Reynold.

Rene (*rê-nâ*). From the French. Like the Italian name *Renato*, derived from the Latin, *renatus*, "renewed, born, risen or begun again." *Fr.*, René; *It.*, Renato; *Lat.*, Renatus.

Renée. Feminine of Rene. Sometimes Anglicised in pronunciation as *ren'ne*. *Fr.*, Renée; *It.*, Renata; *Lat.*, Renata.

Retta. A feminine name derived from Margaretta.

Reuben (*rû'-bên*). From the Hebrew, *R'ubhen*, which St. Jerome translates "son of vision"; Tregelles, "see"; i. e., "behold a son."

Reynold (*rên'-ôld*). From the Teutonic, meaning "power of Judgment." *Danish*, Reinhold; *Dutch*, Reinold; *Fr.*, Renaud; *Ger.*, Reinhold; *Lat.*, Reynaldus or Reginaldus; *Sp.*, Reynaldo; *Sw.*, Reinhold.

Rhine (*rîn*). Is the English spelling of the German name *Rhein*, which was the Latin *Rhenus* and the Keltic *Renos*. It means, to "flow."

Rhoda (*rô'-dâ*). A feminine name derived from the Latin *rhoda*, "a rose." *Gr.*, Rhode; *Lat.*, Rhoda.

Rhode (*rôd*) **Island.** One of the original Thirteen States, said to have received its name from a small island in Narragansett Bay named *Roode Eylandt*, "red island"; according to another authority, named for the island of Rhodes.

Rhodes (*rôdz*). Means an "island of roses," in conformity with the Greek *rhodon*, a "rose."

Richard. From the Teutonic *reich-hart*, "very powerful, strong, or rich." *Dutch*, Richard; *Fr.*, Richard; *Ger.*, Richard or Reichard; *It.*, Ricardo; *Lat.*, Richardus; *Port.*, Ricardo; *Sp.*, Ricardo.

Richmond, Va. From Richmond-on-the-Thames, a suburb of London; the name suggested owing to analogy in situation.

Rio Grande (*rî'-ô-grând*. Spanish, *rê'-ô grân'-dâ*). River rising in the Rocky Mountains and emptying into the Gulf which gives name to a county in Colorado. A Spanish phrase meaning "great river."

Rita (*rē'-tā*). A feminine name of Italian origin; abbreviated from *Margarita*.

Roanoke (*rō-ā-nōk'*). County and city in same county in Virginia, river in Virginia and North Carolina, town in Huntington County, Indiana, and village in Woodford County, Ill. From the island of same name, *Roenoke* or *Rawnoke*, equivalent to *peag*, "sea-shell," or "wampum."

Robert. Is red-beard, from *ru* or *ro*, "red," and *bert* or *bart*, a "beard." Dr. R. S. Maitland gives no fewer than two hundred different methods of spelling this name. Rupert and Robert are identical, and were used occasionally for the same person. *Danish*, Robert; *Dutch*, Robert; *Ger.*, Robert; *It.*, Roberto; *Lat.*, Robertus; *Sp.*, Roberto; *Sw.*, Robert.

Robertina. A feminine name derived from Robert.

Robin. A diminutive of Rob, the nickname of Robert.

Rochester. A city in the State of New York, derives its name from Colonel Nathaniel Rochester, who projected the settlement in 1818.

Rockaway, N. Y. Named from the Indian *ackwek*, "bushy."

Rocky Mountains. Were first called *Montagnes de Pierres Brillantes*, "mountains of brilliant stones," from the sparkling of the summits in the sunshine. Then came the more prosaic *Montagnes Rocheuses*, or "Rocky Mountains"; and our present still more prosaic "The Rockies."

Roderick (*rōd'-ēr-ik*). From the Old German name Roderic or Roderich, from *rad-reich*, "rich or powerful in counsel." *Fr.*, Rodrigue; *Ger.*, Roderich; *It.*, Rodrigo; *Lat.*, Rodericus; *Russ.*, Rurik; *Sp.*, Rodrigo, Roderigo, or Ruy.

Rodrigo. See Roderick.

Rodriguez (Spanish, *rō-drē'-gēth*). The "son of Roderick."

Roger (*rōj'-ēr*). Some translate this name "spear of fame," others "spear-red." It comes from *rat-gar*, "a war councillor," or *ratgar*, "prompt in counsel." *Dutch*, Rutger; *Fr.*, Roger; *It.*, Rugiero; *Lat.*, Rogerus; *Sp.*, Rogerio.

Roland or Rowland (*rō'-land*. French, *rō-lān'*). Derived from the old Frankish name signifying "illustrious countryman." *Danish*, Roland; *Dutch*, Rœland; *Fr.*, Roland; *Ger.*, Roland; *It.*, Orlando or Rolando; *Lat.*, Rolandus; *Port.*, Rolando; *Sp.*, Rolando.

Romanoff (*rō-mā'-nōf*) **Cape, Alaska**. Compliment to the prominent Russian statesman Romanoff.

Rome. The French name of the city called Roma in Latin and Italian. Among the various guesses as to the meaning of the name, the most probable refers it to the word *gruma* or *groma*, "cross roads," spreading themselves at their junction into a sort of forum.

Rosa. See Rose.

Rosalia. A feminine name formed from the name Rose.

Rosalin (*rōz'-ā-līn*), **Rosalind** (*rōz'-ā-līnd*). A feminine diminutive formed from the name Rose.

Rosamond (*rōz'-ā-mūnd*). Probably from *rosa mundi*, "rose of the world," corrupted to "rose of peace." *Dutch*, Rozamond; *Fr.*, Rosemonde; *It.*, Rosmonda; *Lat.*, Rosamunda.

Rose. A feminine name derived from the Latin *rosa*, a "rose." The Romans sometimes called their sweethearts "rose mea." *Danish*, Rosa; *Dutch*, Rosa; *Fr.*, Rose; *Ger.*, Rose; *It.*, Rosa; *Lat.*, Rosa; *Sp.*, Rosa; *Sw.*, Rosa or Rosina.

Rosemary. A feminine name formed from the Latin *rosmarinus*, "dew of the sea."

Rosetta (*rō-sēt'-tā*). A diminutive derived from the name Rose, or from the Italian form Rosa.

Ross. Either as a name of a place by itself, or as a portion of a name, always means "a headland."

It is a Celtic word, and is frequent in Scotland, as in Rosslyn, Culross, Rossberg, Ardrossan, etc.

Rotten Row. The popular name corrupted from *Route en Roi*, "the way of the king," for a famous driveway and promenade in Hyde Park, London, much frequented by fashionables during the season.

Roumania (*rōō-mā'-nī-ā*). A modern kingdom on the Lower Danube, comprising the former Turkish principalities of Wallachia and Moldavia. The kingdom was so named because the people, who speak a Neo-Latin dialect derived from the colonists settled by Trajan in Dacia, designate themselves as Rumeni or Romani (Romans).

Rouse's Point, N. Y. From Jacques Rouse, a Canadian who settled on this point in 1783.

Rowena (*rō-ē'-nā*). A feminine name, which some consider to be of Saxon origin. Mr. Arthur derives it from *D. rouw*, "peace"; Anglo-Saxon *rinnan*, "to acquire"; others derive it from the Welsh *rhonwen*, "white shirt."

Ruben. See Reuben.

Rudolph (*rū'-dōlf*). From root of Randolph and Radolph. *Dutch*, Rudolf; *Fr.*, Rodolphe; *Ger.*, Rudolf; *It.*, Rodolfo or Ridolfo; *Lat.*, Rudolphus.

Rufus (*rū'-fūs*). From the Latin, meaning "reddish," "having red hair." *Lat.*, Rufus.

Rupert (*rū'-pērt*). Etymologically the same name as Robert. *Ger.*, Ruprecht; *Lat.*, Rupertus.

Rurik. See Roderick.

Russia (*rūsh'-ā*, *rōō'-shā*). Named from the *Roosi*, or *Russ*, a tribe of Norsemen in the Ninth Century.

Ruth. From the Hebrew *Ruth*, from *r'uth*, "appearance, vision, fig, beauty."

Sabina (*sā-bī'-nā*). A feminine name derived from Sabina, wife of Adrian, celebrated for her private as well as her public virtues; one as chaste as a Sabine. *Dutch*, Sabine; *Fr.*, Sabine; *It.*, Sabina; *Lat.*, Sabina; *Sp.*, Sabina; *Sw.*, Sabina.

Sabine (*sā-bēn'*) **River, La.** Some allege that it was so named by French voyagers, who applied the name *Sabine* because of a lively skirmish with the Indians on its banks, for wives. More likely it means "cypress," from the French word.

Saco (*sō'-kō*). River, and city in York County, Maine. Derived from an Indian word *sohk* or *sauk*, "pouring out"; hence the outlet or discharge of a river or lake.

Sacramento (*sāk-rā-mēn'-tō*). River, city, and county in California, named by the Spaniards, the word meaning "the sacrament."

Sag Harbor. Village in Suffolk County, New York. Derived from the Indian word *saggaponack*, "place where the ground nuts grow."

Saginaw (*sāg'-ī-nō*). River, county, bay, and city in Michigan. Said to derive its meaning from an Indian word, *sauk-sahcoon*, "pouring out at the mouth," or "an outlet."

Sahara (*sā-hā'-rā*). Is simply an Arabic term for "desert."

St. Anthony, Minn. Named St. Anthony by Hennepin in July, 1680; a reference to his being a Recollet of the Province of St. Anthony in Artois, France. Indian name, *Owahmenah*, "falling water."

St. Augustine (*sānt ō'-gūs-tēn*). A town in Florida, is the oldest European settlement in the United States. Don Pedro Menendez de Aviles, sent by Philip II. of Spain in 1565 to drive out the French Protestant refugees, who, three years before, had reached Albemarle Sound, arrived off the coast of Florida on St. Augustine's Day, August 28th, and gave the name of the Saint to the city which he founded shortly afterwards.

St. Bernard (*sānt bēn-nārd'*), **Great**. An Alpine pass leading from Martigny, Valais, Switzerland, to Aosta, Italy, and connecting the valleys of the Rhone and the Dora Baltea. It was traversed by armies in Roman and medieval times. The passage by the French army under Napoleon in May, 1800, is especially noteworthy.

St. Clair River (*sānt klār'*), Mich. Also the lake, was named in honor of the founder of the Franciscan nuns, from the fact that La Salle reached it on the day consecrated to her (August 12th). He, therefore, named it *Sainte Claire* (St. Clara).

St. Croix (*sānt kroī'*) **River, Me.** Means "Holy Cross," and was named by De Monts, from a circumstance in the two rivers of its mouth forming a cross.

St. Croix River, Wis. Le Seur says, it was originally named *Madelaine* after Madelaine Radisson; then changed to St. Croix, after Monsieur St. Croix, who was drowned at its mouth, while exploring, about 1700. Indian name *hogan-wauke-kim*, "the place where the fish lies."

Saint Elias. Mountain in Alaska, named for the saint upon whose day it was discovered.

St. George's Channel. Named after the patron saint of England.

St. Helena (*sānt hē-lē'-nā*). An island in the South Atlantic belonging to Great Britain. Napoleon was exiled there, and resided at Longwood from 1815 until his death in 1821.

St. James's Palace. A palace in London, adapted as a royal residence by Henry VIII., enlarged by Charles I., damaged by fire in 1809, and since restored. Though no longer occupied by the sovereign, it gives its name officially to the British court.

St. John River, Me. Given by Pierre de Monts; Indian name *looshtook*, "long river."

Saint Johnsbury. Town in Caledonia County, Vermont, named for St. John de Creve-coeur, French consul at New York, and a benefactor of Vermont.

St. John's River, Fla. Indian name, *Yeacas* or *Walaka*, "river of many lakes." French named the stream *Rivière Mai*, Ribaut having entered its waters in that month. The Spaniard, Francisco Gordillo, called it *Rio San Juan*, having reached it on June 24, 1521, "the day as set apart to honor the precursor of Christ." The word was afterward anglicized by the English to St. John's River.

St. Lawrence River, N. Y. Named from the gulf; which received its name *St. Lawrent* or *St. Lawrence* from the French navigator Jacques Cartier, who entered its water August 10, 1535 (St. Lawrence's Day).

St. Louis (*sānt lōō'-īs* or *lōō'-ī*), Mo. In honor of Louis XV. of France; the name originally applied to a depot established at this point February 15, 1764, by Pierre Laclede Siguest.

St. Marie, Sault (*sōō sānt mā'-rī*. French, *sō sānt mā-rē'*), Mich. The French call a cascade, says Schoolcraft, a *leap* or *sault*, but *sault* alone would not be distinctive; therefore, in conformity with their general usage, they added the name of a patron saint to the term by calling it *Sault de Sainte Marie*, that is, "Leap of St. Marie," to distinguish it from other *leaps* or *saults*.

St. Paul. From the Chapel of St. Paul, a log chapel erected here by Roman Catholics. Prior to the adoption of St. Paul, it was known as *Pig's Eye*, from the nickname applied to a corpulent "one-eyed" Frenchman who located a "saloon-shanty" at this point. Indian name, *imnijaska*, "white rock," a reference to the sandstone bluff on which the city stands.

St. Petersburg. See Petersburg.

Salem (*sā'-lēm*). City in Essex County, Massachusetts, so named by its early settlers because they hoped to enjoy peaceful security there. An Indian word meaning "peace."

Salome (*sā-lōm'*, *sā-lō'-mē*). A feminine name, from the Hebrew *Solomon*, "peaceful."

Salt Lake. County and city in same county, in Utah, named for the famous lake of that State.

Samson or Sampson (*sām'-sōn* or *sāmp'-sōn*). From the Hebrew *Shimshon*, "illustrious sun;

solar, like the sun; one who resembles the sun." *Danish*, Samson; *Dutch*, Samson; *Fr.*, Samson; *Lat.*, Samson; *Port.*, Sansao; *Sp.*, Sanson; *Sw.*, Simson.

Samuel (*sām'-ū-ēl*). From the Hebrew *sh'mu-El*, "heard of God." *Danish*, Samuel; *Dutch*, Samuel; *Fr.*, Samuel; *Hungarian*, Samuel; *It.*, Samuele; *Lat.*, Samuel; *Sp.*, Samuel.

San Antonio (*sān ān-tō'-nī-ō*). City in Bexar County, Texas, named for the Roman Catholic mission, San Antonio de Velero, otherwise the Alamo.

San Diego (*sān dē-ā'-gō*), Cal. From the bay, which was named by Sebastian Vizcaino, Spanish navigator, who entered it November 12, 1603, in honor of the day saint, San Diego d'Alcala. A coincidence being that Vizcaino's vessel also was named San Diego.

Sandusky (*sān-dūs'-kī*). Town in Illinois, county, river, and city in Ohio, whose name by some authorities is said to be derived from the Indian word *Outsandouke*, "there is pure water here"; or *Sanduste*, "large bodies or pools of water." Another authority states that it was named for Jonathan Sandousky, a Polish trader of the vicinity.

Sandwich Islands. Named by Captain Cook in compliment to Lord Sandwich, First Lord of the Admiralty.

Sandy. A Scottish name corrupted from Alexander.

Sandy Hook, N. Y. Namely, "sandy point," *Hook* being applied from the Dutch *haak*, "point."

San Francisco. Bay, county, and city in same county, in California, said by some to have been named for the old Spanish mission of San Francisco de Assisi, by others to have been named for the founder of the order to which Father Junipero, the discoverer of the bay, belonged.

San Joaquin (*sān hō-ā-kēn'*). County and river in California. A Spanish phrase meaning "whom Jehovah has appointed."

San Jose (*sān hō-sā'*). City in Santa Clara County, California, named for the patron saint of Mexico, St. Joseph.

San Salvador (*sān sāl-vā-dōr'*). Means "Holy Saviour." This was the first land sighted by Columbus (October 11, 1492); he, therefore, gave it this name as a token of thanksgiving.

Sanskrit (*sān'-skrīt*). From the Sanskrit *sam-skṛta*, "polished," the learned language of the Hindustan and of the Brahmins, which was current at the time of Solomon. It is the parent of most modern languages. It contains the roots of Greek, Latin, Celtic, Slavonic, and German, and as it contains no exotic terms must be one of the primitive tongues.

Santa Barbara. County and city in same county, in California, named for an old Spanish mission, which, in turn, probably received its name from the Santa Barbara Channel, designated by Vizcaino as *Canal de Santa Barbara*, he having sailed through its water, December 4, 1603, the day being St. Barbara's.

Santa Claus (*sān'-tā klōz*) or **Santa Klaus.** A modern adaptation of the Dutch, *Sant Nikolaas* (St. Nicholas). As is now very well known, St. Nicholas was the patron saint of children and dispensed gifts to them on Christmas eve.

Santa Cruz (*sān'-tā krōōs'*). Counties in Arizona and California, city and island in the latter State. A Spanish word meaning "holy cross."

Santa Fe (*sān'-tā fā'*). County and city in same county, in New Mexico; and city in Haskell County, Kansas, and town in Monroe County, Missouri. A Spanish phrase meaning "holy faith." The name originally given by Antonio de Espejo, in 1582, was *La Ciudad de la Santa Fe de San Francisco*, "the City of the Holy Faith of St. Francis."

Santiago (*sān-tē-ā'-gō*). The capital of Chile, was founded in 1541 by Pedro de Valdivia, and placed under the protection of the patron saint of

Spain. Iago is a form of Jacobus, and Santiago of Spain was St. James the Great, the elder brother of St. John.

Sara. A feminine name derived from the Italian form of Sarah.

Saracen (sär'-ä-sën). Is a term loosely used by Medieval writers to denote the Moslem races, and especially the foes of the Crusaders. It is a Greek corruption of the Arabic *sharqīn*, "eastern" people, as opposed to the *maghrabī* or "western" people.

Saragossa (sä-rä-gös'-sä). From Cæsarea Augusta; its Basque name was *Saluba*, "the sheeps' ford."

Sarah or **Sara** (sä'-rä). From the Hebrew *Sarah*, variously rendered "female ruler, governor"; "princess, noble lady"; "leader, commander." *Dutch*, Sara; *Fr.*, Sara; *Ger.*, Sara; *It.*, Sara; *Lat.*, Sara; *Port.*, Sara; *Sp.*, Sara; *Sw.*, Sarah.

Saranac (sär'-ä-näk) **Lake.** Village in Franklin County, New York. An Indian word meaning "river that flows under a rock."

Saratoga (sär'-ä-tō'-gä), **N. Y.** Uncertain. Termination *oga* or *aga* said to signify "place," the first part of the word thought by some to imply "hillside"; by others, a reference to the springs, *soragh* in some Indian dialects being the name for "salt"; *seitake* is given, meaning "on the heel," but no reason further than a probable corruption in pronunciation of the word. *Assarat*, "sparkling," *oga*, "place," is mentioned by Schoolcraft.

Sarawak (sä-rä'-wäk). Malay *Sarakaw*, "the cove," or bay.

Sardinia (sär-dīn'-i-ä). Italian, *Sardegna*. Bears the name of the *Sardi*, its early inhabitants, who may possibly be identified with the *Shardina*, or *Shardana*, one of the northern races who attacked Egypt in the reign of Meneptah. Another view is that it expresses the "land of the Sardonion," a Greek term for a plant indigenous to this island.

Saskatchewan (säs-käch'-ē-wön). A river in British North America. The name is derived from the Indian, meaning "swift river."

Saturday. The day of Saturn, one of the planets of the solar system.

Saugatuck (sö'-gä-tük), **Conn.** Indian *Sauketuck*, "at the mouth of the stream with tides."

Saul. From the Hebrew *Shaul*, which Simonis translates "exoratus," i. e., obtained by entreaty; and others, "asked for, or desired." *Fr.*, Saul; *Lat.*, Saulus.

Sault Ste. Marie, Mich. See St. Marie Sault.

Savannah (sä-vän'-nä). Town in Wayne County, New York, and city and river in Georgia. The name derived from the Spanish word *savanne*, meaning "grassy plain."

Saxon. Comes from the word *saex* — a short crooked sword; and so "the men of the sword." We can readily understand how, with sword in hand, they became invincible in arms, and how they spread dread and destruction all along the shores which they frequented. By the terror of their name they compelled the Gauls to include in their litany a new petition, "Deliver us, O Lord, from the fury of the Northmen." How could it be otherwise than that the men who affected such grim appellations as "Bloody-ax," "Skull-cleaver," "Death's-head," — and whose deeds did not belie their names, should inspire a natural horror.

Saxony (säks'-ün-i). A modern German kingdom, called *Sachsen* in German, is the country of the Saxons; derived from the *Seax*, or short crooked knife with which they armed themselves.

Scandinavia (skän-dī-nä'-vī-ä). A convenient name for the Swedish and Norwegian Peninsula, adopted from a passage in Pliny where the correct reading is probably *Scadinavia*, which Mr. Bradley refers to the Teutonic *shadino*, "dark." *Scadinavia*, the "land of darkness," was possibly at first a mythical name for the dark North, which

was afterwards applied to the Swedish Peninsula.

Schenectady (skën-ëk'-tä-dī), **N. Y.** Originally spelled *Schenectada*, from the Indian *Schaunaughtada*, "river valley through or beyond the pine-trees," there being a portage across the woodland neck, from the present site of Albany to the Mohawk River at this point.

Schoharie (skō-här'-i), **N. Y.** Corruption of the Indian *to-wos-sho'-her*, "drift-wood," from the collecting at this point, where the Line Kil and Little Schoharie flowed into the main stream.

Schönbrunn (shön'-bröön). Near Vienna, the suburban residence of the Austrian Emperors, so called from a "beautiful spring" in the grounds of the palace, was erected in 1744 by Maria Theresa on the site of a former hunting-seat.

Schroon (skrōön) **Lake, N. Y.** Said to be a corruption of *Scharon*, and to have been applied in honor of the Duchess of Scharon, favorite of Louis XIV. Others advise from an Adirondack Indian word signifying "a child or daughter of the mountain."

Schuylkill (skōöl'-kīl) **River, Pa.** From the Dutch *schuylen-kill*, "hidden creek." The Swedes called it *Skierkillen*. Indian name was *ganshowehanne*, "the roaring stream."

Scioto (sī-ō'-tō) **River, Ohio.** Shawnoese Indian word meaning "hairy," its waters at flood in the spring being filled with hairs, attributed to the herds of deer drinking or bathing in the water at the season of shedding their coats.

Scotland. Originally *Caledonia*, meaning, literally, the hilly country of the *Caels*, or *Gaels*, signifying "a hidden rover."

Scotland Yard. A short street in London, near Trafalgar Square. Here formerly were the headquarters of the Metropolitan police, now removed to New Scotland Yard on the Thames embankment, near Westminster Bridge.

Scutari (skōō'-tä-rē). In Turkey, from *Uskudar*, "a messenger," having been in remote periods, what it is to this day, a station for Asiatic couriers.

Seattle (sē-ät'-t'l). City in King County, Washington, named for the chief of the Duwamish tribe of Indians, *See-aa-thl*.

Sebago (sē-bā'-gō) **Pond, Me.** From the Indian, meaning "great water," or "place or region of river lake."

Sebastian (sē-bäs'-chan. Spanish, *sā-bäs-tē-än'*). From the Greek rendering of Augustus, and signifying "to be venerated or revered, venerable." *Dutch*, Sebastiaan; *Fr.*, Sebastien; *It.*, Sebastiano; *Lat.*, Sebastianus; *Port.*, Sebastiao; *Russ.*, Sevastian; *Sp.*, Sebastian; *Sw.*, Sebastian.

Sebastopol (sē-bäs'-tō-pöl). The "august" or "imperial city," was founded and named by Potemkin soon after the conquest of the Crimea in 1783.

Selah. A masculine name derived from the Hebrew *Shelah*, signifying a "weapon," "missile."

Seneca (sën'-ē-kä) **Lake, N. Y.** From a tribe of Indians, the Senecas; known as the "great hill people" from a tradition that they broke out of the earth from a large mountain, on Canandaigua Lake, known as *Ge-nun-de-wah* or "great hill."

Senegambia (sën'-ē-gām'-bī-ä). So named because of its situation between the Senegal and Gambia rivers.

September. The seventh month of the Old Roman Calendar, counted from March, which commenced the year previous to the addition of January and February by Numa in the year 713 B. C.

Serena. A feminine name derived perhaps from *Serena*, a daughter of Theodosius; from the Latin *sercnus*, "cheerful, quiet, calm."

Servia (sēr'-vī-ä). Known by the Romans as *Suedia*, district peopled by the Suevi, who afterwards settled in the territory now called Sweden.

Seth. From the Hebrew *Sheth*, signifying "ap-

pointed." Fuerstius writes the name *S'et*, and renders it "war bustle or noise."

Sevres (*sāv*). Named from the two rivers which traverse it; anciently called *Villa Savara*.

Sheboygan (*shē-boi'-gan*) **River, Mich.** From the Indian *showbwawaygum*, "the stream that comes from the ground."

Shenandoah (*shēn-ān-dō'-ā*). County and river in Virginia, city in Page County, Iowa, borough in Schuylkill County, Pennsylvania, and town in Page County, Virginia. An Indian word said by some to mean "the sprucy stream"; by others, "a river flowing alongside of high hills and mountains"; and still another authority states that it means "daughter of the stars."

Sherwood Forest. A forest in Nottinghamshire, England, fourteen miles north of Nottingham. It was formerly of large extent. It is the principal scene of the legendary exploits of Robin Hood.

Shetland Isles. The Norse for the "Viking Island," conformably with their native prenomens *Hyaltri*, "a Viking." The term Viking, meaning pirate, derived from the *Vik*, or creek, in which he lay concealed.

Shiraz (*shē'-rāz*), **Persia.** Signifies "lion's paunch," because at one time, like the lion, it consumed much but produced nothing.

Shirvan (*shir-vān'*). River and district of Persia, said to have been named after *Nieshirvan*, a king of Persia.

Shrewsbury (*shrūz'-bēr-ī*) **River, N. J.** From a town of England. Anglo-Saxon *scrobbes*, "of a bush," *buhr*, "a fortress," literally, "a fortress near which were many shrubs."

Siam (*sī-ām'*, *sē-ām'*). The European corruption of the Malay *Siyam*, which is identical with the name Shian or Shan given by the Burmese to their eastern neighbors.

Siberia (*sī-bē'-rī-ā*). In Russian, Sibir, is so called from Sibir or Ssibir, a town on the Irtysh near Tobolsk, which no longer exists. Sibir was the capital of a Tartar khānate of the same name, which was conquered in the Sixteenth Century by Yermak, the Hetman of the Don Cossacks.

Sibyl (*sīb'-il*). From the Latin, meaning "wise old woman." *Dutch*, Sibylla; *Fr.*, Sibylle; *Gr.*, Sibulla; *Lat.*, Sibylla.

Sicily (*sīs'-ī-lī*). The English form of *Sicilia*, so called from the Siculi, who possessed a great part of the island when the Greek colonists arrived.

Sierra (*sē-ēr'-rā*). This is a Spanish word signifying "a saw." Its application to ranges of mountains, whose peaks rising in succession, as do those of the Sierra Nevada, resemble the teeth of a saw, is peculiarly picturesque and poetical.

Sierra Nevada (*sē-ēr'-rā nē-vā'-dā*). Spanish, *sē-ēr'-rā nā-vā'-thā*) **Mountains.** Spanish words *Serrado*, "serrated or saw-toothed," *Nevada*, "snowy," i. e., "snowy mountains," the application taken from the Sierra Nevada Mountains of Grenada.

Sigismund (*sij'-is-münd*). A masculine name, from *sieg-mund*, "man of victory, triumphant man." *Dutch*, Sigismundus; *Fr.*, Sigismond; *Ger.*, Sigismund or Sigmund; *Lat.*, Sigismundus; *Sp.*, Sigismundo; *Sw.*, Sigismund.

Silas (*sī'-las*). A name corrupted from Silvanus.

Silesia (*sīl-ē'-shī-ā*). From *Zlezia*, "the bad land."

Silvanus (*sīl-vā'-nūs*). From the Roman name Silvanus or Sylvanus; also the appellation of a god of forests and fields; from *silva*, *sylva*, "a forest, wood." *Dutch*, Silvanus; *Fr.*, Sylvain or Silvain; *It.*, Silvano; *Lat.*, Silvanus; *Sp.*, Silvano.

Silvester, Sylvester (*sīl-vēs'-tēr*). A masculine name derived from the Latin *silvester*, "wild, found in a wood"; from *silva*, "a wood." *Fr.*, Silvestre; *It.*, Silvestro; *Lat.*, Silvester; *Sp.*, Silvestre.

Silvia. See Sylvia.

Simeon (*sīm'-ē-ōn*). From the Hebrew *shama*,

meaning "obedient," or "hearing with acceptance." *Fr.*, Siméon; *Ger.*, Simeon; *It.*, Simeone; *Lat.*, Simeon; *Port.*, Simeão; *Sp.*, Simeon.

Simon (*sī'-mōn*). Originally the same as Simeon. *Dutch*, Simon; *Fr.*, Simon; *Ger.*, Simon; *Hungarian*, Simon; *It.*, Simone; *Lat.*, Simon; *Sp.*, Simon; *Sw.*, Simon.

Sinai (*sī'-nā*, *sī'-nā-ī*, *sī'-nī*). Is usually supposed to have been named from the Hebrew *seneh*, the "acacia tree," but is more probably the mountain of Sin, the moon-god of the Babylonians.

Singapore (*sīng-gā-pōr'*). The name of an island and city in the Straits Settlements, means the "lion city." The form Singapore was adopted by Sir Stamford Raffles for the city which he founded in 1819 on an island which since the Middle Ages had been called *Sinhapura*, from a town of that name built in the Fourteenth Century by Malay or Javanese settlers.

Sing Sing, N. Y. Mohegan Indian word *Sin-Sing* or *Sink-Sink*, said to signify "stone upon stone."

Sioux (*sō*). Many places in the United States bear the name of this tribe of Indians, among them the counties in Iowa and Nebraska. The word means a "species of snake," the appellation of the tribe being "enemies."

Sirloin of Beef. There is a laughable tradition current in Lancashire, England, that King James I., in one of his visits there, knighted at a banquet a loin of beef, which part ever since has been called the Sir-loin.

Sistine (*sīs'-tīn*), or **Sixtine** (*sīks'-tīn*) **Chapel.** The papal private chapel in the Vatican constructed by Pope Sixtus IV. Whence the name.

Sitka, Alaska. From a tribe of Indians, the *Sitkayans*.

Skager Rack (*skäg-ēr-rāk'*, *skäg'-ēr-rāk*). The channel between Norway and Jutland, means "cape strait." The word *rack* denotes a crooked channel, and the Skager Rack is so called from the town of Skagen, situated on Cape Skagen (*skagi*, a "promontory"), the Skaw of English sailors which forms the northern point of Jutland.

Skaneateles (*skān-ē-āt'-lēz*). Lake, town, and village in Onondaga County, New York. An Indian word meaning "long lake."

Skowhegan (*skou-hē'-gan*), **Me.** Indian word meaning "spearing."

Snake River, Idaho. Suggested from its windings and given to a tribe of Indians on its banks.

Society Islands. Received their name from Captain Cook in honor of the Royal Society.

Sofia. See Sophia.

Soissons (*swā-sōn'*). Town in France, was so named from the Suessiones, a Belgic tribe.

Solomon (*sōl'-ō-mon*). From the Hebrew *Sh'lomoh*, signifying "peaceable." *Arabic*, Soliman or Suleyman; *Dutch*, Salomo; *Fr.*, Salomon; *Ger.*, Salomon; *Gr.*, Solomon; *Hungarian*, Salamon; *It.*, Salomone; *Lat.*, Salomon; *Polish*, Salomon; *Port.*, Salomão; *Sp.*, Salomon.

Sophia (*sō-fī-ā*). A name derived from the Greek *sophos*, "knowledge, wisdom, prudence." *Danish*, Sophie; *Dutch*, Sophie; *Fr.*, Sophie; *Ger.*, Sophie; *Gr.*, Sophia; *It.*, Sofia; *Lat.*, Sophia; *Russ.*, Sofia; *Sp.*, Sofia; *Sw.*, Sofia.

Sophie. The French form of Sophia.

Sophronia (*sō-frō'-nī-ā*). A feminine of Sophronius, formed from Sophron; means "sober modest, discreet."

Sorbonne (*sōr-bōn'*). A famous Parisian school, named from Robert de Sorbonne, almoner of St. Louis.

Soudan (*sō-dān'*). From the Arabic *Belād-ēz-Suden*, the "district of the blacks."

South Carolina. As provinces the two divisions of Carolina were one tract originally.

South Sea Bubble. A financial scheme which originated in England about 1711 and collapsed in 1720.

Spain. The English of Hispania, founded upon the Punic *span*, "a rabbit," owing to the number of wild rabbits found in this country.

Spanish Main. The southern banks of the West India Islands, and the water extending for some distance into the Caribbean Sea, so called from the fact that the Spaniards confined their buccaneering enterprises to this locality.

Spires (*spīrz*) or **Speyer** (*spīr*). An historic place in Bavaria, Germany, so named from the River *Speyerbach*.

Spitzbergen (*spīts-bērg'-en*). Literal Dutch for "sharp-pointed mountains," referring to the granite peaks of the mountains, which are so characteristic of this group of islands.

Spottsylvania. County in Virginia, named for Alexander Spotswood, early lieutenant-governor.

Springfield, Mass. In honor of the English residence of its founder, William Pynchon (1640). Indian name *Agawam*.

Spuysten Duyvil (*spī'-tēn dī'-vīl*). Channel connecting the Hudson and Harlem rivers. So named on account of the oath sworn by a Dutch shipmaster that he would pass the mouth of the creek "in spite of the devil."

Stanislaus (*stān'-īs-lōs*). From the Slavonic *slawa*, signifying "the place of glory or fame." The Bohemian form of the name is Stanislaw.

Staten (*stāt'-n*) **Island, N. Y.** Named by Henry Hudson *Stadten Nylandt*, that is, "island of the State," in compliment to the States-General under whose flag he was sailing. The Indian name was *Monachnong*, "place of the bad woods."

State of Franklin. An old name of Tennessee, under which it was organized in 1785.

States General. The name given to the legislative assemblies of France before the Revolution of 1789, and to those of the Netherlands.

Stella. A feminine name, from the Latin, signifying "a star."

Stephen (*stē'-vēn*). From the Greek name signifying "a crown or garland." *Danish*, Stephan; *Dutch*, Steven or Stephanus; *Fr.*, Etienne; *Ger.*, Stephan; *Gr.*, Stephanos; *Hungarian*, Istvan; *Lat.*, Stephanus; *Polish*, Szczepan; *Port.*, Estevão; *Russ.*, Stepan or Stefan; *Sp.*, Esteban; *Sw.*, Stefan.

Stettin (*stēt-ēn'*). From Zytyn, "the place of green corn."

Stirling. From *Estrevelyn*, "the town of the Easterlings, from Flanders."

Stockholm (*stōk'-hōlm*). The capital of Sweden is often said to have been so called because built like Venice on stocks or piles. According to the local legend, a stock or log floating up the Malar Lake from Sigtuna guided the first settlers to the granite rocks on which Stockholm is built. The older form *Stakhholm* explains the name as a *holm* or "island," in a *stak* or "sound."

Stockton. Cities in California and Missouri and town in Chautauqua County, New York, named for Commodore R. F. Stockton, who took part in the conquest of California.

Stonington, Conn. From an English town. *Ston*, "stone," *ing*, "field," *ton*, "town," "a town situated in a field of stone." It was first called *Southerton*.

Strait of Gibraltar. See Gibraltar.

Sublime Porte (*süb-līm' pōrt*). The synonym by which is designated the government of the Sultan of Turkey. It is the French equivalent of *Bab-i-Humayoon*, "the high gate." The term contains an allusion to the Oriental custom of transacting public business at the principal gate of the city or palace, and from this practice the Sultan's government is popularly styled in Turkey "the Sultan's gate."

Suez (*sōō'-ēz*, *sōō-ēz'*). Is a Portuguese corruption of *Bir Suweis*, the Arabic name of a fortified well of brackish water about an hour's journey

from the town, where the pilgrims waited to embark for Mecca. From this well, by a curious accident, the Gulf and Isthmus of Suez and the Suez Canal take their names.

Sumatra (*sōō-mā'-trā*). A corruption of *Trima-tara*, which means "the happy land."

Sunapee (*sūn'-ā-pē*). Lake in New Hampshire, for which a town in Sullivan County and mountain in the same State are named. From an Indian word, *shehunknippe*, "wild goose pond."

Sunday. Signifying the day upon which the sun was worshiped.

Superior. See Lake Superior.

Susa (*sōō'-sā*). A city of ancient Persia, so called from the lilies in the neighborhood; name derived from *susa*, "a lily."

Susan (*sū'-zan*), or **Susanna** (*sū-zān'-nā*). The Hebrew word, derived from the Arabic *sūsan*, "a lily." *Danish*, Susanna; *Dutch*, Susanna; *Fr.*, Susanne; *Ger.*, Susanne; *It.*, Susanna; *Lat.*, Susanna; *Sp.*, Susana; *Sw.*, Susanna.

Susannah. See Susan.

Susquehanna. River, county, and borough in Pennsylvania. From an Indian word, *suckahanne*, "water."

Suwanee (*sū-wō'-nē*). County, town, and river in Florida, creek and town in Gwinnett County, Georgia. Interpretations of this Indian word are various; some stating that it is from Shawnee, the tribe, while others give its derivation as from *sawani*, meaning "echo," or "echo river"; others give it as a corruption of the name *San Juanita*, applied by the Spaniards to the stream, meaning "little St. John," in contradistinction to St. John on the eastern coast.

Sweden (*swē'-den*). A modern term made up of the Latin *Suedia*, signifying the land of the Suevi, a warlike tribe of the Goths, and the Anglo-Saxon *den*, testifying to its occupation by the Danes.

Switzerland (*swīt'-zēr-land*). An anglicized form of the native *Schweitz*, the name of the three forest cantons whose people asserted their independence of Austria, afterwards applied to the whole country.

Sybil (*sīb'-īl*). An old name corrupted from Isabella.

Sydney. The capital of New South Wales, was founded on January 26, 1788, and so named by Captain Phillip after Thomas Townshend, first Lord Sydney, who, as Home Secretary, drew up, in 1786, a scheme for the transportation of convicts to New South Wales.

Sydney. A personal name corrupted from St. Denis, pronounced in French St. Nie.

Sylvanus. See Silvanus.

Sylvester. See Silvester.

Sylvia or **Silvia** (*sīl'-vī-ā*). A Roman name, feminine of Sylvius. *Fr.*, Silvie; *It.*, Silvia; *Sp.*, Silvia.

Sylvius (*sīl'-vī-ūs*). A Roman name, from *sylva*, "a wood." Sylvius was the name of the brother of Ascanius, so called from being born in the woods.

Syracuse (*sīr'-ā-kūs*). The greatest Greek colony in Sicily, is believed to have replaced an older Phœnician trading post which obtained its name from a marsh at the mouth of the Anapus called *Syraco*, "to stink."

Syracuse. City in Onondaga County, New York, named for the ancient city of Sicily, after passing through the names of Bogardus Corners, Milan, South Salina, Cossitt's Corners, and Corinth. In 1820, its present name was adopted at the suggestion of John Wilkinson, its first postmaster.

Syria (*sīr'-ī-ā*). Now called *Suristan* by the Turks and Persians, is the classical name which replaced the older name *Aram*, "the highlands." The name Syria first appears in Herodotus, and is doubtless a modification of the name Assyria, adopted by the Greeks at the time when Aram was included in the Assyrian Empire. Assyria was

thought to be the land of the deity Assur or Asshur, but it is now believed to have taken its name from the former capital Assur, a city on the Tigris, an Accadian name meaning "the water bank."

Tabitha (*tăb'-i-thă*). A female name, from Tabitha, the Aramæan name of a Christian female, Hebrew *zebia*, "a gazelle." Calmet, who translates the name "wild goat or kid," says the Syriac word *tabitha* signifies "clear sighted." *Lat.*, Tabitha.

Tabriz (*tă-brēz'*). The commercial capital of Persia, was the classical and medieval Tauris, "the mountain town."

Tacoma (*tă-kō'-mă*). City in Washington. From the Indian word Tahoma, meaning "the highest," "near heaven."

Tagus (*tă'-gūs*) or **Tejo** (*tă'-zhōō*). Name of the longest river in the Spanish peninsula, means "the fish river."

Tahlequah (*tă-lē-kwă'*). Former capital of Indian Territory, is a Cherokee Indian word and properly spelled according to their pronunciation is *Talikwa*. The word as it stands probably means "place of two large towns."

Taj Mahal (*tăj mă-hăl'*) or **Taj Mehal** (*tăj mē-hăl'*). The famous mausoleum erected at Agra, India, by Shah Jehan for his favorite wife. It literally means "gem of buildings."

Talladega (*tăl-lă-dē'-gă*), Ala. A Creek Indian word, *italua-atigi*, "the border town."

Tallahassee (*tăl-lă-hăs'-sē*). City in Florida, so named because it is supposed to have been the site of Indian cornfields in remote times. An Indian word meaning "old town."

Tallahatchie (*tăl-lă-hăch'-ē*). County in Mississippi, named from the principal branch of the Yazoo River in the same State. An Indian word meaning "river of the rock."

Tallapoosa (*tăl-lă-pōō'-să*). River in Georgia and Alabama, giving name to a county in Alabama and a city in Haralson County, Georgia. An Indian word meaning "swift current," or, according to some authorities, "stranger," "newcomer."

Tampa (*tăm'-pă*). Bay and city on the west coast of Florida. From the Indian word *Itimpi*, "close to it, near it." It was called by De Soto *Espiritu Santo*, "Holy Ghost."

Tarragona (*tăr-ră-gō'-nă*). Name of an important Spanish city, is derived from the ancient Tarraco, "The citadel or palace."

Tarrytown. Village in Westchester County, New York. Modification of its former name of Terwen, "wheat town," given on account of its large crops of that cereal.

Tartary (*tăr'-tă-rī*). The old name, now falling into disuse, for Turkistan, the parts of Central Asia which are inhabited by the Nomads of Turkic race called Tartars or Tatars. The name is said to have arisen out of the designation *Tha-ta*, "robbers," applied by the Chinese to the mongols.

Tasmania (*tăz-mă'-nă-d*). Named after Abel Tasman, who discovered it in 1642. It was called Van Diemen's Land in honor of the Governor-General of the Dutch East India Company. The change of title was effected in 1853.

Tay (*tă*). The largest river of Scotland, flows from Loch Tay, where, probably, was the *Tamia* or *Ptolemy*, a name explained by the Gaelic *tamh*, "tranquil," or "smooth," the equivalent of the Pictish *tau* and the Cymric *taw*, of which an oblique case may be the source of the name *Tava*, given by Tacitus to the Firth of Tay.

Teneriffe (*tēn-ēr-īf'*). One of the Canaries, is a Portuguese corruption of *Chinerfe* or *Tinerfe*, the name of the last Guanche chief. From its snow-clad peak, the Romans called it *Nivaria*, the "snowy."

Tennessee. Tributary of the Ohio River, which gives name to a State of the Union. Three different derivations are given the name. From *Tanase*, the name of the most important village of

the Cherokee Indians; from an Indian word meaning "a curved spoon"; or from *Taensa*, an Indian tribe of the Watchesan family.

Tenochtitlan (*tēn-ōch-tēt-lăn'*). The chief city of the Aztecs, occupying the site of the modern city of Mexico.

Terence (*tēr'-ēns*). From the Latin name Terentius. Macrobius says the name of the Terentia Gens is derived by Varro from the Sabine word *terenus*, soft.

Teresa. See Theresa.

Terre Haute (*tēr'-ē hōt*. French, *târ-hōt'*). City in Indiana, built upon a bank sixty feet above the river. French words meaning "high land."

Terry. A masculine name derived, like the French name Thierry, from Theodoric.

Texas. From a small tribe of Indians that inhabited a village called *Texas*, meaning "friendly." Also, "the place of protection," in reference to the fact that a colony of French refugees were afforded protection here by General Lallemon in 1817.

Thadeus, Thaddeus (*thăd'-ē-ūs*, *thăd'-ē'-ūs*). From the Latin *Thaddeus*, in turn from the Hebrew, "one who praises and confesses." *It.*, Taddeo; *Lat.*, Thaddeus; *Sp.*, Tadeo.

Thames. River in England and America. (American, *thāmz*. English, *tēmz*.) The Tamesis of Cæsar, is a Celtic name meaning the "tranquil" or "smooth" river.

Thebes (*thēbz*). In Boeotia, the Greek *Thebae*, is now Pheba or Phiba. The site of the acropolis was a small hill, and we learn from Varro that *teba* meant a "hill." In the name of the Egyptian Thebes we have a Greek corruption of the popular Egyptian designation of the city, which was called *t'ape*, "the capital."

Theobald (*thē'-ō-bôld*, *tīb'-ald*). From the Old German *teut-bald*, "strong or bold leader." *Danish*, Theobald; *Dutch*, Tiebout; *Fr.*, Thibaut; *Ger.*, Theobald; *It.*, Teobaldo; *Lat.*, Theobaldus; *Sp.*, Teobaldo; *Sw.*, Theobald.

Theodora (*thē-ō-dō'-ră*). A feminine name derived from Theodore.

Theodore (*thē'-ō-dōr*). From the Greek name Theodorus, signifying "the gift of God." *Danish*, Theodor; *Dutch*, Theodorus; *Fr.*, Théodore; *Gr.*, Theodorus; *It.*, Teodoro; *Lat.*, Theodorus; *Port.*, Theodoro; *Russ.*, Feodor; *Sp.*, Teodoro; *Sw.*, Theodor.

Theodoric (*thē-ōd'-ō-rīk*) or **Theoderick**. An Old German name from *teut-reich*, "powerful lord." *Dutch*, Diederick; *Fr.*, Theodoric; *Ger.*, Theodorich or Dietrich; *It.*, Teodorico; *Lat.*, Theodoricus; *Sp.*, Teodorico.

Theodosia (*thē-ō-dō'-shă-d*). Feminine of Theodosius. *Gr.*, Theodosie; *It.*, Teodosia; *Lat.*, Theodosia.

Theodosius (*thē-ō-dō'-shă-ūs*). From the Greek, meaning "given by God." *Fr.*, Théodose; *It.*, Teodosio; *Lat.*, Theodosius; *Sp.*, Teodosio.

Theophilus (*thē-ōf'-īl-ūs*). From the Greek name signifying "a friend of God." *Danish*, Gottlieb; *Dutch*, Theophilus; *Fr.*, Théophile; *It.*, Teofilo; *Lat.*, Theophilus; *Port.*, Theophilo; *Sp.*, Teofilo.

Theresa (*the-rē'-să*). Probably from the Greek Theriso, "to reap or gather in the crop." *Dutch*, Theresia; *Fr.*, Thérèse; *Ger.*, Therese; *It.*, Teresa; *Lat.*, Theresa; *Sp.*, Teresa; *Sw.*, Theresa.

Thermopylae (*thēr-mōp'-īl-ē*). It means "the defile of the warm springs."

Thian-shan (*tē-ăn'-shăn'*). Chinese, meaning "the celestial mountains."

Thibet or Tibet (*tīb'-ēt*, *tī-bēt'*). Supposed to be a corruption of Thupo, "high country," the country of the *Thou*, a people who founded an empire there in the Sixth Century.

Thirty, Battle of the. A fight between thirty Bretons and thirty Englishmen, pitted by Jean de Beaumanoir and Bemborough, an Englishman,

against each other, to decide a contest. The fight is said to have taken place between the castles of Josselin and Ploermel in France in 1351. The English were beaten.

Thomas (tōm'-as). From an Aramaic word, meaning "a twin." *Danish*, Thomas; *Dutch*, Thomas; *Gr.*, Thomas; *Ger.*, Thomas; *Fr.*, Thomas; *Hungarian*, Tamas; *It.*, Tommaso; *Lat.*, Thomas; *Polish*, Tomasz; *Port.*, Thomas or Thomar; *Sp.*, Tomas; *Sw.*, Thomas.

Thrace. From the Greek *trachus*, meaning "the rough land."

Thursday. The day of Thor, the son of Odin (or Wodin) and the God of Thunder.

Tiber (tī'-bēr. Italian, *Tevere*). Was the Roman *Tiberis*. From the name of the river was derived the Roman name Tiberius.

Tiberius (tī-bē'-rī-ūs). Means "of the Tiber." *Fr.*, Tibere; *It.*, Tiberio; *Lat.*, Tiberius.

Ticonderoga (tī-kōn-dēr-ō'-gā), **N. Y.** Indian *Cheonderaga*, signifying "brawling water," from the noise of the rapids in the outlet of Lake George as it falls into Lake Champlain.

Tierra del Fuego (tē-ēr'-rā dēl fwā'-gō). Spanish for "land of fire."

Tigris (tī'-grīs). A name rightly explained by Strabo, who says that it was so called from its "swiftness," for among the Medes *tigris* means "an arrow."

Timothy (tīm'-ō-thī). From the Greek name signifying "honoring or worshiping God." *Danish*, Timotheus; *Dutch*, Timotheus; *Fr.*, Timothée; *Ger.*, Timotheus; *Gr.*, Timotheos; *It.*, Timoteo; *Lat.*, Timotheus; *Port.*, Timotheo; *Sp.*, Tumoteo; *Sw.*, Timotheus.

Tippecanoe (tīp-pē-kā-nōō') **River, Ind.** From the Indian name given to a fish living in this stream, "the long-lipped pike," or "buffalo fish."

Titicaca (tīt-ē-kā'-kā). An island and lake near the peninsula of Copacabana, South America. It was a sacred place of the Incas, and "the birth-place of the Sun," according to one of their legends.

Titus (tī'-tūs). From the Greek name signifying "honored." *Fr.*, Tite; *Ger.*, Titus; *It.*, Tito; *Lat.*, Titus; *Sp.*, Tito.

Tobago (tō-bā'-gō) **Island**. So called by Columbus from its fancied resemblance to the *Tobacco*, or inhaling tube of the aborigines, whence the word *tobacco* has been derived.

Tobias (tō-bī'-as or **Toby** (tō'-bī). From the Hebrew *tobh-mah*, which has been variously rendered "God's goodness" and "distinguished of the Lord." *Danish*, Tobias; *Dutch*, Tobias; *Fr.*, Tobie; *Ger.*, Tobias; *It.*, Tobia; *Lat.*, Tobias; *Sp.*, Tobias.

Tokio or **Tokyo** (tō'-kē-ō). The capital of Japan, is the "Eastern Capital," in contra-distinction to *Saikio*, the "Western Capital." Formerly called Yeddo.

Toledo (tō-lē'-dō. Spanish, *tō-lā'-thō*). The capital of Gothic Spain, was the Roman *Toletum*, a name of unknown etymology, wildly supposed to be of Phenician origin, meaning the city of "generations."

Tomas. See Thomas.

Tombigbee River, Fla. From the Choctaw Indian word *itumbibikpi*; the literal translation would be "an undertaker," it being a name given to the old men of the tribe who were employed in preparing their dead for the "bonehouses."

Tommaso. See Thomas.

Tom, Mount, Mass. In honor of a neighboring resident, Rowland Thomas, probably familiarly known as "Tom."

Tonquin (tōn-kēn'). Chinese *Tang-king*, the eastern capital.

Topeka (tō-pē'-kā), **Kansas**. An Indian word, *Topeakae*, "a good place to dig potatoes."

Toronto (tō-rōn'-tō). Many towns and cities in the United States bear this Indian name, meaning

"oak tree rising from the lake," which has been transferred to them from the city in Canada, which see.

Toronto, Canada. Now the capital of the Canadian province of Ontario. The name at first denoted the country of the Huron tribe to which the Bay of Toronto gives access. Here a French trading post was built on the site of the present city, and called *Fort Toronto*. In 1793, the name was changed to *York* in honor of the Duke of York, but in 1834, the old name Toronto was revived.

Torres (tōr'-rēz) **Strait**. Owes its designation to its position near the equator, the word *torres*, from the Latin *toridus*, signifying "parched."

Tortugas (tōr-tōō'-gāz) **Islands, Fla.** Spanish word meaning "tortoise," the name given by the Spaniards from the number of tortoise found on them.

Toulon (tōō'-lōn. French, *tōō-lōn'*). French city, is from the ancient *Telonium* or *Telo Martius*, named after its founder.

Toynbee (toin'-bē) **Hall**. An institution in Whitechapel, London, founded in 1885, as the outcome of plans set on foot by the members of Oxford and Cambridge universities "to provide education and the means of recreation and enjoyment for the people of the poor districts of London," etc.

Trafalgar (trāf-āl'-gār) **Square**. One of the principal squares in London, about one and one-half miles west by south of St. Paul's. It contains the Nelson monument, and the site of Charing Cross and the National Gallery faces on it.

Transvaal (trāns-vāl'). That territory beyond the River Vaal.

Traverse Bay, Mich. Named by Marquette Petit Traverse and Grand Traverse, little, small, and large breadth or crossings; applied to it being nearer to cross the bay than follow along the shores.

Trebizond (trēb-ī-zōnd'). From the Greek *trapezus*, "the table," so called from its form.

Trenton, N. J. First called *Trent Town*, so named from Col. William Trent of Philadelphia, a speaker of the house of assembly in 1720.

Trianon, Grand (grān trē-ā-nōn'). A small palace at Versailles of only one story but considerable length, built by Louis XIV. for Mme. de Maintenon, and since used by successive French sovereigns as a private residence.

Trianon, Petit (pte trē-ā-nōn'). A graceful, neo-classical villa in the park at Versailles, built by Louis XV., and closely associated with the memory of Marie Antoinette, whose favorite abode it was.

Trinidad (trīn-ī-dād'. Spanish, *trē-nē-thāth'*). So named by Columbus from its three peaks, emblematic of the Holy Trinity.

Tristram (trīs'-tram). From the Latin, meaning "sorrowful." *Lat.*, Tristramus; *Port.*, Tristao.

Troy, N. Y. Prior to present name known as *Vanderheyden's*; the name Troy adopted at a town meeting, January 5, 1789, on the suggestion of Christopher Hutton.

Tsarskoe Selo (tsār'-skō-yē syē-lō'). A town in the government of St. Petersburg, Russia, about fifteen miles south of St. Petersburg. It contains a famous imperial palace, a favorite summer residence of the court.

Tucson (tū-sōn' or tūk'-sūn), **Arizona**. From the Pima dialect, meaning "black spring."

Tuesday. Devoted to Tiw, the god of war.

Tulare (tōō-lār'. Spanish, *tōō-lā'-rā*) **Lake, Cal.** Called by the Spaniards *Lagana Grande de los Tulares*, from a dense growth of "tule" found in its waters and on the shores.

Tunis (tū'-nīs). Anciently known as *Tunentum*, "the land of the Tunes."

Turanian (tū-rā'-nī-an). A legendary ancestor of the Turks. The word is loosely and indefinitely used to designate a family of languages and also an ethnological group.

Turin (*tū'-rīn*). *It.*, Torino. Anciently *Augusta-Taurinorum*, named from the Taurini, i. e., "dwellers among hills."

Turkestan (*tōōr-kēs-tān'*). The country of the Turks. See Turkey.

Turkey. The English name of the Ottoman Empire, appears to have been derived from *Turcia*, the Latinized form of the Arabic name *Al-Turkiyah*, the "land of the Turks." *Turkestan* in Central Asia is a Persian form of the same name, denoting the land occupied by the Usbeks, the Kirghis, the Turcomans, and other Turkic races. The name *Turk* has been supposed to be a corruption of the name *Tu-kiu* of the Chinese historians, or from the Arabic *turkur*, "robbers." It is probably a Tartar word meaning "brave."

Tuscaloosa (*tūs-kā-lōō'-sā*). County and city in Alabama named for an Indian chief, the name meaning "black warrior."

Tuscany (*tūs'-kā-nī*. *It.*, Toscana). Bears the name of its ancient inhabitants the *Tusci* or *Etrusci*. The Etruscans were called *Tyrrheni* by the Greeks, whence the name Tyrrhenian Sea, given to that part of the Mediterranean which lies between the mainland and the islands of Corsica and Sardinia, the Greeks of Cumæ and of Sicily encountering them by sea and the Romans by land.

Tuskegee (*tūs-kē'-gē*). Town in Macon County, Alabama. Probably derived from the Indian word *taskialgi*, "warriors."

Tuxedo (*tūks-ē'-dō*). A few places in the United States bear this Indian name, which undoubtedly is derived from *P'tauk-seet-tough*, meaning "the place of bears."

Ulysses (*yū-līs'-ēz*). A masculine baptismal name, the Latin form of the Greek *Odysseus*, "to cause pain." *Fr.*, Ulysse; *Gr.*, Odysseus; *It.*, Ulisse; *Lat.*, Ulysses or Ulyxes.

Umatilla (*ū-mā-tīl'-lā*). River and county in Oregon, said by some to be named for a tribe of Indians. Others state that it is derived from *U-a-tal-la*, meaning "the sand blew bare in heaps," this part of the country having ridges of sand alternating with bare ground.

Umbagog (*ūm-bā'-gōg*). Lake lying partly in New Hampshire and partly in Maine. An Indian word, said to mean "doubled up." Other authorities favor "clear lake, shallow," or "great waters near another."

Una (*ū'-nā*). A Gaelic feminine name, corrupted from Winifred.

Unter den Linden (*ōōn'-tēr dēn līn'-dēn*). A famous street in Berlin which extends from the Brandenburg Gate eastward about three-fifths of a mile. Bordering it are the imperial and princely palaces, the university, the academy, the statue of Frederick the Great, etc. It literally means "under the lindens."

Ural (*yū'-rāl*). The chain dividing Europe from Asia, means the "girdle" or "belt," *ural-tau*, being a Turkic word meaning a "mountain chain," while *urr* means a "chain" in Ostiah. The Russians call the Ural Mountains by the translated name Poyas, the "girdle." The mountains have given their name to the River Ural, which flows from them into the Caspian.

Urban (*ūr'-ban*). From the Latin *urbanus*, signifying "civil, courteous, polite, refined"; literally, of or belonging to a city (*urbs*). *Danish*, Urban; *Dutch*, Urbanus or Urbaan; *Fr.*, Urbain; *Ger.*, Urban; *It.*, Urbano; *Lat.*, Urbanus; *Sp.*, Urbano; *Sw.*, Urban.

Uriah (*ū-rī'-ā*). From the Hebrew, meaning "light of Jehovah," or "fire of the Lord." *Fr.*, Urie; *Ger.*, Urias; *It.*, Uria; *Lat.*, Urias.

Ursula (*ūr'-sū-lā*). A feminine name derived from the Latin *ursula*, "a young or small she-bear." *Dutch*, Ursula; *Fr.*, Ursule; *Ger.*, Ursula; *It.*, Ursula; *Lat.*, Ursula; *Sp.*, Ursula; *Sw.*, Ursula.

Uruguay (*yū'-rōō-gwā*. Spanish, *ōō-rōō-gwī*).

Name of a river in South America, meaning "the golden water."

Utah (*yū'-tā, yū'-tó*). State in the Union, county and lake in same State, named for the Ute Indians, the word meaning "home, or location, on the mountain top."

Utica (*ū'-tī-kā*). City in New York, named for the ancient city in Africa; towns in Livingston County, Missouri, and Hinds County, Mississippi, and village in Macomb County, Michigan, named for the above.

Uzziah (*ūz-zī'-ā*). From the Hebrew, signifying the "strength of the Lord." *Lat.*, Uzzias.

Valencia (*vā-lēn'-shī-ā*. Spanish, *vā-lān'-thē-ā*). City in Spain, was the ancient Valentia, "the powerful."

Valenciennes (*vā-lēn-sī-ēnz'*. French, *vā-lān-sē-ēn'*), also **Valenza** and **Valence**. Said to have been named after the western Roman emperor, Valentinian.

Valentina (*vāl-ēn-tī'-nā*). Feminine name derived from Valentine.

Valentine (*vāl'-ēn-tīn*). A name derived from St. Valentine, from the Latin *Valentinus*, of or belonging to Valentia, one of the ancient names of Rome; also of towns in Spain, Italy, and Sardinia, and the appellation of a goddess worshiped at Oriculum in Italy; originally from *valens*, "puissant, mighty, strong." *Danish*, Valentin; *Dutch*, Valentijn; *Fr.*, Valentin; *Ger.*, Valentin; *It.*, Valentino; *Lat.*, Valentinus; *Port.*, Valentim; *Sp.*, Valentin; *Sw.*, Valentin.

Valeria (*vā-lē'-rī-ā*). The feminine of Valerius. *Fr.*, Valérie; *It.*, Valeria; *Lat.*, Valeria.

Valerian (*vā-lē'-rī-an*). From the Latin *Valere*, "to be strong, healthy." *Dutch*, Valerianus; *Fr.*, Valerien; *It.*, Valeriano; *Lat.*, Valerianus.

Valerie. See Valeria.

Valley Forge. Village in Chester County, Pennsylvania, so named because situated at the mouth of Valley Creek, where a forge was erected in the days antedating the Revolution, by Isaac Potts.

Vancouver (*vān-kōō'-vēr*). A rising city which forms the western terminus of the Canadian Pacific Railway, bears the name of Captain George Vancouver, R. N., who, as a midshipman in Cook's last voyage, visited the coast in 1776, and surveyed it in 1792.

Vancouver Island. In memory of Captain Vancouver, a midshipman under Captain Cook, who discovered it in 1792, while cruising about in search of a river on the west coast of North America.

Vashti (*vāsh'-tī*). Feminine name, so called from Vashti, wife of Ahasuerus, signifying "beauty, goodness."

Vasili or Vasilii. See Basil.

Vatican (*vāt'-ī-kan*). A hill of Rome, on the right bank of the Tiber, opposite the Pincian. On it stands St. Peter's and the Vatican Palace.

Venezuela (*vēn-ēz-wē'-lā*. Spanish, *vā-nēth-wā'-lā*). Expresses the Spanish for "Little Venice," which designation was given to this country owing to the discovery of some Indian villages built upon piles after the manner of the "Silent City" on the Adriatic Sea.

Venice (*vēn'-īs*). *It.*, Venezia, *Ger.*, Venedig. Is the French name for the city founded by fugitives from the Roman province of Venetia. The word means "blessed."

Vermont. When the French were in possession of the St. Lawrence valley they called the mountains of the southern section *Vertmont*, *vert*, "greek," *mont*, "mountain," and the inhabitants of that section in their Declaration of Independence, January 16, 1777, adopted the name for the State.

Veronica (*vēr-ō-nī'-kā* or *vēr-ōn'-īk-ā*). From the Greek word meaning, "true picture." *Fr.*, Veronique; *It.*, Veronica.

Versailles (*vēr-sālz'*. French, *vēr-sā'-yū*), Palace

of. A famous royal palace in the French city of the same name, a great part of which is now occupied by the Museum of French History, consisting chiefly of paintings; but some of the apartments are still preserved with the fittings of a royal residence.

Vesuvius (*vê-sû'-vî-ûs*), **Mt.** The only active volcano on the continent of Europe, and the most noted one in the world, situated on the Bay of Naples, Italy. The Italian form is *Vesuvio*, and the French form *Vesuve*, the word originally meant "emitter of smoke."

Vicksburg. City in Mississippi, named for Neivitt Vick, its founder.

Victoria (*vîk-tô'-rî-â*). From the Latin, meaning "victory." *Fr.*, Victoire; *It.*, Vittoria; *Lat.*, Victoria; *Sp.*, Vitoria.

Vienna (*vî-ên'-â*). *Ger.*, Wien; *Fr.*, Vienne. Capital of Austro-Hungary. Originally, Vindobona, a name probably of Keltic origin, meaning either "white castle," or "town of the Wends."

Vincennes (*vîn-sênz'*. French, *vân-sên'*). City in Indiana, named from the fort built by Sieur de Vincennes.

Vincent (*vîn'-sênt*). From the Latin name, Vincentius, from *vincere*, "to conquer." *Dutch*, Vincentius; *Fr.*, Vincent; *It.*, Vincente; *Lat.*, Vincentius; *Port.*, Vicente; *Sp.*, Vicente or Vincente.

Viola (*vî-ô-lâ*. Italian, *vê-ô'-lâ*). A feminine name derived from the Latin *viola*, "a violet."

Violante. A feminine name derived from the name Violet.

Violet. A feminine name derived from French *violetie*, from the Latin, *viola*.

Violetta. A diminutive of the name Violet, or direct from Italian Violetta.

Virgil (*vêr'-jîl*). Derived, like the surname Vergil, from the bard of Mantua. Angelus Politianus writes the poet's name Vergilius; Pierius, Virgilius. The name has been variously derived from Vergiliæ, the stars called the Pleiades, and from *virga*, "a garland or laurel."

Virginia (*vêr-jîn'-î-â*). A Roman name, feminine of Virginius, from root of *virgo*, "a virgin." *Dutch*, Virginie; *Fr.*, Virginie; *Ger.*, Virginia; *It.*, Virginia; *Lat.*, Virginia.

Vittoria or Vitoria. See Victoria.

Vivian, Vyvian (*vîv'-î-an*). A Cornish name derived from locality, from *vy-vian*, "the small water." *Fr.*, Vivien; *Lat.*, Vivianus.

Volga (*vôl'-gâ*). The greatest European river, bears a name which is from the Old Slavonic *wolkoï* or *wolkoia*, "great."

Wabash (*wô'-bâsh*). Counties in Indiana and Illinois, river flowing through both States, and city in Indiana. From the Indian word *Uwabache*, "cloud borne by an equinoctial wind," or, according to another authority, "white water."

Wales. Derived from *Wealas*, "foreigners," or "Welsh," a name given by the Anglo-Saxon invaders to the natives of Britain. Wales is a plural form denoting the people, which afterwards acquired a territorial significance.

Walla Walla (*wôl'-lâ wôl'-lâ*), **Washington.** The Indian *walawala* means "waving, throwing up waves, ripples."

Wall of Antoninus. A rampart erected in the southern part of Scotland, in the reign of Antoninus Pius, to check the barbarians in the north of Britain. It extended from the Firth of Forth to the Firth of Clyde.

Walloons (*wôl-lôonz'*). A people found chiefly in southern and southeastern Belgium, also in the neighboring parts of France, and in a few places in Rhenish Prussia near Malmedy. They are descended from the ancient Belgæ, mixed with Germanic and Roman elements.

Wall Street. A street in the lower part of New York City which extends from Broadway, opposite Trinity Church, to the East River, famous as a

financial and speculative center. A figurative term for the money power of the country.

Walter. From the German, *walt-her*, "powerful lord"; literally, a "wood-master." *Dutch*, Wouter; *Fr.*, Gautier; *Ger.*, Walter; *It.*, Gualterio; *Lat.*, Gualterus; *Port.*, Gualter; *Sp.*, Gualterio; *Sw.*, Walter.

Warsaw. Formerly Varsovia (Polish, *Warszawa*), takes its Slavonic name from a "castle," or "fortified place," built in the Ninth Century by Conrad, Duke of the surrounding palatinate of Mazovia. Here originated the mazurek, a dance of the Polish peasantry, which we call the mazurka.

Washington. The name of two places in England, one in Durham the other in Sussex (Anglo-Saxon *Hwessingaton* and *Wassingaton*) which signifies the *tun*, or "town," of the Hwessings or Wassings. From the Durham village the ancestors of George Washington, the first President of the United States (1789-1797), are believed to have derived their territorial surname. In his honor the city of Georgetown, in Maryland, selected in 1790 for the Federal capital, was renamed Washington.

Watervliet (*wô-têr-vlêt'*). City on the Hudson, in Albany County, New York. From the Dutch, meaning "flowing stream."

Wednesday. Set apart for the worship of Odin, or Wodin, sometimes called the god of magic and the inventor of the arts.

Weehawken (*wê-hô'-kên*), **N. J.** From the Delaware Indian name *weachin*, "maize lands."

Wellsburg, W. Va. In honor of Alexander Wells, an early settler.

Western Reserve, The. When, by the treaty of 1783, Great Britain relinquished the territory south of the Great Lakes and east of the Mississippi River, disputes arose among the States of Virginia, New York, Massachusetts, and Connecticut as to the right of occupancy in that locality. The difficulty was finally settled by the cession of the whole to the Federal Government, but Connecticut reserved a tract of nearly 4,000,000 acres on Lake Erie. That State finally disposed of this in small lots to colonists, and so accumulated a magnificent school-fund.

Westminster Hall. A structure adjoining the British Houses of Parliament on the west, forming part of the ancient palace of Westminster.

Westminster Palace, London. The Houses of Parliament. A palace is supposed to have existed at Westminster in the reign of Canute (1017-35). Its importance, however, begins with Edward the Confessor (1042-66), and the name has been conferred upon the great legislative edifice of the British Empire.

West Virginia. See "Virginia" for the word *Virginia*; the Western division of Virginia separated from the eastern, owing to civil war issues, as provided in Amnesty Proclamation of President Lincoln, December 8, 1863, affecting section of States in rebellion. Proposed at one time to call the State Kanawha, from its principal river.

Wetterhorn (*vêt-têr-hôrn*). A mountain of the Bernese Alps, canton of Bern, Switzerland, situated near Grindelwald, fourteen miles east-southeast of Interlaken. Means, literally, "storm peak."

Wettin (*vêt-tên'*). A town in the province of Saxony, Prussia, situated on the Saale, thirty-two miles northwest of Leipsic. It contains the ancestral castle of the Saxon line of Wettin from which King Edward VII. of England is descended.

Wheeling. City in West Virginia, so named because the Indians placed the head of a white victim on a pole and gave the place the name of *weal-ink*, "a place of a human head." The present name of the place is a corruption of the Indian name.

Whitechapel. A quarter in the eastern part of London, named from a certain chapel from which distances out of London used to be measured.

Whitehall. In modern London, the main thoroughfare between Trafalgar Square and the houses of Parliament.

Whitehall Palace. A palace in London, England, originally built by Hubert de Burgh in the reign of Henry III.

White House, The. The official residence of the President of the United States in Washington. It is a handsome mansion in the English Renaissance. Its classical details are sober and well designed, both outside and inside.

White Mountains, N. H. Named from the color of its tops; being covered with snow (white), this has always been the groundword of various appellations. The first English explorers (1632) called them *The Crystal Hills*. The Indian name was *Waumbekket*.

White Sea. So called from its proximity to the sterile regions of snow and ice.

Whitney. Loftiest peak of the Sierra Nevadas, named for Prof. J. D. Whitney, State geologist of California.

Wilford. A name corrupted from Wilfred.

Wilfred, Wilfrid. This name has been translated "much peace," or "resolute peace," but the name is rather from *viel-frid*, "powerful protector."

Wilhelm. See William.

Wilhelmina (*vīl-hēl-mē'-nā*). A feminine name derived from the German name *Wilhelmine*, from *Wilhelm*.

Wilhelmine (*wīl'-hēl-mēn'*. German, *vīl-hēl-mē-nē*). A feminine name derived from Wilhelm. *It.*, Guglielma.

Wilkesbarre (*wīlks'-bār-ī*). City in Luzerne County, Pennsylvania, named for two members of the British Parliament, American sympathizers, John Wilkes and Colonel Barre.

William. A name corrupted from the Old German name *Wilhelm*, derived from *weil-helm*, "protector of rest, defender of tranquility," or *vīl-helm*, "strong protector." *Danish*, Wilhelm; *Dutch*, Willem; *Fr.*, Guillaume; *Ger.*, Wilhelm; *It.*, Guglielmo; *Lat.*, Gulielmus, Wilhelmus, or Willielmus; *Sp.*, Guillermo; *Sw.*, Wilhelm.

Williamette (*wīl-ä'-mēt*). River in Oregon. Indian word said to have originally been *Wallamet*, derived from the same root as *Walla Walla* and *Wallula*; when applied to water, meaning "running." Another authority gives its definition as "the long and beautiful river."

Willimantic (*wīl-lī-mān'-tik*). River, and a city in Windham County, Connecticut. Indian word, meaning a "good lookout," or, according to another authority, "good cedar swamps."

Wilmington. City in Delaware, the present name a corruption of the name Willington, given it in honor of Thomas Willing.

Wilmington, N. C. In honor of the Earl of Wilmington, England; originally called Newton.

Windsor (*wīn'-zōr*). A contraction of the Anglo-Saxon name *Windlesofra*, *Windlesora*, *Wendlesore*, or *Windelesore*, is usually explained as the place by the "winding shore."

Windsor Castle. A famous royal residence, founded by William the Conqueror, extended by his successors, especially by Edward III., and recently restored by Queen Victoria as a memorial of her husband. The interior is decorated in so lavish a manner that it forms one of the most remarkable existing examples of such work.

Winifred (*wīn'-ī-frēd*). A feminine name, which some consider a Saxon compound signifying "winning peace"; it comes rather from the Old German *win-frid*, "beloved protector." *Dutch*, Winfried; *Fr.*, Winifred; *Lat.*, Winfreda; *Sw.*, Winfrid.

Winnepesaukee (*wīn-ē-pē-sō'-kē*). Lake in New Hampshire. Indian word *winnepesaukee*, meaning "good water discharge," or "the beautiful lake of the highland."

Winnipeg (*wīn'-ī-pēg*) **City.** The capital of the

Canadian province of Manitoba, is built on a spit at the junction of the Red River and the Assiniboine, whose united waters after a course of forty-five miles reach Lake Winnipeg, which bears an Algonquin name meaning "the muddy water," the water being discolored by the Saskatchewan, which brings down much clay in solution.

Winona (*wī-nō'-nā*), **Minn.** A Dakota name applied to the first born, if a daughter, hence, "first born." If a boy, he is spoken of as *Chaske*.

Winooski (*wī-nōōs'-kī*) **River, Vt.** Composed of two Algonquin words meaning "land of onions." The stream is often called the Onion River, also French River, the latter term from the circumstance of this valley being the line of travel of the French and Indians (1755).

Winter Palace. An imperial palace at St. Petersburg, Russia. The interior is remarkable for its series of Russian historical paintings and portraits, and for the splendid state apartments. The crown jewels are kept in this palace.

Wisby or Visby (*vēs'-bü*). A famous old town on the west coast of the Island of Gotland, Sweden. It contains a cathedral and ruined churches, towers, and walls.

Wisconsin (*wīs-kōn'-sīn*). From its principal river named by Marquette as *Masconsin*, "wild rushing channel," changed to *Ouisconsin*, then to Wisconsin. Present spelling from a misprint; all the early French documents have *Ouisconsin* or *Misconsin*.

Wissahickon (*wīs-sā-hīk'-on*) **Creek, Pa.** From the Delaware Indian word, *misamekhan*, "catfish stream."

Witenagemot (*wīt'-ē-nā-gē-mōt*). In Anglo-Saxon history, the great Saxon council or parliament, consisting of the king with his dependents and friends and sometimes the members of his family, the ealdormen, and the bishops and other ecclesiastics.

Worcester (*wōōs'-tēr*), **England.** From the ancient Huic-wara-ceaster, "the camp of the Huieci, or Hwiccas," a Celtic tribe.

Worcester (*wōōs'-tēr*, *wōōs'-tēr*), **Mass.** County and city in Massachusetts, named for the county in England.

Wouter. See Walter.

Wyoming (*wī-ō'-mīng*). Name carried to the West by emigrants from the Wyoming Valley of Eastern Pennsylvania in its native location, the word derived from the Delaware expression, *Maughwauwame*, meaning "the large plains."

Yadkin (*yād'-kīn*). County in North Carolina, said to be named for a tribe of Indians, though some authorities favor the idea that it was named for an early settler.

Yang-tse-Kiang (*yāng-tsē-kī-āng*) **River.** "The son of the great water."

Yankee. This word is believed to have been derived from the manner in which the Indians endeavored to pronounce the word English, which they rendered "Yenghees," whence the word Yankee.

Yankton (*yāngk'-tūn*), **South Dakota.** From the Dakotah Indian word, *eyank-ton-wah*, "people of the sacred or spirit lake."

Yazoo (*yāz'-ōō*). County and river in Mississippi, named for a tribe of Indians, the name said to mean "to blow on an instrument"; another definition is given as "the ruins."

Yellow Sea. From the color of the water caused by the nature of its muddy soil.

Yellowstone. River in Montana and Wyoming. Name derived from its original French name, *Roche jaune*, "yellow rock or stone," though by some said to be from the Indian *mī-tsi-a-da-zī*, "rock yellow river."

Yemassee (*yēm-ā-sē*) **River, Ga.** From a tribe of Indians, *Yamassi*, signifying "peaceable."

Yenisei (*yēn-ē-sā'-ē*). The great river of Siberia, also written *Jenissy*, *Geniseia*, or *Gelissy*, has been

explained as "the water which flows down," or the river which "brings down ice."

Yokohama (*yō-kō-hā'-mä*). Now the chief port in Japan, was before 1854 a small fishing village. The name is believed to mean the "cross shore."

Yonkers (*yōngk'-ērz*). City in New York, named for a manor house built by the Dutch, the word meaning "young lord," and first applied in this country to Adrien Van der Douck, a patentee.

York River, Va. After the Duke of York; prior to this it was noted on the maps as Salt River. The Indian name was *Pamawnkee* or *Pamaunk*.

Yosemite (*yō-sēm'-īt-ē*). An Anglicized or corrupted form of the Indian *A-hom-e-ta*, meaning "grizzly bear"; supposed to have been the title of a chief, and generally applied to a tribe that inhabited the region.

Youghiogeny (*yō-hō-gā'-nī*) **River, Penn.** From the Indian *yukwiakhanna*, "a stream taking a roundabout course."

Youngstown. City in Ohio, named for John Young, an early resident.

Ypsilanti (*īp-sīl-ān'-tī*). City in Michigan, named for a Greek prince.

Yucatan (*yōō-kā-tān'*). A compound Indian word meaning "what do you say?" which was the only answer the Spaniards could obtain from the natives to their inquiries concerning a description of the country.

Yukon (*yōō'-kōn*) **River, Alaska.** Named from the *Yakuts*, a Tartar tribe.

Yuste (*yōōs'-tā*). A convent in Spain, east of Plasencia. It is noted as the place of retirement of the Emperor Charles V. after his abdication.

Zaccheus (*zāk-ē'-ūs*). From the Hebrew *Zak-kay*, "pure, innocent." Others render it "pure of the Lord," making the last letter stand for *Yah*. *Fr.*, *Zacchée*; *It.*, *Zacheo*; *Lat.*, *Zaccheus*.

Zachariah (*zāk-ā-rī'-ā*). From the Hebrew *Zakhar-Yah*, meaning "remembering the Lord." *Danish*, *Zacharias*; *Dutch*, *Zacharias*; *Fr.*, *Zacharie*; *Ger.*, *Zacharias*; *It.*, *Zaccaria*; *Lat.*, *Zacharias*; *Sp.*, *Zacarias*; *Sw.*, *Zacharias*.

Zachary (*zāk'-ā-rī*). Same derivation as *Zachariah*.

Zadok (*zā'-dōk*). Means "righteous." *Fr.*, *Zadoc*; *Lat.*, *Zadocus*.

Zambezi (*zām-bā'-zē*, *Pop.*, *zām-bē'-zī*). Is the "great river" of Eastern Africa, whose upper waters and chief affluents are called *Jambaji* and *Luambezi*, dialectic forms of the same name.

Zanesville (*zānz'-vīl*). City in Ohio, named for Ebenezer Zane, who, with John McIntire, founded the city.

Zanzibar (*zän-zī-bār'*). The name of an East African island, was used before the Fifteenth Century in a more general sense to denote the East African coast south of the River Jubb. *Zanzibar* is a Portuguese form of the Arabic *Zanjebar*, which is itself a corruption of the Persian *Zangibar*, or *Zenquebar*, which means the coast or "region of the blacks," the name being formed like *Hindubar*, the land of the Hindus, or *Malebar*, the land of the mountains.

Zealand (*zē'-land*). In Netherlands, "land surrounded by the sea."

Zebulon (*zēb'-ū-lōn*). From the Hebrew, meaning "dwelling." *Fr.*, *Zabulon*; *Lat.*, *Zabulon*.

Zeno (*zē'-nō*). From the Greek *Zeus*. *Fr.*, *Zenon*; *Gr.*, *Zenon*; *It.*, *Zenone*.

Zenobia (*zē-nō'-bī-ā*). Feminine form from *Zeus*. *Fr.*, *Zenobie*; *Ger.*, *Zenobia*; *It.*, *Zenobia*; *Lat.*, *Zenobia*.

Zion (*zī'-ōn*), or **Sion** (*sī'-ōn*) **Mount.** A hill on which was situated the old city of Jerusalem; the "city of David." Now used symbolically of the Christian church and of heaven.

Zoe (*zō'-ē* or *zō*). From the Greek name, signifying "life."

Zululand (*zōō'-lōō-lānd*). The country of *Zulus*.

Zurich (*zōō'-rīk*). From the ancient *Thiouricum*, "the town of the *Thuricii*," who built it after it had been destroyed by *Attila*.

Zuyder Zee (*zī'-dēr zē*. *Dutch*, *zoi'-dēr-zā*). Expresses the Dutch for the "South Sea," in relation to the North Sea or German Ocean.

Zwinger (*tsvīng'-ēr*). A famous museum in *Dresden*. Its picture-gallery contains about 2,500 paintings, also collections of drawings, casts, etc.

Newspapers. Newspapers first came into existence when the reports of the Roman imperial army were transmitted to the generals in all parts of the country, but for the actual newspaper we are indebted to Germany, where in Augsburg, Vienna, Ratisbon, and Nuremburg, it was, early in the Fifteenth Century, the practice to issue news sheets in the form of letters. Yet the first newspaper that at all covered the same idea as those of the present day, was issued in Venice, by order of the Venetian Government in 1566, and called the *Notizie Scritte*. At first they were not printed, but written out, and hung up in various public places, where the people could read them on payment of a small coin. The first actual English newspaper was the *Weekly News* of 1622, edited and published by Nathaniel Butler. The *London Weekly Courant* came out in the same year. The first daily paper was the *Daily Courant*, which appeared printed on one side only, in 1702. The first newspaper published in America was *Publick Occurrences* (1690), followed in 1704 by the *Boston News-Letter* and the *Boston Gazette*.

Oddfellows. A large and extensively ramified friendly society, having its headquarters in Manchester. It was originally an association of a convivial kind, modeled on freemasonry, and still retains watchwords and secret signs. It assumed its present form at a convention in Manchester (1813), and has spread widely in Britain and elsewhere. The unparalleled prosperity of the order of Odd Fellows in the United States has excited the wonder of the leading men in all fraternal organizations. The first lodge was organized in Baltimore, Md., April 26, 1819; in 1825 the Grand Lodge of the United States was formed. In 1839 there were fifteen grand lodges, 135 subordinate lodges, 11,000 members; in 1893 over 800,000 members, and 8,000 lodges; and at present in excess of 1,396,000 members. The American system has become popular in France, Germany, Switzerland, Holland, Sweden, Denmark; also in Canada, Mexico, West Indies, South America, Australia, and Japan. The total relief paid by the Independent Order of Odd Fellows, up to the present, is over \$5,113,000.

Panic. Though the word is now applied to a financial stringency, it originated on the battlefield of Marathon. It will be remembered, in that renowned encounter, that a mere handful of Greeks put a vast multitude of Persians to flight, and the honor of the victory was all given to the god Pan, who smote the Persians with sudden and unaccountable fright. They lost all sense or reason, and this condition of affairs took its name from the god who was supposed to cause it. It was a Pan-ic.

Pawnbroker's Sign. This sign, popularly known as "three balls," was taken from that of the Italian bankers, generally called Lombards, who were the first to open pawn-shops in England for the relief of temporary distress. The greatest of the Lombards were the celebrated and eventually princely house of the Medici of Florence. They bore pills on their shields (and those pills, as was usual then, were gilded), in allusion to the professional origin from which they had obtained the name of Medici. Whence their

agents in England and other countries placed their armorial bearings over their doors, and others adopted the sign.

Pestilence and Plague.

BEFORE CHRIST

In 767 a great plague, mentioned by Petavius, prevailed throughout the world.

In 534, at Carthage, multitudes perished by an infectious distemper; children were offered in sacrifice as an atonement with the gods.

In 461, in Rome, 100,000 persons died.

In 430, beginning in Athens, a peculiar disease, described by Thucydides, extended over Egypt and Ethiopia, causing frightful loss of life.

In 188 a plague raged throughout Egypt, Syria, and the Grecian colonies; according to Pliny, 2,000 persons perished every day.

ANNO DOMINI

In 80, in and about Rome, by an infectious disease, for a considerable time, 10,000 died daily.

In 167, and again in 169 and 189, the Roman Empire suffered in almost every part by a contagious and fatal sickness.

From 250 to 265 the Empire was again ravaged; many provincial towns were depopulated; in Rome itself for some time 5,000 died every day.

In 430 Britain was devastated by a strange disease; there were not enough survivors to bury the dead.

In 558, and during many subsequent years almost without intermission, a plague prevailed through Europe, Asia, and Africa.

From 746 to 749, 200,000 Constantinopolitans died of a contagious disease, which prevailed also in Greece, Sicily, and Calabria.

In 772 an epidemic disease carried off 34,000 persons at Chichester, England.

In 954, in Scotland, 40,000 persons perished.

In 1094 many died in London of an epidemic; which the following year extended into Ireland.

In 1111 a distemper in London, causing great mortality among both human beings and domestic animals.

In 1172 a plague in Ireland, which drove back the English invaders.

In 1204, in Ireland, a similar disease again appeared.

In 1267 the plague prevailed in England; mortality great.

In 1340 the "Black Death" first appeared in Italy. This plague spread throughout Christendom, and raged during many years, causing unprecedented mortality. "In London alone 200 persons were buried daily in the Charter House yard, 1348." In Germany, 1340, thousands perished.

In 1362, 1367, 1370, and 1379, there was frightful mortality in Western Europe, especially near Paris and London, and in portions of Ireland; 57,376 died in England in 1362.

In 1383 the "fourth pestilence" in Ireland destroyed many people.

In 1407, in London, a dreadful plague caused the death of 30,000 persons.

In 1466, in Ireland, a famine, followed by a fearful pestilence, caused the death of hundreds.

In 1470 the mortality in Dublin was very great.

In 1471 and 1478, at Oxford and throughout all England, a plague so destructive to human life that more people died than in the constant wars of the fifteen years previously.

In 1485, in London, an awful distemper prevailed called Sudor Anglicus, or sweating sickness, by which very many lost their lives.

In 1499 to 1500 plague in London; the royal court was in consequence removed to Calais.

In 1506 and again in 1517 the "sweating sickness" revisited London and prevailed over all England; the mortality was frightful, the disease proving fatal in three hours; half the inhabitants died in most of the large towns; some towns being depopulated.

In 1522 Limerick was devastated by a plague by which many thousands lost their lives.

In 1528, in England, the "sweating sickness" again made its appearance; North Germany was also visited by it in 1529; and England ravaged for the fifth time in 1548 and 1551.

In 1603 and 1604 dreadful mortality in England by the plague; in London alone 30,578 persons perished; Ireland also suffered severely by it.

In 1611 a pestilence raged in Constantinople by which 200,000 of the inhabitants perished.

In 1625 London again visited by a fearful plague; the mortality great; 35,417 persons died.

In 1632, in France, large numbers perished; at Lyons alone 60,000 died.

In 1656, at Naples, the plague raged with such violence that it carried off 400,000 persons in six months; it had been brought by a transport with soldiers on board from Sardinia.

In 1664 and 1665 the great plague of London is said to have swept away 68,596 persons; some say 100,000; to destroy the contagion fires were kept burning day and night; but not until the great fire of London in 1666 was the city free of infection.

In 1720, at Marseilles and vicinity, 60,000 perished by the plague, which was brought in a ship from the Levant.

In 1741 and 1742 New York City was visited by yellow fever.

In 1743 Messina was ravaged by the plague.

In 1760 an awful plague prevailed in Syria.

In 1773 infectious distemper in Persia; 80,000 died in Bassora.

In 1773 Sauguis, in France, was visited by a putrid fever, which broke out at the opening of a grave; out of 180 persons present, 174 were attacked.

In 1784, at Smyrna, 20,000 people were carried off by the plague; it raged in Tunis the same year.

In 1791 and 1795 yellow fever swept along the Atlantic Coast of North America.

In 1798 yellow fever in Baltimore, Philadelphia, and New York; in the latter city one out of every twenty-seven died; in and about Philadelphia several thousands died — 117 in one day, and 50,000 out of 70,000 inhabitants fled from the city.

In 1799, on the coast of Africa, particularly in Barbary, 3,000 died daily of the plague, and at Fez 247,600 were swept away.

In 1800, at Morocco, 1,800 died in one day, and the plague continued to rage.

In 1804 and 1805 pestilence in Spain and Gibraltar.

In 1805 yellow fever in North American ports; 37,000 out of a total population of 70,000 fled from New York City.

In 1813, at Malta, fearful ravages by plague.

In 1814 plague desolated Asia Minor, Palestine, and Grecian Archipelago; Smyrna lost 30,000.

In 1816 plague raged at Naples.

In 1817 the spasmodic or Asiatic cholera appeared in India, at Jesson, a town about a hundred miles north-east of Calcutta.

In 1817 the city of Calcutta was attacked by cholera, and its ravages soon extended to Behar, Benary, Allahabad, Lucknow, Delhi, and many other towns; it carried off a large proportion of soldiers, both European and natives, and ravaged many parts of India with great mortality.

In 1818 cholera visited Bombay; from thence spread into Ceylon, Siam, Malacca, China, and the Islands of Mauritius and Bourbon, causing alarm, desolation, and death, carrying off vast numbers; the season of the year did not modify its virulence.

In 1819 and 1822 great alarm in seaports of United States because of spread of yellow fever, but the mortality was not so great as on former visits of that disease.

In 1819 Tunis lost half its population by plague.

In 1821 Persia visited by Asiatic cholera.

In 1823 the cholera extended to the Mediterranean Sea. Aleppo, Antioch, and other places were visited by it.

In 1828 epidemic fever at Gibraltar — great mortality.

In 1830 Astrakhan visited by cholera; it soon advanced up the River Volga and into the heart of Russia in Europe, attacking many towns, until it reached Moscow, where it continued four months; 8,576 were attacked, of whom 4,630 died.

In 1830, at Sunderland, the Asiatic cholera first made its appearance in England. Haddington in Scotland was visited the same year.

In 1831 the Russian and Polish armies were attacked in their encampments by cholera; at Warsaw in seven weeks 3,012 were taken ill, of whom 1,462 died; its ravages continued in Poland; it appeared at St. Petersburg in Russia, same year; and 7,567 cases were reported, of whom 3,804 died in forty-eight days. Ham-burgh in Germany also suffered from this disease.

In 1832 cholera first appeared at Belfast, Ireland, and at many places in Great Britain, Newcastle, Edinburgh, Greenock, London, Dublin, etc., but until January 1, 1832, the mortality did not exceed 6,000 in both islands.

In 1832 Paris visited by cholera, mortality in sixteen days amounted to more than 8,000; it continued in Paris for some weeks, and the total mortality in that city has been estimated at 15,000, out of a population of 750,000.

In 1832 cholera crossed the Atlantic Ocean and appeared at Quebec and Montreal, in Canada; about 2,000 in each of these cities died. The city of New York was visited by cholera the same year; in less than

two months 6,000 persons had been attacked, of whom 3,000 died, one-third of the inhabitants having left the city. The distemper spread to Albany, Brooklyn, Rochester, Buffalo, and other towns in the State of New York, and afterward to Philadelphia, Newcastle, Baltimore, Norfolk, Portsmouth, Petersburg, and Richmond.

In 1848 and 1849 England and America visited by cholera.

In 1865 at Smyrna and Constantinople large numbers perished by cholera; it also appeared at Paris, Marseilles, and Naples, from July to December.

In 1878 yellow fever raged in Southern towns, especially Memphis.

In 1884, 1885, and 1892 cholera raged in various parts of Europe.

Poisons. A poison is commonly defined to be a substance which, when administered in small quantity, is capable of acting deleteriously on the body. Poisons are divisible into three classes, according to their mode of action on the system, viz: *Irritants*, *Narcotics*, and *Narcotico-irritants*. The *Irritants*, when taken in ordinary doses, speedily occasion intense vomiting and purging, and severe abdominal pain. They act chiefly on the stomach and intestines, which they irritate, inflame, and frequently corrode, and may thus occasion ulceration, perforation, or gangrene. The *Narcotics* act specially on the brain and spinal cord. Among their most common symptoms are giddiness, headache, obscurity of sight, or double vision, stupor, loss of power of the voluntary muscles, convulsions, and finally complete coma. The *Narcotico-irritants* have, as their name implies, a mixed action. "At variable periods," says Dr. Taylor, "after they have been swallowed, they give rise to vomiting and purging, like irritants, and sooner or later produce stupor, coma, paralysis, and convulsions, owing to their effect on the brain and spinal marrow." Under the head of *Irritant Poisons* may be included (1) Mineral Acids, as sulphuric, nitric, and hydro-chloric acids; vegetable acids, and other salts, as oxalic acid, binoxalate of potash, and tartaric acid; the alkalies, as pearl-ash, soap lees, ammonia and its sesquicarbonate; metallic compounds, as white arsenic, yellow arsenic, corrosive sublimate, bichloride of mercury, pernitrate and other salts of this metal, acetate of lead in doses of an ounce and upward, carbonate of lead, sulphate of copper, subacetate of copper, arsenite of copper, tartarized antimony, chloride of antimony, chloride of zinc, nitrate of silver, sulphate of iron, and bichromate of potash. (2) Vegetable substances, viz: colocynth and gamboge in large doses, savin, croton oil, the leaves and flowers of the common elder; and (3) animal substances, such as cantharides, to which must be added the occasional cases in which sausages, and certain fish and mollusks, usually quite innocuous, act as irritant poison. The *Narcotic Poisons* include opium, hydrocyanic acid, oil of bitter almonds, cyanide of potassium, henbane, especially the seeds, alcohol, ether, chloral, and chloroform; while *Narcotico-irritant Poisons* are nux vomica, meadow saffron, white hellebore, foxglove, common hemlock, water-hemlock, hemlock water-dropwort, fool's parsley, thorn-apple, monk's-hood, or wolf's-bane, deadly nightshade, tobacco, Indian tobacco, the bark and seeds of the common laburnum, the berries and leaves of the yew-tree, and certain kinds of fungi.

Pulse. The following table, compiled from the observations of Dr. Guy, shows the differences in the rapidity of the pulse at different ages.

Ages	Average Pulsations Males	Average Pulsations Females
From 2 to 7 years,	97	98
From 8 to 14 years,	84	94
From 14 to 21 years,	76	82
From 21 to 28 years,	73	80
From 28 to 35 years,	70	78
From 35 to 42 years,	68	78
From 42 to 49 years,	70	77
From 49 to 56 years,	67	76
From 56 to 63 years,	68	77
From 63 to 70 years,	70	78
From 70 to 77 years,	67	81
From 77 to 84 years,	71	82

Dr. Guy found the pulsations of the heart in the foetus to be pretty uniformly 140 per minute. At birth, the pulse is 136. It gradually diminishes during the first year to about 128. The second year, the diminution is quite rapid, the tables of Dr. Guy giving 107 as the mean frequency at two years of age. After the second year, the frequency progressively diminishes until adult life, when it is at its minimum, which is about 70 per minute. It is a common but erroneous impression that the pulse diminishes, in frequency, in old age. On the contrary, numerous observations show that at the later periods of life the movements of the heart become slightly accelerated, ranging from 70 to 80, according to sex.

During early life there is no marked and constant difference in the rapidity of the pulse in the sexes; but, toward the age of puberty, the development of the sexual peculiarities is accompanied with an acceleration of the heart's action in the female, which continues even into old age.

Railway Gauge. The gauge, or distance between the steel rails on railway tracks, varies very much with the gradient and with the supply of materials and other causes. Of course, there can be no through transport of goods unless all the lines in a country or on a continent are of the same gauge; but in some places this is, or might be, politically dangerous, because troops might suddenly be run through from one country to another. This accounts for the difference of gauge which formerly existed throughout Europe, and which still exists on some frontiers. Sometimes, however, the difference of gauge is due to the character of the ground, and sometimes to motives of economy. Up very steep inclines, e. g., in Switzerland and India, the line must be either on a very narrow gauge or on a zigzag, to enable the engine to climb. Across a desert, e. g., from Karachi to Lahore, there is a great scarcity of wood. The gauge up to Darjiling, in Northern India, is 2 feet, the Norwegian lines are 3 feet 6 inches, the British is 4 feet 8½ inches, the Indian is 5 feet 6 inches, and the old Great Western Railway had a 7-foot gauge. The standard gauge in America is 4 feet 8½ inches.

Seven Wonders of the World. In ancient times this description was assigned the Pyramids of Egypt, the Hanging Gardens of Semiramis at Babylon, the Temple of Diana at Ephesus, the Statue of Jupiter at Athens by Phidias, the Mausoleum, the Colossus at Rhodes, and the Pharos of Alexandria. This cycle of seven wonders originated among the Greeks after the time of Alexander the Great.

Signature of the Cross. The mark which persons who are unable to write are required to make, instead of their signature, is in the form of a cross (X), and this practice having been followed formerly by kings and nobles, is constantly referred to as an instance of the deplorable ignorance of ancient times. Anciently, the use of this mark was not confined to illiterate persons; for, amongst the Saxons, the mark of the cross, as an attestation of good faith of the person signing, was required to be attached to the signature of those who could write, as well as to stand in the place of the signature of those who could not write. The ancient use of the cross was, therefore, universal by those who could and those who could not write. It was, indeed, the symbol of an oath from its holy associations.

Solid South, Solid North. The phrase "Solid South" denotes a political solidarity dominated by the Democratic party such as obtained in ante-bellum days. The expression came into vogue about ten years after the close of the war, and was given a political significance by a portion of the newspaper press which opposed it with a "Solid North" based on a survival of the old war feeling. John Singleton Mosby, American soldier, but who also served in the Confederate army, was the first to use the phrase "Solid South," in a letter to the *New York Herald*, in 1876, supporting the candidacy of R. B. Hayes for the presidency.

Standard Time. Standard time was established by mutual agreement, in 1883. It was primarily intended for the convenience of railroads, by which trains are run in accordance with certain schedules and local time regulated. According to this system, the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour, commencing with the 75th meridian. The first (eastern) section includes all territory between the Atlantic Coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last-named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah, and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific Coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York City (eastern time), the time at Chicago (central time) is 11 o'clock A. M.; at Denver (mountain time), 10 o'clock A. M., and at San Francisco (Pacific time), 9 o'clock A. M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, 1 minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

STATES, MOTTOES, AND POPULAR NAMES

STATE	MOTTO	TRANSLATION	POPULAR NAME OF STATE	POPULAR NAME OF PEOPLE
Alabama.	Here we rest.	Lizards.
Arkansas.	Mercy, justice. Regnat populi.	The people rule.	Bear.	Toothpicks.
California.	Eureka.	I have found it.	Golden.	Gold Hunters.
Colorado.	Nil sine numine.	Nothing without Provi- dence.	Centennial.	Rovers.
Connecticut.	Qui transtulit sustinet.	He who transplanted still sustains.	Land of Steady Habits. Nutmeg.	Wooden Nutmegs.
Delaware.	Liberty and Independ- ence.	Blue Hen. Dia- mond.	Blue Hens. Chick- ens. Muskrats.
Florida.	In God is our trust.	Flower.	Fly-up-the-Creeks.
Georgia.	Obverse: Wisdom, jus- tice, moderation. Reverse: Agriculture and commerce.	Empire State of the South.	Buzzards.
Idaho.	Salve.	Hail.
Illinois.	National Union, State Sovereignty.	Prairie.	Suckers.
Indiana.	None.	Hoosier.	Hoosiers.
Iowa.	Our liberties we prize and our rights we will maintain.	Hawkeye.	Hawkeyes.
Kansas.	Ad astra per aspera.	To the stars through all difficulties.	Jayhawkers.
Kentucky.	United we stand, divided we fall.	Blue Grass. Dark and Bloody Ground.	Cornercrackers.
Louisiana.	Union, justice, and con- fidence.	Creole, Pelican.	Creoles.
Maine.	Dirigo.	I direct.	Pine Tree. Lumber.	Foxes.

STATES, MOTTOES, AND POPULAR NAMES—Continued

STATE	MOTTO	TRANSLATION	POPULAR NAME OF STATE	POPULAR NAME OF PEOPLE
Maryland. . . .	Fatti maschii parole femine. [At one time the seal was mislaid, and the new die carried the motto, "Crescite et Multiplacimini." Grow or increase and multiply.] Coronasti nos. Scuto bonae voluntatis tuae.	Manly deeds, womanly words. [Seal originally pendant, for wax, when screw introduced the reverse was abandoned.] You have crowned us with the shield of your good will.	Crawthumpers.
Massachusetts. .	Ense petit placidam sub libertate quietem. . .	With the sword she seeks quiet peace under liberty.	Bay.	Beaneaters.
Michigan. . . .	Si quaeris peninsulam amoenam circumspice.	If thou seekest a beautiful peninsula, behold it here.	Wolverine.	Wolverines.
Minnesota. . . .	L'etoile du nord. . . .	The Star of the North. .	North Star. Gopher.	Gophers.
Mississippi. . . .	None.	Bayou.	Tadpoles.
Missouri.	Salus populi suprema lex esto. United we stand, divided we fall.	The welfare of the people is the supreme law.	Pukes.
Montana.	Oro y plata.	Gold and silver.	Mountain.	Bug-eaters.
Nebraska.	Equality before the law.	Silver.	Sage Hens.
Nevada.	All for our country.	Granite.	Granite Boys.
New Hampshire. .	None.	Jersey Blues. Clam-catchers.
New Jersey. . . .	None.	Knickerbockers.
New York.	Excelsior.	Higher, more elevated. .	Empire.
North Carolina. .	None.	Old North. Turpentine.	Tar heels.
North Dakota. . .	Liberty and union, one and inseparable now and forever.	Sioux.	Tuckoes.
Ohio.	None.	Buckeye.	Buckeyes.
Oklahoma.	The Union.	Beaver, Sunset. .	Webb feet.
Oregon.	Obverse: None.	[The State "Coat of Arms" carries the motto, "Virtue, Liberty, and Independence."].	Keystone.	Pennanites. Leather-heads.
Pennsylvania. . .	Reverse: Both can't survive.	Little Rhody. . .	Gun-flints.
Rhode Island. . .	Hope.	Prepared in mind and resources; ready to give life and property.
South Carolina. .	Animis opibusque parati.	Palmetto.	Weasels.
.	Dum spiro, spero. Spes.	While I breathe I hope, Hope.	Coyote.
South Dakota. . .	Under God the people rule.	Volunteer.	Butternuts. Whelps
Tennessee. . . .	Agriculture, Commerce.	Lone Star.	Beef-heads.
Texas.	None.
Utah.	None.	Green Mountain. .	Green Mountain Boys.
Vermont.	Freedom and unity.
Virginia.	Obverse: Sic semper tyrannis. Reverse: Perseverando.	Ever so to tyrants. Perseverance.	Old Dominion. . .	Beadies.
Washington. . . .	Al-Ki.	Bye-bye.
West Virginia. . .	Obverse: Montani semper liberi.	Mountaineers are always free men.
.	Reverse: Libertas et fidelitas.	Liberty and fidelity. . .	Panhandle.	Panhandlers.
Wisconsin.	Forward.	Badger.	Badgers.
Wyoming.	Cedant arma togae. . .	Let arms yield to the gown.

State Flowers.

The following are "State Flowers," adopted in most instances by the vote of the public school scholars of the respective States:

Alabama,	Golden Rod
Arkansas,	Apple Blossom
California,	California Poppy (<i>Eschscholtzia</i>)
Colorado,	Columbine
Connecticut,	Mountain Laurel
Delaware,	Peach Blossom
Idaho,	Syringa
Indiana,	Corn
Iowa,	* Wild Rose
Kansas,	Sunflower
Kentucky,	Golden Rod
Louisiana,	Magnolia
Maine,	* Pine Cone and Tassel
Maryland,	Golden Rod
Michigan,	Apple Blossom
Minnesota,	Moccasin
Mississippi,	Magnolia
Montana,	Bitter Root
Nebraska,	Golden Rod
New York,	Rose
North Dakota,	Wild Rose
Ohio,	Scarlet Carnation
Oklahoma,	Mistletoe
Oregon,	Oregon Grape
Rhode Island,	Violet
South Dakota,	* Pasque
Tennessee,	Daisy
Texas,	Blue Bonnet
Utah,	Sego Lily
Vermont,	Red Clover
Washington,	Rhododendron
West Virginia,	Rhododendron

In other States the scholars or State Legislatures have not yet taken action.

* Adopted by State Legislature, not by public school scholars.

Statistics of the Earth.

Thanksgiving Day. This holiday, in the United States, is named by the president, and usually by the governors of the various States, to be kept as a thanksgiving for the mercies of the year, and to be observed on the last Thursday of November. The festival is essentially a harvest thanksgiving, and its earliest observance can be traced to the Pilgrim Fathers. The summer of 1621, following the landing at Plymouth, yielded but a scanty harvest, and unless speedy supplies came from Europe the sturdy colonists foresaw that they would be reduced to the point of starvation. Yet, amid such surroundings as these, we learn from the old chronicles that Governor Bradford, "the harvest being gotten in, sent four men out on fowling, so that we might, after a more special manner, rejoice together after we had gathered the fruit of our labor." And thus,

"While sickness lurked, and death assailed,
And foes beset on every hand,"
the first governor of New England instituted the American Harvest Home.

During the Revolution, Thanksgiving Day was a national institution, being annually recommended by Congress; but after the general

thanksgiving for peace, in 1784, there was no national appointment until 1789, when Washington, by request of Congress, recommended a day of thanksgiving for the adoption of the Constitution. Washington issued a second proclamation of thanksgiving, in 1795, on account of the suppression of insurrection. President Madison, by request of Congress, recommended a thanksgiving for peace, in 1815. But the official recommendation of a day for the giving of thanks was mainly confined to New England until the year 1817. During the Civil War, in 1863 and 1864, President Lincoln issued proclamations recommending annual thanksgivings. Since then a proclamation has been issued annually, as indicated above.

Uncle Sam. This term is used in reference to America exactly in the same way as "John Bull" is applied to England. It arose at the time of the last war between England and America. At Troy, N. Y., on the Hudson, a commissariat contractor named Elbert Anderson, of New York, had a store yard. A government inspector named Samuel Wilson, who was always called "Uncle Sam," superintended the examination of the provisions, and when they were passed, each cask or package was marked "EA-US," the initials of the contractor and of the United States. The man whose duty it was to mark the casks, who was a facetious fellow, being asked what the letters meant, replied that they stood for Elbert Anderson and *Uncle Sam*. The joke soon became known, and was heartily entered into by Uncle Sam himself. It soon got into print, and long before the war was over was known throughout the United States. Mr. Wilson, the original "Uncle Sam," died at Troy, in 1854, aged eighty-four years.

Union Jack. The national flag of England was originally the banner of St. George — white with a red cross. It was called simply the "Jack." When James I. came to the throne of both kingdoms, the banner of St. Andrew, blue with a white diagonal cross, was added. The word "Jack" is supposed to be corrupted from the French *Jaque*, a jacket, and was applied to the early flags because the cross of St. George was embroidered on the jackets of the English infantry.

Valentine Day, or, more properly, St. Valentine's Day, is celebrated on the 14th of February, usually by the sending of valentines or other gifts. The old form of the valentine was a ridiculous, colored caricature of a male or female figure, with a few burlesque verses below. More recently the print is of an artistic or sentimental kind, and even extends to the form of a book. St. Valentine was a bishop of Rome during the Third Century. He was of a most amiable nature, and possessed remarkable gifts of eloquence, and was so very successful in converting the pagan Romans to Christianity that he incurred the displeasure of the emperor, and was martyred by his order, February 14, A. D. 270. When the saint came to be placed in the calendar, his name was given to the day of his death.

Weather Signals. When black triangular flag is placed above white or blue flag it indicates warmer; when placed below, colder, weather; when omitted, stationary temperature.

For example — 3, 1, 2 indicates warmer, fair weather, followed by rain or snow.

1st. A cautionary signal: A yellow flag with white center will indicate that the winds expected are not so severe but well-found and seaworthy vessels can meet them without great danger.

2d. A storm signal: A red flag with black center will indicate that the storm is to be of more marked violence.

3d. A red pennant will indicate that the winds are to be easterly — that is, from north-east to south, inclusive — and that the storm center is approaching.

4th. The white pennant will indicate westerly winds — that is, from north to southwest, inclusive — and that the storm center has passed.

5th. When red pennant is hoisted above cautionary or storm signal, winds are expected from the northeast quadrant; when below, from the southeast quadrant.

6th. When white pennant is hoisted above cautionary or storm signal, winds are expected from the northwest quadrant; when below, from the southwest quadrant.

7th. Night storm signals: A red light for easterly winds, and a red light and white light for westerly winds.

Weights and Measures.

AVOIRDUPOIS WEIGHT

Drachm,	dr.	= 27½ grains (27.34375).
Ounce,	oz.	= 16 drachms, 437.5 grains.
Pound,	lb.	= 16 oz., 256 dr., 7,000 grains.
Legal Stone,	st.	= 14 lbs.
Quarter (Eng.),	qr.	= 28 lbs.
Quarter (Can.),	qr.	= 25 lbs.
Cental or Quintal,	cent.	= 100 lbs.
Hundredwei't (Eng.), cwt.	= 4 qrs., 112 lbs.	
Hundredwei't (Can.), cwt.	= 4 qrs., 100 lbs.	
Ton (Eng.),	T.	= 20 cwt., 2,240 lbs.
Ton (Can.),	T.	= 20 cwt., 2,000 lbs.

TROY WEIGHT

Carat,	= 3.17 grains.
Pennyweight,	dwt. = 24 grains.
Ounce,	oz. = 20 dwts., 480 grains.
Pound,	lb. = 12 oz., 240 dwts., 5,760 grs.
Hundredweight,	cwt. = 100 lbs.

Troy is the weight used by goldsmiths and jewelers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries.

The oz. Troy and Apothecaries' = 1.09714 oz. avoirdupois; but the lb. Troy and lb. Apothecaries' = only 0.82286 lb. avoirdupois; while 175 lb. Troy and Apothecaries' = 144 lb. avoirdupois.

APOTHECARIES' WEIGHT

Scruple ☉ = 20 Grains,	= 20 grains.
Drachm ℥ = 3 Scruples,	= 60 grains.
Ounce ℥ = 8 Drachms,	= 480 grains.
Pound lb = 12 Ounces,	= 5,760 grains.

BRITISH LIQUID MEASURE

The Gill contains 8.665 cubic inches.
The Pint contains 4 gills or 34.660 cubic inches.
Quart = 2 pints = 8 gills.
Gallon = 4 quarts = 32 gills.

APOTHECARIES' FLUID MEASURE

60 Minims ℥ (drops), = 1 Fluid Drachm,	f 3
8 Drachms,	= 1 Ounce, f 3
16 Ounces,	= 1 Pint, O
8 Pints,	= 1 Gallon, C., or Cong.
1 Drachm = 1 Teaspoonful.	
2 Drachms = 1 Dessertspoonful.	
4 Drachms = 1 Tablespoonful.	
2 Ounces = 1 Wineglassful.	
3 Ounces = 1 Teacupful.	

CUBIC OR SOLID MEASURE

Cubic Foot = 1,728 Cubic Inches.
Cubic Yard = 27 Cubic Feet, 21,033 bushels.
Cord of Wood = 128 Cubic Feet.
Shipping Ton = 40 Cubic Feet merchandise.
Shipping Ton = 42 Cubic Feet of timber.
Ton of displacement of a Ship = 35 Cubic Feet.

LINEAR MEASURE

3 barleycorns, or,	} 1 inch (in.).
12 lines, or,	
72 points, or,	
1,000 mils (mi.),	} 1 inch (in.).
3 inches,	
4 inches,	
9 inches,	} 1 span.
12 inches,	
18 inches,	
3 feet,	} 1 yard (yd.).
2½ feet,	
5 feet,	
2 yards,	} 1 fathom.
5½ yards,	
66 feet, or,	
4 rods,	} 1 Gunter's chain.
40 poles, or,	
220 yards,	
8 furlongs, or,	} 1 furlong (fur.).
1,760 yards, or,	
5,280 feet,	
3 miles,	} 1 league.

The hand is used to measure horses' height. The military pace is the length of the ordinary step of a man. One thousand geometrical paces were reckoned to a mile.

LAND MEASURE (LINEAR)

7.92 inches,	1 link.
100 links, or,	} 1 chain (ch.).
66 feet, of,	
22 yards, or,	
4 poles,	} 1 furlong (fur.).
10 chains,	
80 chains, or,	
8 furlongs,	} 1 mile.

LAND MEASURE (SQUARE)

144 sq. inches,	1 square foot (sq. ft.).
9 square feet,	1 square yard (sq. yd.).
30¼ square yards,	1 sq. pole, rod, or perch.
16 square poles,	1 square chain (sq. ch.).
40 square poles, or,	} 1 square rood.
1,210 square yards,	
4 roods, or,	
10 square chains, or,	} 1 acre.
160 square poles, or,	
4,840 square yards, or,	
43,560 square feet,	} 1 square mile.
640 acres, or,	
3,097,600 square yards,	
30 acres,	1 yard of land.
100 acres,	1 hide of land.
40 hides,	1 barony.

GEOGRAPHICAL AND NAUTICAL MEASURE

6086.44 feet, or,	} = 1 nautical mile.
1000 fathoms, or,	
10 cables, or,	
1.1528 statute miles,	} = 1 knot.
1 nautical mile per hour,	
60 nautical miles, or,	
67.168 statute miles,	} = 1 degree.
360 degrees,	
1 league,	= 1 circumference
1 cable's length,	= 120 fathoms.

DRY MEASURE, UNITED STATES

		Cu. In.
2 pints,	1 quart (qt.)	= 67.20
4 quarts,	1 gallon (gal.)	= 268.80
2 gallons, or,	} 1 peck	= 537.60
8 quarts,		
4 pecks,	1 struck bushel	= 2150.42

LIQUID MEASURE, UNITED STATES

		Cu. In.
4 gills,	1 pint (O.)	= 28.875
2 pints,	1 quart (qt.)	= 57.75
4 quarts,	1 gallon (gal.)	= 231.
63 gallons,	1 hogshead (hhd.).	
2 hogsheads,	1 pipe or butt.	
2 pipes,	1 tun.	

HOUSEHOLD MEASURES

120 drops water,	= 1 teaspoon..
60 drops thick fluid,	= 1 teaspoon.
2 teaspoons,	= 1 dessertspoon.
3 teaspoons,	= 1 tablespoon.
16 tablespoons,	= 1 cup.
1 cup,	= $\frac{1}{2}$ pt.
1 cup water,	= $\frac{1}{2}$ lb.
4 tablespoons flour,	= 1 oz.
2 tablespoons butter,	= 1 oz.
3 teaspoons soda,	= $\frac{1}{2}$ oz.
4 teaspoons baking powder,	= $\frac{1}{2}$ oz.
2 cups granulated sugar,	= 1 lb.
2 $\frac{1}{2}$ cups confectioners' sugar,	= 1 lb.
2 $\frac{1}{2}$ cups wheat flour,	= 1 lb.
3 $\frac{1}{2}$ cups whole wheat flour,	= 1 lb.
2 $\frac{1}{2}$ cups buckwheat flour,	= 1 lb.
5 $\frac{1}{2}$ cups coffee,	= 1 lb.
6 $\frac{1}{2}$ cups tea,	= 1 lb.
2 cups rice,	= 1 lb.
2 cups lard,	= 1 lb.
2 cups butter,	= 1 lb.
2 cups graham flour,	= 1 lb.
2 cups rye flour,	= 1 lb.
2 cups corn meal,	= 1 lb.
2 cups rolled oats,	= 1 lb.
2 cups powdered sugar,	= 1 lb.
2 cups brown sugar,	= 1 lb.
2 cups raisins,	= 1 lb.
2 cups currants,	= 1 lb.
2 cups bread crumbs,	= 1 lb.
9 eggs,	= 1 lb.

TIME

The unit of time measurement is the same among all nations. Practically it is $\frac{1}{86400}$ of the mean solar day, but really it is a perfectly arbitrary unit, as the length of the mean solar day is not constant for any two periods of time. There is no constant natural unit of time.

1 minute	= 60 seconds.
1 hour	= 60 minutes, 3,600 seconds.
1 day	= 24 hours, 1,440 minutes, 86,400 seconds.
1 sidereal day	= 86,164.1 seconds.
1 sidereal month	= 27.321661 mean solar days (average).
1 lunar month	= 29.530589 mean solar days (average).

1 anomalistic month	= 27.544600 mean solar days (average).
1 tropical month	= 27.321582 mean solar days (average).
1 nodical month	= 27.212222 mean solar days (average).
Mean solar year	= 365 d. 5 h. 48 m. 46.045 s. with annual variation of 0.00539.

The change in the length of the mean sidereal day, i. e., of the time of the earth's rotation upon its axis, amounts to 0.01252 s. in 2,400 mean solar years.

ANGULAR MEASURE

There is perfect unanimity as to the standard angle (i. e., the right angle) and practical unanimity as to its subdivision, for the subdivision into grades, etc., once favored by the French, is now abandoned.

1 minute of angle or arc	= 60 seconds.
1 degree " " "	= 60 minutes.
90 degrees " " "	= 1 right angle or $\frac{1}{4}$ of circumference.
Radian " " " "	= arc same length as radius.
" " " "	= 57.295779513082°.
Length of arc of 1°	= 0.017453292520.
" " " " 1'	= 0.015707963268.
" " " " 1"	= 0.000290888209.

METRIC SYSTEM

The French Metrical System is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo*, and *myria*, from the Greek, and the subdivisions by *deci*, *centi*, and *milli*, from the Latin:

SQUARE, OR MEASURES OF SURFACE (UNIT ARE)

EQUAL TO	Sq. Feet	Yards	Perches	Roods	Acres
Centiare, or square meter, .	10.764299 . .	1.196 . .	0.039 . .	0.000 . .	0.000

AND ENGLISH MEASURES

1 yard,	$\frac{11}{12}$ meter.
11 meters,	12 yards.
To convert meters into yards,	Add $\frac{1}{11}$ th.
1 meter = 1.1 yd.; 3.3 ft.,	{ 3 ft. $3\frac{3}{8}$ inches ($\frac{1}{512}$ th less).
	{ 40 inches (1.6 per cent. less).
1 meter, by the Standards Commission,	= 39.38203 inches.
1 meter, by the Act of 1878,	= 39.37079 inches.
1 foot,	3 decimeters (more exactly 3.048).
1 inch,	25 millimeters (more exactly 25.4).
1 mile,	1.6 or $1\frac{3}{5}$ kilometers (more exactly 1.60931).
1 kilometer,	$\frac{5}{8}$ of a mile.
1 chain (22 yards),	20 meters (more exactly 20.1165).
5 furlongs (1,100 yards),	1 kilometer (more exactly 1.0058).
1 square yard,	$\frac{6}{7}$ square meter (more exactly .8361).
1 square meter,	{ $10\frac{3}{4}$ square feet.
	{ $1\frac{1}{5}$ square yards.
1 square inch,	$6\frac{1}{2}$ square centimeters (more exactly 6.45).
1 square mile (640 acres),	260 hectares (0.4 per cent. less).
1 acre (4840 square yards),	4,000 square meters (1.2 per cent. more).
1 cubic yard,	$\frac{3}{4}$ cubic meter (2 per cent. more).
1 cubic meter,	$1\frac{1}{3}$ cubic yards ($1\frac{2}{3}$ per cent. less).
1 cubic meter,	$35\frac{1}{3}$ cubic feet (.05 per cent. less).
1 cubic meter of water,	1 long ton nearly.
1 kilogram,	2.2 pounds fully.
1,000 kilograms,	{ 1 long ton nearly.
1 metric ton,	{
1 long hundredweight,	51 kilograms nearly.
1 United States hundredweight,	$45\frac{1}{2}$ kilograms nearly.

ELECTRICAL UNITS

NAME	SYMBOL	UNIT OF	HOW OBTAINED	CGS*	EQUIVALENT
Ohm	R	Resistance	The electrical resistance of a column of mercury 106 centimeters long and of 1 square millimeter section.	10^9	1 true ohm = 1.0112 British Association ohms.
Ampère	C	Current	Is that current of electricity that decomposes .00009324 gram of water per second.	10^1	Deposits 1.118 milligrams of silver per second.
Volt	E	Electromotive force	One ampere of current passing through a substance having 1 ohm of resistance = 1 volt.	10^8	.926 of a standard Daniel Cell.
Coulomb	Q	Quantity	A current of 1 ampere during 1 second of time.	10^1	Deposits 1.118 milligrams of silver.
Farad	K	Capacity	The capacity that a current of 1 ampere for 1 second (= 1 coulomb) charges it to potential of 1 volt.	10^9	2.5 knots of D. U. S. cable.
Microfarad	K	Power	1 millionth of farad.	10^{15}	.0013405 or ($\frac{1}{746}$) of a horse power.
Watt	Pw.		Power of 1 ampere current passing through resistance of 1 ohm.	10^7	
Joule	W. j.	Work	Is the work done by 1 watt of electrical power in 1 second.	10^7	.238 unit of heat (Therm).

* C. G. S. = Electro-magnetic units. Consult technical works in electricity.

WEIGHTS AND MEASURES OF THE BIBLE

WEIGHTS							
Avoirdupois.				Troy.			
	Lbs.	Oz.	Drs.	Lbs.	Oz.	Dwt.	Gr.
A gerah,	0	0	0.439 =	0	0	0	12
10 gerahs = 1 bekah,	0	0	4.39 =	0	0	5	0
2 bekahs = 1 shekel,	0	0	8.78 =	0	0	10	0
60 shekels = 1 maneh,	2	0	14.628 =	2	6	0	0
50 manehs = 1 talent,	102	13	11.428 =	125	0	0	0
MEASURES							
LONG MEASURE.				Ft.	In.		
A digit, or finger (Jer. lii. 21),				0	0.912		
4 digits = 1 palm (Exod. xxv, 25),				0	3.648		
3 palms = 1 span (Exod. xxviii, 16),				0	10.944		
2 spans = 1 cubit (Gen. vi, 15),				1	9.888		
4 cubits = 1 fathom (Acts xxvii, 28),				7	3.552		
1.5 fathoms = 1 reed (Ezek. xl, 3, 5),				10	11.328		
13.3 reeds = 1 line (Ezek. xl, 3),				145	11.04		
LAND MEASURE.				Eng. Miles.	Paces.	Ft.	
A cubit,				0	0	1.824	
400 cubits = 1 furlong (Luke xxiv, 13),				0	145	4.6	
5 furlongs = 1 sabbath day's journey (John xi, 18; Acts i, 12),				0	727	3.0	
10 furlongs = 1 mile (Matt. v, 41),				1	399	1.0	
24 miles = 1 day's journey,				33	76	4.0	
LIQUID MEASURE.					Gals.	Pts.	
A caph,					0	0.625	
1.3 caphs = 1 log (Lev. xiv, 10),					0	0.833	
4 logs = 1 cab,					0	3.333	
3 cabs = 1 hin (Exod. xxx, 24),					1	2	
2 hins = 1 seah,					2	4	
3 seahs = 1 bath, or ephah (1 Kings vii, 26; John ii, 6),					7	4.5	
10 ephahs = 1 kor, or homer (Isa. v, 10; Ezek. xiv, 14),					75	5.25	
DRY MEASURE.				Pecks.	Gals.	Pts.	
A gachal,				0	0	0.1416	
20 gachals = 1 cab (2 Kings vi, 25; Rev. vi, 6),				0	0	2.8333	
1.8 cabs = 1 omer (Exod. xvi, 36),				0	0	5.1	
3.3 omers = 1 seah (Matt. xiii, 33),				1	0	1	
3 seahs = 1 ephah (Ezek. xlv, 11),				3	0	3	
5 ephahs = 1 letech (Hosea iii, 2),				16	0	0	
2 letechs = 1 kor, or homer (Num. xi, 32; Hos. iii, 2),				32	0	0	

N. B.— The foregoing table will explain many texts in the Bible. Take, for instance, Isa. v, 10. "Yea, ten acres of vineyard shall yield one bath, and the seed of an homer shall yield an ephah." This curse upon the covetous man was, that 10 acres of vines should produce only 7 gallons of wine, i. e., one acre should yield less than 3 quarts; and that 32 pecks of seed should only bring a crop of 3 pecks, or, in other words, that the harvest reaped should produce but one-tenth of the seed sown.

TIME

The *Natural* Day was from sun-rise to sun-set.
The *Natural* Night was from sun-set to sun-rise.
The *Civil* Day was from sun-set one evening to sun-set the next; for, "the Evening and the Morning were the first day."

NIGHT (<i>Ancient</i>).		DAY (<i>Ancient</i>).	
First Watch (Lam. ii, 19), till midnight.		Morning till about 10 A. M.	
Middle Watch (Judg. vii, 19), till 3 A. M.		Heat of day till about 2 P. M.	
Morning Watch (Exod. xiv, 24), till 6 A. M..		Cool of day till about 6 P. M.	
NIGHT (<i>New Testament</i>).		DAY (<i>New Testament</i>).	
First Watch, <i>evening</i> = 6 to 9 P. M.		Third hour = 6 to 9 A. M.	
Second Watch, <i>midnight</i> = 9 to 12 P. M.		Sixth hour = 9 to 12 midday.	
Third Watch, <i>cock-crow</i> = 12 to 3 A. M.		Ninth hour = 12 to 3 P. M.	
Fourth Watch, <i>morning</i> = 3 to 6 A. M.		Twelfth hour = 3 to 6 P. M.	

JEWISH MONEY

With its value in English and American money; the American dollar being taken as equal to 4s. 2d.

Jewish.	English.			American.	
	£	s.	d.	Dols.	Cents.
A gerah (Exod. xxx, 13),	=	0	0	1.36	= 0 2.73
10 gerahs = 1 bekah (Exod. xxxviii, 26),	=	0	1	1.68	= 0 27.37
2 bekahs = 1 shekel (Exod. xxx, 13; Isa. vii, 23),	=	0	2	3.37	= 0 54.74
50 shekels = 1 maneh,	=	5	14	0.75	= 27 37.50
60 manehs = 1 kikkar (talent),	=	342	3	9	= 1,642 50
A gold shekel,	=	1	16	6	= 8 76
A kikkar of gold,	=	5,475	0	0	= 26,280 0

N. B.— A *shekel* would probably purchase nearly ten times as much as the same nominal amount will now. Remember that one *Roman* penny ($8\frac{1}{2}d.$) was a good day's wages for a laborer.

The Hebrew *maneh*, according to 1 Kings x, 17, compared with 2 Chron. ix, 16, contained 100 shekels; though according to one interpretation of Ezek. xiv, 12, it contained 60, but more probably 50. The passage reads thus: "Twenty shekels, five and twenty shekels, fifteen shekels shall be your maneh." This is variously interpreted: (1) $20 + 25 + 15 = 60$. (2) 20, 25, 15 are different coins in gold, silver, and copper, bearing the same name. It is well to remark the meaning of these names: Shekel = simply, *weight*: Bekah = *split*, i. e., the shekel divided into two: Gerah = a *grain*, as in our weights, a grain and a *barley-corn*, the original standard weight: Maneh = *appointed*, equivalent to *sterling*, a specific sum: Kikkar = a *round* mass of metal, i. e., a weight or coin. Hebrew names of weights and coins are not found in the New Testament: *mna* in Luke xix, 13, is Greek, though possibly identical with the Hebrew *maneh*.

ROMAN MONEY

Roman.	English.		American.
	d.		Cents.
A "farthing," <i>quadrans</i> (Matt. v, 26) = nearly,	0.125	=	0.25
A "farthing," as in 4 <i>quadrantes</i> (Matt. x, 29) = nearly,	0.5	=	1
A "penny," <i>denarius</i> = 16 <i>asses</i> (Matt. xxii, 19) = nearly,	8.50	=	17

[The Roman sesterlius = $2\frac{1}{2}$ asses, is not named in the Bible.]

N. B.— Here we learn that:—

Naaman's offering to Elisha of 6,000 pieces (shekels) of gold amounted to more than £10,000 = 48,000 *dollars*.

The Debtor (Matt. xviii, 24), who had been forgiven 10,000 talents, i. e., £3,000,000 = 14,400,000 *dollars*, refused to forgive his fellow-servant 100 pence, i. e., £3 10s. 10d = 17 *dollars*.

Judas sold our Lord for 30 pieces of silver, i. e., £3 10s. 8d. = 16 *dollars*, 96 *cents*, the legal value of a slave, if he were killed by a beast.

Joseph was sold by his brethren for 20 pieces, i. e., £2 7s. = 11 *dollars*, 28 *cents*.

TEMPERATURES OF SOME CHEMICAL SUBSTANCES

Degree of Fahr.		Degree of Fahr.	
1,750,	Brass (containing 25% of zinc) melts (Daniell).	185,	Nitric acid 1.52 begins to boil.
1,000,	Iron, bright cherry red (Poillet).	180 (about),	Starch forms a gelatinous compound with water.
980,	Red heat, visible in daylight (Daniell).	176,	Rectified spirit boils, benzol distils.
640,	Sulphuric acid boils (Magrignac), 620 (Graham).	173,	Alcohol (sp. gr. .796 to .800) boils.
630,	Whale oil boils (Graham).	151,	Beeswax melts (Kane), 142 (Lepage).
600,	Linseed oil boils.	150,	Pyroxylic spirit boils (Scanlan).
380,	Arsenious acid volatilizes.	145,	White of egg begins to coagulate.
356,	Metallic arsenic sublimes.	141.8,	Chloroform, and ammonia of .945, boil.
315,	Oil of turpentine boils (Kaure).	132,	Acetone (pyroacetic spirit) boils (Kane).
302,	Etherification ends.	122,	Mutton suet and styracin melt.
257,	Saturated sol. of sal ammoniac boils (Taylor).	116,	Bisulphuret of carbon boils (Graham).
256,	Saturated sol. of acetate of soda boils.	115,	Pure tallow melts (Lepage), 92 (Thomson).
238,	Saturated sol. of nitre boils.	112,	Spermaceti and stearin of lard melt.
221,	Saturated sol. of salt boils (Paris Codex).	95,	Ether (.720) boils.
220,	Saturated sol. of alum, carb. soda, and sulph. zinc, boil.	95,	Carbolic acid crystals become an oily liquid.
218,	Saturated sol. of chlorate and prussiate potash, boil.	88,	Acetous fermentation ceases, water boils <i>in vacuo</i> .
216,	Saturated sol. of sulph. iron, sulph. copper, nitrate of lead, boil.	77,	Vinous fermentation ends, acetous fermentation begins.
214,	Saturated sol. of acetate lead, sulph. and bitartrate potash, boil.	64.4,	Oil of anise liquefies.
213 or (213.5),	Water begins to boil in glass.	59,	Gay Lussac's <i>Alcoomètre</i> graduated at.
212,	Water boils in metal, barometer at 30°.	55,	Sirups to be kept at.
211,	Alloy of 5 bismuth, 3 tin, 2 lead, melts.	30 (about),	Olive oil becomes partially solid.
201,	Alloy of 8 bismuth, 5 lead, 3 tin, melts (Kane).	32,	Water freezes.
		5,	Cold produced by snow 2 parts and salt 1 part.
		-37.9,	Mercury freezes.

WORLD TRAVEL DISTANCES

The chief ports of the world are named in alphabetical order across the top and down the sides of the tables. The distance between any two ports will be found at the intersection of the two columns which contain the names of the selected ports. Thus the distance from Baltimore to Bombay is given as 8,431, and the small "S" shows that the route is via Suez Canal. Distances are for full-powered steam vessels reckoned in nautical miles.

	Amsterdam	Antwerp	Barbados	Belfast	Bombay	Boston	Bremen	Buenos Aires	Cape Town	Cherbourg	Genoa	Glasgow	Hamburg	Havana	Havre	Hongkong	Liverpool	London	Melbourne	New Orleans	New York	Plymouth	Rio de Janeiro	San Francisco	Shanghai	Singapore	Southampton	Valparaiso	Yokohama

K, via Kiel Canal. S, via Suez Canal. C, via Cape of Good Hope. M, via Strait of Magellan. H, via Cape Horn. T, via Torres Strait.

WORLD TRAVEL DISTANCES — (Continued)

The chief ports of the world are named in alphabetical order across the top and down the sides of the tables. The distance between any two ports is found at intersection of the two columns which contain the names of the selected ports. Thus the distance from New York to Melbourne is given as 11,586, and the small "C" shows that the route is via Cape of Good Hope. Distances are for full-powered steam vessels reckoned in nautical miles.

SPECIAL NOTE

In addition to the general index on the following pages — which in itself will usually be found sufficient — a large number of alphabetical lists are to be found in the body of the book, and they should be carefully consulted in connection with the general index, if necessary. For example, American Battles, page 11; Treaties, Coalitions, Conventions, and Leagues, page 163; Right Use of Some Common Words, page 191; Abbreviations, Contractions, and Degrees, page 202; Words and Phrases from the Classic and Modern Languages, page 255; Modern Languages, page 263; Words Often Mispronounced, page 267; Pen Names of Noted Writers, page 321; Mythology, page 323; Names in Fiction, Literary Plots, and Allusions, page 343; Famous Poems, Author and First Line, page 387; Biography, page 393; Canals, page 653; College Fraternities, page 697; Colleges and Universities, page 698; Notable Bridges, page 779; Cities, Popular Names of, page 782; Names and Name Origins, page 797.
